ACTIVE AQUA PREMIUM WHITE FLOOD TRAYS

Active Aqua's new premium white trays offer unparalleled strength and performance. These heavy duty full ID flood trays are thick, rigid, durable, and easy to clean. The tray edge has been arch-formed, which reinforces the tray and minimizes flexing. They feature a square drainage pattern and smooth channels, which simplifies cleaning. Active Aqua's premium white trays are manufactured in seven sizes: 2' x 2', 2' x 4', 2' x 4' tent, 3' x 3', 4' x 4', 3' x 6', 4' x 8'.

- Made in North America
- UV-resistant, virgin ABS plastic cap over a 100% recycled ABS plastic core
- True internal dimensions
- Water level fill height indicators
- Reinforced with a deep, 7" sidewall
- Recessed drain position
- Smooth, rounded corners
- Easy to clean

100% Recyclable!

Strong, durable, and low maintenance

Recessed drain position for better drainage

Arch-formed edge for more strength

Inside gradation for accurate water levels

Premium quality at an affordable price

ACTIVE AQUA PREMIUM WHITE RESERVOIRS & COVERS

The Active Aqua line of premium white reservoirs and covers offers features that rival the competition at value prices. These reservoirs are thicker all around than most other brands, with slightly concave sides to improve strength and avoid bowing. They feature stronger corners and a low profile to fit under flood tables and other hydroponic systems.

- Multi-level drill access points for automated drainage, float valves, or other improvements
- Inside gradation to verify water level
- True, full-size dimensions and volume to provide maximum growing area
- Made from durable, high-impact ABS plastic with UV resistance for longevity
- Stronger corners and thicker walls than any others in their class

HGRES115K
Includes HGRES115PWB, HGRES115PWC, and HGRESPPHC

HGRES70K
Includes HGRES70PWB, HGRES70PWC, and HGRESPPHC

HGRES40K

PREMIUM RESERVOIR COVER & PORTHOLE COVER

Our premium reservoir covers are slightly convex with a ribbed design for strength. They fit inside the reservoir top to guarantee that any water that may collect on top falls back into the reservoir. They feature a convenient access porthole (cover available separately) and multi-drill access points to install various meters and pump cords. Porthole cover fits all of our premium reservoir covers.

PREMIUM RESERVOIR KITS

Our convenient Premium Reservoir Kits include one reservoir, one cover, and one porthole cover – a great value at an affordable price.

Reinforced steel tray stands offer strength & mobility for your flood trays!

ACTIVE AQUA TRAY STANDS

Active Aqua tray stands offer strength and mobility for all scenarios involving use of specific propagation flood tables. The reinforced steel structure with casters is easy to assemble, features an attached light hanging cross bar, and supports flood tables for even tray balance, equal water distribution, and drainage. The low profile design ensures trays are positioned directly over reservoirs so more vertical space is available for plant growth.

Measurements (all stands):

- Extendable light bar adjusts from 51" to 73"
- 20" clearance for reservoirs
- Top of tray is 30" from the ground when in the tray stand

ITEM CODE	DESCRIPTION	SRP
HGSFT24	2' x 4' Tray Stand w/Hanging Bar	\$166.95
HGSFT44	4' x 4' Tray Stand w/Hanging Bar	261.95

Compatible with Hydrofarm trays and other brands

Fill the Root Spa with your favorite nutrient solution and watch your plants grow!

ROOT SPA COMPLETE DEEP WATER CULTURE SYSTEM

The Root Spa Deep Water Culture System is a fun and simple DIY bucket system that offers an effective method for delivering optimal levels of water, nutrient, and oxygen to your plants. Fill up The Root Spa with your favorite nutrient solution and watch your plants grow! After a very short time, you will realize the advantage of the simplicity of this uniquely easy-to-use, inexpensive, and forgiving system! Pumping raw air into the nutrient solution, without the need of expensive and often troublesome air stones, is not only cost effective, but your plants will also thrive!

Includes:

- DIY bucket (HG5DIYB – see page 299) – also available with 4 and 8 buckets
- 10" bucket basket to hold your choice of growing medium
- Multipurpose air hose to deliver air from the pump to the bottom of the bucket
- External air pump to oxygenate your water to encourage root growth
- .5" grommet fitting
- .5" elbow fitting
- .25" black tubing
- Air hose retainer
- Instruction manual

Clay pebble media sold separately.

Ideal for use with clay pebbles

See page 137

Easy to assemble & use – no tools required!

1. Attach tubing to air pump.

2. Insert other end of tubing into the multipurpose air hose.

3. Turn on the pump to deliver air to the bottom of the bucket

RSSGALSYS includes EMPUMP air pump with 1 outlet

EMILY'S GARDEN™ SYSTEM

This 6"H x 16"W x 24"L garden with 6 individual planters allows you to rotate or add new plants as you please. It will fit just about anywhere – on a bench, a shelf, table, or out on the patio. Also available without media so you can customize your system with media of your choice.

