## Section 2. Hazards identification

OSHA/HCS status

Classification of the substance or mixture

GHS label elements
Hazard pictograms

Signal word
Hazard statements
: This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
: FLAMMABLE LIQUIDS - Category 3
SKIN SENSITIZATION - Category 1
CARCINOGENICITY - Category 2
TOXIC TO REPRODUCTION (Unborn child) - Category 2
SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 ASPIRATION HAZARD - Category 1
Percentage of the mixture consisting of ingredient(s) of unknown oral toxicity: 26.4\%
Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 26.4\% Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 26. 4\%
:

: Danger
: Flammable liquid and vapor.
May cause an allergic skin reaction.
Suspected of damaging the unborn child.
Suspected of causing cancer.
May be fatal if swallowed and enters airways.
May cause damage to organs through prolonged or repeated exposure.

Precautionary statements

| Date of issue/Date of revision | $: 6 / 4 / 2018$ | Date of previous issue | $: 5 / 30 / 2018$ | Version | $: 4$ |

|  |  |  |  |  |  |
|  |  |  |  |  |  |

## Section 2. Hazards identification

General

Prevention

Response

Storage
Disposal

Supplemental label elements

## Hazards not otherwise

 classified: Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand
: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating, lighting and all material-handling equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Keep container tightly closed. Do not breathe vapor. Contaminated work clothing must not be allowed out of the workplace.
: Get medical attention if you feel unwell. IF exposed or concerned: Get medical attention. IF SWALLOWED: Immediately call a POISON CENTER or physician. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of soap and water. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention.
: Store locked up. Store in a well-ventilated place. Keep cool.
: Dispose of contents and container in accordance with all local, regional, national and international regulations.
DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE. Contains solvents which can cause permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
Please refer to the SDS for additional information. Keep out of reach of children. Do not transfer contents to other containers for storage.
: DANGER: Rags, steel wool, other waste soaked with this product, and sanding residue may spontaneously catch fire if improperly discarded. Immediately place rags, steel wool, other waste soaked with this product, and sanding residue in a sealed, water-filled, metal container. Dispose of in accordance with local fire regulations.

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture |
| :--- | :--- |
| Other means of | $:$ Not available. |
| identification |  |
| CAS number/other identifiers |  |

| Ingredient name | $\%$ by weight | CAS number |
| :--- | :--- | :--- |
| Light Aliphatic Hydrocarbon | $\geq 10-\leq 16$ | $64742-47-8$ |
| Titanium Dioxide | $\geq 10-\leq 25$ | $13463-67-7$ |
| Heavy Paraffinic Oil | $\leq 5$ | $64742-54-7$ |
| Amorphous Diatomaceous Earth | $\leq 3$ | $61790-53-2$ |
| Heavy Aliphatic Solvent | $\leq 3$ | $64742-47-8$ |
| Zirconium 2-Ethylhexanoate | $\leq 1$ | $22464-99-9$ |
| [(Trichloromethyl)thio]phthalimide | $<1$ | $133-07-3$ |
| Hydrotreated Heavy Petroleum Naphtha | $\leq 0.3$ | $64742-48-9$ |
| Methyl Ethyl Ketoxime | $\leq 0.3$ | $96-29-7$ |
| 3-lodo-2-propynyl Butyl Carbamate | $\leq 0.3$ | $55406-53-6$ |
| 1,2,4-Trimethylbenzene | $\leq 0.3$ | $95-63-6$ |
| Xylene | $1330-20-7$ |  |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.
There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

| Date of issue/Date of revision | $: 6 / 4 / 2018$ | Date of previous issue | $: 5 / 30 / 2018$ | Version | $: 4$ |

## Section 4. First aid measures

## Description of necessary first aid measures

Eye contact

Inhalation

Skin contact

Ingestion
: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
: Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.
Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.
: Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

## Most important symptoms/effects, acute and delayed

 Potential acute health effects| Eye contact | : No known significant effects or critical hazards. |
| :--- | :--- |
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : May cause an allergic skin reaction. |
| Ingestion | : May be fatal if swallowed and enters airways. |

