HEALTHY SOLUTIONS FOR A HAPPIER PET

DIAMONDCAREPETFOOD.COM

Specialized diets designed with pets and price in mind.

When we set out to create Diamond CARE® and Diamond CARE Rx, we had one goal in mind: produce specialized and prescription foods that are high in quality and palatability, without the high price. We knew if we could make an affordable nutritional regimen, pet owners would be more likely to stick to it.

The science behind beneficial nutrition.

The veterinarians and nutritionists behind Diamond CARE curated proven research, determined ideal nutrient levels and carefully selected exceptional ingredients for each recipe. Then we figured out how to make these formulas affordable without sacrificing quality or taste, because we believe every pet deserves the best nutrition. Price should not dictate whether pets with unique health issues get the specialized nutrition they require. All Diamond CARE formulas provide complete nutrition, so your clients can feed their pets the special diets they need for as long as they need them. All formulas are intended for adult dogs or cats and should not be fed to puppies or kittens.

BENEFITS IN THE BAG

LIMITED-INGREDIENT DIETS

A narrow selection of high-quality ingredients provides an alternative feeding option that still delivers complete nutrition in our Sensitive Skin, Sensitive Stomach and prescription Renal formulas for adult dogs.

EASILY DIGESTIBLE PROTEIN

We carefully selected easily digestible, high-quality protein sources, which include egg protein, potato protein, lamb meal or chicken meal. Hydrolyzed salmon is the single animal protein source in our Sensitive Skin Formula for Adult Dogs.

GRAIN-FREE

As an alternative to grains, other ingredients such as potatoes and peas provide high-quality carbohydrates in select formulas.

BROWN RICE

Easy-to-digest brown rice is the single source of grain in our Renal Formula for Adult Dogs.

IDEAL SODIUM LEVELS

Our Renal Formula for Adult Dogs is guaranteed to contain less than 0.25% sodium.

ANTIOXIDANT FORMULA

Guaranteed levels of zinc, selenium and vitamin E help support a healthy immune system.

GUARANTEED PROBIOTIC STRAINS

To help support digestion and a healthy immune system, each cup of Diamond CARE adult dog and Weight Management for Adult Cats formulas provides a guaranteed amount of live, active cultures of K9 Strain® Probiotics or Viables® Probiotics. These beneficial bacteria are developed specifically for dogs and cats, respectively, and processed under strict quality and safety standards to ensure purity.

FIBER BLEND

Added insoluble fiber in our weight management formulas helps dogs and cats feel full. In other formulas, an ideal blend of soluble and insoluble fibers in the form of tomato pomace, psyllium seed husk or dried chicory root helps support optimal digestion.

L-CARNITINE

Added to our weight management formulas, L-Carnitine helps the body metabolize fat.

GLUCOSAMINE & CHONDROITIN

Added to our Weight Management Formula for Adult Dogs, these ingredients help support joints.

SUPERFOODS

Kale, chia seed, pumpkin, blueberries, quinoa and other superfoods in our Weight Management Formula for Adult Dogs are particularly high in nutritional value and help provide more complete nutrition for pets.

OMEGA FATTY ACID BLEND

Omega-6 and omega-3 fatty acids from sources such as sunflower oil, chicken fat, eggs or flaxseed help support healthy skin and coat. Omega-3 fatty acids from marine sources are also added to all our dog formulas.

REDUCES URINE pH

A healthy urinary tract is reliant on a lower pH in a cat's urine, so our Urinary Support Formula for Adult Cats is designed to maintain appropriate acidity.

DIAMOND CARE Rx Renal Formula for Adult Dogs is indicated for the management of acute or chronic kidney disease in adult dogs.

Complete nutrition, unique formulation

Diamond CARE Rx Renal Formula is a limited-ingredient diet that delivers complete nutrition and may be fed long-term as part of a complete renal disease management plan. High-quality egg protein in controlled levels provides adequate amounts of essential amino acids, while guaranteed levels of antioxidants help support the immune system. A guaranteed amount of live, active cultures of canine-specific probiotics also helps support the digestive and immune systems.