System includes:

- 2 gal reservoir
- Growing media
- UL-listed air pump
- Tubing
- Six 7"H x 6"W x 6"L planters
- Seed starter cubes
- Molded cover
- Nutrient
- Water level indicator
- pH test kit
- Illustrated instructions

Grow media & starter cubes included; also available without media – see our website for suggested media.

MEGAGARDEN™ SYSTEM

Get the convenience of an ebb & flow system in a 10"H x 22"W x 22"L size garden. Ebb & flow systems work by pumping nutrient solution up from a reservoir to a controlled water level tray. All plants are watered uniformly on a timed cycle. Also available without media so you can customize your system with media of your choice.

System includes:

- 7.5 gal reservoir
- Growing media
- Insert grow tray
- Fifteen 5.5" square planters
- Submersible pump and timer
- Nutrient
- Seed starter cubes
- pH test kit
- Water level indicator
- Illustrated instructions

TOMATO PLANTERS

Hydrofarm's self-watering tomato planters provide lightweight, strong support for tomatoes, beans, peas, and other climbing plants, and flowers. An easy-fill reservoir system delivers water and nutrients from below, helping avoid over- or underwatering. The sturdy frame construction helps support the weight of vines as they grow, allowing the plant to devote more energy to developing fruit – and preventing the fruit from falling off before it's ripe.

- Expandable – as plants grow, just add extra risers or rings
- Convenient watering port makes refilling easy
- Simple to assemble – no tools required
- Breaks down for easy storage
- Durable plastic construction

TOMATO BARREL™

GCTB

- Trellis expands to 4 feet tall

Features and flexibility you want at a price you can afford

Active Aqua's Grow Flow is the most efficient ebb & flow system on the market. With the Grow Flow's easy-to-program controller unit, you can pretty much "set it and forget it." And since your pumps are only pumping a short time each day, the system is extremely reliable and efficient. Just set the fill drain cycles and the controller unit does the rest!

As for safety, the Grow Flow is the only unit available with fail-safe overflow protection. If the float valve stops operating, the LED indicator lights up on the control panel and the emergency shut-off valve automatically shuts down the system, preventing any spillage or damage to your growing area.

Have bigger plans? Expand your system to up to 48 growing modules with the convenient Grow Flow or Grow Flow 2.0 Expansion Kit, or you can build your own system from the ground up by purchasing all the components individually.

GROW FLOW EBB & FLOW SYSTEM

The updated Grow Flow System has everything you need to get started, right down to the fittings and tubing. Save money in your initial setup with this 12-site complete system.

- Digital controller with 3-year warranty
- Adjustable fill height
- 3/4" (13 mm) tubing and fittings make for fast flood and drain times
- 55-gallon distribution reservoir
- Two 250 GPH high-flow pumps
- Twelve bucket modules

EFFICIENT, CONVENIENT CUSTOMIZABLE

Available as a 12-site Complete System, or create a custom setup by purchasing individual components.

- Connect 6 to 48 growing modules to a single system
- Adjustable float ladder and emergency shut-off valve
- LED emergency indicator light
- Each growing module consists of one outer bucket and one inner bucket – making it easy to lift and move plants
- 3/4" (13 mm) tubing and fittings make for fast flood and drain times
- Water pumps operate on 120V

Updated system comes with heavy duty square 5-gallon pots and 3/4" fittings

For the ultimate in customization, purchase Grow Flow components separately and build your own system

Heavy duty Grow Flow 2.0 Expansion Kit

GROW FLOW 2.0 EXPANSION KIT (GFOE3) 5 GALLON

The new Grow Flow 2.0 Expansion Kit includes six growing modules, each consisting of a square, heavy-duty, 5-gallon pot with 3/4" fittings, an inner bucket, and all necessary fittings and tubing. Each pot features concave bottom with multiple drain holes for better water flow.

GROW FLOW EXPANSION KIT (GFOE2) 2 GALLON

The Grow Flow Expansion Kit includes six growing modules, each consisting of a round 2-gallon pot with 1/2" fittings, an inner bucket, and all necessary fittings and tubing. Each pot features concave bottom with multiple drain holes for better water flow.

GROW FLOW CONTROLLER UNIT (GF07CB)

Each Grow Flow Controller Unit w/3-year warranty can control up to 48 growing modules. Includes one 7-gallon controller bucket, premium Grasslin® timer, two 250 GPH pumps, all fittings, 1/2" tubing for pumps, and sample nutrients.

