BONE CHEWS AND ANTLERS

Our All-Natural Antlers and Bone Chews come in several different forms, perfect for all dogs ranging from those with a passion for chewing to gentle nibblers. Gentle or frenzied, the scraping motion used to chew the bone or antler helps to promote a pearly white smile.

ELK VS. DEER

ELK

Elk are twice as large as deer species – translating to larger antler racks.

DEER

Deer antler is typically smaller and are about half the size of elk species.

SPLIT VS. WHOLE

SPLIT

Split antlers are recommended for dogs that are considered mild to hard chewers.

WHOLE

Whole antlers are recommended for dogs that are considered aggressive to power chewers.
