Make the right choice

//ALSCO®

From Blueprint To Finish — **WE ENRICH HOMES**

We're perfectionists.

Unlike many building products manufacturers, we've maintained control of every part of the manufacturing process in house since 1947 including painting, roll–forming and fabricating the material.

Why?

So we can keep total control over the quality and bring you uniform color and gloss, **every single time**.

For more than 70 years ALSCO® has been driven to manufacture a diverse collection of products that stand out in the home building marketplace. Each has been carefully conceived, engineered and made to create maximum curb appeal to reflect a personality and taste for the look that is uniquely yours.

Table of Contents

//ALSCO®

We're obsessed with getting it right.

Made **right** in America's Heartland.

We've been a privately-owned American company since our founding in 1947. **Today, we directly employ 100 American workers**, and our decisions to obtain manufacturing materials locally supports even more jobs right here in the USA. And we get products to you quickly, from our state-of-the-art facility near O'Hare International Airport and several major highways.

Sustainable, for **good**.

We make our aluminum products from recycled aluminum, which **saves 95% of the energy** needed for refining new aluminum from ore. Aluminum can be recycled over and over while maintaining its strength and flexibility — in fact, over 75% of all aluminum ever manufactured is still in circulation. **We're committed to keep it there**.

Not only that, but we domestically source our raw materials. Many from within 500 miles of our factory. Getting those materials nearby reduces the amount of fuel needed to move them, which **lowers our carbon footprint**.

All of us make choices every day that impact our environment. **Choosing Alsco products can help make that impact a positive one.**

MADE IN USA

//ALSCO®

The Right Choice
Quality, Service, Support and Value

WE'RE PASSIONATE ABOUT CUSTOMER SATISFACTION!

The relationship with our customers is of the utmost importance to us. Alsco's Customer service team has unparalleled experience and is committed to providing you with the answers you need. Our representatives are dedicated to your business and available via phone, fax and email from 8 am to 5 pm Eastern time. We are equipped to handle all your inquiries, order requests and provide the follow-up you deserve. Your satisfaction matters to us.

When it comes to growing your business, we support you with industry and technical knowledge. We offer the tools you need to assist you in making the sale. Ask us about our full line of marketing support materials, product samples, literature, specification sheets and warranties. We want to ensure your success.

At ALSCO® we listen to our customers and grow with our distribution partners as we align and expand our product offering throughout North America to provide the aluminum and steel building products you need on time. We are committed to our distributors, building contractors and ultimately the homeowners to be a consistent, reliable source of superior quality building products.

IMPECCABLE PRODUCT

- Superior quality control
- Exceptional formability
- Easy to clean
- Virtually maintenance free
- Right product mix

UNPARALLELED SERVICE

- Dedicated customer service
- Consistent lead times
- On time & in full delivery
- Industry leading warranty
- A partner to help you grow

PERFECT TRIM™ PLUS
A Beautiful Finish To Any Exterior

At ALSCO® we believe that in order to create exterior beauty on a home you need a collection of products that are functional, stylish and provide options in today's most popular colors.

That is why our Perfect Trim™ Plus products Soffit, Fascia, Drip Edge, Trim Coil and Rain Carrying Systems come in matching colors: all the components you need to trim any home beautifully.

Perfect Trim™ Plus components are finished with our advanced Dymalar® 2000 coating to ensure their color will match perfectly now and for years to come, withstanding the harshest elements for a lifetime of virtually maintenance-free beauty

The Perfect Trim™ Plus *PT+* symbol in this product catalog indicates that the color or palette is available in the complete collection of trim products previously listed. The accompanying three character color code is the key to using the Perfect Trim™ Plus system: Products with the same color code will match in color, even if the name differs.

* TWK-30˚ White and TWL-80˚ White used for gutter products are not perfect matches to 280 white products

* See pages 13-15 for additional Smooth and PVC trim coil color matches in our Color Select™ trim coil line

TRIM COIL

When It comes To Choosing Between Beauty and Protection, the Choice Is Easy. **Get both with ALSCO® Trim Coil.**

Dymalar® 2000

We combine 3105 aluminum alloy with our exclusive Dymalar® 2000 finish to create easy-to-form, mark and abrasion-resistant trim coil. It's engineered to withstand the harshest elements for a lifetime of virtually maintenance-free beauty.

