

CCI[®]

The Leader in Rimfire Ammunition[®]

2018 CATALOG

OPTIONS FOR EVERY SHOOTER FROM THE LEADER IN RIMFIRE AMMUNITION

Every CCI round begins the same way—with a commitment to deliver the best possible performance for every shooter. As part of that promise, we are constantly developing new loads and projectiles built around real-world needs. While other manufacturers are content to offer a small selection of general purpose loads, CCI crafts ammunition customized to perform to the highest standards of specific disciplines. And our high-capacity manufacturing and wide distribution ensure we put the most product on store shelves for shooters. It's why we remain the leader in rimfire ammunition. Thank you for shooting CCI.

MINI-MAG® SEGMENTED HOLLOW POINT

NEW!

The new Mini-Mag Segmented Hollow Point combines all of what made our original Mini-Mag a favorite with a bullet engineered to split into three equal-size parts on impact. Learn more page 6.

VNT™ 17 HMR **NEW!**

New VNT 17 HMR offers flat trajectories, superb long-range accuracy and explosive terminal performance on impact. Learn more on page 5.

TNT GREEN®

Get match-grade accuracy and maximum lethality on varmints in a non-lead bullet with CCI TNT Green. The 17 HMR load offers explosive expansion on impact and reliable CCI priming and brass.

- Lead-free bullet
- Explosive terminal performance
- Match-grade accuracy

TNT®

- Explosive on impact
- Minimal mid-range rise
- Nearly identical point of aim to V-Max in 17 HMR

VARMINT

Cartridge/Product Name	Part No.	Caliber	Bullet Style	Wt. (grs)	Muzzle
17 HMR TNT GREEN *	0951	17 HMR	TNT GREEN HP	16	2500

22 MAG TNT GREEN	0060	22 WIN. MAG.	TNT GREEN HP	30	2050

* To avoid serious injury do not use in semi-automatic firearms without consulting with your firearms manufacturer, use only in modern firearms in good condition marked for 17 HMR cartridges.

VNT™ NEW!

Devastate varmints or drill targets at long range with new CCI VNT. The 17 HMR loads feature a Speer® bullet with an extremely thin jacket and polymer tip that team up to offer flat trajectories, superb long-range accuracy and explosive terminal performance on impact. It's the perfect combination for hunting varmints or shooting at the range.

- Speer VNT bullet design
- 100 fps faster than comparable 17 HMR loads
- Devastating terminal effect on varmints

V-MAX®

- Flat-shooting
- Accurate
- Explosive expansion
- Available in 17 HMR and 22 Win. Magnum

VARMINT					
Cartridge/Product Name	Part No.	Caliber	Bullet Style	Wt. (grs)	Muzzle

MINI-MAG® SEGMENTED HOLLOW POINT **NEW!**

Mini-Mag remains one of CCI's most popular 22 LR loads, offering unbeatable accuracy, high velocities, flat trajectories and superior reliability. The new Mini-Mag Segmented Hollow Point combines all of what made the original a favorite with a bullet engineered to split into three equal-size parts on impact, creating three distinct wound channels that quickly take down varmints. The ammunition also features CCI's extremely reliable priming and specialized powders for clean, consistent ignition.

- Bullet splits into three equal-size parts on impact
- Flat shooting and highly accurate to maximize effective range
- Reliable feeding
- Clean-burning powder causes significantly less barrel fouling

New Mini-Mag Segmented Hollow Point uses a bullet that splits into three pieces on impact, tripling the lethality.

MINI-MAG®

- Reliable cycling
- Extreme accuracy
- High velocities and flat trajectories

VARMINT					
Cartridge/Product Name	Part No.	Caliber	Bullet Style	Wt. (grs)	Muzzle
MINI-MAG SHP	36CC	22 LONG RIFLE	SHP	40	1235
MINI-MAG HP	0031	22 LONG RIFLE	CPHP	36	1260

STINGER®

Stinger 22 LR loads produce a muzzle velocity of 1,640 fps and are loaded within industry standard pressures. They shoot flat, anchor varmints fast and provide reliable performance thanks to CCI priming and brass.