55 GALLON RESERVOIR DRUM (HG55DRUM)

The multi-purpose, heavy-duty reservoir barrel is made of high-density polyethylene so it's lightweight and won't dent, rust, or peel. Easy to read levels are marked on the side. Open head design includes plastic lid with pre-drilled opening and metal clamp for secure closing. Dimensions: 22.0"L x 22.0"W x 36.0"H. (A lid without holes is available separately—not shown: item # HG55LID).

- Easy to read levels on side
- Lid clamps securely

GROW FLOW 1/2" AND 3/4" HARDWARE KITS (GFTH AND GFEH)

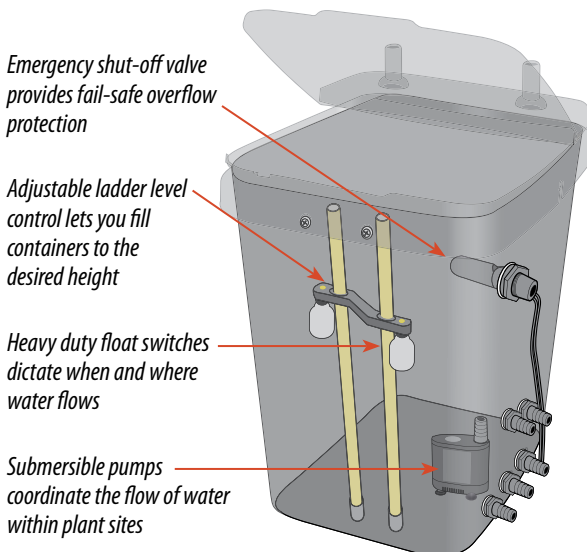

The Grow Flow Tee Hardware Kit (GFTH) includes six each of 1/2" tees, drain tees, and mounting nuts, and 12 washers.

The Grow Flow Elbow Hardware Kit (GFEH) includes six each of 1/2" elbows, drain screens, and mounting nuts, and 12 washers.

SUBMERSIBLE PUMP (GFOPUMP)

The Grow Flow Submersible 120V, 251 GPH pump is recommended for 25 gallon reservoirs. Great for indoor or outdoor use, it's oil free and environmentally safe.

EBB & GRO HYDRO SYSTEM AND COMPONENTS

The Ebb & Gro system works by connecting all of the grow pots to the controller unit. All necessary tubing is included with the system. Just set the timer and the system will fill and drain the pots three to four times a day. When the fill and drain cycle comes on, it turns on the pump in the large reservoir (the 55 gallon drum) and starts filling the controller unit. Since the grow pots are all plumbed to the controller unit, the water in the entire system starts to level off with the controller unit. When the pots are full, and your drain cycle starts, the pump in the controller unit pumps all of the water back into the reservoir. When the level of the water in the controller unit goes down, all of the grow pot's levels go down also. Then the controller unit waits for the next fill and drain cycle a few hours later.

EBB & GRO EXPANSION KIT *CAEBBEXP6*
Expand your Ebb & Gro hydroponic system up to 48 modules! Includes six 2-gallon modules with perforated grow pots, and all tubing and fittings. Connects to existing controller and 55-gallon reservoir.

EBB & GRO CONTROLLER UNIT *CAEBBCTR*
Includes 2 pumps and a 3.5 gallon reservoir – you supply the pots. This is the same controller unit that comes with the Ebb & Gro Hydro System.

System expands up to 48 modules

NEOPRENE INSERTS

These neoprene inserts are pre-slit and come in convenient sheets. Available in black or mixed color packs to help you keep track of cutting varieties.

ITEM CODE	DESCRIPTION	SRP
HGNE02B	Neoprene Insert 2", Black – 35/pk	\$13.95
HGNE02MC	Neoprene Insert 2", Mixed Colors – 100/pk	\$39.95
HGNE03B	Neoprene Insert 3", Black – 25/pk	\$19.95

PLANT!T BIG FLOAT AUTO TOP-UP KIT

The PLANT!T BigFloat Auto Top-Up kit lets you connect a secondary header tank to your existing reservoirs – then, using gravity and a low-pressure float valve, it automatically tops-up and maintains nutrient levels in your system. Spend less time filling and inspecting your tanks, and protect your plants from drying out if your reservoir runs low. No pump required. The kit contains everything you need – simply attach to the header tank of your choice up to 400 L (sold separately). Includes:

- 1 x 2 meters 13 mm flexible pipe
- 1 x 13 mm barbed tee
- 1 x 13 mm nut and tail with .75" BSP
- 1 x 13 mm poly to hose connector
- 1 x grey low pressure float valve

ITEM CODE	DESCRIPTION	SRP
GMBF	Plant!t Big Float Auto Top-Up Kit	\$24.95

TELESCOPIC FLOOD TABLE GROOVE BRUSH

Clean flood tables from a standing position! Telescopic handle and stiff nylon bevel cut bristles to help clean hard-to-reach corners and inner channels. Pivoting brush head measures 7.5".