Dymalar 2000 — Smooth Durable Finish

PT+ — Perfect Trim PLUS

Over 350 Industry Colors

PVC

DuraTex™ trim coil features a low-gloss, brushed surface texture to match virtually any siding, including many leading brands like Mastic, Variform, James Hardie, Royal, and more.

Scratch — Scratch Resistant Surface

Brushed, Low Gloss Texture

Strong Enough for Commercial Use

Color Select™

Color SELECT™

Our revolutionary Color Select trim coil is available in over 350 colors.

Match Any Siding, Including Leading Brands

Dymalar 2000 or **PVC** Coating Options, For The Look and Feel You Want

DURATEX™

HIGH PERFORMANCE, QUALITY TRIM COIL

Enhanced Low Gloss Textured Finish For Unmatched Protection and Beauty.

Newly formulated ALSCO DuraTex™ trim coil is engineered to provide long-lasting protection in a low maintenance finish. The low gloss, brushed surface texture of DuraTex trim coil enhances the craftsmanship that goes into the forming and installation of custom building components. **This durable, reliable, finish maintains its stunning appearance through field forming, installation and the harshest weather conditions.**

FEATURES & BENEFITS

- Excellent mar and scratch resistance
- Texturized finish
- Durable, low gloss finish
- UV Protection
- Low maintenance
- **Designed to provide clean, crisp bends during field forming**

ALSCO DuraTex™ trim coil matches leading window manufacturers Marvin, Andersen, Pella and more.

Aluminum Soffit and Fascia
Enhance and Protect
The Overhangs On A Home
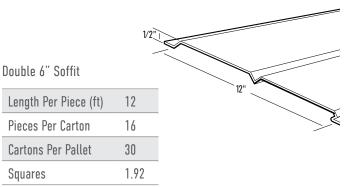

Our soffit and fascia products complement a home's existing exterior appearance both in color and style, giving homes a beautifully finished look.

These fabricated products are offered in the Perfect Trim™ Plus color package that includes soffit, drip edge, roof moldings, trim coil and rain carrying systems. Properly installed soffit protects the investment in homes by ventilating the attic and eaves, thus eliminating excess moisture and heat that can damage your roof.
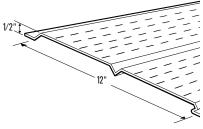

FEATURES & BENEFITS

- **Proper soffit ventilation can save on heating and air conditioning costs**

- **Prevent mold, mildew, rot and poor indoor air quality**

- **Available in solid, center vent and full vent configuration**

- **Ensure your shingle warranty remains valid**

- **FL approved soffit**

- **Lifetime Limited Warranty**

MERIDIAN Vinyl Products
A Beautiful & Durable Exterior

MERIDIAN
Vinyl Siding

Available in a wide range of rich colors, the deep cedar embossed woodgrain texture, and contemporary low-luster finish blend naturally to the architectural style of any home. MERIDIAN vinyl siding by ALSCO® provides a solid foundation for any home's exterior, creating a clean and vibrant look, while increasing a home's value with its proven durability. Maintenance is minimal and repainting is 100% unnecessary. Meridian is manufactured using a unique coloring process that fully penetrates the panel, eliminating worry about scratches or fading.

THE MERIDIAN DIFFERENCE

- Deep Cedar Embossed Woodgrain Texture
- Contemporary Low-Luster Finish
- Advanced Insta-Lock System Ensures Panels Remain Firmly in Place
- Enhanced Thickness and Strength so Panels Remain Straight and True
- Secure-Lock Reinforced Nail-Hem withstands Gale-Force Winds
- Limited Lifetime Warranty

ALSCO®

ALUMINUM SIDING
Lasting Protection and Curb Appeal

Buying or building your home is not only a major milestone but it is likely the largest investment that you will ever make. And, perhaps no other building material plays as key a role in your home as siding. That is why ALSCO has engineered high-quality aluminum siding that will protect your home from the elements, optimize its appearance, architectural character, and value.