- Hyper-velocity
- Loaded within industry standard pressures
- Anchors varmints fast

22 SHORT HOLLOW POINT

- A CCI exclusive
- Great stopping power
- Reliable expansion

VARMINT

Cartridge/Product Name	Part No.	Caliber	Bullet Style	Wt. (grs)	Muzzle

22PLINKSTER'S FAVORITE

CCI Stinger isn't just a great load for pinning down varmints. It's also one of the top choices of YouTube shooting sensation 22plinkster. He relies on the accuracy and consistency of Stinger and other CCI loads to pull off the jaw-dropping trick shots that have to date attracted more than 400,000 subscribers and nearly 60 million views.

[youtube.com/user/22plinkster](https://www.youtube.com/user/22plinkster)

A17®

Get magnum rimfire performance in a semi-automatic rifle with A17 Varmint Tip ammunition. CCI engineers literally built this 17 HMR load around the A17 rifle from Savage®. The round is optimized for feeding and function in the semi-automatic rifle, and produces muzzle velocities 100 fps faster than other 17 HMR loads with the same bullet weight. Its Varmint Tip bullet ensures explosive expansion and quick, clean kills.

- Optimized for the Savage A17 semi-automatic and can be fired through bolt-action 17 HMR rifles
- 100 fps faster than other 17 HMR loads of the same weight
- Varmint Tip bullet provides rapid expansion

SEGMENTED HOLLOW POINT

- Lethal terminal effect
- Bullet breaks into three parts on impact
- Each segment creates its own wound channel

A17 17 HMR (949CC) shot into bare ballistics gel at 100 yards; 6 inches penetration.

LANDRY SIGNATURE SERIES

You might never need to stop an ornery alligator, or depend on your marksmanship to put food on the table, but with the Troy Landry Signature Series, you'll know you can. Landry, from the series Swamp People™ on HISTORY®, has trusted his livelihood to the proven 22 WMR and 22 LR loads for decades.

- Gator-tested performance trusted by Troy Landry
- Clean-burning propellants
- Reliable cycling
- Surefire CCI priming

MAXI-MAG®

- Clean-burning propellants
- Maximum velocities
- Maximum energy transfer on impact

COPPER-22™

You'll enjoy accurate, reliable performance on targets and small game in a non-lead bullet with Copper-22. The projectile is constructed from a unique mix of copper particles and polymer compressed into a potent, 21-grain hollow-point bullet. Combined with CCI's reliable priming and propellant, Copper-22 loads achieve a muzzle velocity of 1,850 fps and provide superb accuracy.

- Non-lead bullet suited for small game hunting, plinking and target shooting
- 21-grain hollow-point bullet
- Compressed copper-polymer construction
- 1,850 fps muzzle velocity
- Excellent accuracy

SUB-SONIC HP

- Low noise
- Bullet expands without fragmenting
- Great performance on small game

SMALL GAME BULLET

- Better stopping power than round-nose bullets
- Flat nose creates cylindrical wound channel
- Less meat spoilage

SMALL GAME					
Cartridge/Product Name	Part No.	Caliber	Bullet Style	Wt. (grs)	Muzzle
COPPER-22	925CC	22 LR	COPPER HP	31	1850
SUB-SONIC HP	0056	22 LONG RIFLE	LHP	40	1050
SGB (SMALL GAME BULLET)	0058	22 LONG RIFLE	LFN	40	1235

QUIET-22™ SEGMENTED HP

Quiet-22 Segmented HP generates 75 percent less perceived noise than a standard velocity 22 Long Rifle round. However, its Segmented HP bullet splits in three on impact, with each section creating its own distinct wound channel to bring down small game fast.

- 40-grain Segmented HP bullet breaks into three pieces on impact
- 75 percent less perceived noise than standard 22 Long Rifle
- No hearing protection needed when fired in locked-breech firearms
- Standard 22 Long Rifle case
- Excellent accuracy

SUPPRESSOR

- Subsonic velocity further minimizes noise through suppressed firearms
- Hollow-point bullet consistently expands at low velocities
- Reliable function in suppressed semi-automatic firearms
- Clean-burning powders

SMALL GAME

Cartridge/Product Name	Part No.	Caliber	Bullet Style	Wt. (grs)	Muzzle
QUIET-22 SEGMENTED HP *	0970	22 LONG RIFLE	CPRN	40	710

* These cartridges may be used in semi-automatic firearms, however manual cycling of the action may be required.

