

ADVENTURE

MADE BY PET LOVERS

ACANA's Biologically Appropriate foods feature ranch-raised meats, free-run poultry, and freshwater fish with nourishing ratios of meat, organs, and cartilage or bone. Our recipes deliver nutrients naturally, with farm-fresh ingredients and real, protein-rich meat, so your cherished cat's diet is loaded with nourishment. Just like you, we want the best for your pet, to keep them happy and healthy.

INGREDIENTS WE LOVE DELIVERED BY PEOPLE WE TRUST

A Biologically Appropriate diet means mirroring the richness, freshness, and variety of whole prey meats that cats have evolved to eat. Our Fresh Regional Ingredients are raised and supplied by people we know and trust, and are delivered fresh or raw, directly to our kitchen.

FRESH REGIONAL INGREDIENTS

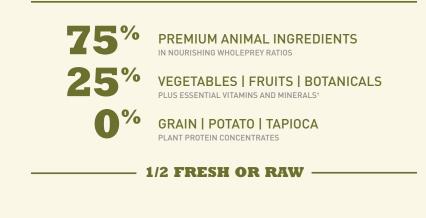

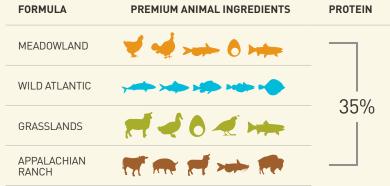

AS DISTINCT AS YOUR CAT

ACANA Regionals' unique recipes feature 75% meat from a variety of free-run poultry, wild-caught fish, ranch-raised red meats, and fresh cage-free eggs. These ingredients are blended into four nutrient-dense, delicious recipes, for a savory flavor and richly wholesome meal.

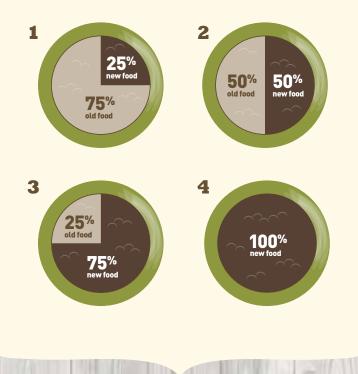

[†]Plus natural preservatives. Contains a source of live (viable) naturally occurring microorganisms.

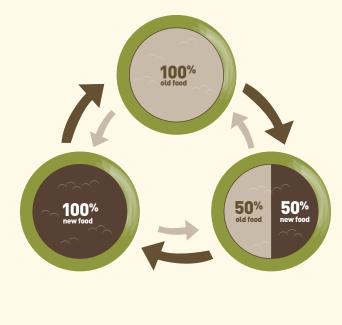

TRANSITIONAL FEEDING

Transitional feeding is when you're switching your cat from one food to another. This should be done slowly, giving your cat's body time to adjust. A gradual incorporation of a new food helps prevent stomach upsets, so adding it in 25% increments can make this transition smooth and comfortable.

ROTATIONAL FEEDING

Rotational feeding is beneficial for your cat in many ways. It mimics their ancestral diet, helps support a strong gastrointestinal environment, and provides your cat with a variety of flavors. To rotate, simply mix different ACANA flavors as often as you wish every day, every week, or by the bag. Your cat will thank you for it.

NUTRITION THEY NEED

FROM OUR KITCHEN TO YOURS QUALITY YOU CAN TRUST