FEATURES & BENEFITS

- Peace of Mind in knowing it will withstand temperature extremes, snow, rain and hail

- Security because our no-nonsense warranty protects against fading, peeling, chipping or blistering

- Comfort in knowing it's virtually maintenance free and resistant to dents and scratches

- Pride of ownership with aluminum siding's sleek and clean lines and look of natural wood

- Satisfaction from choosing a siding that's 100% recyclable

ALSCO®

ROOF MOLDINGS
A Finished Look

ALSCO® Building Products offers a complete line of aluminum roof molding accessories that facilitate adequate rain water run-off for any residential roofscaping.

Our roof molding products are designed to channel water away from the underlying wood construction. This provides efficient watershedding at the eaves, a barrier which protects the vulnerable wooden areas of your home from potential water damage.

FEATURES & BENEFITS

- **Helps prevent water and ice damage at roof edge**
- **Available in a broad range of colors**
- **Protects underlying wood rotting**
- **Backed by a Lifetime Limited Warranty**

Check out our extensive line of roof accessories:

- **Roll Valley**
- **W Valley Flashing**
- **Pre-cut Flat Flashings**
- **Pre-formed Step Flashings**

ALSCO®
ALSCO® ALUMINUM RAINWARE ACCESSORIES
DESIGNED TO WORK TOGETHER

ALSCO® rainware products are designed to stand up to the harshest conditions, snow and ice. The system directs moisture away from the walls and the foundation. It is easy to install because it's engineered to fit right the first time.

ALSCO's® rainware products feature an exclusively formulated coating system called GUTTER-TUFF®. This superior coating system is designed for the demands of roll forming equipment while maintaining excellent formability and strength.

ALSCO® rainware components are part of the Perfect Trim™ Plus color palette that allows you to create a custom trim package that will match perfectly and coordinate with any style home.

ALSCO® BUILDING PRODUCTS ALUMINUM WARRANTY
A LIMITED AND TRANSFERABLE WARRANTY

Coverage

Alsco warrants to the original homeowner that Alsco aluminum building products are free from manufacturing defects and when used as intended under conditions of ordinary wear will not peel, chip, crack, split, flake or blister. Alsco warrants for a period of twenty five years from date of installation, that color change in panels used as intended will not vary more than seven color difference units and that chalk erosion for colors will not exceed a numerical rating of six units over the same period of time.* This warranty does not cover non-uniform color changes resulting from unequal exposure to sunlight.

If a product fails to perform in accordance with the above standards, after written notification and validation of the condition by inspection, Alsco Building Products will repair or replace, at its option, any defective product, assuming 100% of the cost. In the event of repair or replacement under the terms of this warranty, the original warranty terms and duration will remain in effect for the remaining warranty term.

All warranty claims shall be settled between the owner and Alsco. Alsco may direct and pay a contractor to perform any remedial work under this warranty. If any corrective work on or replacement of warranted products is performed by the homeowner or anyone engaged by homeowner prior to receiving written permission to do so from Alsco, such action will void the homeowner's coverage under this warranty.

The liability of Alsco for a claim under this warranty shall in no event exceed the homeowner's original purchase price- including labor and taxes- for the product involved. It shall be the homeowner's obligation to provide documentation or other reasonable evidence of such original costs.

* Color difference units are determined by Tristimulas Colormetry - A.S.M. D2244 -08. Numerical chalk erosion ratings are determined by standard methods of evaluating degree of chalking - A.S.T.M. D4214-07.

Duration

1. Original Owner: This warranty is in effect for the lifetime of the original homeowner so long as such original homeowner continues to own the home where Alsco products have been installed.

2. Second Owner: This warranty can be transferred by the original owner to whom is issued to the next owner of the property. Upon completion of the transfer, the warranty period shall be limited to 50 years from the original date of installation of the Alsco products; provided, however, Alsco and the second owner shall share the cost of repair or replacement of any defective products, including labor and materials. (Please see "Allocation of Warranty Costs When Applicable")

3. Institutional Owner: For an owner such as a corporation, partnership, group, governmental agency, association, or other organization capable of enduring for generations, this warranty is limited to a period of 50 years from the date of original installation of Alsco products.

Warranty Registration

This warranty is valid only after the registration card has been completed by the Alsco building products dealer, signed by the original owner and mailed to Alsco within 30 days after installation has been completed. Failure to register within the 30 day period set forth above will not void the warranty, but registration will confirm the date of purchase and will assist Alsco in processing any warranty claim that might arise in the future. This confirmation is a benefit to the homeowner in case original proof of purchase cannot be found.

