

TOMMY
DOCKS

WHO WE ARE

Since 1987, the dock industry has never been the same with the trusted and proven American brand of Tommy Docks. In that year, Thomas Suthers designed and patented a dock bracket system. He knew there had to be a solution to the methods of old, an easier system. Tommy Docks was born, and today the tradition lives on with a locally owned company still based in Central Wisconsin. Over the years Tommy Docks has expanded to all 50 states and two countries, but we're still the same Wisconsin based company at our core. We take pride in our products and strive to provide the best possible service to each and every customer, all while keeping our company and products in the USA.

Tommy Docks are designed to be the highest quality, most user-friendly do-it-yourself dock system on the planet. Our patented hardware design will deliver strength and superior stability to your dock. Our system is completely modular for creating a multitude of different dock layout configurations.

Whether you're looking for a standard dock design or a way to create an elaborate custom setup of your own invention, the Tommy Docks system makes doing it yourself easy.

We offer a variety of dock selections:

CLASSIC • CLASSIC PLUS • PREMIUM • FLOATING • ROLL-IN • BOX KITS

We also offer an outstanding variety of:

HARDWARE • FLOATING PARTS • DOCK AND WATER ACCESSORIES

"I purchased lots of hardware and installed the dock. I found the hardware to be excellent, easy to install and the directions were easy to read. My experience with you has been A+++. Thanks for everything."

Roger – Island Pond, VT

All our neighbors on the lake admire the dock and can't get over how easy our dock goes in and out."

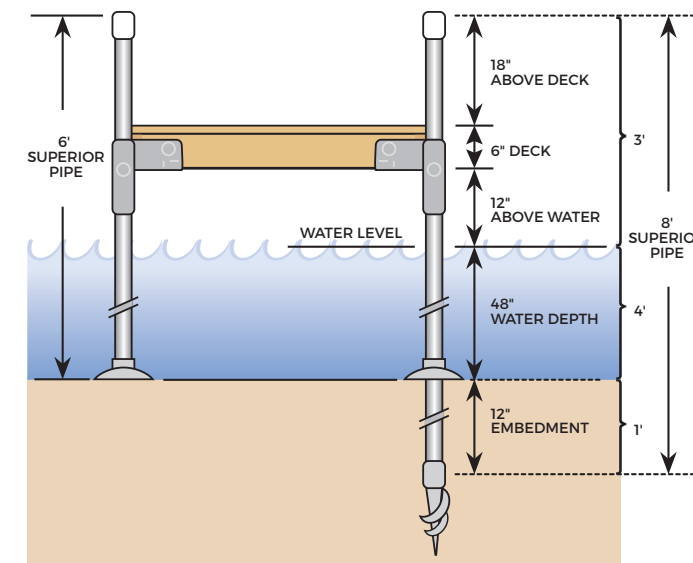

Bruce – Springfield, NY

The simplicity of your system is extremely helpful to us as we have limited resources for the installation of our pier."