ITEM CODE	DESCRIPTION	SRP
HGSB	Telescopic Flood Table Groove Brush	\$39.95

HYDROFUSION FILL & DRAIN KIT

Fill and drain kit for non-electric siphoning pumps. Faucet adapter changes ordinary faucets into hose threads. Super Pump can create over 20 lbs. of vacuum and is non-electric. Hose shut-off valve allows you to shut off at the filling point. Hose guard's micro screen and grill prevent debris from getting into the pump.

ITEM CODE	DESCRIPTION	SRP
HF101	Hydrofusion Fill & Drain Kit	\$19.95

DRILL BIT FOR DRAIN INSTALLATIONS & DEBURRING TOOL

1/4" to 1 3/8" step in 1/8" increments drill bit for plastic containers. Don't forget to also purchase a deburring tool (at right) to get a leak-free installation of drains and fittings. Quickly removes sharp edges – use on all plastic modifications. Great for removing burrs from holes drilled in lids and grow trays. Eliminates the chances of leaks created by an uneven drainage hole.

ITEM CODE	DESCRIPTION	SRP
HGDRBT	Drill Bit for Drain Installations	\$29.95
HGDEBURR	Deburring Tool	12.95

FLOATING THERMOMETER

Easy and accurate, this gauge floats and has a pressure-sensitive backing for easy mounting. It features readings in both celsius and fahrenheit, as well as clear markings that delineate ideal nutrient temperature.

ITEM CODE	DESCRIPTION	SRP
HGFLT	Floating Thermometer	\$2.09

WATERFARM®

The WaterFarm is built out of high-impact plastic to assure a long service life. Unique square design allows growers to closely pack WaterFarm modules in order to create large, high-density installations. Will grow small, medium, and large plants. It has large water capacity and low water requirements, simple and efficient. As it offers all the features of larger systems at a lower cost without sacrificing quality or performance, the WaterFarm is one of the very best buys.

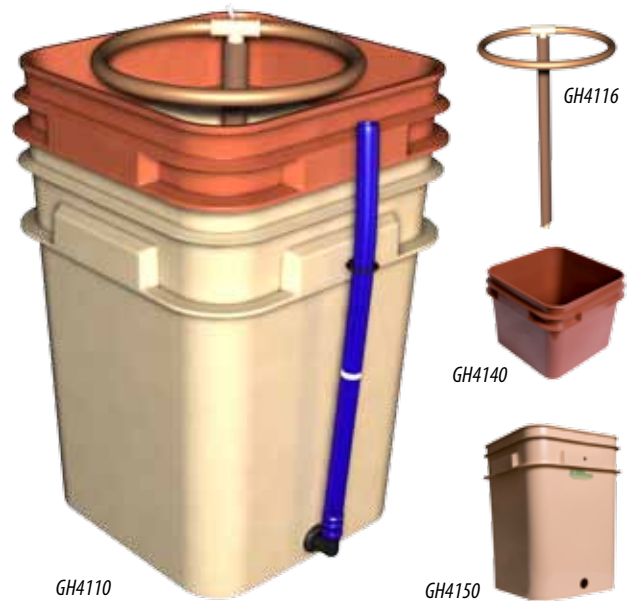

WATERFARM COMPLETE

Includes 4-gallon reservoir, grow chamber, farm kit, pump, tubing, nutrients and media.

GH4120

WATERFARM® 8-PACK

The WaterFarm 8-pack is eight WaterFarm module units connected to one General Hydroponics Controller consisting of an integrated 13-gallon reservoir and an 8-gallon controller unit. The Controller will keep each unit topped off with the correct level of nutrient for low maintenance. The kit is powered by GH's dual diaphragm air pump and includes all the necessary hardware, supplies, and General Hydroponics Flora Series nutrients. Arrange the WaterFarm units in a design suitable for any environment. Pack them tight or space them out for your growing situation. The WaterFarm 8-Pack is the system for big growers.

ITEM CODE	DESCRIPTION	SRP
GH4720	WaterFarm Controller Kit – Terra Cotta (Includes 8 Farms & Controller)	\$514.60

POWERCROWER ECO

The PowerGrower Eco incorporates numerous design innovations and is protected by several patents. It is 15" across the top and 15" tall and consists of a single growing chamber at the top with an integrated reservoir below. The unique hexagonal shape lets you place units close together when plants are small, and then separate them as the plants mature and grow.

ITEM CODE	DESCRIPTION	SRP
GH4830	Power Grower Eco Complete	\$80.12
GH4831	Power Grower Eco Module	54.19
GH4832	Power Grower 8 Pack (2 box)	687.48

ECOGROWER MAX & MEGAFARM

THE ECOGROWER incorporates an air driven "spider" drip system and a revolutionary 17-gallon hexagonal reservoir with removable 6" lid inserts. Each lid insert accommodates one 6" net pot. Dimensions: 2' x 2' x 2'.

