# The FastCap® Difference

FastCap was founded in 1997 by Paul Akers, 20-year veteran in the cabinet-making/woodworking industry. One day, while Paul was building some cabinets, he got an idea for a self-adhesive screw cap cover and the Fastcap was born.

Today FastCap is a product development company that specializes in making innovative time-saving products for the woodworking professional. FastCap has over 2,800 distributors in 40 countries worldwide and launches 10 to 20 new products per year.

At its core, FastCap is a Lean company. We are determined to continuously improve everything, everyday. Our products reflect the idea that things can be improved and the best ideas come from the shop floor. Did you know that most of our ideas come from people just like you? If you have an idea or a better way of doing something, email Paul directly at [paul@fastcap.com](mailto:paul@fastcap.com)! To learn more visit us at [www.fastcap.com](http://www.fastcap.com) and click on the idea tab.

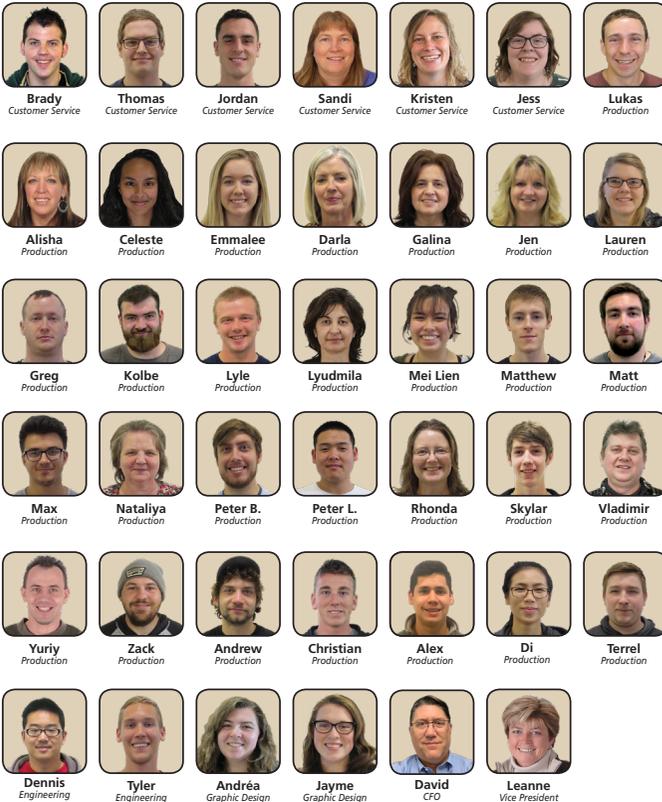

At the end of the day, FastCap's products are about efficiency, increasing productivity and making work fun. We are determined to satisfy you 100%. If we fall short we want to hear about it; that is how we improve and there is no end to improvement.

Thanks

Paul Akers,  
President

# 3 Way Clamp™

Edge trim isn't always easy to install and taping trim doesn't always provide the pressure needed for bonding edging. FastCap's solution is the 3 Way Clamp. We've combined the usual spring clamp with an additional spring that applies a third direction of pressure. With approximately 30lbs of clamping pressure, the 3 Way Clamp can provide a better bond than tape alone.

**Features...**

- Non-marring rubber tips
- Spring clamp and edge clamp in one
- Simple to use and remove
- Approx. 30lbs of edge pressure

**Great For...**

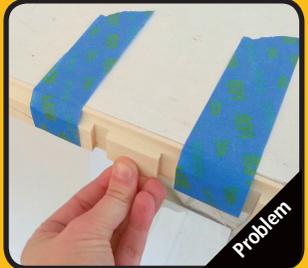

- All types of edge banding
- General clamping purposes
- Straight lines with no hassle

The pneumatic Quad Trimmer with Carbon Steel or Tungsten Carbide Blades makes trimming edgebanding quick and easy! With a comfortable and ergonomic design, it trims both sides of the edgebanding in just one pass. The Tri Trimmer allows you to get tight into the corners when trimming veneers and edgebanding.

## Features...

- No springs, all pneumatic
- Cuts forwards and backwards
- Cuts both sides at once
- Cuts 1/2" to 1-1/4"

## Great for...

- Edgebanding
- Wood veneer (watch the video)
- Materials up to .018"

# Sealant Saver

Depending on the type of caulk, water or paint thinner will create an air-starved seal that will prevent caulk from drying out

The Sealant Saver was developed by a cabinet maker to prevent caulking tubes from drying out. Simply fill the tube with water and place open caulking tube down into the Sealant Saver tube. The Sealant Saver creates an air-starved seal that prevents caulk or silicones from drying out. It easily mounts with screws to any surface.

# BeauClip™

## Panel Mounting System

The BeauClip is an easy fastener system for panels. The system is a secure, reusable, durable and effective way to prevent panels from slipping, falling and constantly being repaired. Stop struggling with inaccurate measurements, hook and look, and complicated specialty tools. This product is also good for RVs, architectural woodwork, applied wall panels, seat cushions, and much more!

### Features...

- Holds up to 15lbs. per clip
- Securely locks in place
- Simple to install

### Great for...

- Paneling on boats
- Access panels
- Signs and more!

Applying Lean to relationships

Can't get enough of Paul?

# Get hooked on Lean!

Read about Paul's Lean journeys and how he applied these principles to his business, health, travel, and relationships.

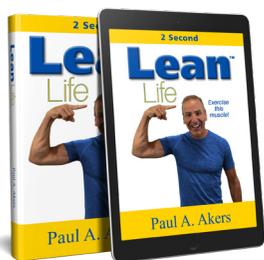

Think all the talk about Lean is a bit boring and all about charts and graphs? Read this lean book and be inspired by how easy and fun it can be. No flow charts or graphs, just the real life journey of one company and the astounding results Lean thinking can produce. Take a few hours, read 2 Second Lean and charge your life!

If I were to summarize my entire book in one word it would be "Ferrari." The secret to excellent health-the answer- is to treat your body like you would treat a Ferrari. A Ferrari is the archetype of a sports car, one of the most precise and high-performance machines ever made. It is exotic fast agile and beautiful. If you take the same care of your body as you would a Ferrari- using only the best fuel and regularly taking it to the best mechanic for maintenance-your body will give you ten times what you put into it, for the duration of your life. So ask yourself, "Do I treat my body like a Ferrari or a Pinto?"

As you start this book, I want you to understand the two main parts of my Lean Travel philosophy. First, what you give in the travel experience will have a profound impact on how much you enjoy it. Second, the less you bring and the lighter you travel, the more you will be able to feel and adapt to the fantastic trade winds of the travel experience. So travel with a full heart and light suitcase.

I promise this will not be an intellectual exercise. No psychobabble. I don't understand it and it never helps me anyway. Rather, this is the perspective of an average guy who happens to be in love with Lean and fixing what bugs him. So if simple and practical is your preference, you're in luck! It is for me as well. If you have a modicum of curiosity and you want to see how I do life better, then Lean Life is the right book for you
