A CLEAN FIREARM IS A SAFE AND ACCURATE FIREARM

There is a lot more to firearm safety than knowing your target and keeping your muzzle pointed in a safe direction. Gun safety begins before you chamber a round or step on the field or range. It begins with equipment that is properly maintained. A clean firearm is a safe firearm. A dirty, fouled action can cause jams, ejection problems, misfeeds and even misfires. Our products are formulated to protect and clean to the highest standards.