VELOCITOR® HP

Shoot flatter and hit distant small game harder with CCI Velocitor HP loads. They're 200 fps faster than 22 Long Rifle high-velocity loads of the same bullet weight and provide excellent weight retention, downrange energy and penetration.

- 200 fps faster than 22 Long Rifle high-velocity loads of the same bullet weight
- Excellent weight retention
- Impressive downrange energy
- Deep penetration

SMALL GAME FMJ

- Punches clean holes
- 17 HMR option is a CCI® exclusive
- Very accurate
- No expansion

SMALL GAME

** To avoid serious injury do not use in semi-automatic firearms without consulting with your firearms manufacturer; use only in modern firearms in good condition marked for 17 HMR cartridges.*

A22 MAGNUM

A22 Magnum gets the most performance possible from the venerable 22 WMR cartridge. The light, 35-grain bullet boosts speed, while its GamePoint® design expands like a big game bullet on impact, maximizing terminal effects. CCI has enhanced the round even further by building it around the A22 Magnum semi-automatic rifle from Savage®. The rifle allows for the ultimate 22 WMR reliability and accuracy. A22 ammunition also provides precise, consistent performance with other rifles chambered in 22 WMR.

- Built around the Savage A22 Magnum semi-automatic rifle
- GamePoint bullet expands reliably for maximum terminal effect
- 35-grain bullet weight yields a 2,100 fps muzzle velocity
- Reliable cycling and excellent accuracy
- CCI brass and priming

GAMEPOINT®

- Dimple-Tip expands like a big game bullet
- Minimal meat and hide damage
- Accurate, powerful

SMALL GAME

* To avoid serious injury do not use in semi-automatic firearms without consulting with your firearms manufacturer; use only in modern firearms in good condition marked for 17 HMR cartridges.

22 AR TACTICAL

AR Tactical 22 Long Rifle loads are specifically designed for AR-style 22s. These rounds achieve 1.5-inch 10-shot groups at 100 yards in factory testing and provide fast, reliable cycling in rimfire MSRs. CCI brass, primer and bullet lube combine with clean-burning powder to provide consistent performance every time.

- Optimized for cycling and accuracy in rimfire MSRs
- 1.5-inch groups at 100 yards in factory testing
- Copper-plated round-nose bullet

22 LONG

- A CCI exclusive
- Only 22 Long load on the market
- Extreme reliability and accuracy

MAXI-MAG® TMJ®

- Consistent performance for plinking
- Utilizes surefire priming technology
- Jacket seamlessly encases lead core for accuracy

QUIET-22™

Set your 22-caliber rifle to stealth mode with CCI Quiet-22. It is ideal for bolt-action and single-shot rifles, and generates 75 percent less perceived noise than standard-velocity 22 Long Rifle rounds. It is perfect for areas where noise may be a problem and is ideal for introducing newcomers to the shooting sports.

- 75 percent less perceived noise than standard velocity 22 Long Rifle loads
- Excellent accuracy
- Low velocity

MINI-MAG®

- Original CCI 22 Long Rifle offering, and still the most popular
- Reliable feeding
- Clean-burning powder minimizes barrel fouling

SELECT	0045	22 LONG RIFLE	LRN	40	1200

BIG 4™

Centerfire handgun shotshells have proven themselves as highly practical options for close-range pests. CCI Big 4 loads extend the range and capabilities of these downsized shotshells, thanks to a payload of No. 4 shot. The resulting energy and patterns enable Big 4 loads to take down larger pests at longer distances, making them even more useful.

CENTERFIRE HANDGUN SHOTSHELL

- Great for close-range pest control
- Packed in reusable boxes of 10 shotshells
- Widely available in a variety of calibers

Big 4 38 Special/357 Magnum (3714CC) fired into bare ballistic gel at 10 feet; 6 ¾ inches penetration.

