OUR STORY, OUR HISTORY

Sometimes a product can remain virtually unchanged for hundreds of years, until a flash of inspiration leads to a revolutionary innovation that changes an industry forever.

This is the story of one such moment.

Drew McGill and Stan Wright owned the Wright & McGill Co. in Denver, Colorado. Their company was known for tying high-grade fishing flies, a passion of Drew's. On this fateful day in the 1920's, Drew took a break while fly fishing the Colorado River.

While the rainbows and native trout were rising, they were proving exceedingly difficult to hook. Lighting his pipe and reflecting on ways he could improve his technique, Drew's attention was drawn to one large eagle circling lazily overhead. As the bird landed atop a nearby dead cottonwood, Drew noticed how the tips of the bird's talons lightly gripped the weathered, stripped limb.

Suddenly Drew had an idea: what if his hooks were shaped like an eagle's talon?
Using a pair of fishing pliers, he slightly curved the point of his hook, giving it the angle needed to penetrate the leather of his fishing creel. He spent the rest of the day testing different shapes and sizes until an afternoon thunderstorm drove him from the river.

Drew returned to his fly factory in Denver and immediately started refining his design. He envisioned a hook that would exert greater penetrating power in the direct line of pull of the leader. It wasn't long before he created his masterpiece, a hook that would change the way people fished forever, with sweeping curves and sharper points, forged for strength and greater hooking power.
What else could Drew and Stan call it but Eagle Claw?

Today, the Eagle Claw family of brands is the most recognized in all of fishing. We still make our world-famous hooks in Denver, and are proud to be the only brand made in the United States.
