We're pleased to present our 2021 Product Catalog, where you'll find our outstanding product lines.

Ordering is easy and convenient as we've consolidated our multiple catalogs into this single, product-packed volume. We offer an amazing range and variety of products making us a single source for the purchasing needs of independent retailers and landscape supply businesses. We do more than deliver high quality products; we package them with great customer service.

Enjoy browsing our catalog. We welcome your comments, ideas, and, of course, your orders. Simply call 800.845.3343 or email info@borderconcepts.com. We're looking forward to hearing from you soon!

In The Beginning

A Brief Company History

New Border Concepts' 18,000 sq. ft. showroom in Lexington, NC.

In 1990, Neil Miller and Tony Ferguson founded Border Concepts, Inc. in Charlotte, NC as a steel landscape edging systems manufacturer. Through the years, this grass roots business grew organically, expanding our product lines based on the needs of the company's customer base: garden centers, growers, contractors, landscape supply yards, and other independent retailers.

In 1994, we introduced Iron Edge®, the country's first galvanized steel paver restraint. The following year we developed a ball cart, which earned national recognition and led to a new line of tree carts, nursery carts, and retail carts. We also launched our first decorative steel and wrought iron products including: hanging baskets, window baskets, hooks, trellises, arbors, and plant stands – all in a wide range of prices. This product line expanded our manufacturing facility in Lexington, NC to over 90,000 square feet.

Ten years later, we introduced a line of quality pottery, which led to our acquisition of the International Pottery Alliance. Before long, we started importing the best pottery worldwide from manufacturers in Germany, Italy, Malaysia, China, Thailand, and Vietnam. Once again, we expanded our facilities with a brand new 100,000 square foot distribution center to complement our manufacturing plant.

In 2014, we expanded to the west coast by opening our new distribution facility in Kent, WA. The Seattle warehouse serves as a prime outlet and source for customers to conveniently access Border Concepts' quality lawn and garden products on the west coast. The new warehouse stocks inventory from most product lines including pottery, wrought iron, steel edging, Nature's Gallery resin animals, ball carts, and tools.

Today, Border Concepts is a multifaceted company, offering the following products to our independent retail customers created by our own designers: resin animals, tracking trailers, commercial and residential tools, and a full line of store display fixtures. We continue to carry our nationally recognized reputation as a premier commercial supplier of steel landscape edging into each of our product divisions.

Manufacturer
When we design and manufacture a Border Concepts product, we offer the best quality and price point for our customers. We're innovators when it comes to developing and manufacturing specialized products for the lawn and garden industry. At BCI, we provide creative solutions, exciting ideas, new designs, sizes, and shapes.

We focus on customer service and flexibility thanks to our dedicated work force in our 90,000+ square foot manufacturing facility in Lexington, NC. This "Made in the USA" team's capabilities include welding, bending, cutting, stamping, assembling, punching metal and steel products. In addition, we now powder coat terracotta standard pots.

Is there a highly customized project or distinctive lawn and garden product you've been thinking about? Put our designers, facilities, and experience to work for you. We'd love to be your partner in creating an original solution tailored to meet your specific needs.

Importer
Our overseas contacts are a valuable resource for our company and our customers opening global capacity and competitiveness. Team members travel throughout the world to scout potential partners. Border Concepts works solely with companies that share our high standards of quality and integrity. The excellent relationships we have with our overseas partners are based on good communication. We visit their factories regularly for in-person consultations and product quality verifications.

Each country offers unique skills, styles, and price points – so it's critical that we import from a broad range of countries. In doing so, we're able to provide our customers with an outstanding variety of products and styles to satisfy all tastes and budgets. This is especially true for our largest import item which is pottery. We import hundreds of containers from all over the world virtually guaranteeing that we can provide you with the product you need when you need it.

Distributor
Border Concepts has the infrastructure necessary to provide our independent retailers with the superior service they deserve. Our 100,000 square foot distribution center in Lexington, NC, along with our Kent, WA facility, and our newest facility in Pittston, PA complement the manufacturing side of our business.

Because we have the ability to ship directly to you, there's no need for a traditional distributor. We're able to keep the exclusivity of our multiple product lines available to you as a retailer.

As a result, our customers get more for their money. There's no pricey middleman. Plus, by combining varied items such as ceramic pottery, hanging baskets, wrought iron trellises, nursery carts, tools, and arbors, customers save big on freight costs. Our customers are able to buy from a single supplier further reducing costly duplication of products and vendors.