*DO NOT USE SHOTSHELLS IN FIREARMS WITH PORTED BARRELS OR PORTED RECOIL COMPENSATORS. DO NOT RELOAD THESE CARTRIDGE CASES. These cases are marked NR (Not Reloadable). Rupture of reloaded cases can cause severe injury. Intended for short-range pest control; not recommended for self-defense. Cylinder lock up may occur in lightweight revolvers due to capsule movement resulting from recoil inertia. * These cartridges are loaded with a lighter projectile than conventional 9mm Luger ammunition for use in pistols and revolvers. They may not function reliably in all models of firearms. ** May not function properly in rifles. *** These cartridges are designed to function in semi-automatic pistols. DO NOT USE IN REVOLVERS – cylinder lock-up may occur.*

RIMFIRE SHOTSHELL

- Consistent patterns
- Easier hits on pests
- Only 22 WMR shotshell load on the market

CB

- More effective at longer ranges on pests
- Accurate
- Great plinking loads

NOISE BLANKS

- Great for training
- Clean-burning propellant
- Work in any firearm chambered for 22 Short, Long or Long Rifle

22 WRF JACKETED HOLLOW-POINT

- 19th century favorite with 21st century technology
- Only 22 WRF JHP in the industry
- Copper composition and special base are ideal for old barrels

DO NOT USE SHOTSHELLS IN FIREARMS WITH PORTED BARRELS OR PORTED RECOIL COMPENSATORS. DO NOT RELOAD THESE CARTRIDGE CASES. These cases are marked NR (Not Reloadable). Rupture of reloaded cases can cause severe injury. Intended for short-range pest control; not recommended for self-defense. † Not for revolvers. Most 22 WRF revolvers have undersized bores that cannot use a jacketed bullet. Performance data derived from industry test barrels; provided for reference. Velocities from production firearms may vary. Specifications subject to change without notice.

PRIMERS

High-performance handloads start with CCI primers. Our designs are sensitive and proven to offer extremely consistent, reliable performance for every application.

BENCH REST RIFLE PRIMERS

- Built specifically for bench rest shooters
- Engineered to provide precision ignition in tough competition
- Assembled with extra care for superior consistency and accuracy

STANDARD RIFLE/ PISTOL PRIMERS

- Clean-burning
- Mil-spec offerings available
- Unmatched reliability

PERCUSSION CAPS

- Non-corrosive, non-mercuric priming compounds
- Choice of styles
- Assembled with soft, ribbed copper cups

209 IN-LINE MUZZLELOADING PRIMERS

- Optimized for muzzleloading
- Reduce fouling
- Formulated to ignite in humid conditions

MAGNUM RIFLE/PISTOL PRIMERS

- Provide extra heat and ignition power
- 20 percent hotter flame to light propellants in the toughest hunting conditions
- No loss in sensitivity

SHOTSHELL PRIMERS

- 209 primer designed for standard field and target loads
- Reliable, clean-burning
- Fit all modern shotshell cases with 209 primer pocket
- 209M is a true magnum shotshell primer for heavy waterfowl and turkey loads

FOUR-WING MUSKET CAPS

- Tough four-wing design
- Lighter explosive charge
- Designed especially for reenactment

PRIMERS IN APS® STRIPS

- Available for most popular primers
- Speeds up reloading
- Protects primers until used

ERIC GRAUFFEL WORLD IPSC CHAMPION

CCI's competitive shooting expert Eric Grauffel has an unprecedented winning streak. The French shooter has won more than 180 President Medals and has earned the title of World Champion of the International Practical Shooting Confederation (IPSC) seven consecutive years. For his competitive shooting, Grauffel uses only CCI small pistol primers in his hand-loaded ammunition. With CCI primers he gets the most reliability, efficiency and accuracy.

NOISE BLANK	0044	BLANK	—	—	—	—	—	—

CB = "conical ball" reduced power/noise; FP = flat point; CP = copper-plated; L = lead; J = jacketed; HP = hollow-point; RF = Rimfire; RN = round nose; SHP = segmented hollow-point; SP = soft point; TMJ = encapsulated full metal jacket. †—not for revolvers. Most 22 WRF revolvers have undersized bores that cannot use a jacketed bullet. Performance data derived from industry test barrels; provided for reference. Velocities from production firearms may vary. Specifications subject to change without notice. ††—Bulk pack. § Trajectory—bullet path based on 1.5 inches sight height. * Do not use 17 HMR ammunition in semi-automatic firearms without first contacting your gun manufacturer. ** Use only in firearms having standard ANSI sporting barrel/chamber dimensions. *** These cartridges may be used in semi-automatic firearms, however manual cycling of the action may be required.

Muzzle	Energy, ft-lb			Trajectory [§]			Box Ct.	Special Features
