OUR REPUTATION IN EVERY BAG

PICK A BAG. ANY BAG.

ALUF PLASTICS IS ABOUT PROVIDING
EXCELLENT SERVICE AND TOP
QUALITY PRODUCT AT **COMPETTIVE**
PRICES. FROM DUAL MANUFACTURING
FACILITIES, ROLLING OUT **CAN LINERS**
OF ALL SIZES TO **MULTIPLE**
WAREHOUSES, STOCKING OVER **500**
READY-TO-SHIP SKUS FOR IMMEDIATE
DELIVERY, ALUF'S **STERLING**
REPUTATION IS INSIDE EVERY BAG.. **FOR**
WHICH EVER BAG YOU CHOOSE.

Dear Valued Customer,

Welcome and thank you for your interest in our company.

Aluf Plastics is a minority, woman-owned (WBENC Member) manufacturer of custom, retail and private label trash bags, We've been in business under the same family ownership since 1977 and maintain state-of-the-art facilities in Orangeburg, NY, and Sulphur Springs, TX

We've grown into one of the largest manufacturing and blown-film extrusion powerhouses in North America, and yet maintain that personal, one-on-one, individualized relationship with each and every customer.

Please take a moment to peruse through this catalog. Got questions? Need more information? Have a special request? Our knowledgeable Sales team is standing by to provide you with the answers and the attention you deserve.

We appreciate the fact that you've chosen to do business with Aluf Plastics and pledge to consistently serve you with the highest levels of dedication, reliability and professionalism.

Thanks again for your patronage.

Yours truly,

Susan Rosenberg
Chief Executive Officer

"OUR **SALES** TEAM
IS STANDING BY TO
PROVIDE YOU WITH
THE **ANSWERS**
YOU NEED AND THE
ATTENTION YOU
DESERVE."

antimicrobial and odor protection
ANTIMICROBIAL

"It's not about what's IN the bag, it's about what's ON the bag"

Antimicrobial Can Liner Manufacturer

Antimicrobial Protection is well known for inhibiting the growth of odor-causing bacteria. Antimicrobial trash bags from Aluf provide new and important protection to help differentiate your offering with a solution that reduces unwanted bacteria.

antimicrobial and odor protection
ANTIMICROBIAL

ANTIMICROBIAL PRODUCT PROTECTION INHIBITS THE GROWTH OF ODOR-CAUSING BACTERIA ON THE BAG

Antimicrobial Protection is built-in to the bag during manufacturing, and will not wash off or wear away, so it provides continuous protection for the duration of its use.

Antimicrobial Product Protection is available in these Aluf Products Lines:

COEX CXP POST CONSUMER

GREEN PRODUCTS

The Bag That Saves You Green

Aluf is at the forefront of the plastics industry in providing innovative solutions for a better environment. Aluf's COEX SUPERTUFF CXP line uses a proprietary tri-laminate process. Our COEX line of bags are approximately 25% thinner than competitor's bags, yet provide superior strength and durability. Aluf's Environmental Best Practices mandate strict adherence to a higher standard of environmental friendliness and sustainability. We consistently maintain the 4-R principle:

REDUCE

We minimize the amount of material used in production.

REUSE

Most internally generated waste, including wastewater and cardboard, is reused.

RECYCLE

60% of our product line consists of content made from recycled material.

RECLAIM

We implemented ambitious effective collection programs.

Plus **ANTIMICROBIAL** antimicrobial and odor protection. Antimicrobial Protection provides an added benefit by inhibiting the growth of odor-causing bacteria on the outside and inside surfaces of the bag.

COEX Supertuff CXP bags qualify for LEED-MR 4.1 and 4.2 credits. The COEX Supertuff CXP line is produced from 80% recycled materials with 10% post consumer. They are treated with Antimicrobial Protection, a feature that inhibits the growth of odor-causing bacteria on both the inside and outside surfaces of bags.

