ACTIVE AQUA PREMIUM HIGH RISE FLOOD TABLES

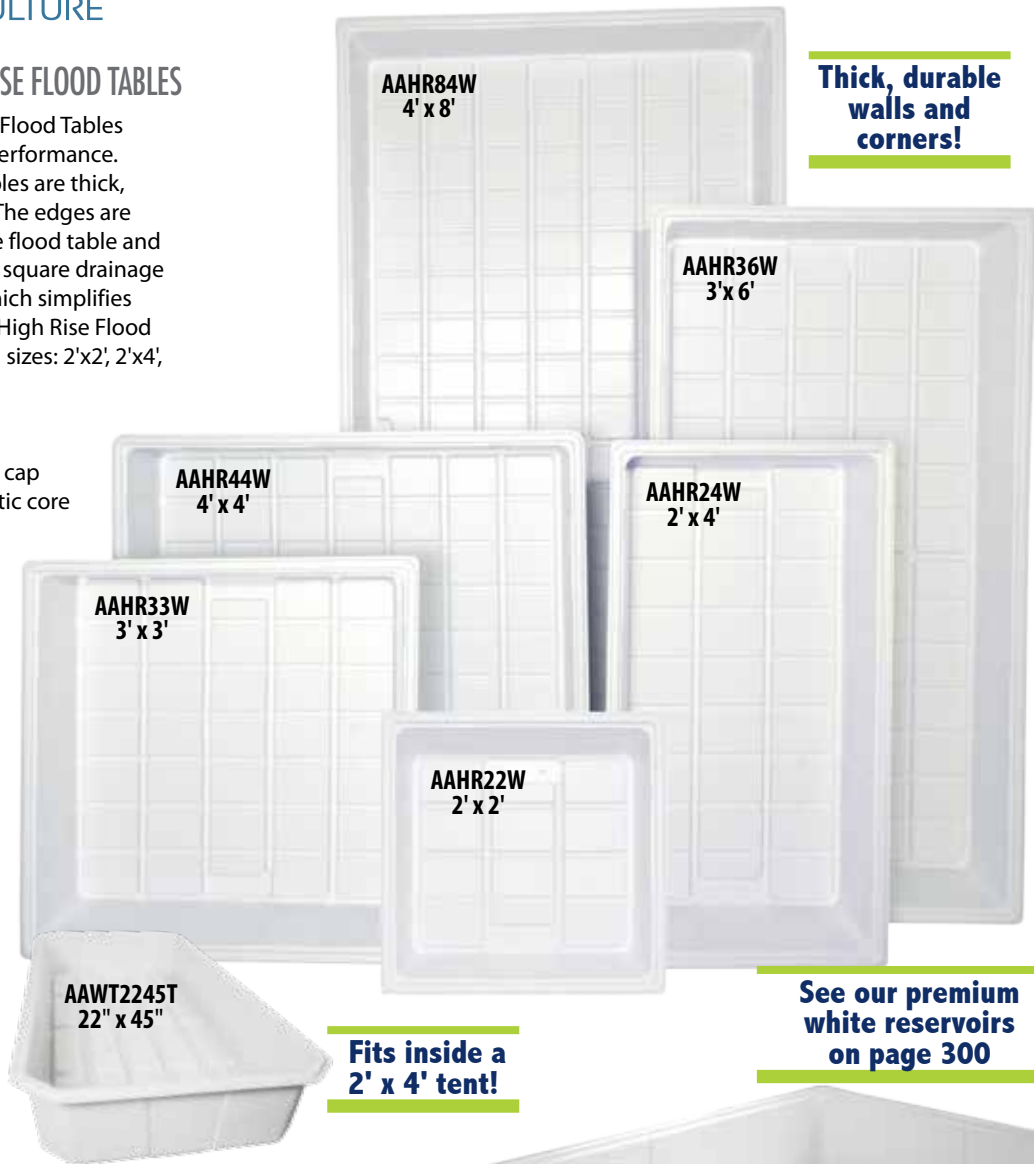

Active Aqua's Premium High Rise Flood Tables offer unparalleled strength and performance. These heavy duty full ID flood tables are thick, rigid, durable, and easy to clean. The edges are arch-formed, which reinforces the flood table and minimizes flexing. They feature a square drainage pattern and smooth channels, which simplifies cleaning. Active Aqua's Premium High Rise Flood Tables are manufactured in seven sizes: 2'x2', 2'x4', 2'x4' tent, 3'x3', 4'x4', 3'x6', 4'x8'.

- Made in North America
- UV-resistant, virgin ABS plastic cap over a 100% recycled ABS plastic core
- True internal dimensions
- Water level fill height indicators
- Reinforced with a deep, 7" sidewall
- Recessed drain position
- Smooth, rounded corners
- Easy to clean

100% Recyclable!

Strong, durable, and low maintenance

Thick, durable walls and corners!

See our premium white reservoirs on page 300

Fits inside a 2' x 4' tent!

