

Thank you for making a commitment to sharpening with DMT® products.

To All Who Share Our Zeal for Sharpening

We understand that when you purchase a world-class diamond sharpener you expect your investment to provide many years of reliable performance, but at DMT® we're looking to exceed that expectation. We want to develop a long-standing relationship with you—a partnership for a lifetime of sharpening excellence. In order for this to happen, we have to make sure that you achieve the best possible results from day one, and enjoy continued success as you expand your sharpening needs. That's why, as an industry leader, we are set up to do more than just help you choose the right sharpener for every job; we provide ongoing education, tutorials, video demonstrations and more. Just go on line any time, or call us during business hours to speak with a real person. That's right, a *real* person, because we're always happy to talk with you about sharpening!

The Innovations Never Stop

Sharpening technology has been around since the Bronze Age, so one might think that by now there's not much left to improve. And yet for DMT®, the innovations just keep coming. In 1976, we introduced the first interrupted diamond sharpening surface—the signature polka-dot design that ensures cleaner, more efficient sharpening. From there we innovated our best-selling Diafold® sharpener, followed by the high-tech DuoSharp® line, then the Diamond Wave™ and our patented Magna-Guide® sharpening system. Now, we're proud to introduce our latest inspiration.

The Latest Innovation from DMT®: **HardCoat™**

Diamond stones make quick work of steel and ceramic edges alike. The DMT® HardCoat™ surface is a unique diamond surface especially suited for the rigors of sharpening ceramic edges. Originally introduced on our DiaFlat® Lapping Plate for flattening traditional bench stones, the HardCoat™ surface proved so durable we expanded its application to 3 of our most versatile and popular models. These premium sharpeners will produce excellent, consistent results time after time, year after year.

Striving to Build upon Our Winning Reputation

Made in the USA and recognized internationally, our products have earned accolades for excellence in design, innovation, and quality. Among them are the *International Spark Design Award™*, the *International Practical World Exhibition Prize*, the *Blade Magazine Accessory of the Year Trophy*, the *HANDY Magazine Innovation Award*, packaging awards from the *National Retail Hardware Association* and more. We take pride in these industry honors, and work hard to earn them, over and over again, through dedication to our customer's needs.

Please take a look at our complete line of superior sharpening products, and contact us any time by phone or email, or visit us on the web at www.dmtsharp.com

Diamond abrasives provide the fastest, easiest and most effective way to sharpen an edge. Unrivaled in both performance and durability, DMT® brand sharpeners have earned the reputation as the best sharpening products on the planet.

The DMT® Difference

Since 1976, DMT® has been in business to do just one thing: make the world's best diamond sharpeners. Product innovations with our signature polka-dot interrupted surface, as well as our continuous surface of high-performance diamond, are praised worldwide for their superior quality. From pocket-sized whetstones to heavy-duty bench stones, the *DMT® Difference* shows time and again through our undivided pursuit of sharpening excellence.

Quality Must Be Manufactured, Not Fabricated

Diamond Coverage differs widely from one manufacturer to the next. For long-lasting performance, DMT® makes certain that each sharpening surface carries the most diamonds per square inch in the industry.

Diamond Uniformity is also key to sharpener performance. DMT® uses a proprietary process that ensures near-perfect consistency in grit size. The result is a micronized monocrystalline diamond that covers evenly across the sharpening surface to prove effective with every use, year after year.

Always look for the DMT® logo to be sure you're buying the genuine DMT® diamond surface.

◀ Beware of imitators!

The DMT® sharpening surface (left) exhibits full coverage and the diamonds show striking consistency in size to ensure peak performance and durability. The copycat surface (right) carries a sparse, patchy coating made from a jumble of different sized diamonds.

Surface Flatness can mean the difference between a well-honed tool and one that is barely serviceable. Flat surfaces maintain consistent, even contact with the edge to produce a bevel that carries the same degree of sharpness from end to end. DMT® sharpeners are engineered to be the flattest on the market, and built to outlast other products, which are variable in surface, and often warped, hollowed or grooved.

▲ DMT® gives it to you straight.

Like all DMT® sharpeners, the Diamond Whetstone™ (left) proves flat every time. When tested against a precision straight edge, no light appears between the sharpening surface and straight edge. The copycat whetstone (right) may look similar to a Diamond Whetstone™, but when tested for flatness the difference is obvious. The light shines through to reveal a surface that fails to prove flat.