- CXP Bags Advantages**
- Heavy Gauge Equivalent
 - Stronger - 3 Ply Liner
 - Green - Post Consumer
 - Antimicrobial Protection
 - Cost Efficient
 - Individually Folded

IDEAL FOR

Source Reduction SCR High Density Bags

Source Reduction SCR High Density Bags are our most cost efficient general stock bags packed on perforated coreless rolls. SCR Liners use less plastic which is good for the environment, yet they are strong enough "to get the job done".

Aluf's Source Reduction (SCR) High Density bags feature:

- ▲ Metalocene High Density Blend, for superior stretch ability
- ▲ Up to **10% recycled content**
- ▲ Less Polyethylene than traditional liners

SUSTAINABILITY

SUSTAINABILITY CONTRIBUTIONS

Aluf Plastics supports and invests in sustainable manufacturing and recycling solutions.

What is Sustainability?

The quality of caring for the environment or protecting natural resources, and supporting long-term ecological balance.

Aluf's contribution to Sustainability includes:

REDUCE

We minimize the amount of plastic sent to landfills by recycling over 50 Million Pounds a year.

We are one of the largest recyclers in New York State.

REUSE

We reuse over 25,000 Gallons of waste water a week.

All Wooden Pallets are repaired and reused.

RECYCLE

60% of our product line consists of content made from recycled material.

Our packaging is 100% recyclable.

RECLAIM

We reclaim and recycle over 8 Million Pounds of corrugate each year.

We implement in-house collection programs for office paper, cardboard, electronics, and plastics manufacturing scrap.

PRODUCT LISTING

FILM DESIGNATION:

HIGH DENSITY: Aluf Plastics HDPE film is a blend of high molecular weight, high density resins. High Density offers superior dart strength performance over all our other products. HDPE is the ideal material to be used for non-sharp objects.

SUPER HEXENE: Our strongest and best material; a linear low resin blend that provides the strength necessary to replace conventional liner grade film, down gauging up to 50% in many applications.

HEXENE: A linear low resin blend; our second best blend of linear low resin used in those applications where other materials may not be suitable. This resin blend is used to offset the blocking and stretch of LDPE, while still maintaining strength and impact resistance; down gauging of up to 35% in many applications.

BUTENE: A linear low resin blend that can usually be down-gauged 20% when replacing a conventional liner grade film. This film is used for those applications where other materials may not be suitable. This resin blend is used to offset the blocking and stretch of the LDPE while still maintaining strength and impact resistance.

BUTENE HIGH CLARITY: Is an excellent high clarity film similar to the above.

COEX SUPERTUFF CXP: Three-layer co-extrusions formulated for a higher performance rate and is produced with a maximum of 80% recycled material, and a minimum of 10% post consumer material. CXP qualifies for LEED Certification and contains Antimicrobial protection.

METALLOCENE / ALULENE BLEND: A unique blend of linear low recycled material and super strength prime resins. This material typically enables the user to utilize a bag 10% thinner, yet equal or stronger than a traditional LDPE bag at a competitive price.

REPRO PLASTICS: Aluf repro has good strength characteristics since it is a blend of our own virgin resins and outside recycled content. However, natural or clear film bags made from repro are somewhat cloudier than conventional industrial liner film, although contact clarity is sufficient for easy product identification. Repro plastics are not recommended for applications requiring food contact or FDA certification. 10% Post-Consumer additive is available upon request on most products.

ANTIMICROBIAL: antimicrobial and odor protection Antimicrobial Protection provides an added benefit by inhibiting the growth of odor-causing bacteria on the inside and outside surfaces of can liners. Aluf High Density products, Pro-Lene and HCR Series as well as our LEED CXP line of products are manufactured with Antimicrobial Protection.

BIODEGRADABLE & COMPOSTABLE: Aluf compostable and biodegradable bags are BPI Certified and made with natural polymers including potato and corn starch and meet ASTM D6400 specifications. Bags are able to decompose under specific conditions of light, moisture and oxygen.

