## Special Order Commercial Planters

Glass fiber reinforced concrete (GFRC) is a composite material consisting of cement, fine aggregate, water, alkali-resistant glass fibers, polymer and additives which, when mixed in a scientific recipe and manufactured in a controlled environment, achieves physical properties that allow it to be used for numerous applications, especially those where weight and strength are a significant factor in the design. GFRC products have been tested for freeze-thaw resistance and have shown superior results for use in harsh Winter conditions.

These planters are available in a wide variety of contemporary shapes, colors and sizes perfect for any commercial or residential customer who wants to make a statement with their planters.
