

DANGER. CAUTION: AVOID CONTACT WITH EYES, SKIN MUCOUS MEMBRANES AND CLOTHING.

Can cause eye and skin damage. Can be fatal if swallowed.

1. **Use rubber gloves and eye goggles.** Avoid breathing vapors or fumes and do not allow **ComStar's Commercial Lye** to come into contact with skin, eyes, mucous membranes, clothing, aluminum, floors, or paint.
2. **DO NOT** use if any other chemical has been used. Before using **ComStar's Commercial Lye**, be sure to empty sink of all standing water.
3. Immediately place dish pan or deep metal container over drain opening to protect against possible eruption. Stand back!
4. After use, be sure to close cap.

KEEP OUT OF REACH OF CHILDREN.

HAZARD STATEMENT: DANGER: AVOID CONTACT WITH EYES, SKIN, MUCOUS MEMBRANE AND CLOTHING. Can cause severe eye and skin damage. May be corrosive to metals.

PREVENTION: Do not breathe mists. Wash skin and eyes thoroughly after handling. Wear protective gloves and clothing, and eye and face protection. Keep only in original container. Do not allow contact with aluminum. **RESPONSE: INTERNAL: If swallowed:** rinse mouth. DO NOT induce vomiting. **If in eyes:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **If on skin (or hair):** Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. **If inhaled:** Remove person to fresh air and keep comfortable for breathing. **IMMEDIATELY CALL A POISON CONTROL CENTER or DOCTOR/PHYSICIAN. DO NOT USE IF ANY OTHER CHEMICAL HAS BEEN USED.** After use, close cap. Keep in original container.

Clears Out Drains, Grease Traps,
Septic Systems
Biodegradable

NET WEIGHT: 2 LBS. (.91 KILOGRAMS)

Bio-Safe Series

Made in USA

CAN CAUSE SEVERE BURNS ☠ **POISON** ☠ MAY BE FATAL IF SWALLOWED

ComStar's Commercial Lye's blue, odorless and non-acid formula is safe on fine fixtures, chrome trim, and plastic pipes. Will not harm septic tanks or cesspools. It sinks to the bottom of standing water to get right to the blockage for fast break up. **IMPORTANT: READ ALL DIRECTIONS AND CAUTIONS BEFORE USING.**

SMALL DRAINS: Use **ComStar's Commercial Lye** for slow moving drains that have a build-up of grease, hair, soap scum or oils. Warm the pipes by running hot water for a minute. Add 1/4 cup (2 oz.) or 3 heaping tablespoons of **ComStar's Commercial Lye** into drain opening. Let it stand for 15 minutes or longer. Run hot water until it is dissolved. To keep drains free flowing, add 1/4 cup of **ComStar's Commercial Lye** per month. If drain is completely clogged, use a plastic pail to combine one cup of **ComStar's Commercial Lye** with one quart (32 oz.) of cold water. Stir the mixture with a non-metal stirring device until the **ComStar's Commercial Lye** is dissolved. Pour the mixture into the stopped drain. Leave overnight if possible, then flush with water. **ComStar's Commercial Lye** will not lose its effectiveness over time.

GREASE TRAPS: Use 2 lbs. of **ComStar's Commercial Lye** for each 100 gallons regularly to keep grease and suspended solids in a liquid form. Pour **ComStar's Commercial Lye** in any drain leading to grease trap. Run hot water to dissolve it. Allow **ComStar's Commercial Lye** to stand in grease traps as long as possible, overnight for the best results.

SEPTIC TANKS: To prevent costly pumping, use 6 lbs. of **ComStar's Commercial Lye** to start immediate bacteria action in a 500 gallon capacity septic tank. Add 6 lbs. of **ComStar's Commercial Lye** once a year to prevent build-up of grease, solid waste and root growth.

Note: Not for use in septic systems in the State of Massachusetts.

SOAP MAKING: Can be used according to standard soap making instructions or visit www.comstarpurelye.com for more information. Note: The soap will be blue due to the natural blue dye.

CONTENTS: Sodium Hydroxide (CAS# 1310-73-2), Food Grade Blue Dye (CAS#N/A).