Steven – Mosinee, WI

DOCK HARDWARE

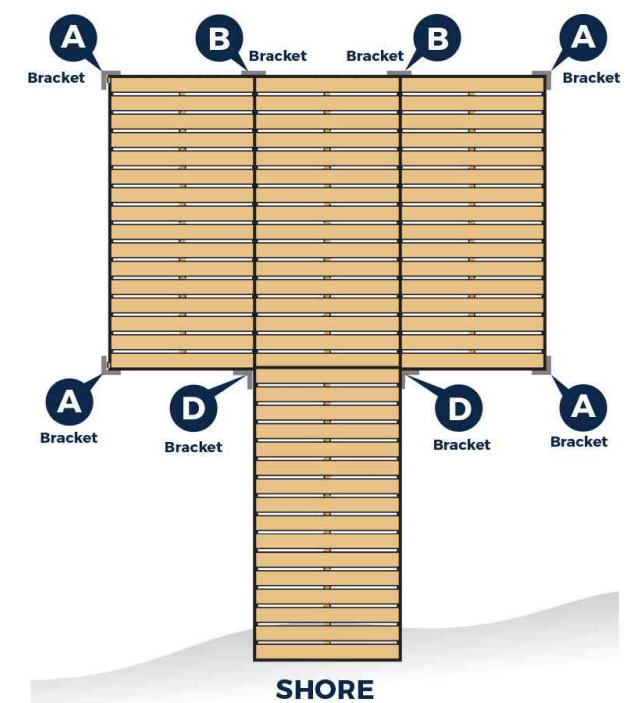

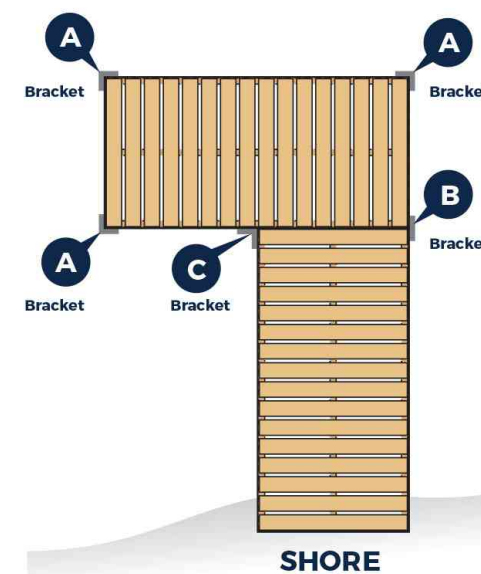

TYPICAL TOMMY DOCKS SETUP

BENEFITS:

- Easy to set up
- Easy to take down
- Quick interlocking "L Pin" system
- Choice of normal duty or heavy duty systems
- Patented stable load-cradling bracket design
- Less hardware required through superior design
- Exceptionally corrosion-resistant hardware
- Secure safety cap pipe covers
- Rustproof stainless steel adjusting bolt/nut assemblies
- No-settle, easy to remove dome-shape footpads and muck footpads
- Lighter, stronger, corrosion-resistant pipes
- Complete selection of accessories available
- Construct ATV bridges, lakeside patio decks and nature walkways over wetland areas with our heavy duty hardware

STATE OF THE ART BRACKETS

Tommy Docks brackets are reliable and flexible - use them to assemble a custom dock configuration. From a simple straight layout to something more elaborate, the possibilities are endless!

STATE OF THE ART BRACKETS

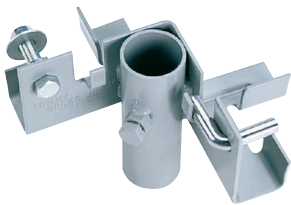

- Offered in both regular and heavy duty
- Brackets manufactured using a high-grade powder coating that prevents weather damage.

USE WITH

REGULAR VS. HEAVY DUTY

Your hardware should be chosen to accommodate the water conditions.

A-50001
"B" Straight Bracket
(Regular Duty)

TD-10003
"B" Straight Bracket
(Heavy Duty)

USE REGULAR DUTY HARDWARE	USE HEAVY DUTY HARDWARE
Light currents or wave action	Strong currents or wave action
Docking regular sized or small watercraft	Docking larger watercraft
Light boat activity	Heavy boat activity
Water depth under 7 feet	Water depth over 7 feet
Standard dock setup with no platforms	Large platform sections at the end of a dock

TOMMY DOCKS SUPERIOR PIPES

The supporting leg structure for our docks is manufactured specifically for Tommy Docks. 40% lighter, 45% stronger and has 50% more corrosion resistance than ordinary galvanized pipe. We use hi-tensile strength galvanized steel for superior dock rigidity and finish with a clear acrylic coating for exceptional corrosion resistance.

Use REGULAR DUTY pipes with NORMAL DUTY brackets.
Use HEAVY DUTY pipes with HEAVY DUTY brackets.