We supply our customers with more than just products – we offer them selection, quality, service, and exceptional value that can be passed on directly to the public.

Pottery Assortments

You'll enjoy these collections of our best-selling pottery shapes and glazes from China, Malaysia, Vietnam, and Mexico.

Each one represents a nice mix of basic pottery. These assortments are packed as half pallets and consist of minimal quantities of a variety of shapes. Most assortments feature a single color making it easy to "color block" your pottery displays.

Once you have the basics covered with these assortments, you can add Pottery Open Stock to offer your customers even more choices in shapes and glazes.

Pottery Open Stock

Pottery Open Stock consists of collections of pottery from different countries that offer a diverse range of shapes, styles, colors and textures.

These collections beautifully complement the basic, best-selling items in our Pottery Assortments. You can try our newest shapes and glazes without having to buy a mixed pallet. Because you are able to buy such a wide range of product from one source, Pottery Open Stock allows you to consolidate your pottery vendors.

Tips For Better Displays & Increased Profits

HAVE A PLAN

- Draw a map of the department to have a visual reference.
- Write notes as you buy product for that area.
- Know where you are going to put it BEFORE you buy.
- Note purchases on your map.
- By following this guideline you reduce product that never seems to find a home and looks messy and out of place wherever it lands.

DISPLAY FIXTURES

- Invest in quality fixtures to set yourself apart from your competition by upgrading the look and feel of your garden center.
- Have a plan for replacing old and unsightly shelving.

Old fixtures

New fixtures

COLOR

- Color block product by grouping objects together by color. Display either a single color or a range of shades of the same color on each fixture.
- In the off-season product can be grouped with two colors on the same fixture. Try to stay with two colors that complement each other and the season. (Example: Red and Amber in fall or White and Blue in summer).
- Color blocking helps to gauge what is selling or not in season so that you can react by reordering hot selling colors or mark down slow moving colors.

Great impact – colors show well against each other.

Tips For Better Displays & Increased Profits

BALANCE

- Balanced Asymmetry makes the display interesting to look at and allows for more product in a smaller area.
- Look at your pottery display, there should be a 2/3 balance of standard, egg and bowl shaped containers with 1/3 being tall, square and elongated styles. If your display contains too many of the same shape items it will be off balance visually.
- Keep it Simple. When displays are simple, they are easier to maintain and customers aren't afraid to shop from them. Keep it to three colors / elements or less.
- When planning your pottery area, basic terracotta is a great group to put on a back wall or in a dead corner. This is a destination item. The same idea applies to plastic containers; put these as far to the back as possible, if they want an inexpensive pot, make them walk through every other beautiful container you have for sale.

Asymmetry gives the eye somewhere to land. Once you have caught their eye, they will take in more detail of what is contained in the display.

MAINTAIN

- Have a designated person for your container category. Hold them accountable for the appearance in their area. When someone “owns” the category, it shows on the bottom line.
- Make sure when pricing, you apply labels to the outside of the pots; this makes it easier for customers and cashiers to find the price quickly.
- Multi surface glass cleaner attaches to your garden hose, gets pots clean and then repels dust. Just be careful so that you don’t wash off your pricing or UPC labels.
- Signage telling customers that they can ask for help with large pots lets customers know that you are there to help and to minimize breakage. Having staff available to help customers with larger products is key for greater sell through.
- When you have sold through most of a color story or display and don’t plan to reorder, move the pots to a clearance area. You don’t have to deep discount right away; you can do mark downs in stages. This keeps your primary display areas new and fresh as well as allowing you to free up inventory dollars faster. Also by moving product at a shallower discount you retain more margin.

Pottery Planting & Care Guidelines

We take great care to ensure that all Border Concepts' planters are produced to the highest standards. To extend the life of your planter and to promote healthy plant growth it is important that you follow a few simple planting guidelines to get the best possible performance.

GETTING IT RIGHT

We recommend that you:

- allow adequate drainage
- use good compost
- raise the pot off the ground

POTTERY CARE GUIDELINES

Glazed Pottery
Simply clean with water and a soft cloth.

Terracotta
Use water and a stiff brush to remove algae and dirt.

Cast Iron
To protect the original finish and reduce rusting, apply a clear coat sealant. Consult your local hardware store for the proper sealant.

