Handmade Belgian Candles

These candles combine pure craft with contemporary design. Each color is manually mixed, and each wick is positioned by hand in a Belgian studio. They are then individually molded and the finishing and packaging completed by hand.

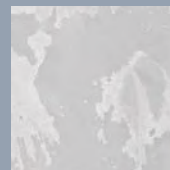

All production runs are completed in small series to safeguard the quality of the candles. The coarse frost effect gives these pieces a unique appearance and charm.

Due to the top quality ingredients, the candles produce minimal soot. The composition is mainly paraffin wax with mineral colorants. Wicks are made of high-quality cotton.

While maintain stock on the seasonally changing colors pictured below, each candle is also available in 75 additional colors by special order.