Exclusions and Limitations

This warranty does not cover damage resulting from any of the following: faulty installation (including but not limited to waving and/or buckling caused by improper installation); "oil canning" (perceived waviness in the flat areas of metal siding panels); fire, lightning, hurricane, hail storm, wind storm, earthquake or other acts of God; accidental damage or vandalism; impact of foreign objects; structural shrinkage or distortion; lap abrasion; harmful chemicals, pesticides, fumes or vapors; direct contact with and water run-off from dissimilar metals or other materials (e.g., metals such as copper, zinc and steel, or other materials such as concrete, blacktop, stucco, asbestos siding, pressure treated or pre-treated lumber, roofing materials or roofing systems containing metallic granules or strips, or other corrosive non-metallic materials); damage resulting from painting, varnishing, coating or otherwise altering the surface of the products except in strict accordance with Alsco's instructions or guidelines; distortion or warping caused by excessive heat sources such as window reflection, skylights, outdoor grills and other items which can cause products to distort or change color due to excessive heat buildup; surface deterioration due to air pollution and airborne stains; misuse or abuse; normal weathering; acid rain; salt spray directly applied or in the atmosphere; mildew accumulation; owner's failure to provide normal cleaning and maintenance of the product (please see care and maintenance instructions); and/or other causes beyond the control of Alsco.

This is the homeowner's exclusive warranty and is in lieu of all other warranties, express or implied, except as may be required by applicable law. Without limiting the generality of the foregoing, Alsco shall not be liable for any breach of any other written or oral warranties given to the homeowner by any third party(ies) such as those (if any) given to the homeowner by dealers, contractors, applicators or distributors of the products.

ALSCO IS NOT LIABLE FOR INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES FOR THE PRODUCTS COVERED BY THIS WARRANTY. REPAIR OR REPLACEMENT IS THE EXCLUSIVE REMEDY AVAILABLE UNDER THIS WARRANTY.

Alsco reserves the right to discontinue or make changes in any of its products. If the products covered by this warranty are not available, Alsco has the right to substitute a product of equal or greater quality or value.

Alsco does not hereby undertake to repair or replace non-defective Alsco products. Rather, Alsco may elect to repair or replace only the particular portion(s) of such Alsco products that is/are defective and/or excessively faded (as per the terms of this warranty) and we cannot and do not guarantee an exact color match with regard to the replacement product(s) as compared to the adjacent non-replaced products. Color variance may occur between replacement products in comparison with the original products due to normal weathering and aging of the original products, and this is not indicative of a defect in either the replacement products or the original products.

This warranty gives you specific legal rights; you may also have other rights which may vary from state to state. Pertinent state law shall also control for what period of time following the sale a homeowner/consumer may seek a remedy under the implied warranty of merchantability or fitness for a particular purpose. Some states do not allow the exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

Claims Procedure

A claim under this warranty must be presented in writing within 30 days following the discovery of any warranted defects to Alsco Building Products, 800 Chase Ave., Elk Grove Village, Illinois 60007 Attention: Warranty Service Department.

The claim should be accompanied by a copy of this warranty certificate, and a description of the defect.

Corrective work on warranted products may not be started prior to receiving permission to do so from Alsco.

Ultimate determination of the existence and extent of any claimed manufacturing defect hereunder shall be made by Alsco in its sole discretion. As noted above, corrective work on warranted products may not be started prior to receiving permission to do so from Alsco, and Alsco reserves the right to perform such corrective work itself or through others retained by it. Homeowner shall cooperate with Alsco and its contractors in connection with the scheduling and performance of any corrective or replacement work hereunder.

In the case of second and institutional owners, after five years of the warranty period have elapsed, a claim under this warranty must be accompanied by a $50 payment to Alsco. Checks should be made payable to Alsco Building Products and mailed to the above address.

Warranty Transfer

This warranty may be transferred from the original owner to whom it was issued to the next owner of the property provided Alsco receives written notice within 30 days of the date of the transfer. Notice must include the original owner's name as shown on the warranty certificate, the name of the new owner, the warranty certificate registration number and the date Alsco products were installed on the property.

Upon transfer of the property, the warranty period shall be limited to 50 years from the date of installation. Alsco and the new owner shall share in the cost of repair or replacement of any defective product, including labor and materials as described below.

