FEED YOUR FIREARM™

Your guns are hungry. They crave lead and feast on recoil. They are born with a gluttonous appetite for speed and accuracy. We are Aguila Ammunition. We believe that getting the most out of your firearm begins with what you put into your firearm. And that's why we only source the best raw materials to manufacture the best ammunition possible. Ammunition that's reliable and dependable shot after shot. Ammunition that holds nothing back when it comes to performance, quality, and innovation. Yes, ammunition that your guns will downright devour. Let the feeding frenzy begin.

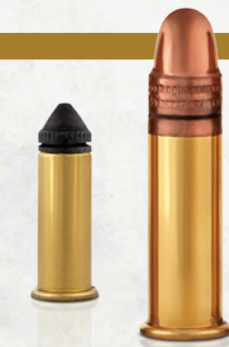

RELIABILITY. ACCURACY. PERFORMANCE.

RIMFIRE

Manufactured and tested to ensure optimal reliability, accuracy, and performance, our rimfire ammunition uses world-famous ELEY Prime technology — the same used by Olympic shooting teams.

RIMFIRE TECHNICAL SPECIFICATIONS

Given their name from the process of packing the priming compound into the rim of the cartridge, Rimfire rounds are limited to lower pressures and lighter weights — making them an inexpensive and easily accessible round. Manufactured using world-famous ELEY Prime technology — the same used by Olympic shooting teams — Aguila Rimfire cartridges are meticulously formed for performance and perfection. Clean combustible powders, maximum output at controlled pressures, and a strict quality assurance program all add up to give shooters the Aguila Advantage.

RIMFIRE / STANDARD

.22 SUPER EXTRA / LONG RIFLE HIGH VELOCITY COPPER-PLATED SOLID POINT							STANDARD
NO. 1B222328							
	KILL MORE BULL'S-EYES. These high velocity rounds are perfect for target shooting or plinking and provide tight groupings. The copper-plated bullet provides excellent accuracy, consistent performance, and smooth cycling.						
	BULLET WEIGHT		VELOCITY		ENERGY		PACKAGING
	Grams	Grain	Muzzle ft/sec	100 yds ft/sec	Muzzle ft/lb	100 yds ft/lb	Case Rounds Per Box
	2.59	40	1,255	1,036	140	95	5,000 50

.22 SUPER EXTRA / LONG RIFLE HIGH VELOCITY COPPER-PLATED HOLLOW POINT							STANDARD
NO. 1B222335							
	NOT A GOOD TIME TO BE A VARMIT. Our high velocity hollow point is engineered for varmint control. The copper-plated bullet provides excellent accuracy, consistent performance, and smooth cycling. Nickel casing is resistant to corrosion for a longer shelf life.						
	BULLET WEIGHT		VELOCITY		ENERGY		PACKAGING
	Grams	Grain	Muzzle ft/sec	100 yds ft/sec	Muzzle ft/lb	100 yds ft/lb	Case Rounds Per Box

AGUILAAMMO.COM

A man with a beard and a dark beanie is shown in profile, looking off to the side. He is wearing a camouflage jacket and has a rifle slung over his shoulder. He is holding the rifle with his right hand, which is wearing a tactical glove. The background is a light, textured surface.

PROVEN PERFORMANCE SHOT AFTER SHOT.

CENTERFIRE

From the standard to the unique, these high-quality rounds consistently hit dead center and cycle flawlessly — giving shooters the Aguila advantage.

CENTERFIRE TECHNICAL SPECIFICATIONS

By definition, Centerfire rounds have a primer located in the center of the cartridge case head that is a separate, replaceable component. Unlike Rimfires, which are ignited from the “Rim” and consist of fewer components, Centerfire rounds are ignited when the explosive primer, located between the cup and anvil components, is struck. Hiram Berdan and Edward M. Boxer are credited with modern primer designs with origins dating as far back as 1866. At Aguila “Non-Corr Priming” is used and guarantees reliable ignition in any weather conditions, and with over 25 skus ranging in velocity/Energy ratios between 705/108 to 3215/1266, the Aguila Advantage will hit dead center. A wide variety of calibers from the standard to the unique, Aguila offers high-quality rounds that cycle flawlessly with remarkable consistency in both velocity and accuracy.

CENTERFIRE / PISTOL

.25 AUTO FMJ / FULL METAL JACKET							PISTOL	
							NO. 1E252110	
	VELOCITY. ACCURACY. CONSISTENCY. Engineered for use at the range or with paper targets, this ammo features a lead core copper full metal jacket bullet and our “Non-Corr Priming” for reliable ignition no matter the weather conditions.

PISTOL

9MM LUGER 117 GRAIN +P JHP / JACKETED HOLLOW POINT – COMING IN 2016

A single 9mm Luger 117 Grain +P Jacketed Hollow Point bullet. The bullet is brass-colored with a copper-colored tip. It has a hollow point design, which is visible at the tip. The bullet is shown in a side profile, facing right.

ALWAYS SAFE. NEVER SORRY. This overpressure jacketed hollow point provides more energy for maximum penetration and controlled expansion of the mushroom. Accurate and effective, it's made for critical situations when your personal safety is threatened.

A box of 9mm Luger 117 Grain +P Jacketed Hollow Point ammunition. The box is red and black. It features the text "9mm Luger +P", "117", and "JACKETED HOLLOW POINT". The box is shown at an angle, facing right.

9MM LUGER 124 GRAIN FMJ / FULL METAL JACKET						PISTOL		NO. 1E092110	
	PACK MORE PUNCH. Originally made for the Mexican military and law enforcement, this hard-hitting round is now available to civilian shooters. It's engineered so the crimp on the casing reduces potential for set-back of the projectile. This round is perfect for home defense, tactical scenarios, right down to target shooting.								
	BULLET WEIGHT		VELOCITY		ENERGY		PACKAGING		
	Grams	Grain	Muzzle ft/sec	100 yds ft/sec	Muzzle ft/lb	100 yds ft/lb	Case	Rounds Per Box

SHOTSHELL

Hunting and competition. Clays and home defense.
.410 Bore to 12 Gauge and everything in between. It's fair to say
our extensive shotshell line has something for everyone.

SHOTSHELL TECHNICAL SPECIFICATIONS

Fowling piece, scattergun, peppergun, shotgun, the naming choice for your pride and joy isn’t important, but what goes in it is. The blunderbuss, arquebus and musket all had their place in early shotgun history for their incredible close-range firepower and moving target effectiveness, but were limited to rough shot and out of round steel to be shot out of their 4 ½’ to 5 ½’ smooth bore barrels. Today’s sophisticated offerings require a little more finesse. Enter Aguila shotgun shells. From high velocity buckshot to Pichón Plus, from 16 gauge to the versatile Minishell slug, the same strict performance standards, high quality materials, and attention to detail used in the pistol cartridges is found under ever crimp of every shell. Aguila shotgun shells are redefining the genre. Aguila’s extensive shotshell line has something for everyone – whether the application is hunting, competition, clays, or home defense – .410 to 12 Gauge and everything in between.

SHOTSHELL / FIELD

12 GAUGE / HIGH VELOCITY SHOT								
	AS THE SAYING GOES, SPEED KILLS. Perfect for hunting and target shooting, these high-velocity shot loads are made from clean combustible powders for maximum output and minimum residue. Available from 2 shot to 9 shot.
