

Clamping angles and miters

Angle clamps for construction and woodworking

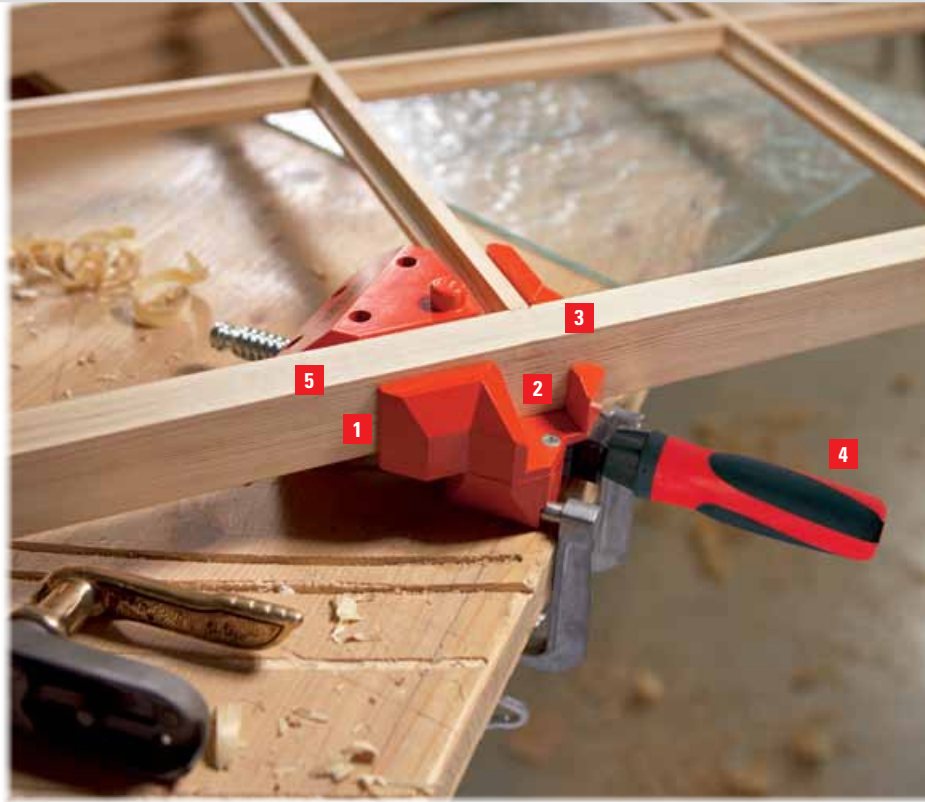

Simply better.

Small and very handy

WS Angle Clamps

- 1 Sturdy frame**
Die-cast jaws coated to protect work.
- 2 Versatility**
Designed for clearance of dowels, screws or staples while gluing.
- 3 Right angle clamping**
Holds and aligns material at 90° angle.
- 4 BESSEY® comfort**
Your choice of the tried-and-true wooden handle or the 2K composite handle with a comfort insert.
- 5 Adjustable**
Adjust automatically to wood thickness.

Angle Clamp Video

- Ideal for clearance of dowels, screw or staples while gluing.
- Holds and aligns material at 90° angles and even adjust automatically to wood thickness.
- Use the TK-6 Table mount clamp to hold wood handle version in place.

	Handle Style	Maximum Clamping Capacity	Max. Passage for T-Joints	Approx. Weight
WS-3+2K	2K	Both sides-max 4" thick	1 1/8"	2.40 lbs
WS-6	Wood	Both sides-max 8" thick	2 7/16"	4.80 lbs
TK-6	Table Mount Clamp (TK) Accessory Holds WS to work surface, 2/set (included with 2K version)			

Corner clamp (WS)

- An economical alternative for fixed 90° angle for miter or butt joints.
- Use the mounting holes to fix the corner clamp to your work surface.
- Can be adjusted to various sized work pieces with the 2 spindles.
- Made for light duty clamping.

	Clamping Capacity	Angle	Approx. Weight
WS-1	Up to 2 3/4" per side	90°	0.50 lbs.
