### Aligns & Holds Tiles for a Smooth Floor

### For perfect tile-to-tile leveling

The patented LASH system is designed for quick installation and reduces costly call backs by insuring that the finished floor surface is lippage-free. This time saving system helps adjust the height of the tiles and evenly holds their edges throughout the curing process of the setting material.

- Wedges are reusable

### Advantages to the installer:

- Very easy to learn and use at any skill level
- Great for use with tiles of varied thickness
- Requires minimal effort to install and remove
- Virtually eliminates lippage
- Prevents tile from moving during the installation
- Speeds up installations
- Less time at the job = more jobs in one day = more profit
- Decreases call-backs due to poor installation

Once the mortar sets, simply kick the clips, forcing them to snap off at the specially designed break-points.