Allocation of Warranty Cost When Applicable

For second and institutional owners the cost, including labor and materials, to repair or replace defective products shall be allocated between the owner and Alsco according to the following schedule: Alsco will assume 100% of such costs for validated claims made during the first five years of the warranty period. During the sixth year, Alsco's share of such costs will be 90%, and the homeowner's share will be 10%. Each year thereafter, through the thirteenth year, Alsco's share of such costs will cumulatively decrease from 90% by 10% per year. Starting with the fourteenth year of the warranty period, and for the balance of the warranty period, Alsco's share will be 10% and the owner's share will be 90% of such costs.

Effective only for Alsco aluminum products purchased in or after April, 2015

G1

ALSCO®

SPECIFICATIONS

TRIM COIL

MATERIAL

A. All ALSCO® trim coil shall be made of an ALSCO 3105-type aluminum sheet with a minimum tensile strength of 29,000 psi, or equivalent, as referenced in Architectural Aluminum Manufacturers Association specification AAMA 1482-86 (paragraph 3.2.3). The metal shall be treated on both sides with a non-chromate chemical conversion coating to ensure excellent paint adhesion and resistance to corrosion.

B. ALSCO trim coil products are all packaged with one roll per carton. All 24" coils shall be packaged with 32 rolls/skid.

Coil shall be of the following widths, lengths and thicknesses:

Product	Width	Length/Roll	Nominal Thickness
C14	14"	50 feet	0.019"
C24	24"	50 feet	0.019"
C24PVC	24"	50 feet	0.019"
CTP24	24"	50 feet	0.019"
T24	24"	50 feet	0.019"
T24PVC	24"	50 feet	0.019"

C. ALSCO aluminum trim coil is available in a wide array of colors to match all ALSCO fabricated products. Please refer to product literature for color availability. The standard thickness tolerance for products made from aluminum sheet material shall be +0.000", -0.003".

APPLICATION

ALSCO aluminum trim coil is designed for residential and light commercial applications. Trim coil can be field formed to provide low-maintenance coverings for exterior trim surfaces such as window and door casings, window sills, drip caps, fascias, porch posts, louvers, flashings, etc. Trim sheet shall be attached with color-matched screws, stainless steel or aluminum trim nails.

APPLICATION CONSIDERATIONS

Direct contact of aluminum products with certain dissimilar materials or contact with the water run-off from such materials is likely to result in corrosion, which is not covered by the Warranty. Therefore, care should be exercised to avoid contact of aluminum with any corrosive materials during installation, including, but not limited to: pretreated lumber, concrete, masonry cement, stucco, fiber cement products, salt, corrosive chemicals, dissimilar metals (copper, zinc, steel, etc.), and roofing systems made with metallic granules of such dissimilar metals.

DYMALAR® 2000

ALSCO® Dymalar® 2000 finish is a proprietary resin system available in a wide variety of colors and specifically formulated for residential aluminum product applications. The system is designed for compatibility with industry-accepted pre-treatment systems. This baked-on finish offers exceptional forming flexibility, cleanability, stain and mar resistance in exterior applications.

Physical Properties

Flexibility	1T NC/NTO
Pencil Hardness	HB-2H
Reverse Impact	1.5X Metal Thickness, NTO
Solvent Resistance	100+ D-MEK
Dry Film Thickness	0.6 - 0.8 mils avg.
Gloss	8 - 10°

Weathering

5% Salt Spray (Al)	No creep over 1/32" from scribe, ASTM B117, 1,000 HR
100% Humidity	No significant visual change after 1,000 HR per ASTM D2247-87
QUV	No visible loss of film integrity and no chalking greater than #8 after 500 HR, as measured by ASTM D4214-89

SPECIFICATIONS

PVC

ALSCO® PVC finish is a roll-applied, plasticized polyvinyl chloride (plastisol) two-coat system available in a wide variety of colors. Like our Dymalar® 2000 finish, it is engineered specifically for exterior applications and designed for outstanding resistance to weathering, abrasion, pollution, corrosion and other harmful airborne contaminants.

Physical Properties

Film Thickness	3.2-3.7 mils standard
Pencil Hardness	2B-HB
Flexibility	0-T
Solvent Resistance	50-100 D-MEK
Dry Film Thickness	3.5 mils avg.