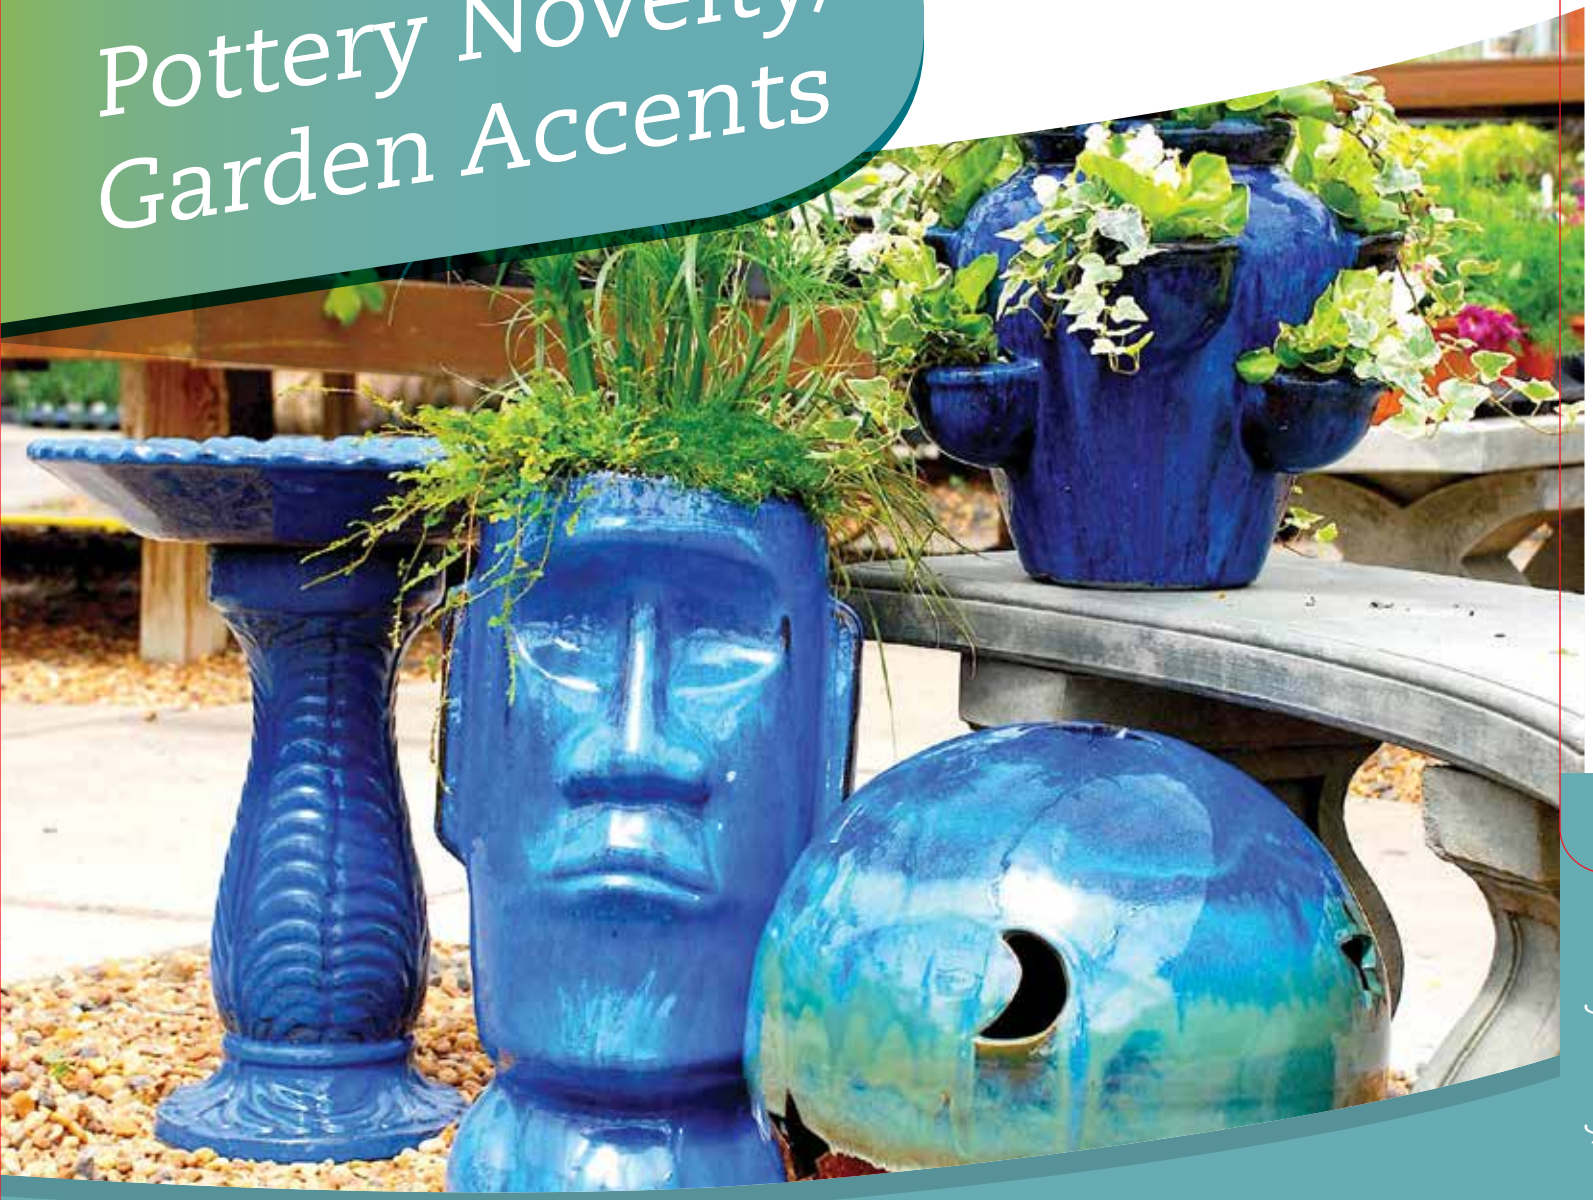

Fiberclay/Fiber Cement
This porous material naturally absorbs salts and minerals which will age the finish over time. Clean with water and a soft cloth. A clear coat sealer may be used to reduce aging. Consult your local hardware store.

WHAT DOES FROST RESISTANT MEAN?

Generally frost resistance means that the pot should be able to be kept outdoors in freezing temperatures. The key to survival of the planter throughout the winter months is to ensure that the planter has proper drainage so that excess water does not build up and freeze. Water expands when freezing and could cause the planter to crack. We recommend elevating the planter off the ground with pot feet and make sure that the drain hole remains unclogged.

Terracotta Collection

The Terracotta Collection offers the best shapes in German and Italian terracotta.

Our premier line of German terracotta is considered the world's finest terracotta crafted from finely filtered red, chocolate, marbled, and granite clays. German terracotta pots are high fired and frost resistant. The finely filtered clay process results in clean lines and an incredibly smooth texture on each pot. Our line of Italian terracotta exudes old world elegance many customers desire. Also high fired and frost resistant, Italian terracotta boasts the traditional look of classic terracotta with a slightly rough hand feel.

We offer a wide range of accessories to complement all of our pottery. Our products feature everything your customers need including high quality clear vinyl saucers, cork mats, carpet savers and plant trays. Additionally, we offer these products in floor ready displays to keep your garden center organized.

