# MEET THE LINE THAT MEETS THE SPECS.

Introducing the first full line of sealants and adhesives designed specifically to meet the industry specs for the kind of work you do. So now whether you're installing a window, door, siding, laying subfloor or hanging drywall, there's a simple way to be sure you are doing the job to your high standards, as well as those of the leading manufacturers.

DOORS

**SEALANT PERFORMANCE SPECIFICATIONS**

Gunnable sealants shall comply with AAMA 808.3 per **AAMA 800** section 1.4 for proper joint expansion and contraction.

SIDING

**SEALANT PERFORMANCE SPECIFICATIONS**

For best results use an Elastomeric Joint Sealant complying with **ASTM C 920**, Grade NS, Class 25 or higher.

WINDOWS

**INSULATING FOAM PERFORMANCE SPECIFICATIONS**

If low expansion foams are used, they shall meet the **AAMA 812** specification.

DRYWALL

**ADHESIVE PERFORMANCE SPECIFICATIONS**

Adhesives used for attaching gypsum panel products to wood framing members shall comply with industry standard **ASTM C 557**.

SUBFLOOR

**ADHESIVE PERFORMANCE SPECIFICATIONS**

Always use polyurethane or solvent-based subfloor adhesives that conform to industry standard APA, AFG-01 or **ASTM D 3498**