REGULAR DUTY Outer Diameter	HEAVY DUTY Outer Diameter
1.66"	1.90"

CLASSIC

CEDAR DOCK SECTIONS WITH CEDAR DECKING

TD-10201 – 4' x 8' Cedar frame with cedar decking, assembled

TD-10200 – 4' x 10' Cedar frame , assembled

- Made from premium quality kiln dried cedar
- 2" x 6" frame with (2) intermediate support braces for added strength
- 5/4" x 6" radius edge

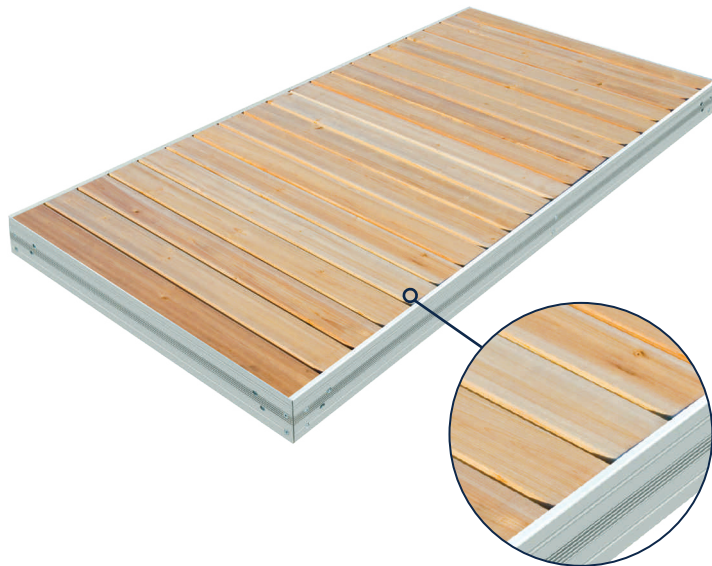

CLASSIC PLUS

ALUMINUM DOCK SECTIONS WITH REMOVABLE CEDAR DECKING

TD-30088 – 4' x 8' Aluminum frame with removable cedar decking, assembled

TD-30089 – 4' x 10' Aluminum frame with removable cedar decking, assembled

- Comfortable and attractive aluminum frame with premium quality radius edge cedar decking
- Cedar panels are removable for ultra lightweight installation and removal
- Sturdy aluminum alloy frame with (3) 3" wide I (eye) beam center support

PREMIUM

ALUMINUM DOCK SECTIONS WITH ALUMINUM DECKING

TD-30136 – 4' x 8' Aluminum frame with aluminum decking, assembled

TD-30131 – 4' x 10' Aluminum frame with aluminum decking, assembled

- Non-slip Teflon/polyester powder coating finish
- Decking retains its crisp and clean appearance for the life of the dock
- Stays cool to the touch even in full sun
- Sturdy aluminum alloy frame with (3) 3" wide I (eye) beam center support

ALUMINUM DOCK SECTIONS WITH REMOVABLE PVC DECKING

TD-500018 – 4'X 8' Aluminum frame with composite decking, in brown, assembled

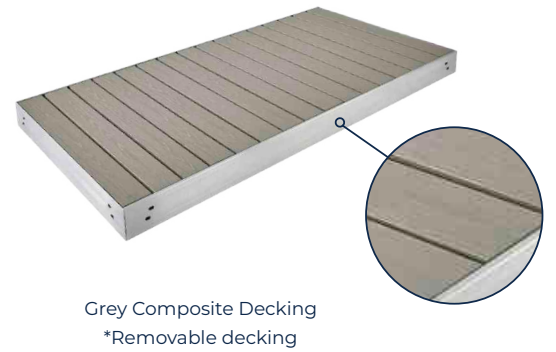

TD-50020 – 4'X 10' Aluminum frame with composite decking, in brown, assembled

TD-50008 – 4'X 8' Aluminum frame with composite decking, in grey, assembled

TD-50010 – 4'X 10' Aluminum frame with composite decking, in grey, assembled

- Engineered Composite decking is a structural deck board without any foam or wood fillers and will not absorb moisture
- Comfortable slip-resistant surface stays cool to the touch and has no exposed fasteners
- Beautiful wood grain finish requires no maintenance
- Sturdy aluminum alloy frame with (3) 3" wide I (eye) beam center supports