THE MEGAFARM is GH's largest (22" x 22" x 22") drip hydroponic module. The unique 20-gallon growing chamber sits on top of a 20 gal reservoir. A dual drip ring is utilized to allow for unlimited planting options. The MegaFarm will grow all sizes of plants, including many varieties of trees. Large water capacity and low water requirements make the MegaFarm simple and efficient.

EUROGROWER DRIP HYDROPONICS

Ideal for new hydroponic gardeners, the Eurogrower provides users with a simple, yet efficient approach to home hydroponics. The heart of the system is the custom designed 40-gallon Panda reservoir, which is more than adequate for its eight 2-gallon buckets. Whether using a soil or soilless medium, growers can use the EuroGrower virtually anywhere. Comes complete with Flora Series nutrients.

GH5400

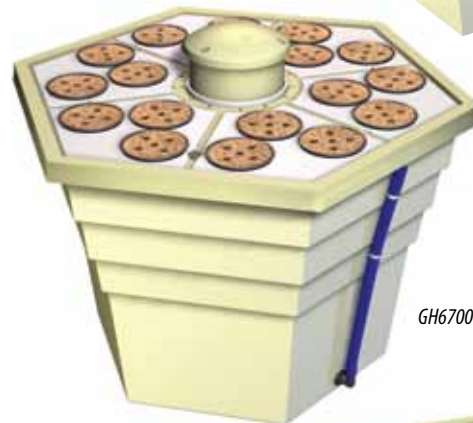

ITEM CODE	DESCRIPTION	SRP
GH5400	EuroGrower, 8 Pots Complete	\$616.65

RAINFORREST 318/236/66 AEROPONICS

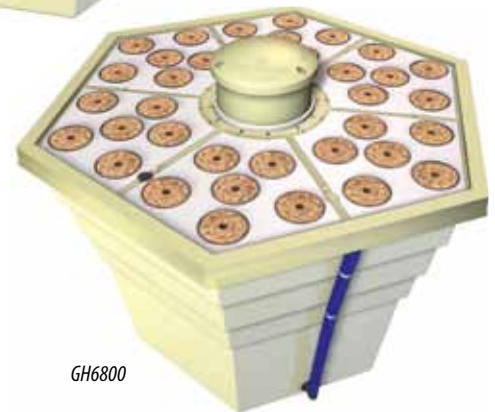

Perfect for propagating cuttings or for starting seeds, seedlings, or transplants. The Vortex Sprayer lifts and oxygenates nutrient solution then gently distributes it over cutting base or root system, for more oxygen in the root zone. Start plants in RainForest modules and later transplant them into larger systems like our WaterFarm. Several RainForest modules can be connected to a Texas Controller for larger installations.

AEROFLO® AEROPONICS

By generating a fine mist of nutrient solution, AeroFlo Aeroponics systems optimize the oxygen/water/nutrient ratio for plant roots and provide ideal conditions for all stages of growth. Plants' roots grow in the moist air space between the net cups and hang in a shallow, constantly circulating bath of super-oxygenated nutrient solution. Systems come with everything you need to get started – net cups, coco inserts, pump, all plumbing and fittings, leg stand, and nutrient solution.

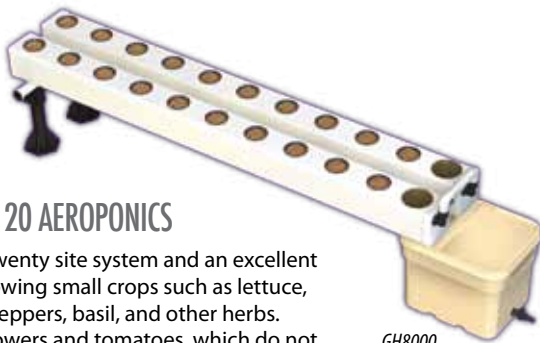

AEROFLO® 18 AEROPONICS

GH8006 – With a 17-gallon reservoir and 18 plant sites, the AeroFlo 18 site is perfect for those who want a compact, high performance system. It is particularly well-suited to growing lettuce, basil, and other small plants up to three feet in height.

