THE INSIDE STORY

Immigrants and explorers. Loggers, traders, millers, merchants, farmers with crops, and cattle. Pioneer spirits stopped, stayed and started working at the port of Winona; an island city cradled by the Mississippi River on one side, towering limestone bluffs on the other. Winona connected the Midwest to the world, centered in a vast and fertile land where labor was a way of life. Henry Behrens, born in Germany, came to America in 1867, ventured to this bustling river town, was married, had a son they called Henry J and played the role of carpenter and contractor.

WHEN THERE IS WORK TO DO, TOOLS ARE NEEDED

This was a hard-working, thriving community and Henry opened a hardware store on Third and Grand to serve it. On the second floor of this store, Henry J, then 14 years old, tinkered and played with metal, recognizing new ways to make his father's customer's lives easier. With the "Cyclone Spinner" created to help people wash their clothes, Behrens Manufacturing was born. Innovation in its earliest form.

A HANDCRAFTED HERITAGE MADE IN THE USA

The company and its products have stood the test of time. You can see the same workmanship in the details. You'll feel the continued strength and confidence in the materials. You'll recognize the true authenticity and unmatched quality melded out of American pride.

Behrens carries on. While the products we create today still help the world work and get organized, today our purpose transcends function and surpasses utility. From the tubs that hold the Farmer's Market's first blossoms to the pails that gather sands at the lake and hold cold beer... our greatest passion is to inspire, to bring joy and add beauty.

FORGING THE FUTURE

Historically, the most important properties of steel were durability, strength and its ability to be shaped into many useful products. Today, while those aspects are still important, there's more that matters.

STEEL IS SUSTAINABILITY.

Highly durable, weather, chemical and rodent resistant Behrens products are 100% recyclable. When metal products reach the end of their useful life, the materials are simply collected and recycled, again and again, with no loss of their inherent properties.

Abandoned steel objects such as ships, oil rigs, etc. are used to create artificial reefs to boost sea life and are a boon to ecological efforts.

We manufacture responsibly, preserving the earth's natural resources, reducing energy consumption and emissions.

THESE ARE PRODUCTS THAT RESPECT THE PLANET.

NOT ALL STEEL IS CREATED EQUAL.

Behrens steel products are more durable than plastic and resistant to

RODENTS

RUST

ODOR

Cans

HOLD EVERYTHING

these products are built to last. Made with the highest quality galvanized steel, interlocking seams provide superior strength and offset bottoms keep cans off the ground. From yard waste to trash, holding cold beverages, or decorative plants, they work hard and look good around the home, farm, shop and patio.

TRASH / UTILITY CANS

- Superior structure and strength
- Built to last. Weather, chemical & rodent resistant
- More durable & longer lasting than plastic

GALVANIZED SHEET STEEL

Coils of sheet steel are galvanized at the mill. Coating thickness is more consistent. Sealed seams provide water proof properties and protection from leaks.

HOT DIPPED GALVANIZING

After the metal container is constructed, it is dipped in a bath of molten zinc to coat and seal the shape. Zinc on steel provides protection from rust and corrosion.

MATERIAL: Hot Dipped Steel

ITEM #	PRODUCT DIMENSIONS	CAPACITY	MIN MASTER