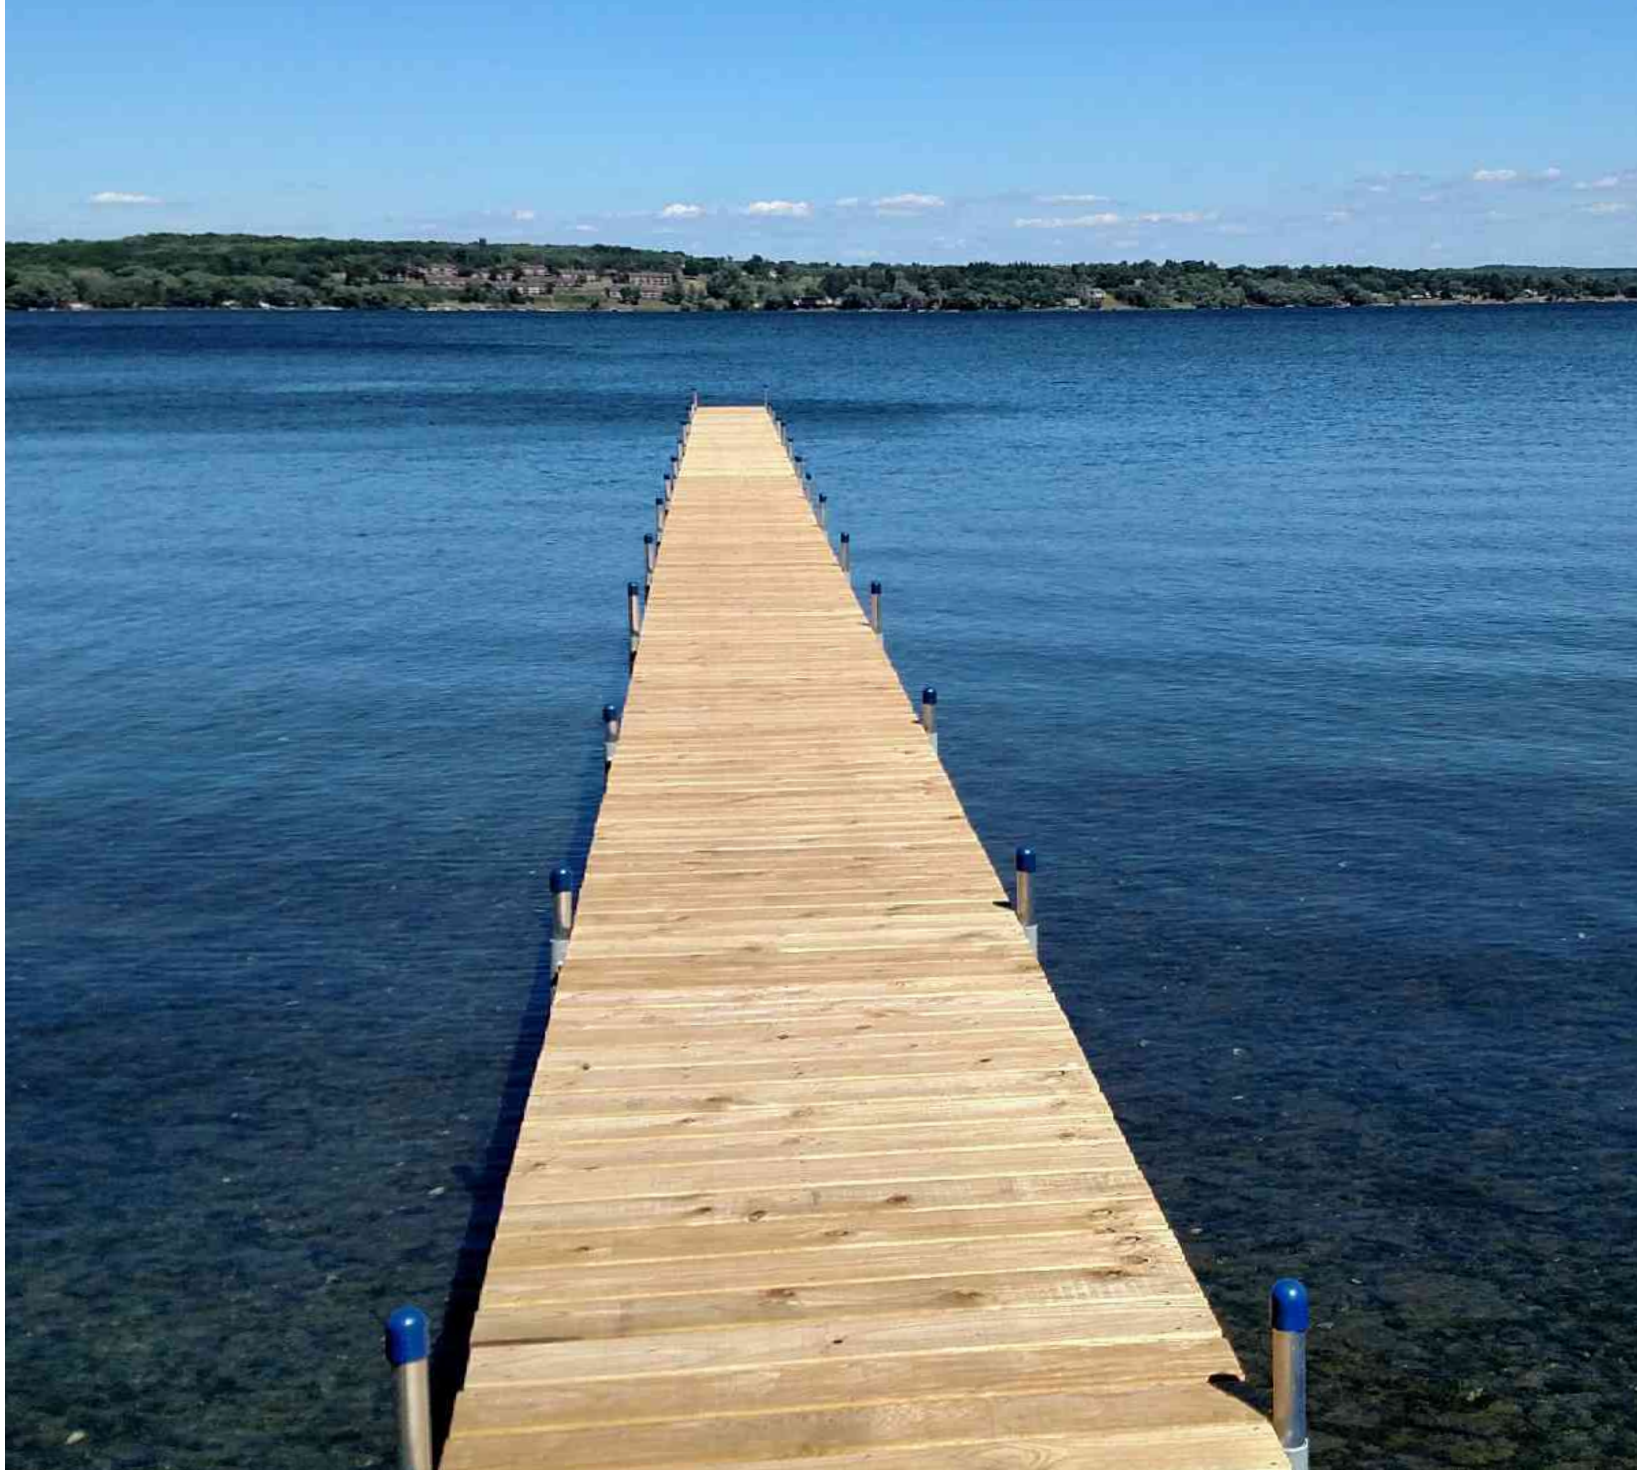

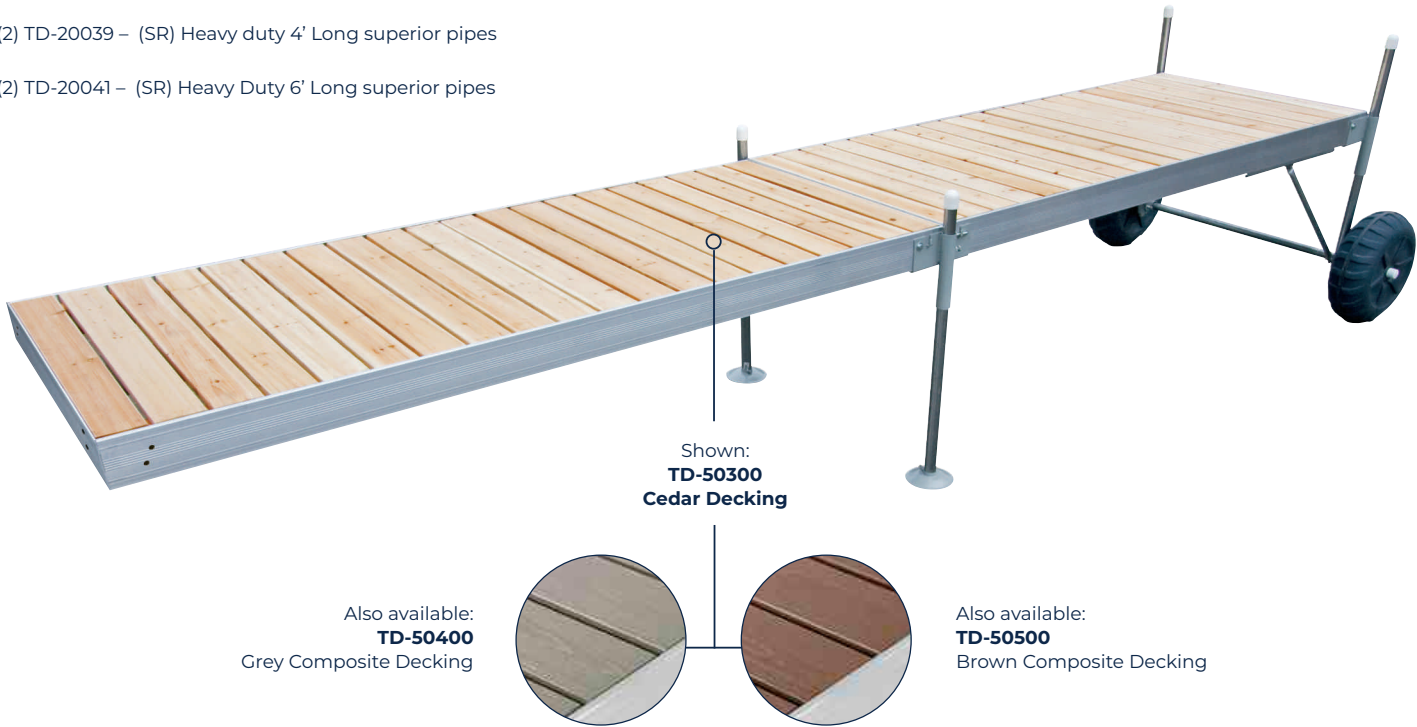

***Composite and Aluminum options now available with removable deck panels for easier installation and removal**

ROLL-IN DOCK KITS

TD-50300: 4' x 20' Complete Dock Kit - Aluminum Frame with Cedar Decking Set complete with:

- (2) TD-40010 – 4' X 10' Aluminum frames
 - (4) TD-310CED – 4' X 5' Removable cedar deck sections
 - (2) TD-10001 – (SR) Heavy duty outside corner brackets
 - (2) TD-10003 – (SR) Heavy duty straight brackets
 - (1) TD-30145 – Roll-in dock kit

BF-12
Bumper Float

TECHSTAR BUMPER FLOATS

Bumperfloats are a unique combination of dock bumper and flotation. Designed to run the length of your dock on both sides, these floats will comfortably float a docks at varying sizes with maximum stability.

- Dock Bumpers are built in as part of the float
- Foam filled with closed cell EPS (Expanded Polystyrene) for added security
- Your wood frame, hardware and decking stay out of the water
- Construction is simple - Build a frame with corner brackets and attach floats through molded bolt holes [there are (5) holes per float]
- Your new dock will sit low to the water for maximum stability

TECHSTAR ALL PURPOSE DOCK FLOATS

Techstar All Purpose Dock Floats offer the maximum in design flexibility and economy. Each float has (6) molded holes enabling you to lag your floats to your frame up from the bottom. You can use any size framing lumber 2x6 or larger. (3) different heights allow you to choose your freeboard.

- Both lumber and hardware stay out of the water
- Less wood required for construction
- Less labor to build your dock
- Polyethylene is environmentally friendly
- Polyethylene is gasoline resistant
- Polyethylene is resistant to aquatic wildlife