A smooth transition

Dogs with renal disease often experience appetite loss or may associate their current diet with feeling sick. Furthermore, many renal formulas lack palatability compared to adult maintenance diets. Our nutritionists paid special attention to the palatability of our renal formula. Working closely with pet owners to correctly transition their dog to Diamond CARE Rx Renal Formula will further help avoid food aversion. The transition should take place gradually, over a period of 7 to 14 days. We recommend following up with clients on a regular basis to monitor food acceptance and encourage compliance.

Controlled phosphorus and sodium levels

Phosphorus retention by the kidneys is one of the first changes in mineral status with renal disease. The resulting hyperphosphatemia can lead to vitamin D deficiency as well as interfere with normal calcium regulation. Evidence shows that controlling serum phosphorus levels may help slow the progression of renal disease.^{1,2} That's why one goal of canine kidney disease management is to normalize serum phosphorus concentration. Diamond CARE Rx Renal Formula is guaranteed to contain no more than 0.5% phosphorus.

Hypertension is a common clinical finding in dogs with kidney disease. Activation of the renin-angiotensin-aldosterone system in response to hyperfiltration of sodium in the early stages of kidney disease promotes retention of sodium. Over time, the RAAS actually causes further injury to the kidneys. In combination with pharmacological intervention, controlling sodium intake is an important feature of the management of renal disease. Diamond CARE Rx Renal Formula is guaranteed to contain no more than 0.25% sodium.

SENSITIVE SKIN FORMULA FOR ADULT DOGS

Diamond CARE Sensitive Skin Formula for Adult Dogs is appropriate for dogs with food-related skin sensitivities. For starters, hydrolyzed salmon is the single animal protein source. Added to that, omega-6 and omega-3 fatty acids in an ideal ratio are included as they have been shown to be beneficial to skin and coat health. Peas provide high-quality carbohydrates and also enhance palatability in this grain-free formula. Finally, this specialized diet is rounded out with a limited number of select ingredients. For best results, instruct your clients to limit other foods, such as treats, that could also be contributing to adverse skin reactions.

INGREDIENTS

Peas, pea flour, hydrolyzed salmon, sunflower oil (preserved with mixed tocopherols), flaxseed, natural salmon flavor, tomato pomace, salmon oil (preserved with mixed tocopherols), dicalcium phosphate, calcium carbonate, DL-methionine, choline chloride, taurine, dried Lactobacillus plantarum fermentation product, dried Bacillus subtilis fermentation product, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Bifidobacterium animalis fermentation product, vitamin E supplement, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, copper sulfate, potassium iodide, thiamine mononitrate (vitamin B1), manganese proteinate, manganous oxide, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, manganese sulfate, sodium selenite, pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, riboflavin (vitamin B2), vitamin D3 supplement, folic acid.

Contains a source of live (viable), naturally occurring microorganisms.

SENSITIVE STOMACH FORMULA FOR ADULT DOGS

Though it may seem like it at times, not all dogs have cast-iron stomachs. This formula is built to help address digestion in pets with sensitive stomachs. A combination of potatoes and egg protein makes this limited-ingredient formula easy to digest for sensitive dogs. Psyllium seed husk — a source of beneficial fiber — helps support proper digestion, as do probiotic strains that are native to the canine GI tract.

INGREDIENTS

Potatoes, egg product, potato protein, tomato pomace, chicken fat (preserved with mixed tocopherols), flaxseed, natural flavor, menhaden fish oil (preserved with mixed tocopherols), dicalcium phosphate, calcium carbonate, psyllium seed husk, ginger, dried chicory root, choline chloride, taurine, dried Lactobacillus plantarum fermentation product, dried Bacillus subtilis fermentation product, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Bifidobacterium animalis fermentation product, vitamin E supplement, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, copper sulfate, potassium iodide, thiamine mononitrate (vitamin B1), manganese proteinate, manganous oxide, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, manganese sulfate, sodium selenite, pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, riboflavin (vitamin B2), vitamin D3 supplement, folic acid.

Contains a source of live (viable), naturally occurring microorganisms.