▲ **DMT® vs. Drag-through**

An edge created by a DMT® sharpener (left) is far superior to one made by a typical drag-through sharpener (right). The DMT® diamond surface produces a clean, razor-sharp edge while the drag-through sharpener leaves a trail of metal burrs that quickly bend and flake off with use.

Start Experiencing the Difference Today

When compared under every condition related to diamond quality and sharpener performance, it becomes clear that DMT® products truly have no competition. Proving more than just the best way to produce a first-rate edge, our sharpeners save you from coping with an entire toolbox of second-rate ones. That's why you owe it to yourself, and your tools, to choose nothing less than a DMT® diamond sharpener.

Which grit should I use?

This *very good* question is exactly why we pioneered the color-coding system for the sharpening industry. Colors provide quick and consistent identification, plus they help emphasize just how easy it can be to make the right choice. Grit selection should be based on just three factors: (1) the type of tool to be sharpened, (2) the condition of its edge, and (3) your desired level of sharpness. For professional results, choose at least two grits so you can step from the coarser to finer surfaces as you sharpen. Or choose a Double-Sided Diafold® or DuoSharp® sharpener, which have two sides to give you a pair of grits in every product. Whichever your preference, the chart below will help you choose the right grits.

*If you're still not sure, just call Customer Service at **800-666-4368** or **508-481-5944** during regular business hours, Monday through Friday, 8:00 a.m. to 5:00 p.m. EST.*

- **Extra Extra Coarse** | Use this grit when aggressive stock removal is needed. Many professionals view it as a better alternative to powered grinding because it cuts quickly without the heat build-up that ruins tool temper. And since our large bench stones have superior flatness ($\pm 0.001''$), this grit is also suitable for flattening water stones, Arkansas stones and synthetic stones. *Size: 120 micron, 120 mesh. Color code: silver.*
- **Extra Coarse** | This option is best for rapid removal of metal on damaged edges or heavy-duty tools such as axes and mower blades. Often used as the first step for flattening the backs of chisels and plane irons, it's also great for flattening Japanese water stones. *Size: 60 micron, 220 mesh. Color code: black.*
- **Coarse** | Recommended for dull tools, this grit will quickly restore an edge to cutting condition. With little effort, it makes fast work of the metal to form the desired bevel, so it's great for anyone who wants sharp tools that do the job without the need for edge refinement. *Size: 45 micron, 325 mesh. Color code: blue.*
- **Fine** | Used widely for slightly dull tools and knives, this grit is best for everyday edge refinement. Many professionals, especially chefs and line cooks, consider it to be the all-purpose sharpener. Woodworkers and sportsmen who prefer two- and three-step sharpening call upon this grit for refinement in preparation of micro-beveling and polishing. *Size: 25 micron, 600 mesh. Color code: red.*
- **Extra Fine** | If anything less than razor sharp is not enough, then this is your go-to grit. In the hands of a professional or serious enthusiast, it can refine and polish an edge to perform like a surgical instrument. And for anyone looking for an easy way to step into big-league edge care, we've made sure to include this grit on many of our double-sided models. *Size: 9 micron, 1200 mesh. Color code: green.*
- **Extra Extra Fine** | Innovated in 2006, this grit remains the finest micronized bonded diamond abrasive on the planet. We introduced it for a very special class of customers: the sharpening enthusiasts who seek the ultimate edge—a polish above the highest polish! *Size: 3 micron, 8000 mesh. Color code: tan.*

BENCH STONES provide high-performance sharpening with precision-flat interrupted and continuous surfaces in a broad range of grits and sizes. DMT® bench stone models include Diamond Whetstone™, Dia-Sharp® and DuoSharp® brand sharpeners.

A

A Diamond Whetstone™ Models

Featuring the signature polka-dot pattern innovated by DMT®, Diamond Whetstone™ sharpeners are often imitated in appearance, but never equalled in quality or performance. The interrupted surface of tiny wells trap metal debris to ensure clean, continuous edge contact while the superior diamond does its work. For the quickest, cleanest sharpening, there truly is no substitute. Offered in 2 sizes and 4 grits with an attractive hardwood box or optional plastic case on 6-inch models.