GENERAL INFO

GENERAL INFO: Aluf Plastics, Inc. extrudes and converts mono and multi layer bag products for industrial packaging and can liner applications. Since our beginning in 1977, Aluf Plastics has grown steadily with advancements of film and bag products. We offer superior products with better performance and reduced cost characteristics than traditional polyethylene products, as well as a full line of commodity polyethylene.

LOCATION: Aluf Plastics headquarters and production facility located in Orangeburg, New York, and are conveniently located 5 minutes from the New York / New Jersey border and 287 / 87 Interstate highways.

PHYSICAL DATA: Aluf Plastics facility is approximately 500,000 square feet running over 70+ extrusion lines.

	Minimum Gauge	Maximum Gauge	Minimum Width	Maximum Width
Prime:	.0004	6 mil	8" (16" Tube)	99" (178" gusseted)
Repro:	.0008	6 mil	8" (16" Tube)	99" (178" gusseted)
HD:	5 mic	25 mic	17"	52"

CONVERTED PRODUCTS: Minimum Bag Length: 12" Maximum Bag Length: Unlimited

CAPABILITIES: Bags can be individually cut, individually folded, cored on 3" and 1½" diameter rolls. Custom sheets and sheeting are available. Gusseted bags, corona treating and 2 color 1 side random repeat print is available. All of our plastic film products can be manufactured in standard film colors with standard additives.

TERMS/POLICIES: Aluf Plastics' payment terms are Net 30 days.

LABELING

Aluf Plastics offers several different labeling options

Co-Label Option: A 4x3 co-label can be applied to all stock products and may contain your reorder information on a standard label or a custom reorder label with your logo and company information. Please allow five days lead time.

STANDARD CO-LABEL: 4x3 Label with 5 lines X 20 characters per line.

ADVANCED CO-LABEL: 4x3 Label with Customer Logo and Reorder info.

Custom Label Option: A fully custom 4x3, 4x6 or 4x13 label can be applied to all custom product. A minimum order of 250 cases per item are required for all private label options. Please allow two weeks lead time.

Advanced 4x13 custom label with customer logo, address and bag specs.

**Packed on a 3" Cored Roll/brown carton

Gusset Seal

Gang Folded

Food Bags

Perfect for packaging a variety of foods, including bakery items, cheeses & a variety of frozen products.

Ice Bucket Bags

Manufactured from high-impact virgin resin and designed to withstand extreme cold temperatures.

Utility Rolls

Extremely versatile bags. They are ideal for a variety of applications, including bakery, produce and small parts inventory; packed on a 1.5" core.

Bun Rack Cover

Packed on a 3" core and has been designed to prevent free standing bakery, restaurant and cafeteria racks from airborne substances.

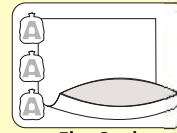

Aluf Plastics is The Second Largest Blown Film Plant in The United States

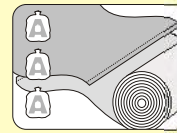

DRAW TAPE

Draw Tape Bags are made from prime super strength high performance Octene LLDPE material. These bags have superior strength than heavier gauge recycled material.

- ▲ **Super strength**
- ▲ **Source reduction**
- ▲ **Puncture and tear resistant**
- ▲ **Easy to use on interleafed coreless rolls**

About Harmonyx:

As President and CEO of Aluf Plastics, and also as a mother and grandmother, I understand how hectic it can be to shop, and how confusing it can be to buy the right trash bag. There are different features such as sizes, strengths, closures, scents, colors and quantities in each box, all designed to make your decision difficult not easy.

It got me thinking, “does it have to be so difficult to make a decision about trash bags”? The obvious answer was NO! Just create one bag that has it all. That insight led to the creation of Harmonyx™ (har mon’ ics), a bag with ALL the features of a high performance bag, PLUS Harmonyx is packed in the first and only patented space saving, self-dispensing tube. Just pull out a bag and the next one is ready to go.

