

NIGHT LIGHTS

These innovative designs and classic originals are a practical and decorative way to illuminate hallways and bedrooms for added safety in the home after dark.

NIGHT LIGHTS

Westek Night Lights enhance the safety and convenience of the home and are offered in designs and finishes to match any décor. The convenient plug-in operation and integrated LEDs eliminate the fuss of replacing batteries or bulbs. They can be safely plugged into a wall socket, providing a soft glow throughout the room.

These beautiful lights are a great way to illuminate pathways such as entrances, stairways, and hallways, without disturbing anyone in nearby rooms. They provide a safe path around the home at night, without the risk of tripping or disturbing anyone from their slumber by turning on overhead lights.

With many styles and functions, Westek offers night lights to match any décor for any purpose – making the home beautiful by day, and safe at night.

Color Temperature (Warm versus Cool)

Color temperature is expressed in kelvin, using the symbol K, a unit of measure for absolute temperature. Color temperatures over 5000K are called “cool colors” (bluish white), while lower color temperatures (2700K–3000K) are called “warm colors” (yellowish white).

Lumens

Lumens measure how much light you are getting from a bulb. More lumens means it's a brighter light; fewer lumens means it's a dimmer light. (Watts measure energy use, not light output.)

Light Control Features

Dusk to Dawn – Automatic light sensing control to operate only in the dark

Manual Switch – Easy on/off control without having to unplug

Always On – Popular for ambient light to enjoy all day

Motion Activated – Motion control to turn on light or increase brightness

VINTAGE EDISON LIGHT

Make a statement with these nostalgic Vintage Edison Lights! Designed with the classic squirrel cage LED filament, these night lights have the flair that makes them an excellent accent light reminiscent of the 19th century. They automatically turn on at dusk and off at dawn and cast a warm, amber glow.

Available in 2 different finishes, these lights are sure to be a conversation piece!

- Aged Bronze
- Aged Nickel

Decoplug™ Night Light

The Decoplug™ night lights are perfect for kitchens, hallways, bathrooms, bedrooms and more. They provide soft illumination in the form of a decorative outlet cover without compromising functionality.

The light sensing technology activates the LEDs automatically as it detects a decrease in light and gives enough illumination to help navigate your way around, eliminating the need to turn on an overhead light.

The front-facing frosted lens ensures an equal distribution of light while reducing hot spots and the LED bulbs cast a relaxing, warm and soft glow. The various styles and finishes available can provide an elegant accent for any decor.

TANGIER DECOPLUG™ LIGHT

- Quatrefoil pattern design
- Hides outlet plugs, rotates up when needed
- Auto, 2 lumens, 3000K

- Floral pattern design
- Hides outlet plugs, rotates up when needed
- Auto, 2 lumens, 3000K
White: NL-DPFL-W
Satin Nickel: NL-DPFL-N
Aged Bronze: NL-DPFL-DB

Seamless Coverage

Decoplugs™ are the perfect solution for hiding those unsightly unused outlets in the home. Our Patent Pending innovation perfectly centers the night lights over any wallplate unlike others that sit high and block the second outlet. However, the 360 degree rotation feature preserves functionality of the second socket when needed.

360° Rotation

These Decoplugs™ can be positioned to make use of the second outlet by simply rotating the cover 180° upward to expose it. No longer is there a need to remove the night light from the outlet or reposition it in effort to keep the adjacent outlet free for use.

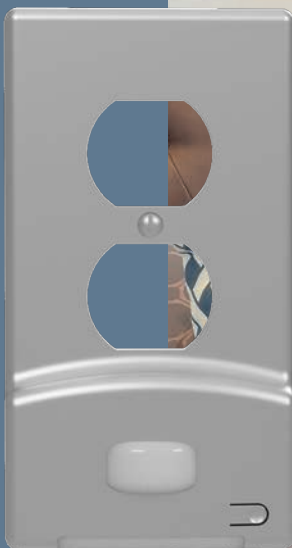

PREMIUM CLASSIC OUTLET WALLPLATE NIGHTLIGHT

The Lumicover Night Light Wallplates have a low-profile design and fit onto your existing plug to operate the LEDs. The premium wallplate night light automatically increases its light intensity when it detects motion, from either off or low night light level. The higher intensity brightness lasts 60 seconds then returns to its original level of light. The color-changing feature allows you to select any color of the rainbow by pressing a button, while maintaining dual-brightness.

Available in classic and decor duplex outlet configurations and 4 different finishes.

- White
- Light Almond
- Nickel
- Bronze

CORE CLASSIC OUTLET NIGHTLIGHT WALLPLATE

- Projects light downward
- Auto, 1 lumen, 3000K