Recessed drain position for better drainage

Arch-formed edge for more strength

Inside gradation for accurate water levels

STRONG · DURABLE · LOW MAINTENANCE

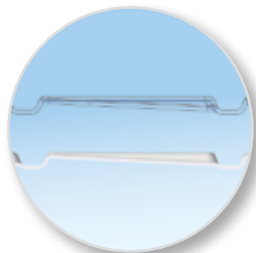

**ACTIVE AQUA PREMIUM
LOW RISE FLOOD TABLES**

Active Aqua Low Rise Flood Tables feature curved narrow edges that allow for tighter grow space, and vertical channels that slope toward the center of the table, directing water to drain down horizontal channels. Ideally suited for top feeding, and perfect for catching run-off from your hydroponic setup. Available in black only, in our four most popular sizes – 2'x4', 3'x3', 4'x4', and 4'x8'.

Low profile and narrow edges provide a better fit for tighter grow spaces

Unique grid design allows for fast and thorough drainage

Sloped grid drains each channel to center of tray

Durable, rigid and strong with low profile 3/4" sidewall

ACTIVE AQUA FILL/ DRAIN FITTINGS

These fittings are mostly used for ebb & flow and drip systems. An ebb & flow system pumps the water from your reservoir up to your flood table. When the water level gets to the level of the overflow fitting, it spills back into the reservoir from the overflow fitting. A drip system simply uses a Fill/Drain fitting to drain the water back to your reservoir from the flood table. The fittings accept 1/2", 3/4", or 1" tubing.

- Made from the highest quality plastic
- All threads accept standard garden hose fittings
- Threaded fittings don't come apart under pressure
- Debris screens easily screw into your extensions
- Overflow extensions allow user to raise or lower water levels

Get the combo kit for great value!

ACTIVE AQUA FILL/ DRAIN COMBO KIT

Includes two sizes of Active Aqua barbed fill/ drain fittings (AAEFBK2 and AAEFBK3), two extension fittings (AAEFEX1), and two screen fittings (AAEFSC1).

ACTIVE AQUA PREMIUM WHITE RESERVOIRS & COVERS

The Active Aqua line of premium white reservoirs and covers offers features that rival the competition at value prices. These reservoirs are thicker all around than most other brands, with slightly concave sides to improve strength and avoid bowing. They feature stronger corners and a low profile to fit under flood tables and other hydroponic systems.

- Multi-level drill access points for automated drainage, float valves, or other improvements
- Inside gradation to verify water level
- True, full-size dimensions and volume to provide maximum growing area
- Made from durable, high-impact ABS plastic with UV resistance for longevity
- Stronger corners and thicker walls than any others in their class

ACTIVE AQUA PREMIUM RESERVOIR COVER & PORTHOLE COVER

Our premium reservoir covers are slightly convex with a ribbed design for strength. They fit inside the reservoir top to guarantee that any water that may collect on top falls back into the reservoir. They feature a convenient access porthole (cover available separately) and multi-drill access points to install various meters and pump cords. Porthole cover fits all of our premium reservoir covers.

ACTIVE AQUA PREMIUM RESERVOIR KITS

Our convenient Premium Reservoir Kits include one reservoir, one cover, and one porthole cover – a great value at an affordable price.

Fill the Root Spa with your favorite nutrient solution and watch your plants grow!

ROOT SPA COMPLETE DEEP WATER CULTURE SYSTEM

The Root Spa Deep Water Culture System is a fun and simple DIY bucket system that offers an effective method for delivering optimal levels of water, nutrient, and oxygen to your plants. Fill up The Root Spa with your favorite grow medium and nutrient solution, and watch your plants grow! After a very short time, you will realize the advantage of the simplicity of this uniquely easy-to-use, inexpensive, and forgiving system! Pumping raw air into the nutrient solution, without the need of expensive and often troublesome air stones, is not only cost effective, but your plants will also thrive!

Includes:

- DIY bucket (HG5DIYB – see page 368) – also available with 4 and 8 buckets
- 10" (3 gallon) bucket basket to hold your choice of growing medium
- Multipurpose air hose to deliver air from the pump to the bottom of the bucket
- External air pump to oxygenate your water to encourage root growth
- .5" grommet fitting
- .5" elbow fitting
- .25" black tubing
- Air hose retainer
- Instruction manual

Clay pebble media sold separately.

Ideal for use with clay pebbles

Sold separately – see page 179

EMILY'S GARDEN™ SYSTEM

This 6"H x 16"W x 24"L garden with 6 individual planters allows you to rotate or add new plants as you please. It will fit just about anywhere – on a bench, a shelf, table, or out on the patio. Also available without media so you can customize your system with media of your choice.