Harmonyx™: the only trash bag that has it all!

And if you have any questions we’d love to hear from you,

Just Ask Susan at:

Susan@harmonyxbags.com

STRONGEST TRASH BAGS ON THE MARKET!

POLY SHEETING

Gritty construction dust is the bane of any remodeling project or large home repair job, whether you're hiring a contractor or doing the work yourself. Dust can damage furniture and rugs and ruin the finish on a hardwood floor.

Dust can inevitably find its way far beyond the work area, traveling on to shoes, clothing, with the slightest breeze and even through duct work.

Although the dirtiest work takes place during demolition, drywall sanding and every phase of construction produces dust. So it's important to prepare for the onslaught before the job starts and maintain dust containment systems to the very last days of the project with poly sheeting.

5 YEAR LANDFILL IMPACT (LBS.)

ALUF SCR LINERS **OTHER LINERS**

*Values are based on usage of 210 cases of liners per week (at 16.5 lbs./case for Aluf SCR Source Reduction vs. 20.74 lbs./case for others) in a facility located 300 Miles from Aluf, with all shipments from a common origin.

CONVERTING GAUGE

Can Liner Mil and Micron Conversion Formulas

How to Convert

MILS TO MICRONS

To convert Mills to Microns

Multiply the Mil by 25.4

$$\text{___ Mil} \times 25.4 = \text{___ Mic}$$

The resulting number is the Actual Micron Thickness

How to Convert

MICRONS TO MILS

To convert Microns to Mills

Divide the Micron by 25.4

$$\text{___ Mic} \div 25.4 = \text{___ Mil}$$

The resulting number is the Actual Mil Thickness

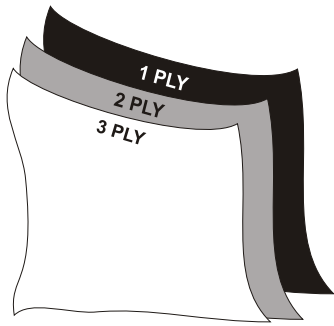

This Table highlights the most popular can liners in both gauge and microns

MIL THICKNESS	MICRON EQUIVALENT
0.20	5
0.24	6
0.28	7
0.31	8
0.35	9
0.39	10
0.43	11

0.94	24
0.98	25
1.00	25.4

Aluf Plastics Patented and Innovative Tube Packaging is Both Cost Effective and Eco-Friendly

CALCULATING GAUGE & NET WEIGHT

Calculating Bag Thickness:

1. Weigh 4 bags in lbs. on a scale to get an AVERAGE weight.
(If scale provides weight in OUNCES divide by 16; or if by GRAMS, multiply x .0022, to get lbs.)
2. For width and length below use ACTUAL exact length you physically measured, (not what is on the label.)

For Low Density

Weight in lbs. ÷ Total Width ÷ Length ÷ # of bags weighed x 15 = Gauge
for example see below

Try it ____ lbs. ÷ ____ Width ÷ ____ Length ÷
____ # of bags weighed x 15 = ____ Mil

- i. Example: 29.4 Net Weight 38x58, 2 mil, LLDPE 100 count = **.002 mil**
ii. 29.4 lbs. ÷ 38 Width ÷ 58 Length ÷ LLDPE 100 count x 15 =

For High Density

Weight in lbs. ÷ Total Width ÷ Length
÷ # of bags weighed ÷ 0.0686 x 25,400 = Gauge
for example see below

Try it ____ lbs. ÷ ____ Width ÷ ____ Length ÷
____ # of bags weighed ÷ 0.0686 x 25,400 = ____ Micron

- i. Example: 20.75 Net Weight 40x48, 16 Micron HDPE 250 Count = **16 mic**
ii. 20.75 lbs. ÷ 40 Width ÷ 48 Length ÷ 250 count ÷ 0.0686 x 25,400 =

Calculating Net Weight:

For Low Density

Gauge ÷ 15 x Total Width x Length x Pack = Net lbs. per case
for example see below

