Our Story

DASCO PRO, Inc. has been in the forged hand tool industry since 1922. Our company has been a leader of innovation, new packaging and superior technology.

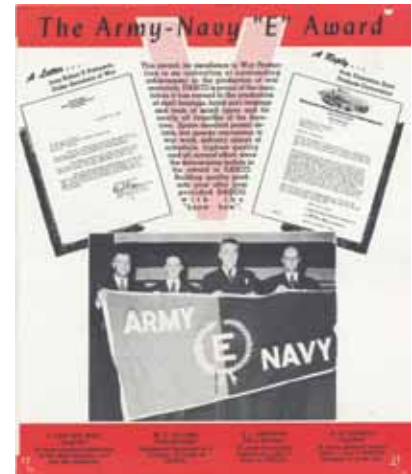

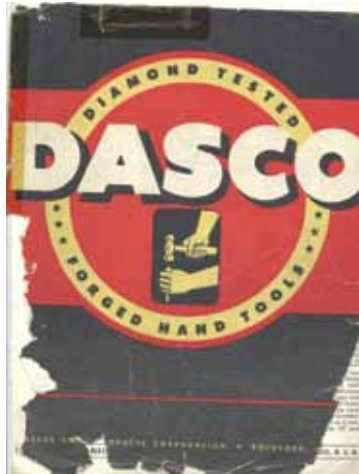

In 1984, DASCO merged with angle finder manufacturer Pro Products and formed DASCO PRO, Inc. Today DASCO PRO, Inc. offers the highest quality line of striking tools, a complete line of angle finders, fiberglass replacement handles, and boundary marker/reflectors.

Our production facilities include three manufacturing plants in Rockford, IL, totaling 216,000 square feet. The upset head on the largest striking tools was developed and trademarked as Targethead® tools in 1948. This feature gives a large surface to strike and allows protection to the hand holding the tool.

The DASCO PRO TargetGuard® tool holder is featured on all of our best selling Targethead® struck tools. The TargetGuard® offers a 3 3/4" circle of protection against glancing blows and missed hits. Our TargetGuard® is made of a special blend of durable molded plastic that is permanently force-fit around the shaft of select striking tools and is a DASCO PRO exclusive. It features a full 360-degree handhold for a firm, comfortable grip.

We pad print our tools with epoxy ink that is easily legible to the customer, giving size, tool name, model number, warnings and "Made in USA" information. All products have an individual UPC code. Our company is EDI integrated.

DASCO PRO is a member of the American Hardware Manufacturers Association.

Cold Chisels

DASCO PRO cold chisels are precision ground for cutting, shaping and removing metal that is softer than the cutting edge of the chisel. Made of high carbon steel that has been heat treated, these chisels are to be used on cast iron, wrought iron, steel, bronze and copper.

Roll Pin Punch

Precision machined Roll Pin Punches are specifically designed to remove spring/roll pins. The heat treated point has a rounded nib to center the point into the pin allowing the point shoulder to maintain maximum contact with the pin during removal. The punch shaft allows for a long, straight removal of the pin without damaging the pin wall material. DASCO PRO offers a range of punch point sizes to accurately fit the pin size to be removed. All Roll Pin Punches are made of high strength steel for years of reliable, durable service.

Replacement Handles

DASCO PRO fiberglass handles give your customers the toughness and durability they want for their striking tools. We pultrude up to 175 rovings of fiberglass per handle into a smooth, strong handle - many times tougher than wood. The waterproof, non-warping and non-corrosive features of fiberglass assures customer satisfaction. Each handle replacement kit comes with instructions, 2 part epoxy resin, stick and mixing cup.

Angle Finders

DASCO PRO angle finders are molded of high impact plastic and allow the user to read any angle instantly and accurately from 0° to 90° in any quadrant. Accurate to within 1/2 of 1°. Not affected by magnetic fields, cold or heat. Angle and grade chart on back shows angles in degrees and converts them to pitch per inch and pitch per foot. Available with optional features such as magnetic base, V-groove sides for easy use on round surfaces, plumb and level vials.

SnowPole® Driveway Markers

The DASCOPRO SnowPole® is used to mark driveways, culverts, roadways, hazards and other areas. We offer a variety of different options, including a strip of highly reflective tape for 360° night time visibility. Markers feature a durable fiberglass rod, which will withstand the elements and abuse. but flexible enough to bend and return to its original position. It will not bend out of shape like metal or aluminum markers. We offer a eye catching pyramid display to merchandise all the Snow Poles.