## Over-exposure signs/symptoms

| Eye contact | $:$No specific data. <br> Inhalation <br>  <br> Skin contact |
| :--- | :--- |
|  | Adverse symptoms may include the following: |
|  | reduced fetal weight |
| increase in fetal deaths |  |
|  | skeletal malformations |
|  | $:$Adverse symptoms may include the following: <br> irritation <br> redness <br> reduced fetal weight <br> increase in fetal deaths |
|  | skeletal malformations |
|  | : Adverse symptoms may include the following: |
|  | nausea or vomiting |
|  | reduced fetal weight |
| Increase in fetal deaths |  |
|  | skeletal malformations |

## Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician | $:$Treat symptomatically. Contact poison treatment specialist immediately if large <br>  <br>  <br> Specific treatments |
| :--- | :--- |
| quantities have been ingested or inhaled. |  |

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

# Section 5. Fire-fighting measures 

Extinguishing media
Suitable extinguishing
media
Unsuitable extinguishing
media
Specific hazards arising
from the chemical
Hazardous thermal
decomposition products

Special protective actions for fire-fighters

Special protective
equipment for fire-fighters
: Use dry chemical, $\mathrm{CO}_{2}$, water spray (fog) or foam.
: Do not use water jet.
: Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.
: Decomposition products may include the following materials: carbon dioxide carbon monoxide metal oxide/oxides
: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency | : <br> personnel <br>  <br>  <br> Evacuate surrounding areas. Keep unnecessary and unprotected personnel from <br> entering. Do not touch or walk through spilled material. Shut off all ignition sources. <br>  <br> No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide <br> adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put <br> on appropriate personal protective equipment. |
| :--- | :--- |
| For emergency responders : If specialized clothing is required to deal with the spillage, take note of any information in |  |
| Section 8 on suitable and unsuitable materials. See also the information in "For non- |  |
| emergency personnel". |  |

## Methods and materials for containment and cleaning up

Small spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

| Date of issue/Date of revision | $: 6 / 4 / 2018$ | Date of previous issue | $: 5 / 30 / 2018$ | Version | $: 4$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| 6701 | Cabot® O.V.T. Solid Color Oil Stain |  |  | SHW-85-NA-GHS-US |  |
|  | White Base |  |  |  |  |

## Section 7. Handling and storage

## Precautions for safe handling

Protective measures

Advice on general occupational hygiene
: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not swallow. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, : Store in accordance with local regulations. Store in a segregated and approved area. including any incompatibilities Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store
locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## Section 8. Exposure controls/personal protection

|  | fraction |

Appropriate engineering controls

Environmental exposure controls
: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## Individual protection measures

Hygiene measures

Eye/face protection
: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with sideshields.

## Skin protection

| Date of issue/Date of revision | $: 6 / 4 / 2018$ | Date of previous issue | $: 5 / 30 / 2018$ | Version | $: 4$ |
| :--- | :--- | :--- | :--- | :--- | :--- |

|  | White Base |  |  |  |  |
|  |  |  |  |  |  |

## Section 8. Exposure controls/personal protection

#### Abstract

Hand protection

Body protection

Other skin protection

Respiratory protection

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## Section 9. Physical and chemical properties

| Appearance |  |
| :---: | :---: |
| Physical state | Liquid. |
| Color | Not available. |
| Odor | Not available. |
| Odor threshold | Not available. |

## Section 10. Stability and reactivity

## Reactivity

: No specific test data related to reactivity available for this product or its ingredients.

Chemical stability

Possibility of hazardous reactions

Conditions to avoid

Incompatible materials

Hazardous decomposition products
: The product is stable.
: Under normal conditions of storage and use, hazardous reactions will not occur.
: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.
: Reactive or incompatible with the following materials: oxidizing materials
: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## Section 11. Toxicological information

## Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
| :---: | :---: | :---: | :---: | :---: |
| Zirconium 2-Ethylhexanoate folpet (ISO) | LD50 Dermal | Rabbit | >5 g/kg | - |

| Amorphous Diatomaceous | - | 3 | - |
| Earth | - | 3 | - |
| Xylene | - |  |  |

## Reproductive toxicity

Not available.