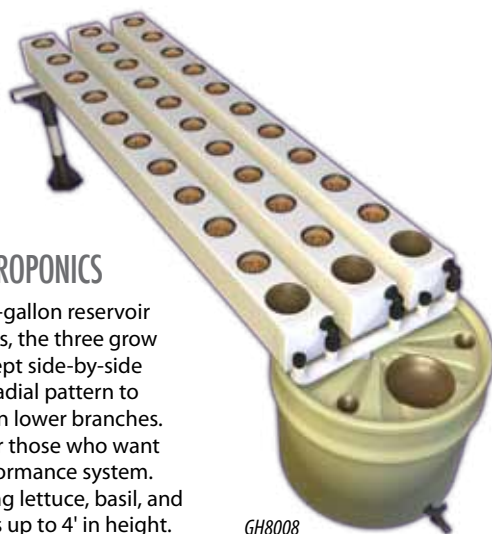

AEROFLO2® 20 AEROPONICS

GH8000 – A twenty site system and an excellent choice for growing small crops such as lettuce, cucumbers, peppers, basil, and other herbs. Varieties of flowers and tomatoes, which do not grow taller than three feet, will also do well. Works beautifully when placed near a sunny window in your home or office.

AEROFLO® 30 AEROPONICS

GH8008 – With a 20-gallon reservoir and thirty plant sites, the three grow chambers can be kept side-by-side or fanned out in a radial pattern to maximize growth on lower branches. A perfect system for those who want a smaller, high performance system. Excellent for growing lettuce, basil, and other smaller plants up to 4' in height.

AEROFLO2® 36 AEROPONICS

GH8004 – Designed specifically for indoor cultivation under a grow light, the AF236 system offers 36 plant sites in a compact footprint. It also features the generous 40-gallon Panda reservoir.

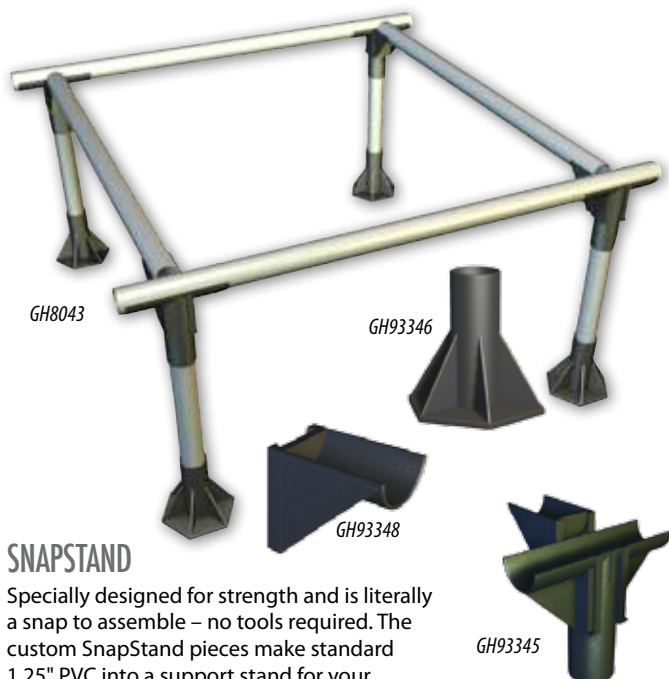

AEROFLO2® 60/120 AEROPONICS

GH8002 – Our largest AeroFlo2 unit, the AF260, features sixty plant sites. Growers who wish to expand this system can enjoy a total of 120 plant sites with the addition of our AeroFlo2 60 extension unit. Users can choose either to configure the grow chambers on the same side or to stagger them in order to cover a larger area or to grow larger plants. The AF260 and extension unit feature the generous 40-gallon Panda reservoir.

ITEM CODE	DESCRIPTION	SRP

SNAPSTAND

Specially designed for strength and is literally a snap to assemble – no tools required. The custom SnapStand pieces make standard 1.25" PVC into a support stand for your system or as many uses as the grower's imagination can conceive.

ITEM CODE	DESCRIPTION	SRP
GH8043	SnapStand 4' x 4' Tray Stand	\$90.00
GH93345	SnapStand Cross Fitting	4.79
GH93346	SnapStand Foot Base	4.79
GH93348	SnapStand Dovetail 90°	3.79

PANDA RESERVOIR

The 40-gallon Panda reservoir has a white exterior to reflect light and heat and is black on the inside to discourage algae growth. Its sleek design fits into tighter spots to optimize space. Convenient access hatch makes nutrient changes a breeze. Float valves and drain kits are also available.

ITEM CODE	DESCRIPTION	SRP
GH93351	Panda Reservoir w/out Lid, 40 Gal	142.00
GH93380	Panda Reservoir Lid w/no holes, 40 Gal	92.00

CONTROLLER SYSTEM

A container with a float valve connected to the line of units. A master reservoir filled with fresh water and nutrients is located on top of the float-valve activated controller. As the plants draw water from their individual reservoirs, the liquid levels drop, causing the float valve in the controller to open and draw fresh nutrients from the master reservoir. This automatically maintains the ideal nutrient level in all the interconnected units. Simple, elegant, reliable, and inexpensive.