System includes:

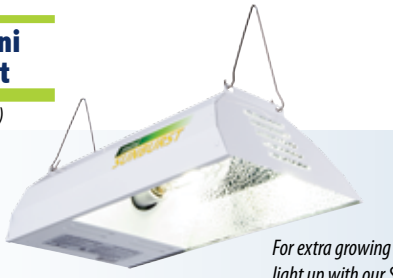

- 2 gal reservoir
- Growing media
- UL-listed air pump 
- Tubing
- Six 7"H x 6"W x 6"L planters
- Seed starter cubes
- Molded cover
- Nutrient
- Water level indicator
- pH test kit
- Illustrated instructions

MEGAGARDEN™ SYSTEM

Get the convenience of an ebb & flow system in a 10"H x 22"W x 22"L size garden. Ebb & flow systems work by pumping nutrient solution up from a reservoir to a controlled water level tray. All plants are watered uniformly on a timed cycle. Also available without media so you can customize your system with media of your choice.

System includes:

- 7.5 gal reservoir
- Growing media
- Insert grow tray
- Fifteen 5.5" square planters
- UL-listed submersible pump and timer 
- Nutrient
- Seed starter cubes
- pH test kit
- Water level indicator
- Illustrated instructions

TOMATO PLANTERS

Hydrofarm's self-watering tomato planters provide lightweight, strong support for tomatoes, beans, peas, and other climbing plants, and flowers. An easy-fill reservoir system delivers water and nutrients from below, helping avoid over- or underwatering. The sturdy frame construction helps support the weight of vines as they grow, allowing the plant to devote more energy to developing fruit – and preventing the fruit from falling off before it's ripe.

- Expandable – as plants grow, just add extra risers or rings
- Convenient watering port makes refilling easy
- Simple to assemble – no tools required
- Breaks down for easy storage
- Durable plastic construction

TOMATO BARREL™

GCTB

- Trellis expands to 4 feet tall
- Planter holds .75 cu ft
- Reservoir holds 1.5 gallons
- Includes round base and planter, 4 support rings, and 4 connecting risers

Features and flexibility you want at a price you can afford

Active Aqua's Grow Flow is the most efficient ebb & flow system on the market. With the Grow Flow's easy-to-program controller unit, you can pretty much "set it and forget it." And since your pumps are only pumping a short time each day, the system is extremely reliable and efficient. Just set the fill and drain cycles, and the controller unit does the rest!

As for safety, the Grow Flow is the only unit available with fail-safe overflow protection. If the float valve stops operating, the LED indicator lights up on the control panel and the emergency shut-off valve automatically shuts down the system, preventing any spillage or damage to your growing area.

Have bigger plans? With our convenient Grow Flow Expansion Kits* you can connect up to 24 growing modules to a single 5-gallon system – and up to 48 modules with the 2-gallon system! You can also build your own system from the ground up by purchasing all the components individually.

*Each kit includes 6 growing modules; see facing page for details.

EFFICIENT, CONVENIENT CUSTOMIZABLE

Grow Flow is available as a 12-site Complete System, or you can create a custom setup by purchasing individual components.

- Adjustable float ladder and emergency shut-off valve
- LED emergency indicator light
- Each growing module consists of one outer bucket and one inner bucket – making it easy to lift and move plants
- Tubing and fittings are sized for fast flood and drain times
- Water pumps operate on 120V
- Each controller unit can control up to 24 of our 5-gallon growing modules, and up to 48 2-gallon modules

Now available in two sizes – 5-gallon and 2-gallon

GROW FLOW EBB & FLOW COMPLETE SYSTEM

Save money in your initial setup! The Grow Flow System has everything you need to get started, right down to the fittings and tubing. 12-site complete system.

Includes:

- 7-gallon digital controller unit with 3-year warranty
- Tubing and fittings
- 55-gallon distribution reservoir with drilled lid and lock
- Two 250 GPH high-flow pumps 
- Twelve bucket modules (available in 2-gallon or 5-gallon sizes)

ITEM CODE	DESCRIPTION	SRP
GF07KT5	Grow Flow 5 Gal System with Controller Unit & 3/4" tubing	\$599.95
GF07KT	Grow Flow 2 Gal System with Controller Unit & 1/2" tubing	499.95

GF07KT
(2-gallon system not shown)

Systems come complete with heavy duty pots and fittings

For the ultimate in customization, purchase Grow Flow components separately and build your own system

GROW FLOW CONTROLLER UNIT (GF07CB)

Each Grow Flow Controller Unit can control up to 24 of our 5-gallon growing modules, and up to 48 2-gallon modules. Includes one 7-gallon controller bucket, premium Grasslin® timer, two 250 GPH pumps, all fittings, 1/2" tubing for pumps, and sample nutrients.

Heavy duty Grow Flow 2.0 Expansion Kit

GROW FLOW 2.0 EXPANSION KIT (GFOE3) 5 GALLON

The Grow Flow 2.0 Expansion Kit includes six growing modules, each consisting of a square, heavy-duty, 5-gallon pot with 3/4" fittings, an inner bucket, and all necessary connectors and tubing. Each pot features multiple drain holes for better water flow.

GROW FLOW EXPANSION KIT (GFOE2) 2 GALLON

The Grow Flow Expansion Kit includes six growing modules, each consisting of a round 2-gallon pot with 1/2" fittings, an inner bucket, and all necessary connectors and tubing. Each pot features concave bottom with multiple drain holes for better water flow.

