AccuTEC
BLADES

2017

INNOVATIVE. INVENTIVE. INSPIRED.

For over 140 years, from the time the original Star Razor Company moved to the heart of the Shenandoah Valley, our company has been designing and engineering high quality precision blades. All along, we have provided manufacturers and distributors with specialty blades that improve efficiency and quality so that they, in turn, can best serve their customers.

Yet what we did yesterday is never good enough. As technology evolves, so have our capabilities, and, today, our products step up to the demands of highly advanced manufacturing enterprises requiring high performance blades and bladed tools. In keeping with this commitment to advancing our products, we have adopted a new name that personifies precision engineering—AccuTec Blades!

NEW NAME. RENEWED COMMITMENT.

AccuTec Blades epitomizes the American can-do spirit of enterprise and invention. We are not just about manufacturing. We are about manufacturing preeminence—being the best possible in all we do. Already recognized as a leader in innovative surgical, histology, food, fiber, glass, flooring, DIY blades and bladed solutions, AccuTec Blades actively plans for what our customers will need in the years to come. We recognize that new ideas inspire new opportunities, and that success promotes success. It is in this spirit that we offer you, our valued customers, our expertise, experience, and exceptional blades.