Dimensions:
3'6"H x 12"W x 12"L

- Controller includes:**
- 13-gallon reservoir with grommet
 - 8-gallon controller with float valve fittings
 - Seven .5" barbed tees
 - Blue .5" tubing
 - Two .5" elbows

ITEM CODE	DESCRIPTION	SRP
GH4520	Controller System (accommodates 8 Farm Modules)	\$134.36

TEXAS CONTROLLER Unit

includes a 20-gallon reservoir with grommet, 20-gallon controller with float valve, fittings, fifteen .5" barbed tees, .5" tubing, and two .5" elbows. Dimensions: 3' 6"H x 2'W x 2'L

ITEM CODE	DESCRIPTION	SRP
GH4610	Texas Controller (accommodates 16 Farm Modules)	\$372.00

COVERT TANK

Covert Tanks are portable, lightweight and are ideal for use as a hydroponic barrel, or for water storage. Covert Tanks are collapsible and are extremely compact which makes them ideal for moving and set up in small spaces and covert ops. Made with food grade plastic.

ITEM CODE	DESCRIPTION	SRP
GH3502	Covert Tank 66 gal/250 L	\$65.30

CLONE MACHINE

Botanicare designed these clone machines to be cost efficient and practical. Each machine contains a true aeroponic mist application to ensure the best rooting and aeration to achieve optimum results.

ITEM CODE	DESCRIPTION	SRP

BCHSCL48	48 Plant Clone Machine	249.95

AEROJET AEROPONICS HYDROGARDEN

The Aerojet is Botanicare's best selling expandable hydrogarden. It is a true aeroponic system, not a deep flow hydro-aeroponic system. Microjets spray the roots of the plants allowing for aggressive growth rates due to the high levels of oxygen delivered to the root zone. Ideal for hobbyists, schools, research and education, and preferred by advanced growers as the method of choice in feed delivery methods.

ITEM CODE	DESCRIPTION	SRP
BCHSAJ2	2 Tray Aerojet	\$802.50
BCHSAJ4	4 Tray Aerojet	1069.95
BCHSAJ6	6 Tray Aerojet	1209.50

BCHSMGAERO	Micro Garden Aeroponic with Lid	358.95
BCMDRIPLINE	.125" Dripline with Stakes	0.75

DAISY CLONER

The aeroponic Daisy Cloner is a self-contained cloning system that fits almost anywhere. Its high-pressure mist provides a perfect atmosphere for fast root development. Comes with net cups and lids, and a 120-volt, UL-listed submersible pump with one-year warranty. Reservoir holds approximately three gallons. The Daisy Cloner 8 has 2-inch plant sites. The Daisy Cloner 4 has 3-inch plant sites and a larger plant area, perfect for growing smaller sized plants (peppers, ornamentals, cooking herbs) to maturity.

Not shown to scale

ITEM CODE	DESCRIPTION	SRP
BCHSDAISY8	Daisy Cloner, 8 Site	84.95

TURBOGARDEN

The same features as above, but has a larger reservoir and holds more plants. Rapid growth rates, higher yields, increased nutritional value, heightened fragrances and flavors in a 2' x 3' area!

Includes everything to start growing right out of the box!

THE AEROGARDEN is a complete countertop hydroponic garden that produces an abundance of fresh herbs, flowers, vegetables, salad greens, and more indoors and year-round. Using aeroponic technology, your plants grow in water, nutrient, and oxygenated air to directly deliver nourishment to their roots. The AeroGarden makes indoor gardening easy, with no dirt, no weeds, and no mess.

EASY – Drop in the pre-seeded Grow Pods, add water and grow. Plant your own seeds or choose from a wide variety of pre-seeded kits.

AUTOMATED – Reminds you when to add nutrients. Light turns on and off automatically.

VERSATILE – Grow a wide variety of herbs, vegetables, salad greens, flowers and more!

FOOLPROOF – 100% success guaranteed!

AEROGARDEN 7 is fully automated, elegantly designed, and now available in silver as well as in classic black. Grow beautiful plants indoors, any time of year – from tomatoes to fresh herbs, lettuce, flowers, and more!

AEROGARDEN 3 is stylish and space saving – about the same size as a coffee maker! Perfect for kitchens that are short on counter space.

AEROGARDEN ULTRA is a revolutionary new indoor garden, featuring the MyGarden control panel – the "brain" of the garden that guides you every step of the way, from planting to harvest. With twice the light of the Aerogarden 7, and more than twice the height, the Aerogarden Ultra is great for growing bigger plants better. Still perfect for herbs and lettuce, too!