Weathering

5% Salt Spray (Al)	No creep over 1/32" from scribe, ASTM B117, 1,000 HR
100% Humidity	No visual change after 1,000 HR per ASTM D2247-87
QUV	No visible loss of film integrity and no chalking greater than #8 after 500 HR, as measured by ASTM D4214-89
Abrasion	(3.5 mils DFT) Pass 200 Liters falling sand, ASTM D968
Flame Resistance	Self extinguishing, ASTM D568

DURATEX™ TRIM COIL

DuraTex™ trim coil is coated on both sides with a high performance, roll-applied, mar-resistant, low-gloss textured polyester. The top surface is available in a wide array of color options and the reverse side is coated with G280 DuraTex 280 White. All coatings conform to the standard commercial coating specifications, as referenced in AAMA specifications 1482-86 (paragraph 3.2.4).

Physical Properties

Gloss	17-25 @ 60°
Flexibility	1-2T NTP
Pencil Hardness	F-2H
Reverse Impact	1.5 X Metal thickness in inch/lbs NTPO
Solvent Resistance	100+ Dbl. MEK
Dry Film Thickness	0.70 - 0.80 mils .

Weathering

Salt Spray Resistance 5% Salt Fog @ 95F	Single coat aluminum, no field blistering, no more than 1/32" creep from the scribe after 1000 hours exposure
Humidity Resistance 100F & 100% Humidity	Single coat aluminum, no blistering or loss of adhesion after 1000 hours exposure

APPLICATION

DuraTex tough low gloss, lightly textured finish makes it the perfect choice for demanding applications. ALSCO DuraTex Aluminum Trim Coil is designed for residential and light commercial applications. Trim coil can be field-formed to provide low-maintenance coverings for exterior trim surfaces such as window and door casings, window sills, drip caps, fascias, porch posts, louvers, flashings, etc. Trim sheet shall be attached with color-matched stainless steel or aluminum painted trim nails.

SPECIFICATIONS

ALUMINUM SOFFIT

ALSCO® soffit and fascia products meet or exceed requirements set forth in AAMA Voluntary Specifications Report Number 1402-86. All stated metal thicknesses are nominal. The standard thickness tolerance for products made from aluminum sheet shall be +0.000", -0.003".

TECHNICAL

Alloy or equivalent	3105 type
Specific Gravity	2.73 gr/cm3
Density	0.098 lb/in3
Minimum Ultimate Tensile Strength	28,000 psi
Minimum Ultimate Yield Strength	24,000 psi
Minimum Elongation	3%
Modulus of Elasticity	10,000,000 psi
Coefficient of Thermal Expansion (Linear)	13.1 u-in/in/°F
Melting Range	1190-1210°F
Thermal Conductivity at 77°F	1190 BTU-in/ft2-hr-°F
Hardness (Rockwell 15T)	63-70

APPLICATION CONSIDERATIONS

Direct contact of aluminum product(s) with certain dissimilar materials or contact with the water run-off from such materials is likely to result in corrosion, which is not covered by the warranty. Therefore, care should be exercised to avoid contact of aluminum with any corrosive materials during installation, including, but not limited to: pretreated lumber, concrete, masonry cement, stucco, fiber cement products, salt, corrosive chemicals, dissimilar metals (copper, zinc, steel, etc.) and roofing systems made with metallic granules of such dissimilar metals.

RAIN CARRYING PRODUCT

MATERIAL
- ALSCO gutter coil shall be made from a 3105-type alloy aluminum with a minimum tensile strength of 24,000 psi.
- ALSCO rain carrying system products are designed for use in residential and light commercial applications.
- ALSCO gutter coil shall be made available in two thicknesses: nominal 0.027" and nominal 0.032". The coil is available in widths that can be used to produce both 5-inch and 6-inch K-style gutters on all popular forming equipment. The standard thickness tolerance for products made from aluminum sheet material shall be +0.000", -0.003".
- ALSCO standard 2"x 3" and 3"x 4" downspout and type A and B elbows shall be available in nominal 0.019" thickness. Heavy Duty 3"x 4" downspouts in nominal 0.024" thickness shall also be available.
- Other gutter accessories shall be readily available including inside and outside box and strip miters, left and right end caps, hangers, drop outlets and fasteners.
- Prior to factory painting, the metal shall receive a special cleaning process to assure maximum paint adhesion. The inside of all gutters, downspouts and elbows shall be coated with a special corrosion inhibiting pretreatment and a protective polyester coating. The exteriors will be coated in a two-phase operation that includes a corrosion-inhibiting pretreatment and ALSCO's high performance Gutter-Tuff® coating system, designed specifically for on-site forming of seamless gutters.
- All accessories used with ALSCO rain carrying system products shall be ALSCO accessories designed for use with ALSCO materials, and shall have the same Gutter-Tuff coating to ensure that the warranty covering the rain carrying products and accessories is applicable to both.