Try it ____ Gauge ÷ 15 x ____ Width x
____ Length x ____ Pack = ____ Net Weight per Case

- i. For LD gauge please input 1.5 mil as .0015, or .5 mil as .0005
ii. Example: 40 x 46, 100 Case, 2 Mil = **24.53**
iii. .002 ÷ 15 x 40 Total Width x 46 Length x 100 Case =
Net lbs. per case

For High Density

Gauge ÷ 25,400 x Total Width x Length x Pack x 0.0686 = Net lbs. per case
for example see below

Try it ____ Gauge ÷ 25,400 x ____ Width x
____ Length x ____ Pack x 0.0686 = ____ Net Weight per Case

- i. For HD gauge please input 17 Mic as the value of 17 ÷ 25,400 = .0006692
ii. Example: 33 x 40, 250 Case, 17 Mic = **15.15**
iii. 17Mic ÷ 25,400 = .00066 x 33 Total Width x 40 Length x 250 Case x .0686 =
Net lbs. per case

BAG CHOOSING GUIDE

How to Choose the Correct Can Liner in 3 Easy Steps.

Step 1 Materials: Are there sharp objects being thrown away?

YES, Select one of the following options

SHARP OBJECTS	LOW DENSITY HIGH MIL	LOW DENSITY MED MIL	LOW DENSITY LOW MIL	LD SUPER HEXENE MED MIL	LD SUPER HEXENE LOW MIL
CONSTRUCTION DEBRIS	3 MIL				
BROKEN GLASS		2 MIL		1 MIL	
ITEMS WITH SHARP CORNERS			1.5 MIL		.8 MIL
LAWN TRIMMINGS & STICKS			1.5 MIL	.9 MIL	
BONES, CRAB LEGS, SHARP METAL LIDS				.9 MIL	.8 MIL

NO, Select one of the following options

GENERAL WASTE	LD SUPER HEXENE LOW MIL	HIGH DENSITY HIGH MIC	HIGH DENSITY MED MIC	HIGH - D LOW/MED MIC	HIGH DENSITY LOW MIC
GENERAL FOOD WASTE	.7 MIL	17 MIC	14 MIC		
NEWSPAPERS / MAGAZINES		14 MIC			
RAGS / LINEN		12 MIC	10 MIC		
OFFICE WASTE	.4 MIL			8 MIC	
TISSUES					6 MIC

Step 2 Size: How to determine the proper liner size?

Round, Follow these steps:

Example: Round Receptacle, Diameter: 23" Height: 42.5"

Width = diameter X 1.57

Width of Bag = 36"

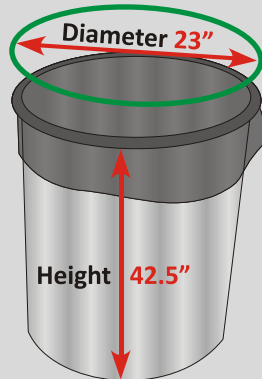

$23" \times 1.57 = 36.11" = 36"$

Length = $\frac{1}{2}$ diameter + 4" + height of can

Length of Bag = 58"

$11.5" (\frac{1}{2} \text{ dia.}) + 4" + 42.5" = 58"$

**Bag Size should be:
36" X 58"**

Square/Rectangle, Follow these steps:

Example: Rectangular Receptacle, Width: 22" Depth: 14" Height: 47"

Width = add the width + the depth

Width of Bag = 36"

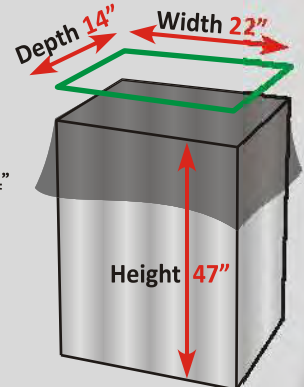

$22" + 14" = 36"$

Length = $\frac{1}{2}$ of the depth + height of can + 4"

Length of bag = 58"

$7" + 47" + 4" = 58"$

**Bag Size should be:
36" X 58"**

Step 3 Gauge: How to determine bag thickness?