## Teratogenicity

Not available.

## Specific target organ toxicity (single exposure)

| Name | Category | Route of <br> exposure | Target organs |
| :--- | :--- | :--- | :--- |
| Light Aliphatic Hydrocarbon | Category 3 | Not applicable. | Respiratory tract <br> irritation and <br> Narcotic effects <br> Respiratory tract <br> irritation and <br> Narcotic effects <br> Respiratory tract <br> irritation and <br> Narcotic effects <br> Respiratory tract <br> irritation |
| Hydrotreated Heavy Petroleum Naphtha | Category 3 | Not applicable. |  |
| Respatratry tract |  |  |  |
| irritation |  |  |  |

## Specific target organ toxicity (repeated exposure)

| Name | Category | Route of <br> exposure | Target organs |
| :--- | :--- | :--- | :--- |
| Light Aliphatic Hydrocarbon | Category 2 | Not determined | Not determined <br> Heavy Aliphatic Solvent <br> Hydrotreated Heavy Petroleum Naphtha <br> 3-iodo-2-propynyl butylcarbamate |
| Category 2 | Not determined | Not determined |  |
| Catene | Category 2 | Not determined | Not determined |
| larynx |  |  |  |
| Category 2 | Not determined | Not determined | Not determined |

## Aspiration hazard

| Name | Result |
| :--- | :--- |
| Light Aliphatic Hydrocarbon | ASPIRATION HAZARD - Category 1 |
| Heavy Aliphatic Solvent | ASPIRATION HAZARD - Category 1 |
| Hydrotreated Heavy Petroleum Naphtha | ASPIRATION HAZARD - Category 1 |
| $1,2,4$-Trimethylbenzene | ASPIRATION HAZARD - Category 1 |
| Xylene | ASPIRATION HAZARD - Category 1 |

Information on the likely : Not available.
routes of exposure

## Potential acute health effects

| Eye contact | $:$ No known significant effects or critical hazards. |
| :--- | :--- |
| Inhalation | $:$ No known significant effects or critical hazards. |

Skin contact : May cause an allergic skin reaction.

| Date of issue/Date of revision | $: 6 / 4 / 2018$ | Date of previous issue | $: 5 / 30 / 2018$ | Version | $: 4$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| 6701 | Cabot® O.V.T. Solid Color Oil Stain |  |  | SHW-85-NA-GHS-US |  |
|  | White Base |  |  |  |  |
|  |  |  |  |  |  |

## Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact | : No specific data. |
| :---: | :---: |
| Inhalation | Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations |
| Skin contact | Adverse symptoms may include the following: irritation redness reduced fetal weight increase in fetal deaths skeletal malformations |
| Ingestion | Adverse symptoms may include the following: nausea or vomiting reduced fetal weight increase in fetal deaths skeletal malformations |

## Delayed and immediate effects and also chronic effects from short and long term exposure

## Short term exposure

| Potential immediate <br> effects | $:$ Not available. |
| :--- | :--- |
| Potential delayed effects | $:$ Not available. |
| Long term exposure |  |
| Potential immediate <br> effects | : Not available. |
| Potential delayed effects | : Not available. |

## Potential chronic health effects

Not available.

| General | : May cause damage to organs through prolonged or repeated exposure. Once <br> sensitized, a severe allergic reaction may occur when subsequently exposed to very low <br> levels. |
| :--- | :--- |
| Carcinogenicity | $:$Suspected of causing cancer. Risk of cancer depends on duration and level of <br> exposure. |
| Mutagenicity | $:$ No known significant effects or critical hazards. |
| Teratogenicity | $:$ Suspected of damaging the unborn child. |
| Developmental effects | $:$ No known significant effects or critical hazards. |
| Fertility effects | $:$ No known significant effects or critical hazards. |

## Numerical measures of toxicity

## Acute toxicity estimates

Not available.