◀ Choose from 3 types of bench stones: (left to right) Diamond Whetstone™, Dia-Sharp® and DuoSharp®

Ⓑ DuoSharp® Models

Innovative, multi-patented and engineered to be precision-flat, DuoSharp® sharpeners use two interrupted surfaces of superior diamond to provide two-stage sharpening with fast, clean and consistent results every time. Available in 2 sizes and 4 grit combinations, all models come with a base or non-skid mat.

Ⓒ DuoSharp®plus™ Models

These sharpeners have all the features of our DuoSharp® line, plus a continuous zone of diamond abrasive for small and pointed tools. Offered in 4 grit combinations, each includes a base or non-skid mat.

▲ DuoSharp® models are available with or without a base. See model numbers ending with “WB” to select a DuoSharp® with a base.

D

D Dia-Sharp® Bench Stones

For those who prefer a continuous diamond surface, especially for sharpening small or pointed tools, these bench stones outperform them all. Offered in 5 sizes and from 4 to 6 grits, all but double-sided models feature non-skid rubber feet.

E Dia-Sharp® MagnaBase™ Sharpening System

This unique sharpening system combines a 12" x 3" double-sided Dia-Sharp® with an innovative magnetic base to deliver the best in 2-stage sharpening. Each stone provides a full 72 sq. inches of superior diamond sharpening surface. System offered in 2 grit combinations.

◀ Only DMT® offers you the same high-performance diamond coating on both interrupted and continuous sharpening surfaces. Choose from many models that feature the signature DMT® polka-dot pattern (left), or choose Dia-Sharp® (right) with full, continuous coverage.

F Diamond Wave™ Sharpener

The first to combine a convex and concave diamond surface in one, this uniquely designed, award-winning product affords longer, easier sharpening strokes over traditional slip stones. The juxtaposing pair of 1" to 1/16" tapered surfaces produce radii to accommodate a full set of curved edges. Available in 2 grits.

▲ The award-winning design of Diamond Wave™ makes it the most useful and versatile sharpener for a wide range of curved edges, such as gouges, chisels and more.

G Diamond Honing Cones

Tapered slip stones are great for honing tool and die sets as well as other curved edges like gouges, chisels, dental instruments and more. DMT® Diamond Honing Cones produce faster results with less effort by placing superior fine-grit diamond at just the right curvature. Offered in 3 sizes, individually or as a kit that includes all 3 cones and a classic hardwood storage box (not pictured).

◀ Honing Cones can be purchased individually or as a kit of three that includes a beautiful hardwood box.

ACCESSORIES

H Dia-Paste™ Compound: For achieving ultimate tool performance, there's no substitute for Dia-Paste™ diamond compound. Just a light application produces a polished, mirror finish that reduces friction and extends sharpness. Offered in 3 grits, syringes can be purchased individually or as a kit of 3.

I DiaSpray™ Diamond Suspension: For those who seek the utmost mirror finish, DiaSpray™ is a sprayable suspension with diamond. This allows the 0.5 micron grit to be easily applied to any stropping material. Available in 0.85 fl. oz. (25 ml) bottles.

J DuoBase™ Bench Stone Base: A great addition to our DuoSharp® stone or any 6" x 2" stone, this base features rubber feet to keep your work in place, and ample height to gain knuckle clearance for easier sharpening.

Non-Skid Mat: (not pictured) For use with any bench stone up to 10 inches in length, this mat offers a space-saving way to keep your stone in place.

Add a base to your DuoSharp® sharpener or any other 6" x 2" stone, or keep just about any sharpener secure with our space-saving non-skid mat.

FOLDING SHARPENERS put uncompromising diamond performance in a compact, portable design. Our best-selling Diafold® brand sharpeners can tackle almost any edge – straight, curved or serrated – and their butterfly design lets you fold, stow and go!

Ⓐ Double-Sided Diafold®

Our most popular, versatile and convenient general-purpose sharpener, the Double-Sided Diafold® delivers two-stage sharpening with compact convenience. Two Diamond Whetstone™ sharpeners are combined to create a lightweight sharpener for all sorts of edges, from knives to scissors to axes and more. Models are available in 4 grit combinations.

Ⓑ Single-Sided Diafold®

Featuring the adaptable Diamond Whetstone™ sharpener with signature polka-dot interrupted surface, Diafold® is truly a multi-use sharpener for the home, camper, tool box and gardening shed. Offered in 4 grits, this trusty tool stores small and performs big.