Hi-Density

F.A.Q.

Frequently Asked Questions

How can I order product samples?

Call your local representative, contact Customer Service at 800-394-BAGS or info@alufplastics.com to request product samples.

Can I buy direct?

We are a manufacturer, we sell our products direct through our wholesale distributor partners. We can refer you to an Aluf Plastic's Manufacturer Rep or local distributor in your area depending upon your volume needs.

What are the minimum order requirements?

We require a minimum of 250 cases for prepaid shipments. The minimum production run for custom items is 2,000 lbs.

What Freight Terms do you offer?

Prepaid, unless otherwise noted.

Can I mix products to make the 250 case prepaid freight order quantity?

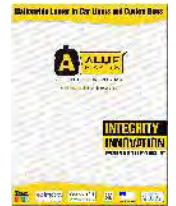

Yes, you can mix and match different items and quantities to have the whole order meet the 250 required cases.

Are all items listed in Aluf's Product Catalog in stock?

Yes, all of the listed items are in stock and available for immediate shipment. However, from time to time new items are added and obsolete items removed from stock.

We also produce industrial products on a customer-by-customer basis with low minimums and prompt turnaround.

How can I tell the difference between Low Density and High Density bags?

Low Density bags feel and sound softer, and are usually much thicker.

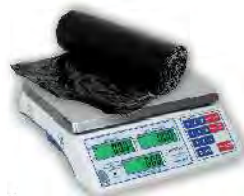

High Density bags are thinner and make a crinkly sound.

What is the difference between Mic and Mil?

Mic and Mil are units of measure that describe the thickness of a can liner.

High Density can liners are measured in microns or the metric system. Low Density liners are measured in mils or the imperial system.

What are the standard and custom product lead times?

Orders for stock products ship within 72 hours. Co-label and custom order lead time will vary depending on the order specifications and volume. Actual lead time will be confirmed at the time order is placed. Standard custom lead time for first order is four weeks and then three weeks on subsequent orders.

Aluf Has The Only 3-Ply Can Liner That Qualified for LEED Certification with COEX Antimicrobial Odor Control

POLICIES

Return Policy

Aluf Plastics puts **“OUR REPUTATION IN EVERY BAG”**; and in the event there is a need to return product to Aluf Plastics, a **Return Merchandise Authorization (RMA)** must be obtained by contacting returns@alufplastics.com within 7 days of delivery. The Request for Return Merchandise Authorization email should include the Original Invoice Number, Date and Quantity of cases and the reason for the return.

If a returned item is found to be defective or delivered damaged, returns with an RMA will be accepted at no charge to the customer and full credit will be applied to the customer's next invoice.

No credit will be given for custom/private label product, partially used packages or dead stock unless defective.

All other products to be accepted for return must be in unopened boxes in resalable condition and are subject to a 15% restocking fee with no credit given for outgoing freight costs. Once the returned product is received in our warehouse, the amount paid for the product, less restocking fees (if applicable) will be credited on the customer's next invoice.

Product Warranty

User assumes all risks resulting from the use of our products and must confirm adaptability thereof by their own tests. Liability will not exceed value of the material sold. We reserve the right to employ various new technologies due to advances in the polyethylene industry which may alter the structure or configuration of material used to manufacture the above. This does not void or change our warranty; the products supplied will function in a satisfactory manner. Any claims for damages or shortages must be noted on bill of lading at time of delivery. If acknowledgment is not returned and changes noted within 48 hours it will be assumed that order will be entered as per above.

Legal

Prices are subject to market changes. Prices are firm for 30 days unless noted otherwise. Prices are subject to raw material fluctuations. Custom bags are subject to an over run or under run of +/- 25% quantity unless agreed to in writing. All products are subject to +/- 5% overall tolerance.
