APPLIANCE CONNECTORS

The B&K Supply Line & Appliance Connector offering has been greatly expanded to include more sizes and lengths than we previously had. Our offering still includes PVC, PEX and Braided Stainless Steel lines.

Some of our new items include the Universal Faucet & Toilet Kits. These kits are supply lines that have four universal fittings in a clamshell connected to the line. We also have included several new lengths of lines with different connection types.

APPLIANCE CONNECTORS

The B&K Appliance Connectors is a newly expanded category. Not only have we expanded our standard offering but we also added SureDry™ items. Our appliance connectors are flexible and durable and come in braided stainless steel and PVC.

This category includes connectors for Dishwashers, Washing Machines, Ice Makers, Water Heaters and Steam Dryers. Our connectors are held to the highest standards and to ensure quality when you chose B&K.