GROW FLOW 1/2" AND 3/4" HARDWARE KITS (GFTH AND GFEH)

The Grow Flow Tee Hardware Kit (GFTH) includes six each of 1/2" tees, drain tees, and mounting nuts, and 12 washers. The Grow Flow Elbow Hardware Kit (GFEH) includes six each of 1/2" elbows, drain screens, and mounting nuts, and 12 washers.

55 GALLON RESERVOIR DRUM (DRM58T)

The multi-purpose, heavy-duty reservoir barrel is made of FDA-approved, high-density polyethylene so it's lightweight and won't dent, rust, or peel. Easy to read levels are marked on the side. Open head design includes plastic lid with pre-drilled opening and metal clamp for secure closing. Dimensions: 22.0"L x 22.0"W x 36.5"H.

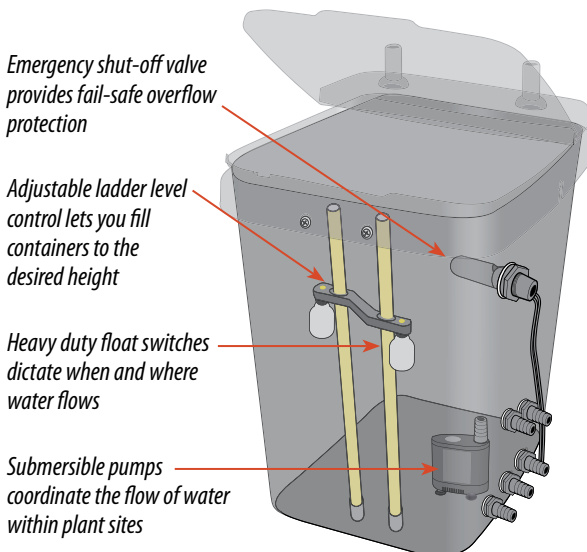

- Easy to read levels on side
- Lid clamps securely

SUBMERSIBLE PUMP (GFOPUMP)

The Grow Flow Submersible 120V, 251 GPH pump is recommended for 10-60 gallon reservoirs. Great for indoor or outdoor use, it's oil free and environmentally safe.

An inside look at the Grow Flow Controller

GFOPUMP	Grow Flow Submersible Pump 251 GPH	\$19.95

EBB & GRO HYDRO SYSTEM AND COMPONENTS

The Ebb & Gro system works by connecting all of the grow pots to the controller unit. All necessary tubing is included with the system. Just set the timer and the system will fill and drain the pots three to four times a day. When the fill and drain cycle comes on, it turns on the pump in the large reservoir (the 55 gallon drum) and starts filling the controller unit. Since the grow pots are all plumbed to the controller unit, the water in the entire system starts to level off with the controller unit. When the pots are full, and your drain cycle starts, the pump in the controller unit pumps all of the water back into the reservoir. When the level of the water in the controller unit goes down, all of the grow pot's levels go down also. Then the controller unit waits for the next fill and drain cycle a few hours later.

EBB & GRO EXPANSION KIT *CAEBBEXP6*

Expand your Ebb & Gro hydroponic system up to 48 modules! Includes six 2-gallon modules with perforated grow pots, and all tubing and fittings. Connects to existing controller and 55-gallon reservoir.

EBB & GRO CONTROLLER UNIT *CAEBBCTR*

Includes 2 pumps and a 3.5 gallon reservoir – you supply the pots. This is the same controller unit that comes with the Ebb & Gro Hydro System.

System expands up to 48 modules

PLANT!T BIG FLOAT AUTO TOP-UP KIT

The PLANT!T BigFloat Auto Top-Up kit lets you connect a secondary header tank to your existing reservoirs – then, using gravity and a low-pressure float valve, it automatically tops-up and maintains nutrient levels in your system. Spend less time filling and inspecting your tanks, and protect your plants from drying out if your reservoir runs low. No pump required. The kit contains everything you need – simply attach to the header tank of your choice up to 400 L (sold separately). Includes:

- 1 x 2 meters 13 mm flexible pipe
- 1 x 13 mm barbed tee
- 1 x 13 mm nut and tail with .75" BSP
- 1 x 13 mm poly to hose connector
- 1 x grey low pressure float valve

ITEM CODE	DESCRIPTION	SRP
GMBF	PLANT!T Big Float Auto Top-Up Kit	\$24.95

TELESCOPIC FLOOD TABLE GROOVE BRUSH

Clean flood tables from a standing position! Telescopic handle and stiff nylon bevel cut bristles to help clean hard-to-reach corners and inner channels. Pivoting brush head measures 7.5".

ITEM CODE	DESCRIPTION	SRP
HGSB	Telescopic Flood Table Groove Brush	\$39.95

DRILL BIT FOR DRAIN INSTALLATIONS & DEBURRING TOOL

1/4" to 1 3/8" step in 1/8" increments drill bit for plastic containers. Don't forget to also purchase a deburring tool (at right) to get a leak-free installation of drains and fittings. Quickly removes sharp edges – use on all plastic modifications. Great for removing burrs from holes drilled in lids and grow trays. Eliminates the chances of leaks created by an uneven drainage hole.