WEIGHT MANAGEMENT FORMULA FOR ADULT DOGS

Too much weight can be bad for a dog's health. Diamond CARE Weight Management Formula for Adult Dogs can help address weight issues in dogs without leaving them feeling hungry. Powdered cellulose, a source of insoluble fiber, helps dogs feel full, while L-Carnitine aids the body in metabolizing fat. Added glucosamine and chondroitin help support joints that may be working a little harder under extra weight. And to make sure dogs get all the nutrients they still need, this formula is rounded out with omega fatty acids, guaranteed antioxidants and canine-specific probiotics for digestive health.

INGREDIENTS

Lamb meal, peas, chickpeas, lentils, sweet potatoes, powdered cellulose, potatoes, chicken fat (preserved with mixed tocopherols), flaxseed, natural flavor, ocean fish meal, menhaden fish oil (preserved with mixed tocopherols), DL-methionine, choline chloride, taurine, dried chicory root, L-Carnitine, glucosamine hydrochloride, kale, chia seed, pumpkin, blueberries, oranges, quinoa, dried kelp, coconut, spinach, carrots, papaya, yucca schidigera extract, dried Lactobacillus plantarum fermentation product, dried Bacillus subtilis fermentation product, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Bifidobacterium animalis fermentation product, vitamin E supplement, chondroitin sulfate, iron proteinate, zinc proteinate, copper proteinate, ferrous sulfate, zinc sulfate, copper sulfate, potassium iodide, thiamine mononitrate (vitamin B1), manganese proteinate, manganous oxide, ascorbic acid, vitamin A supplement, biotin, niacin, calcium pantothenate, manganese sulfate, sodium selenite, pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, riboflavin (vitamin B2), vitamin D3 supplement, folic acid.

WEIGHT MANAGEMENT FORMULA FOR ADULT CATS

Just as in dogs, too much weight can be bad for a cat's health. Diamond CARE Weight Management Formula for Adult Cats can help address weight issues in cats without leaving them feeling hungry. Powdered cellulose, a source of insoluble fiber, helps cats feel full, while L-Carnitine aids the body in metabolizing fat. And to make sure cats get all the nutrients they still need, this formula is rounded out with omega fatty acids, guaranteed antioxidants and probiotics for digestive health.

INGREDIENTS

Chicken, chicken meal, turkey meal, chickpeas, lentils, peas, powdered cellulose, chicken fat (preserved with mixed tocopherols), natural flavor, egg product, flaxseed, sodium bisulfate, DL-methionine, choline chloride, taurine, dried chicory root, L-Carnitine, dried Lactobacillus plantarum fermentation product, dried Bacillus subtilis fermentation product, dried Lactobacillus acidophilus fermentation product, dried Enterococcus faecium fermentation product, dried Bifidobacterium animalis fermentation product, vitamin E supplement, zinc proteinate, niacin, manganese proteinate, copper proteinate, zinc sulfate, manganese sulfate, copper sulfate, thiamine mononitrate (vitamin B1), vitamin A supplement, biotin, potassium iodide, calcium pantothenate, riboflavin (vitamin B2), pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, manganous oxide, sodium selenite, vitamin D3 supplement, folic acid.

URINARY SUPPORT FORMULA FOR ADULT CATS

A healthy urinary tract can make all the difference in a cat's happiness. Diamond CARE Urinary Support Formula for Adult Cats reduces urine pH to promote good urinary tract health and provides a complete and balanced everyday diet. Your clients' cats will get guaranteed levels of omega-6 and omega-3 fatty acids for a shiny coat and healthy skin, and antioxidants for immune support.

INGREDIENTS

Chicken meal, brown rice, brewers rice, corn gluten meal, chicken fat (preserved with mixed tocopherols), natural flavor, flaxseed, sodium bisulfate, potassium chloride, salmon oil, DL-methionine, calcium sulfate, taurine, zinc proteinate, vitamin E supplement, niacin, manganese proteinate, copper proteinate, zinc sulfate, manganese sulfate, copper sulfate, thiamine mononitrate (vitamin B1), vitamin A supplement, biotin, potassium iodide, calcium pantothenate, riboflavin (vitamin B2), pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, manganous oxide, sodium selenite, vitamin D3 supplement, folic acid.
