- Removes Broken or Twisted Common Screws and Bolts.
- Indispensable if you Don't Want to Drive the Screw Through the Hole.
- Perfect Drill to Make Pilot Holes for Screw Extractors.
- 135° Split Point, Won't Walk.
- Polished, Friction Reducing High-Speed Steel.

Spin-It-Out Broken Screw Remover

U.S. Patents #6,978,697,
#7,171,871, Other Patents Pending,
Worldwide Patents

One-Step

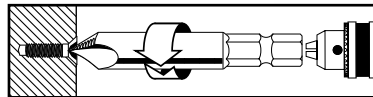

Spin-It-Out™

- One Step, No Flipping To Use
- Use With Hand Screwdriver or Drill

The Broken/Damaged Screw Remover is extremely easy to use. Just set the drill to reverse to take out a screw when the Phillips®, Torx®, Robertson®, Posidriv® or Tri-wing® screw is damaged. The product comes in five different sizes: #0, #1, #2, #3, #4. Simply select the correct size for the screw head size and use in low speed in reverse on your drill. Use #0 for #0 Phillips® Screw, #1

for #1, #2 for #2, #3 for #3, #4 for #4 screws.

For stubborn screws, use the smallest size first and then graduate to the larger sizes until the screw is removed.

Out Performs All Other At Half the Cost, & Half the Time!