ITEM CODE	DESCRIPTION	SRP
HGDRBT	Drill Bit for Drain Installations	\$29.95
HGDEBURR	Deburring Tool	12.95

FLOATING THERMOMETER

Easy and accurate, this gauge floats and has a pressure-sensitive backing for easy mounting. It features readings in both celsius and fahrenheit, as well as clear markings that delineate ideal nutrient temperature.

ITEM CODE	DESCRIPTION	SRP
HGFLT	Floating Thermometer	\$2.09

WATERFARM®

The WaterFarm is built out of high-impact plastic to assure a long service life. Unique square design allows growers to closely pack WaterFarm modules in order to create large, high-density installations. Will grow small, medium, and large plants. It has large water capacity and low water requirements, simple and efficient. As it offers all the features of larger systems at a lower cost without sacrificing quality or performance, the WaterFarm is one of the very best buys.

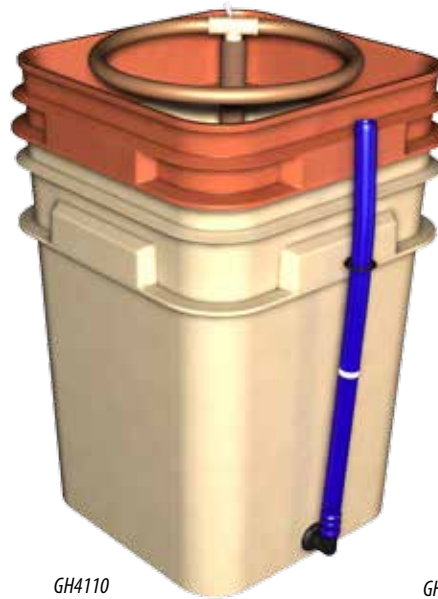

WATERFARM COMPLETE

Includes 4-gallon reservoir, grow chamber, farm kit, pump, tubing, nutrients and media.

WATERFARM® 8-PACK

The WaterFarm 8-pack is eight WaterFarm module units connected to one General Hydroponics Controller consisting of an integrated 13-gallon reservoir and an 8-gallon controller unit. The Controller will keep each unit topped off with the correct level of nutrient for low maintenance. The kit is powered by GH's dual diaphragm air pump and includes all the necessary hardware, supplies, and General Hydroponics Flora Series nutrients. Arrange the WaterFarm units in a design suitable for any environment. Pack them tight or space them out for your growing situation. The WaterFarm 8-Pack is the system for big growers.

ITEM CODE	DESCRIPTION	SRP
GH4720	WaterFarm Controller Kit - Terra Cotta (Kit of 8 Farms & Controller)	\$514.60

POWERCROWER ECO

The PowerGrower Eco incorporates numerous design innovations and is protected by several patents. It is 15" across the top and 15" tall and consists of a single growing chamber at the top with an integrated reservoir below. The unique hexagonal shape lets you place units close together when plants are small, and then separate them as the plants mature and grow.

ITEM CODE	DESCRIPTION	SRP
GH4830	Power Grower Eco Complete	\$108.00
GH4831	Power Grower Eco Module	79.80
GH4832	Power Grower 8 Pack (2 box)	687.48

ECOGROWER MAX & MEGAFARM

THE ECOGROWER incorporates an air driven "spider" drip system and a revolutionary 17-gallon hexagonal reservoir with removable 6" lid inserts. Each lid insert accommodates one 6" net pot. Dimensions: 2' x 2' x 2'.

THE MEGAFARM is GH's largest (22" x 22" x 22") drip hydroponic module. The unique 20-gallon growing chamber sits on top of a 20 gal reservoir. A dual drip ring is utilized to allow for unlimited planting options. The MegaFarm will grow all sizes of plants, including many varieties of trees. Large water capacity and low water requirements make the MegaFarm simple and efficient.

EUROGROWER DRIP HYDROPONICS

Ideal for new hydroponic gardeners, the Eurogrower provides users with a simple, yet efficient approach to home hydroponics. The heart of the system is the custom designed 40-gallon Panda reservoir, which is more than adequate for its eight 2-gallon buckets. Whether using a soil or soilless medium, growers can use the EuroGrower virtually anywhere. Comes complete with Flora Series nutrients.