German

Matching Saucers

- Considered the world's finest terracotta pot
- High fired
- Crafted from finely filtered clay
- Smooth texture

Fixtures, Displays, Carts & Tools

Creator of one of the nation's finest lines of innovative retail fixtures and displays, our "industrial chic" designs feature a stylish interplay of wood against metal. Our stained board decking fits into a sturdy one-piece steel frame. Our products are known for affordability, quality, functionality, and versatility. Built with strong, durable structural steel tubing coated with resilient powder finishes, our fixtures are produced to the highest standards in Lexington, NC. We'll be glad to powder coat your display any color at minimal cost or customize to meet your specifications.

We also supply extremely popular, high quality tools and carts, steel edging, galvanized steel paver restraints, two-wheel and four-wheel nursery carts, farm wagons, custom fabricated carts and tracking trailers.

The History of the Histand Tool Line

Robert H. Histand was a Pennsylvania Dutchman who devoted his life to serving others. This highly respected businessman was a great friend and mentor to Border Concepts and a legend in the tool industry. In early 2000, we asked Bob to design the best tools for the trade, which he accomplished. Much to our sadness, Bob passed away in spring of 2002 just weeks prior to our first production run. Because of his dedication and contribution of wisdom, spirit, time and heart, to both the industry and Border Concepts, we proudly introduce the Robert H. Histand signature Tool Series.

Our heartfelt thanks to Sarah, his wife, and his family for allowing us to honor him this way: Robery H. Highstand (1941 - 2002).