- MaxGrow Grow Lights for even greater luminosity
- Loads of smart features including "Quick Plant" settings, on-screen clock, "Garden Coach" that displays growing tips, easy to set 24 hour light cycles, reminder system with audio alerts, detailed dashboard notes, and custom settings for all critical garden functions including lights, nutrient cycle, and pump cycle
- Improved lamp hood, reflectors and lamp arm for greater growth, easier adjustment

SIZE: 33.5"H x 14.75"W x 19.25"D

SIZE: 21"H x 18.5"W x 10.5"D

SIZE: 20"H x 9.5"W x 11"D

2-PACK GROW LIGHTS

These energy efficient grow lights were engineered exclusively for all AeroGardens with 1 and 2 lights in the hood. High output, full spectrum grow lights provide the optimal amount and type of light needed for robust growth.

SEED KITS

GROW ANYTHING 1-SEASON KIT

Grow Anything Kits let you plant and grow your own favorite seeds in the AeroGarden, from snap peas to wildflowers and more. Or easily root cuttings from your favorite plants.

- 7 grow sponges (seeds not included)
- Liquid nutrients
- (9) 8 ml packets for growing herbs/flowers/salad greens
- (16) 5.5 ml packets for growing vegetables and larger plants
- 7 universal baskets for easy transplanting
- 7 grow domes for faster germination
- 7 labels

GOURMET HERB SEED KIT

Begin harvesting in three to four weeks and continue harvesting for four to five months. Includes Genovese basil, dill, thyme, lemon basil, mint, oregano, and globe basil.

Available exclusively as part of the AeroGarden 7 Complete Kit.

CHERRY TOMATO SEED KIT

Ready to harvest in ten to twelve weeks and continues producing fruit for up to six months. Includes three red heirloom cherry tomato seed pods, plus 4 plant spacers.

CHILI PEPPER SEED KIT

Harvestable fruit in about twelve weeks with hundreds of peppers produced for up to six months. Includes 2 mildly spicy jalapeños, 2 medium Red Fire, and 3 tiny, fiery Super Hots.

FRESH TEA SEED KIT

Makes tea a delicious, special treat—cut fresh from the plant and steep your own special blend, or add amazing flavor to your favorite green or black tea. Includes lavender, peppermint, lemon balm, and lemon mint.

GOLDEN HARVEST CHERRY TOMATO SEED KIT

Bright yellow with a very sweet flavor. Ready to harvest in ten to twelve weeks and continues producing fruit for up to six months. Includes 3 Golden Harvest cherry tomato seed pods and 4 plant spacers.

JALAPEÑO PEPPER SEED KIT

Grow delicious jalapeño peppers all year long! Includes 1 jalapeño pepper seed pod and 2 plant spacers to give your plant ample room to grow.

MIXED ROMAINE SEED KIT

A mixture of crispy, sweet, red and green leaf romaine varieties. Begin harvesting in three to four weeks and enjoy continuous harvests for up to four months.

PESTO BASIL SEED KIT

The favorite basil of Italy, Genovese basil is perfect for pesto. AeroGarden's most productive herb kit will make all the pesto your heart desires.

SALAD GREENS SEED KIT

Perfect for making salads, adding to sandwiches, or garnishing meals. Begin harvesting in weeks and enjoy continuous harvests for three to four months. Includes seeds for green leaf, red leaf, butterhead, and romaine.

SALSA GARDEN SEED KIT

Begin harvesting in ten to twelve weeks and then continuously for up to six months. Includes 2 cherry tomato seed pods, 1 jalapeño seed pod, and 4 plant spacers to allow ample room for the plants to flourish and thrive.

THAI PEPPER SEED KIT

Spicy little bright red peppers produced abundantly on lush plants. Includes 3 Thai pepper seed pods and 4 spacers to allow your pepper plants ample room to flourish and thrive.

LAZY GARDENER SELF-WATERING INSERT

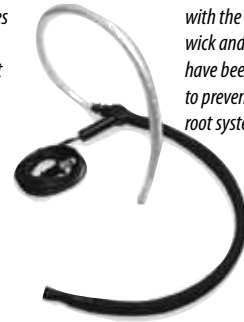

Never over-water again with this innovative self-watering system. Lazy Gardener creates ideal growing conditions by maintaining consistent moisture content, root zone temperature, and oxygen levels. Instead of water, it delivers water vapor, which is the most efficient form of irrigation, eliminates over watering, and cuts water use by up to 90%. All you need to supply is power and a water reservoir (sold separately).

- Three sizes
- Root-zone warming
- Longer growing season and higher yields
- Root-zone aeration
- No fungal root diseases

MOISTURE DELIVERY WICK Uses up to 10 times less water, yet still provides a constant, controlled moisture vapor to the root system for perfect root zone hydration.

WATER SUPPLY LINE The water supply line with the moisture delivery wick and heating element have been carefully scaled to prevent swamping the root system.

THERMOSTATIC HEATING ELEMENT Sipping just 7 watts of electricity, it maintains an optimal sub-surface temperature to extend the growing season by months while also facilitating rapid, robust and healthy root development.