GH5400

RAINFORREST 318/236/66 AEROPONICS

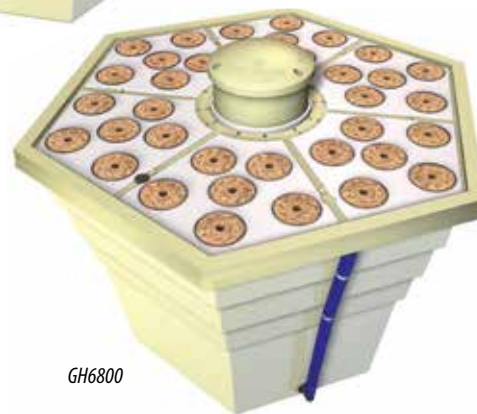

Perfect for propagating cuttings or for starting seeds, seedlings, or transplants. The Vortex Sprayer lifts and oxygenates nutrient solution then gently distributes it over cutting base or root system, for more oxygen in the root zone. Start plants in RainForest Modules and later transplant them into larger systems like our WaterFarm. Several RainForest modules can be connected to a Texas Controller for larger installations.

GH6810	RainForest Modular 236 Lid Insert Kit - Six 2" Lid Inserts, 36-2" Grow Cups	72.50

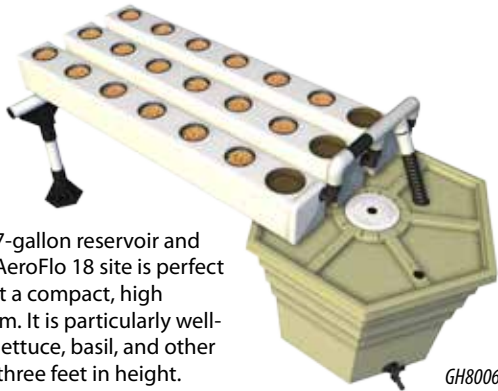

AEROFLO® AEROPONICS

By generating a fine mist of nutrient solution, AeroFlo Aeroponics systems optimize the oxygen/water/nutrient ratio for plant roots and provide ideal conditions for all stages of growth. Plants' roots grow in the moist air space between the net cups and hang in a shallow, constantly circulating bath of super-oxygenated nutrient solution. Systems come with everything you need to get started – net cups, coco inserts, pump, all plumbing and fittings, leg stand, and nutrient solution.

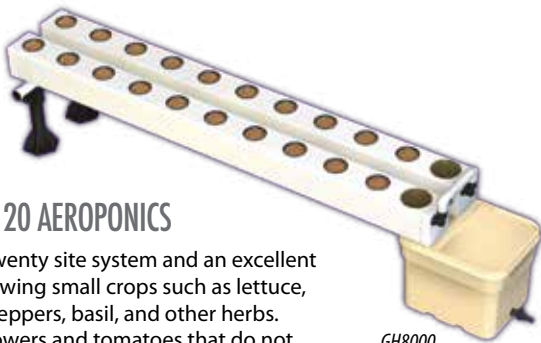

AEROFLO® 18 AEROPONICS

GH8006 – With a 17-gallon reservoir and 18 plant sites, the AeroFlo 18 site is perfect for those who want a compact, high performance system. It is particularly well-suited to growing lettuce, basil, and other small plants up to three feet in height.

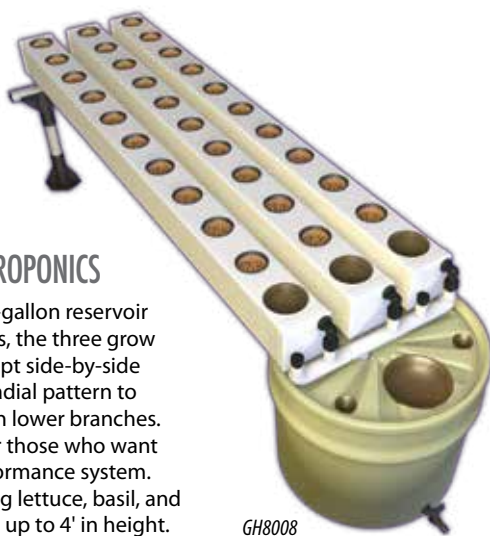

AEROFLO2® 20 AEROPONICS

GH8000 – A twenty site system and an excellent choice for growing small crops such as lettuce, cucumbers, peppers, basil, and other herbs. Varieties of flowers and tomatoes that do not grow taller than three feet will also do well. Works beautifully when placed near a sunny window in your home or office.

AEROFLO® 30 AEROPONICS

GH8008 – With a 20-gallon reservoir and thirty plant sites, the three grow chambers can be kept side-by-side or fanned out in a radial pattern to maximize growth on lower branches. A perfect system for those who want a smaller, high performance system. Excellent for growing lettuce, basil, and other smaller plants up to 4' in height.

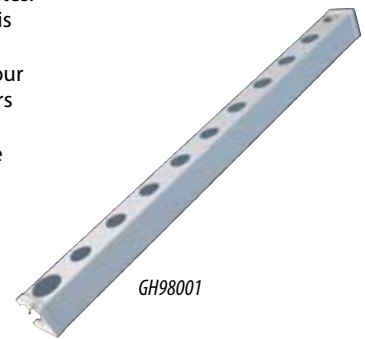

AEROFLO2® 36 AEROPONICS

GH8004 – Designed specifically for indoor cultivation under a grow light, the AF236 system offers 36 plant sites in a compact footprint. It also features the generous 40-gallon Panda reservoir.