Also available in a grooved hook-and-knife model (Ⓒ) that allows anglers to sharpen fishhooks.

▲ Some Diafold® models feature a diamond grit coated groove to easily sharpen fishhooks

◀ All Diafold® models feature a butterfly folding design and clear handles for maximum portability and convenience

D Diafold® Serrated Sharpener

Sharpening serrated knives is easy with a Diafold® diamond serrated sharpener. And better still, this foldable companion also serves triple duty as a portable mini-steel, gut hook sharpener and conical file. Available in 3 grits.

E Diafold® Flat File Sharpener

This single-sided diamond flat file is perfect for confined, narrow applications in the home, shop or garden. And since it's a Diafold® folding sharpener, it stores away small for portable convenience. Offered in 2 grits.

F Diafold® Chain Saw Sharpener

More than just a workhorse for everyday chain saw maintenance, it's a multi-use tool for getting into all those tight spots. Available in coarse grit and 3 diameters.

▲ The combination of high-performance diamond grit and the tapered Diafold® design makes serrated sharpening easy. Just match the serration against the corresponding taper of the sharpener, and make half-inch strokes with a simple twist of the wrist.

GUIDED SHARPENING SYSTEMS ensure proper edge care by providing consistent results without fail—even for beginners! Available in a wide range of grit combinations, DMT® offers two easy-to-use systems: the *Aligner™* and *Diafold® Magna-Guide®* brand sharpening systems.

A Diafold® Magna-Guide® Kits

This portable, lightweight system consists of 3 elegantly integrated parts: the *Double-Sided Diafold®* sharpener, *Aligner™* blade guide and magnetic angle guide. The *Double-Sided Diafold®* offers portable, 2-stage sharpening at its best, the *blade guide* provides 7-angle adjustability for just the right edge every time, and the *angle guide* joins them by way of its unique built-in magnet. Offered in kits of one or two double-sided sharpeners. The two-sharpener kit (shown left) comes with a rugged carry case.

B Magna-Guide® Components

For those who already own one or more *Double-Sided Diafold®* sharpeners and wish to make sharpening easy enough for any family member or coworker, DMT® offers the *Aligner™* blade guide and magnetic angle guide. With these two simple components, there will never be another dull edge in your house, campsite or workshop.

Diafold® Magna-Guide® has three simple parts: a *Double-Sided Diafold®, Aligner™* blade guide, and magnetic angle guide.

Portable, lightweight and easy to use, Diafold® Magna-Guide® lets you hone knives like a pro. Just clamp on the blade guide, choose a sharpening angle, and glide the sharpener along the blade while the angle guide does all the work to keep your angle true.

◀ *Turn any Diafold® sharpener into a guided sharpening system with just two easy-to-use components.*

● **Aligner™ Easy Edge-Guided Sharpening Kits**

Our flagship product for guided sharpening, the Aligner™ provides all the right components to ensure consistent angles, precise edge bevels, and expert sharpening strokes. Carefully designed for the ultimate in fast, faultless knife sharpening, each Aligner™ kit includes one *stone holder*, one *blade guide* and a combination of grits and accessories. See chart below for details of each kit. (A-PROKIT with rugged carry case shown right.)

ⓓ **Aligner™ Components**

For those who already own one or more 4" Diamond Whetstone™ sharpeners or otherwise wish to expand the versatility of their Aligner™ kit, DMT® offers individual components and accessories. In addition to the *Aligner™ blade guide* and *stone holder*, six grits are available, ranging from extra-extra fine to extra-extra coarse.

The Aligner™ is comfortable to grip and easy to use. Just cradle the stone holder in your hand and glide your edge across the stone. Lefty or righty, it works the same for both sides of the blade—just flip it and repeat!

SHARPENING STEELS work well to hone, align and extend the utility of knife edges. More than just a steel, Diamond Steel™ sharpeners feature a high-performance diamond surface that can truly sharpen a dulled knife to its peak condition.

A

A Diamond Steel™

Providing more than just the realigning function of a traditional butcher steel, the Diamond Steel™ utilizes a fast-honing diamond surface to quickly and conveniently produce sharper results. Each rod features a sanitary, single-piece plastic handle with hand guard and a color-coded ring for easy grit identification. Offered in 3 sizes and 2 grits.

