TORNADO POWER MIXERS

FASTER, EASIER CLEANING
BLADE! NO PAIL GOUGING!

For mixing of paint, mud, texture, This high-tech, durable polypropylene mixing paddle, eliminates bucket/pail gouging due to polypropylene on plastic mixing. Easy flow design allows for smooth and proper mixing without lumps. Pivoting paddle acts as a squeegee to pull material off the sides of bucket while mixing material in an upward motion. Compound cleans off high-tech plastic easier and faster than traditional mixer.

Tornado Power Mixer

EC28	Pivot Blade w/28" shaft
EC28F	Fixed Blade w/28" shaft
EC36	Pivot Blade w/36" shaft
EC36F	Fixed Blade w/36" shaft

DRYWALL MIXERS

Fan Blade Mixers

Available in Adjustable or Fixed position. Zinc plated, welded to a non-slip steel hexagon shaft for durability, 3/8" hex, 24" shaft for 1/2" slow speed drill.

FM24	2 Fan Blade Mixer w/24" shaft - Fixed Blade
FM24A	2 Fan Blade Mixer w/24" shaft - Adjustable
FM34	3 Fan Blade Mixer w/24" shaft - Fixed Blade
FM34A	3 Fan Blade Mixer w/24" shaft - Adjustable

Boomerang Mixer with Pail Saver Tip

Radius on leading edge helps prevent pail gouging. Heavy duty 28" 7/16" hex shaft. Mixes inward from top to bottom to prevent splashing. Pail Saver Tip eliminates pail gouging.

BR716	7/16" hex shaft by 28" shaft length. 3/8" radius on bottom of shaft to prevent pail gouging
-------	--

Eggbeater Mixer

Yellow zinc plated solid steel. Heavy duty 28" 3/8" hex shaft. Mixer is used with 1/2" drill for slow mixing speeds. Mixes thin set, grout and concrete.

EB28	3/8" hex shaft by 28" shaft length
------	------------------------------------

Easy Mixers

For mixing of paint, mud, texture, cement, etc. Zinc plated to resist rust. With 3/8" hex shaft for 1/2" slow speed drill. Pail Saver Tip eliminates pail gouging.

EM94	Easy Mixer w/28" shaft
EM95	Easy Mixer w/36" shaft
EM94H	Easy Mixer w/28" shaft w/ Pail Saver Tip
EM95H	Easy Mixer w/36" shaft w/ Pail Saver Tip

EM94

MUD PAN MIXER

Special blend polypropylene blade for durability. It's 1/4" X 11" round shaft fits any standard drill. Perfect for mixing in the mud pan for quick patch and repair jobs. Saves time, saves money, increases productivity, fast clean up.

Watch the video on our website:
<http://advance-equipment.com/>

EMP12 | 12" Mud Pan Mixer

POLYPROPYLENE MIXER

Special blend polypropylene blade eliminates bucket / pail gouging. 3/8" x 28" hex shaft is zinc plated to resist rust and fits any standard drill. Saves time, saves money, increases productivity, fast clean up.

EMP94 | 28" Zinc Plated Steel Shaft

MUD JAM CLEAR TOOL

For use with Automatic Taper. Easily clears paper jams or mud jams in tape guide.

34491 | Mud Jam Clear Tool

DRYWALL PAIL SCOOP

Radius on blade allows total removal of drywall mud, mortar, grout, stucco and cement from pail. Stainless steel blade held in aluminum rib. Sturdy textured handle is molded directly to the blade.

38406 | Drywall Pail Scoop

MORTAR SCRAPER

Cold rolled steel robotic welded to steel base. Comfortable wood handle attached to steel base. Mortar scraper is used to clean dried excess mortar off the face of bricks.

MS200 | Mortar Scraper

DRYWALL HAMMERS

12 oz., forged, heat treated, steel head. Crowned, serrated face designed to set nails in a precise "dimple". 12" clear hardwood handle.

DW12 | 12 oz. 12" handle
DW16 | 12 oz. 16" handle

SCARIFIER

PLASTIC OR COOLGRIP HANDLE

Made of steel tines and lightweight. Soft overlay molded to polypropylene handle is riveted directly to the blade.

36112 | 12" Blue Steel - Cool Grip handle
36114 | 14" Blue Steel - Cool Grip handle

CIRCLE CUTTER

Calibrated steel shaft gives sharp, clean cuts up to 16" in diameter. Cutting blade and center point are hardened for long life. (Imported)

AC31 | 16" Circle Cutter

TAPE HOLDERS

Steel tape holder plated to resist rust. Holds up to 500' roll of tape. Hooks on belt.

TH50 | Tape Holder

Tape roll fits snugly on adjustable, tape tension hub. Steel tape holder plated to resist rust. Holds up to 500' roll of tape. Hooks on belt.