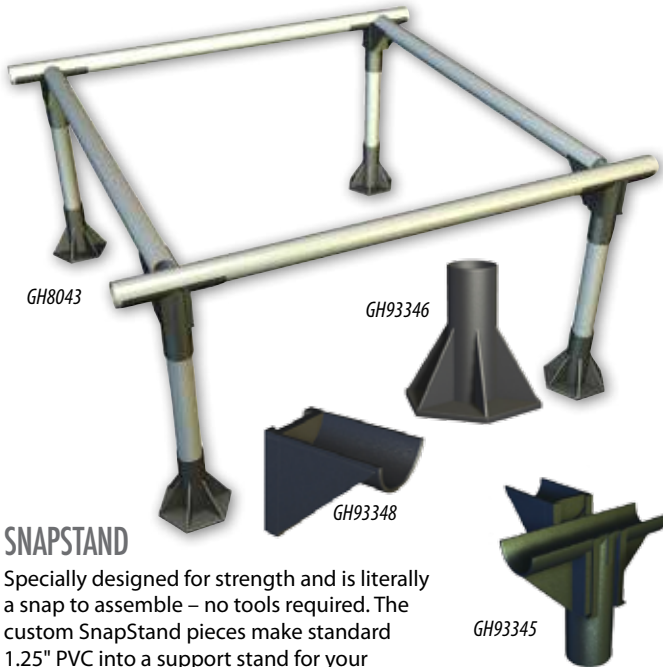

AEROFLO2® 60/120 AEROPONICS

GH8002 – Our largest AeroFlo2 unit, the AF260, features sixty plant sites. Growers who wish to expand this system can enjoy a total of 120 plant sites with the addition of our AeroFlo2 60 extension unit. Users can choose either to configure the grow chambers on the same side or to stagger them in order to cover a larger area or to grow larger plants. The AF260 and extension unit feature the generous 40-gallon Panda reservoir.

PANDA RESERVOIR

The 40-gallon Panda reservoir has a white exterior to reflect light and heat and is black on the inside to discourage algae growth. Its sleek design fits into tighter spots to optimize space. Convenient access hatch makes nutrient changes a breeze. Float valves and drain kits are also available.

ITEM CODE	DESCRIPTION	SRP
GH93351	Panda Reservoir w/out Lid, 40 Gal	\$142.00
GH93380	Panda Reservoir Lid, 40 Gal	92.00

CONTROLLER SYSTEM

A container with a float valve connected to the line of units. A master reservoir filled with fresh water and nutrients is located on top of the float-valve activated controller. As the plants draw water from their individual reservoirs, the liquid levels drop, causing the float valve in the controller to open and draw fresh nutrients from the master reservoir. This automatically maintains the ideal nutrient level in all the interconnected units. Simple, elegant, reliable, and inexpensive.

- Controller includes:**
- Seven .5" barbed tees
 - 13-gallon reservoir with grommet
 - 8-gallon controller with float valve fittings
 - Blue .5" tubing
 - Two .5" elbows

Dimensions:
3'6"H x 12"W x 12"L

ITEM CODE	DESCRIPTION	SRP

Hands-free hydro!

AUTOPOT WATERING SYSTEMS

AutoPot Watering Systems are considered one of the most environmentally friendly watering systems in the world! With AutoPot, the plant uses everything that is supplied to it; there is no loss of water, run-off or leakage. AutoPot Watering Systems are extremely versatile and can be used with the medium / substrate of your choice, including soil, perlite, coco, clay pebbles, rockwool, and more.

- No more daily watering – the system can be left unattended for weeks
- All our systems require no power, pumps or timers to operate
- Simple gravity pressure is all that is required from a reservoir or waterbutt
- Can be used to grow any crop varieties; edible or ornamental
- Adaptable and easily extended in minutes
- Environmentally sustainable

EASY2GO KIT

The easy2GO Kit will keep your plants watered for weeks using a simple gardening tray and reservoir. The easy2GO Kit is placed directly onto the tray along with your potted plants and distributes water to the pots from below. Can be installed anywhere, in the home, greenhouse, conservatory, patio or balcony. Multiple kits can be linked together to keep larger volumes of plants watered. Includes all fittings required to connect to a reservoir of your choice.

AUTOPOT SYSTEM

The 4Pot System is extremely versatile and can be used for a wide range of plant types and sizes. Seasonal flowering plants and perennial shrubs thrive and produce an abundance of blooms and foliage because of the unique action of the AQUAvalve, which is designed to only give the plant the amount of water that it requires – resulting in no wasted water or over/underfeeding. The 4Pot System is easily extended so multiple pots can be linked to a single reservoir. Once set up and the reservoir is filled with water and liquid nutrients, this adaptable system will completely take care of all your plants' needs with minimal monitoring.

FLEXITANK

The FlexiTank is made of a unique flexible material to create up to 200 gallons of water storage that fits where other reservoirs cannot go – and can be packed away and stored at the end of the season. Assembles in minutes with no tools required!