B

B Ceramic Steel

Through a patented process, the DMT® Ceramic Steel combines the fine abrasiveness of ceramic with lightweight aluminum to deliver a shatterproof, wear-resistant tool that provides the finest polished edge achievable by a bonded abrasive. With every convenience of a traditional butcher steel, this professional-grade product also features a sanitary, single-piece plastic handle with hand guard.

▲ All DMT® steels feature a sanitary, single-piece molded handle with 4-lobed guard for protection while in use and no-roll stability when rested on a countertop or prep surface.

C Crystal Saver® Multi-Purpose Sharpener

Its name is Crystal Saver®, but it does so much more than repair chipped crystal, glass and stoneware. This handy tool features a half-round diamond surface coarse enough to bring back the edge to almost anything in your kitchen drawer. For uncompromising results on small knives, use it in 2-stage sharpening along with a Diamond Steel™ or other fine-grit DMT® sharpener.

C

▲ The multi-purpose Crystal Saver® is a coarse-grit sharpener that can really save the day when mishaps occur. Designed to repair delicate crystal, this little hero works just as well on a dull paring knife.

* Ceramic steels carry a 7 micron (2200 mesh) abrasive that contains no diamond grit.

STONE CARE is an often overlooked yet critical part of proper edge care. While DMT® diamond sharpeners hold their flatness over continued use, traditional stones such as waterstones, oilstones and Arkansas stones need regular flattening to perform properly. Dia-Flat® brand lapping plates utilize proprietary DMT® Diamond Hardcoat Technology™ and have extreme flatness to be effective on all types of traditional stones, large or small.

▲ *Dia-Flat® with DMT® Diamond Hardcoat Technology™ outlasts any other diamond coating on the market.*

Dia-Flat® Lapping Plate

The undisputed heavyweight champion above all other bonded abrasive products, this extraordinary tool is unmatched for bringing flatness back to any conventional waterstone, oilstone or Arkansas stone. No other product or method performs the job in less time or with less effort because only Dia-Flat® features the revolutionary new DMT® Diamond Hardcoat Technology™ surface with the option of either 120- or 95-micron diamond grit.

Manufactured to outlast any other diamond coated product on the market, each Dia-Flat® Lapping Plate is precision-ground to carry a consistent, even coating of micronized monocrystalline diamond, then hand-certified to prove flat to less than ± 0.0005 inches. The ample surface area of 40 square inches allows easy flattening of both large and small stones.

▲ *Manufactured to exacting tolerance, Dia-Flat® Lapping Plates are hand certified, so each product arrives with its own certificate verifying absolute flatness to a variance of $< \pm 0.0005$ inches.*

MODEL NUMBER	SIZE <i>inches (millimeters)</i>	DIAMOND GRIT	SPECIAL FEATURES <i>(see text for full description)</i>
DIAFLAT	10 x 4 (254 x 102)	120 Micron	hand certified flat to $< \pm 0.0005$ "
DIAFLAT-95	10 x 4 (254 x 102)	95 Micron	hand certified flat to $< \pm 0.0005$ "

SHARPENERS WITH DIAMOND HARDCOAT™ SURFACE are strong enough to stand up to years of sharpening the hardest edges. The DMT® HardCoat™ (HC) Surface will keep any edge razor-sharp, making them especially suited for the rigors of sharpening ceramic knives. Available in 3 of our most popular models: DuoSharp®, Diamond Steel™, and Diafold®.

A

A DuoSharp® HC™

Innovative, multi-patented, and precision-flat, DuoSharp® HC sharpeners make use of two interrupted surfaces of superior diamond HardCoat™ to provide two-stage sharpening with fast, clean and consistent results every time. Features fine and extra-fine grits, plus the handy DuoBase™ for improved ergonomics.

B Diamond Steel™ HC™

Providing more than just the realigning function of a traditional steel, the Diamond Steel HC™ features our HardCoat™ diamond surface to provide fast and sharp results...even on hard ceramic knives.

The 12-inch, fine-grit rod is set into a single-piece, generous and substantial hand guard with a color-coded ring for easy grit identification.

B

C Double-Sided Diafold® HC™

By combining the Hardcoat™ surface with our most popular, versatile and convenient double-sided sharpener, you get portable two-stage sharpening for not just steel but ceramic edges as well. The fine and extra-fine Diamond Whetstone™ surfaces also feature a continuous zone for use on pointed tools.

The Diafold® HC sharpener features a continuous diamond zone for added versatility.
