OSHA Regulatory Status:	This material is classified as hazardous under OSHA regulations.
Potential Health Effects (Acute and Chronic):	May cause severe chemical burns to the eyes, skin, gastrointestinal tract, and respiratory system.
Inhalation:	Hydrogen chloride gas, mist and vapor can cause irritation of respiratory tract, with burning, choking, coughing, headaches and rapid heartbeat. Levels of 10 to 35 ppm can cause irritation of throat and 50-100 ppm is nearly unbearable for 1 hour. Inflammation, destruction of nasal passage and breathing difficulties can occur with higher concentrations and may be delayed in onset. 1000-2000 ppm can be fatal.
Skin Contact:	Liquid hydrogen chloride or concentrated vapors can rapidly cause burning of skin. Repeated or prolonged contact with dilute solutions, and concentrated vapors, can cause irritations and dermatitis.
Eye Contact:	Liquid or concentrated vapors can cause eye irritations, severe burns and permanent damage including blindness.
Ingestion:	Can cause severe burns of mouth, esophagus and stomach. Nausea, pain and vomiting frequently occur. Depending upon amounts swallowed, holes in the intestinal tract, kidney inflammation, shock and death can occur.
Medical Conditions Generally Aggravated By Exposure:	Prolonged or repeated exposure to dilutions can cause drying, defatting and dermatitis.