TH57 | Tape Holder w/ Tension Hub

BANJOS

STAINLESS STEEL RAPID FILL TAPING BANJO

NEW FILLER VALVE ALLOWS FOR FILLING WITH LOADING PUMP

All the same great features as our S.S. Taping Banjo (see below). The Stainless Steel Rapid Fill Taping Banjo includes a bottom mounted Filler Valve that allows for quick filling with a standard automatic taping tools loading pump and filler. Quickly fill without opening the door! Exclusive Speed Wheel feature allows for tension preference on tape delivery. Holds 500' roll of tape.

4618

Stainless Steel Rapid Fill

STAINLESS STEEL TAPING BANJO

STAINLESS STEEL FOR YEARS OF DEPENDABLE USAGE

Made of stainless steel. Speed Wheel is adjustable to your tension preference. Thumb screw for mud adjustment. Complete with wood handle. Holds 500' roll of tape. Adjustable strap with thumb rest. Right or left handed. Tape fits securely on adjustable tension spool.

- Tension controlled with locking wing nut to adjust flow without backspin
- Tape flows smoother

4617

Stainless Steel

ALUMINUM TAPING BANJO

LIGHTWEIGHT

Made of aluminum, very lightweight. Thumb screw for mud adjustment. Wood handle and web strap. Holds 500' roll of tape. Right or left handed.

4615

Aluminum

WALL SCRAPERS

DETACHABLE HANDLE WOOD HANDLE

PASTE-MATE HEAVY DUTY PASTE MACHINES

Pasting Machines

50301	30" Table Top Model w/ Counter
50401	40" w/ Rolling Stand & Counter
50621	62" w/ Rolling Stand & Counter

Manual, gear driven pasting machine for heavier materials up to 62" wide. Stainless steel tank with two removable and three fixed rollers. Paste roller is hard coat anodized for ultimate protection. Rolling Stand, adjustable in height, has 4" industrial locking casters. Legs fold under machine for easy transport. Has a drain plug for quick clean-up. Also, has measuring counter complete with stainless steel bracket and 2 gear wheels.

Gear driven rollers provide consistent, even distribution of paste roll after roll.

For Heavy-duty Materials Up to 62" Wide.

- Height adjustable chrome rolling stand with 4" casters
- Deep stainless steel tank with two removable and three fixed rollers
- Use with vinyl, grasscloth, string, burlap, suede and more.
- Stand with material supports folds under tank for fast set-up.
- Models 50401 and 50621 include Rolling Stand and Measuring Counter.
- Model 50301 Table Top Model comes with Measuring Counter.
- Optional Booking Table available.

Exclusive pick-up roller pulls paste efficiently, evenly, from high capacity tank. Tank will allow one 30 yard bolt to be pulled without adding paste.

Stainless steel paste adjustment roller allows better control over the amount and flow of paste which prevents adhesive from touching or staining the face of the wall covering.

- Wood Yardstick (1 each)
- Paste Board Clamps (1 pair)

315-5	5' Professional Paperhanging Outfit
316-6	6' Professional Paperhanging Outfit
317-7	7' Professional Paperhanging Outfit

It was 1922. In Chicago, August Wedekind — a carpenter and contractor — was talking to a friend who said that he thought that wallpaper was the “coming thing,” and that August should start manufacturing tools for that market. Taking his friend’s advice, August began manufacturing paste tables, trestles, and paste boards in his garage, and started selling them to local area hardware stores.

As the business grew, August found that he needed more space and built a 5,000 square foot building on the West side of Chicago, which today is still the current location of Advance Equipment Manufacturing Company. The larger space meant additional machinery with which to create more tools. Products were expanded to include items such as straight edges, seam rollers, casing knives, and wallpaper trimmers.

August’s son, Bill, joined the company in the early 1940s and invented the drywall taping knife, the first of its kind. The product line grew again to include not only more wallcovering tools, but tools for painters and decorators.

The business and Bill’s family grew proportionally. He and his wife, Mildred, had four sons and a daughter. The boys (John and Paul) became involved with the company and learned the business. After Bill’s death, John, his oldest son, took the helm and now John’s children (John R. and DeAnne), have become the fourth generation of Wedekinds to run the company. In 2009, Advance Equipment welcomed Michael Palermo (DeAnne’s son), the 5th generation family member to join the Advance team of U.S. manufacturers.

In 1992, Advance Equipment purchased the Miramar Company — a wallcovering pasting machine manufacturer — and more products were added.

The 2004 acquisition of Ramco Tools added additional pasting machines and various hand tools to fill out the product line. The Advance Equipment line of high quality American-made tools has been recognized by the industry, and is well regarded by professional contractors. Advance Equipment’s offerings to the trades have grown larger, facilities and manufacturing technology have expanded, and new innovative products are being developed.

Today, Advance Equipment Manufacturing company sells to a market which includes not only the United States, but Canada, Mexico, and a growing overseas market.
