# chantal®

This year Chantal celebrates 50 years of strength, determination and success! This milestone would not have been possible without the support of our Retail and Manufacturing partners.

It started in 1970 when, CEO and founder, German-born Heida Thurlow, relocated to the United States and within only a year opened Chantal under its incorporated designation. Trained as an engineer, Heida has the distinction of being the only woman in her German engineering school class and the first woman in the U.S. to launch and run a cookware company.

Established in 1971 and Privately Owned by **Heida Thurlow.**

She has received numerous design and utility patents for teakettle, bakeware, and cookware design and innovation. Chantal was the first to bring dramatic color, tempered glass lids and stay-cool handles to the kitchenware marketplace and continues to dedicate itself to the creation of innovative products that bring elegance to the home.

Chantal products feature the healthiest cooking surfaces available today and we pledge to continually look for new innovations and manufacturing techniques which will be ideal for health conscious chefs.

Along the path to 50 years there have been many memories and learning experiences but it is Heida's perseverance that has kept Chantal going since day one.

This year we commemorate not only half a century of business but we also honor Heida for her will power, persistence and willingness to never take "No" for an answer.

For more stories about the history of Chantal & Heida check out [www.chantal.com](http://www.chantal.com).

## PERFORMS. BEAUTIFULLY.

## Teakettle with Natural Wood

Central to Chantal's Scandinavian Collection is the 1.4 quart Sven teakettle. Clean lines and natural wood help create a design that is distinctly northern European. The blond wood handle and knob are made of 100% natural Rubberwood, a tropical tree that grows in the warm climate of Asia. The wood stays cool to the touch when boiling water and the light color beautifully accents the enamel finish of the teakettle's body.

Perfect for all cooktops, **INCLUDING** magnetic induction.

### Items needed:

- Chantal's Mia Eketle®
- Ceramic coffee filter
- #2 or #4 cone paper filter
- Mug, travel mug, or coffee pot
- Ground coffee

### \*Blooming coffee:

Freshly ground coffee when in contact with hot water will swell as it absorbs water. During this process, acidic gases are released and produce a smooth full-bodied cup of coffee.

Brewing instructions included.

### Step 1

Place ceramic filter on top of a preheated mug, coffee pot, or Travel Mug and place the filter paper into it.

### Step 2

Add in your favorite fine coffee grounds (1.5 tbsp./10 g. per 4 oz. serving).

### Step 3

Slowly pour a small amount of boiling water into the coffee grounds. Let it steep for 30 seconds to allow grounds to bloom\*.

### Step 4

Continue to slowly pour boiling water in a circular motion until desired serving size is reached. To ensure coffee does not over flow, view through the Lotus ceramic filter window. Enjoy!
