Superior Design

99% of leather gloves are designed for a flat hand, taking two pieces of flat leather and sewing a seam.

This antiquated design creates more strain on the stitching, leads to undue stress on the leather, and takes too long to break in a new pair of gloves. By the time your typical leather glove finally feels good, you've blown through the stitching or leather. Bear Knuckles has done more than just improve the leather glove: we reinvented it.

Today Bear Knuckles is disrupting the market by bringing the patented Double Wedge Design™ to a variety of gloves for all those seeking that extra grip, durability, and comfort. Whether you are a rancher, farmer, fabricator, welder, ironworker, or someone who wears gloves for DIY projects around the house, Bear Knuckles has the right glove for you!

Building around the Double Wedge Design™ Bear Knuckles has gone above and beyond to provide gloves with unrivaled benefits to all those who rely on their gloves when it matters most.

Key benefits:

- ***More comfort. No more hand fatigue from wearing gloves for hours.***
- ***More grip. No more leather bunching up in your palm.***
- ***More strength. No more sacrificing durability for performance.***

...and that's just being modest. Don't believe us? TRY THEM ON! Thank us later.

WHAT MAKES **Bear Knuckles** DIFFERENT?

FAST FACTS

1 Bear Knuckles Design removes the extra leather in the palm to prevent bunching and pinching.

2 Palm Seam at base of finger fits inside the hands natural crease.

3 The **Double Wedge™** design creates the natural shape of a relaxed hand, eliminating binding and bunching while reducing hand fatigue.

4 Less Stitching allows thicker leather to be used for longer lasting gloves. Our design moves or eliminates stitching in critical areas where most wear occurs.

5 Leather Gussets cover the seams that take the most stress to improve durability.

6 The **Wing Thumb** is two separate pieces of leather that holds the thumb over the palm where it rests naturally. This allows the thumb to move without bunching leather. Most gloves are designed with the thumb flat out to the side.

Bear Knuckles: The All American Glove

GLOVE STYLES

COWHIDE DRIVERS GLOVES

D351

\$24.95
MSRP

- ◀ Patented Double Wedge design (Extreme Curved Finger)
- ◀ Shirred back (Elastic stretch band for secure fit)
- ◀ Purpose placed gussets for longer lasting construction
- ◀ Minimized seams for less stitching wear
- ◀ Ergonomic design that reduces hand fatigue
- ◀ Less stress on gloves that will create a longer life

Measure the circumference around the palm at the widest point of your hand. If measurement is between sizes, size up.

Glove Care & Maintenance

Conditioning for 1st Time Use

To achieve a perfect fit, Bear Knuckles gloves should conform tightly to your hands when wearing for the 1st time as leather will stretch.

Break-in Steps

Put gloves on
Spritz with water
Wear until dry

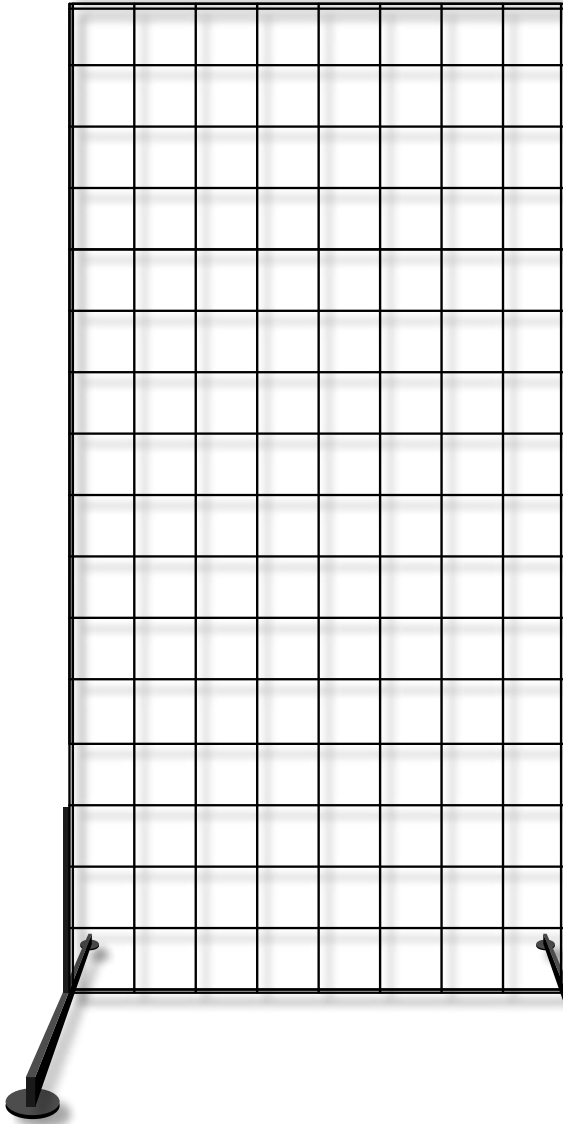

Note: If gloves are water/oil resistant, use mink oil or leather conditioner instead of water

Maintenance & Cleaning

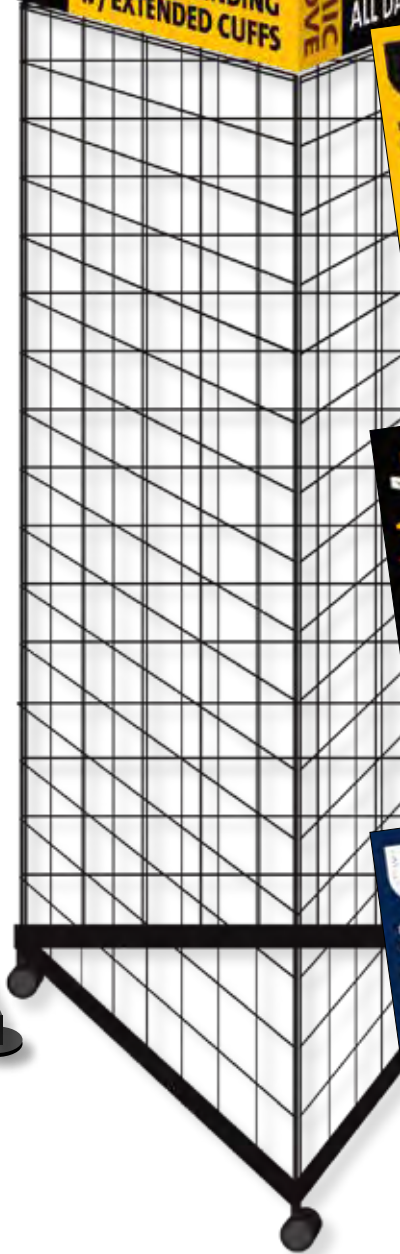

All Bear Knuckles gloves are safe to hand or machine wash and dry. After machine washing, gloves will shrink to original size and may be stiff. Follow Break-in Steps above to recondition.

MERCHANDISE RACKS & SIGNAGE