## Section 12. Ecological information

## Toxicity

| 1,2,4-Trimethylbenzene | Acute LC50 $4910 \mu \mathrm{~g} / \mathrm{l}$ Marine water | Crustaceans - Elasmopus pectenicrus - Adult | 48 hours |
|  | Acute LC50 7720 ug/l Fresh water | Fish - Pimephales promelas | 96 hours |
| Xylene | Acute LC50 $8500 \mu \mathrm{~g} / \mathrm{M}$ Marine water | Crustaceans - Palaemonetes pugio | 48 hours |
|  | Acute LC50 $13400 \mu \mathrm{~g} / \mathrm{F}$ Fresh water | Fish - Pimephales promelas | 96 hours |

## Persistence and degradability

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
| :--- | :--- | :--- | :--- |
| Xylene | - | - | Readily |

## Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
| :--- | :--- | :--- | :--- |
| Zirconium 2-Ethylhexanoate | - | 2.96 | low |
| Hydrotreated Heavy | - | 10 to 2500 | high |
| Petroleum Naphtha |  |  |  |
| Methyl Ethyl Ketoxime | - | 2.5 to 5.8 | low |
| $1,2,4$-Trimethylbenzene | - | 243 | low |
| Xylene | - | 8.1 to 25.9 | low |

## Mobility in soil

Soil/water partition : Not available.
coefficient (Koc)

Other adverse effects
: No known significant effects or critical hazards.

## Section 13. Disposal considerations

## Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues.

| Date of issue/Date of revision | $: 6 / 4 / 2018$ | Date of previous issue | $: 5 / 30 / 2018$ | Version | $: 4$ |
| :--- | :---: | :---: | :---: | :---: | :---: |
| 6701 | Cabot® O.V.T. Solid Color Oil Stain |  |  | SHW-85-NA-GHS-US |  |
|  | White Base |  |  |  |  |

Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

|  | DOT <br> Classification | TDG Classification | Mexico Classification | IATA | IMDG |

| Packing group | III | III | III | III | III |
| Environmental hazards | No. | No. | No. | No. | No. |
| Additional information | This product may be re-classified as "Combustible Liquid," unless transported by vessel or aircraft. Non-bulk packages (less than or equal to 119 gal ) of combustible liquids are not regulated as hazardous materials. <br> ERG No. <br> 128 | Product classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2. 18-2.19 (Class 3). <br> ERG No. <br> 128 | ERG No. <br> 128 |  | ```Emergency schedules F-E, S- E``` |

Special precautions for user : Multi-modal shipping descriptions are provided for informational purposes and do not consider container sizes. The presence of a shipping description for a particular mode of transport (sea, air, etc.), does not indicate that the product is packaged suitably for that mode of transport. All packaging must be reviewed for suitability prior to shipment, and compliance with the applicable regulations is the sole responsibility of the person offering the product for transport. People loading and unloading dangerous goods must be trained on all of the risks deriving from the substances and on all actions in case of emergency situations.

Transport in bulk according : Not available.
to Annex II of MARPOL and the IBC Code

## Section 15. Regulatory information

SARA 313
SARA 313 (40 CFR 372.45) supplier notification can be found on the Environmental Data Sheet.
California Prop. 65
WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

## Section 16. Other information

## Hazardous Material Information System (U.S.A.)

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
Caution: $\mathrm{HM} \mathrm{HIS}_{8}$ ratings are based on a $0-4$ rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although $\mathrm{HM} \mathrm{IS}_{\circledR} ®$ ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented $\mathrm{HMIS} ®$ program. HMIS ® is a registered trademark and service mark of the American Coatings Association, Inc.
Procedure used to derive the classification

| Classification | Justification |
| :--- | :--- |
| FLAMMABLE LIQUIDS - Category 3 | On basis of test data |
| SKIN SENSITIZATION - Category 1 | Calculation method |
| CARCINOGENICITY - Category 2 | Calculation method |
| TOXIC TO REPRODUCTION (Unborn child) - Category 2 | Calculation method |
| SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 | Calculation method |
| Calculation method |  |

## Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by Sherwin-Williams, including but not limited to the incorporation of non Sherwin-Williams products or the use or addition of products in proportions not specified by Sherwin-Williams. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use