CERTIFICATE OF CONFORMANCE
ALSCO gutters, downspouts and accessories shall meet or exceed the following specifications:
- Architectural Aluminum Manufacturers Association (AAMA) Specification 1405.1: Specifications for Aluminum Gutters and Downspouts.
- HUD Minimum Property Standard 4900.1 for One and Two Family Dwellings.
- HUD Minimum Property Standard 4910.1 For Multi-Family Dwellings.

PROPER SOFFIT VENTILATION

Properly installed soffit allows air to flow naturally. Moisture can collect under roof structures and on rafters causing rotting and decaying. ALSCO® aluminum soffit is engineered so that air circulates properly to help eliminate moisture problems.

ALSCO® soffit panels are designed to provide optimal airflow. Following building codes while installing a proper ventilation system is critical to the structural performance of your house. The International Code Council (ICC) has provided general guidelines for determining proper ventilation for the home. The 1/300 and 1/150 ratios are for calculating ventilation requirements. Be sure to follow all applicable, local building codes.

ICC guidelines recommends that the free area of ventilation (in square inches) needed is the number at which the two columns intersect. The sum of the free area of all ceilings equal the total free area required. The total square feet of an attic space divided by 300 = the total net free area required for appropriate ventilation.

Attics without vapor barriers must use the 1/150 ratio. Keep in mind that some climates or locations demand more net free area to prevent ice dams in cold climates and mold and mildew in hotter climates.

		CEILING WIDTH (FT.)													
		20	22	24	26	28	30	32	34	36	40	42	44	46	48	58
CEILING LENGTH (FT.)	20	192	211	230	250	269	288	307	326	346	384	403	422	441	46	480

	42	403	444	484	524	564	605	645	685	726	806	847	887	927	968	1008
	44	422	465	507	549	591	634	676	718	760	845	887	929	971	1013	1056
	46	442	486	530	574	618	662	707	751	795	883	927	972	1016	1060	1104
	48	461	507	553	599	645	691	737	783	829	922	968	1014	1060	1106	1152
	50	480	528	576	624	672	720	768	816	864	960	1008	1056	1104	1152	1200

Free area chart utilizes 1/300 ration. Double the values to obtain 1/150 ratio.

The following calculations are to be use as a general guideline for estimating purposes. Given the variability of tolerance and drift in mill specifications, these figures may vary.

EXAMPLE:
A 350 lbs. coil of 0.027 x 11.75 is
350 lbs. x 2.74 = 959 ft.

Gauge	Multiply	Size	Equals	Ft/Lb	Calculation
0.027	x	11.75	=	2.74	(1/.365)
		11.875		2.688	(1/.372)
		15		2.127	(1/.47)
0.032	x	11.75	=	2.315	(1/.432)
		11.875		2.283	(1/.438)
		15		1.785	(1/.56)

CONVERSION RATIO OF GUTTER COIL TO GUTTER ACCCESSORIES
(based on an average gutter run of 40 ft.)

Downspout	1 ft. of downspout for every ft. of gutter coil
End Caps	2 end caps (left and right) per 40 ft.
Outside Miter	1 outside miter per 40 ft.
Inside Miter	1 inside miter for every 120 ft. of gutter
Outlet Tube	1 outlet per 40 ft.
Elbows	30 80° A and 20 80° elbows for 100 ft. of downspout
Screws	One bag of screws per 2 boxes of downspouts
Pipe Band	20 pipe bands per box of downspouts

These calculations are for information purposes only. All material quantities and weights should be verified when placing your order.
