## NOW 45% LIGHTER.

Designed for easier handling and installation, new Therma-Tru Fiber-Classic and Smooth-Star 20-minute Fire-rated fiberglass doors are now 45% lighter thanks to a polyurethane foam core.

### Tru-Advantages

- Choose from a wide selection of wood-grained and smooth doors designed to complement interior and exterior styles.
- Therma-Tru® Fire-rated fiberglass doors provide durability and long-term performance, resisting scratches, dents and rotting.
- Backed by industry-leading warranties for peace of mind.

All doors will feature a full length wide lock stile and standard reinforcement for closer and panic hardware.

Certified to carry the Warnock Hersey Mark – North America's leading product safety and performance mark for building and construction products. Tested to withstand a minimum of 20 minutes of fire exposure with temperatures that reach more than 1,400 degrees Fahrenheit. Designated a Category B positive pressure door.