Includes:

- FlexiTank reservoir skin with zippered lid
- Tap
- Support poles

Dimensions when full of water:

- 25 Gallons – 29.5" tall x 17" diameter
- 60 Gallons – 31.9" tall x 25" diameter
- 105 Gallons – 43.7" tall x 26.8" diameter
- 200 Gallons – 46" tall x 35.5" diameter

FOUNDATION FOR YOUR *HEALTHY* PROPAGATION STARTER KIT

Mondi Easy Grow Combo

The Mini-Greenhouse, Clean & Strong premium propagation tray and Mond Mini Greenhouse Thermo-Hygrometer combine seamlessly into the growers choice propagation solution!

Mondi Mini Greenhouse Thermo-Hygrometer
Temperature and Humidity Meter
model #E100

**Mondi Clean & Strong
premium propagation tray**
model #G170

PAT PENDING

WHY DO YOU BUY MONDI?
It is the only product on the market that uses a proprietary plastic that is non-offgassing.

model #G170

NEW!

features

Clean

- Premium grade virgin materials for cleanliness and durability.
- Premium white plastic for increased light reflectivity.

Strong

- Reinforced outside shell made from recycled materials provide strongest support to date.
- Black base prevents light penetration to the root zone and reduces the chance of root disease.
- Best design 1020 flat (standard propagation tray) on the market.
- Perfectly fits all Mondi Mini Greenhouses.

Clean & Strong premium propagation tray

Super reinforced sides and lip, thick plastic and UV protection for durability and long life.

Engineered tray-ends add extra strength, making them easier to carry and move.

Deep, continuous channels and 'level fit' wide ridges prevent water pooling and provide better stability for propagation media.

CAPACITY: 6L / 1.6GAL - **TRAY MEASUREMENTS:** 21.5" x 11.2" x 2.5" - **CASE MEASUREMENTS:** 22" x 14" x 13" - **UNITS PER CASE:** 50

ALSO AVAILABLE

Mondi Propagation Tray

1020 no holes

model #G150

Mondi Propagation Tray

1020 with holes

model #G155

Mondi Mini-Greenhouse

7" with Easy Vents

- A professional propagation dome for starting seeds or cuttings
- Constructed from proprietary food-grade materials that do not off gas and kill plants

model #G100

Mondi Mini-Greenhouse

7" No Vents

- Perfectly fitted for standard trays, to create a tight seal and reduce moisture loss

model #G105

Mondi Mini-Greenhouse

4" with Easy Vents

- Temperature and humidity controlled by two adjustable vents for better growing results

model #G110

Mondi Mini-Greenhouse

4" No Vents

- Heavy duty plastic maximizes light penetration with lasting durability

model #G115

Hydrofarm: The Leader in Design and Manufacturing Quality

Hydrofarm's dedication to manufacturing quality is well established. For nearly four decades we've been committed to bringing you the highest-quality indoor gardening products in the industry. Our uncompromising commitment to excellence governs every step of product development, from concept and design to final production, helping to ensure that the product you hold in your hands performs as advertised reliably, while giving great value.

Engineering Collaboration

Our team of in-house engineers collaborates with factory engineers during each step of the design process, consulting certification testing laboratories when necessary. We then embark on the sampling phase, reviewing and refining each sample until the final product reliably meets our exacting standards. Only then can production begin.

Manufacturing Quality

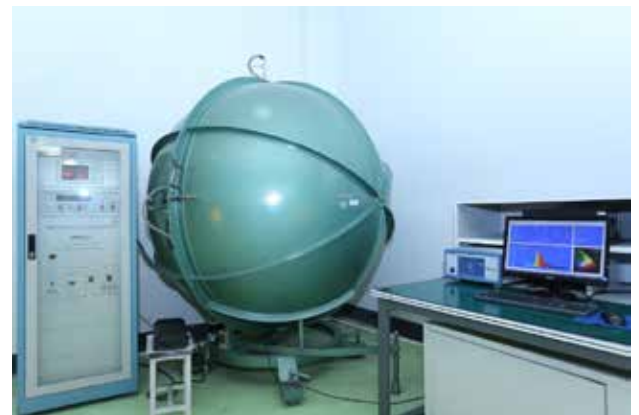

Hydrofarm conducts the most comprehensive Quality Assurance inspection process in the industry! Our unique approach employs a multidisciplinary team of QA specialists who visit the factories to oversee initial production. Following strict protocols, the team reviews each product to ensure that Hydrofarm's rigorous electrical, technical, and material specifications are being upheld in every unit that comes off the line.

Constant Evolution

We utilize a system of internal feedback at all levels, from minor packaging improvements to major product evolutions. That's how we continue to grow, evolve, and prove our value and service offering. Considering all of the above, it's no wonder that Hydrofarm continues to be the indoor horticultural product industry's leader in design and manufacturing quality.

Our dedicated technical teams do not rest until every detail has been scrutinized.

Our lighting test laboratory utilizes cutting-edge equipment like this integrating sphere with goniophotometer.
