ENVIRONMENTAL PRECAUTIONS	Do not breathe dust. This material is not a significant environmental concern.							
METHODS AND MATERIALS FOR CONTAINMENT AND CLEANING UP	Vacuum clean spillage or wet sweep. Avoid creating airborne dust. Place in a container for use or disposal.							
SECTION 7: HANDLING	AND S	TORAGE						
PRECAUTIONS FOR SAFE HANDLING	Minimize dust generation. Avoid contact with eyes. Do not breathe dust. Repair or dispose of broken bags. Observe all label precautions and warnings. Flammable or hazardous substances may retain such characteristics after absorption. Care should be taken to store and dispose of waste material in accordance with instructions of manufacturer of substance absorbed and applicable laws. Do not use with hydrofluoric acid or concentrated caustic solutions.							
CONDITIONS FOR SAFE STORAGE	Store in a dry place to maintain packaging integrity and product quality. Store product separately from feed, food, pesticides and fertilizers so that cross contaminations does not occur. Do not store near hydrofluoric acid or concentrated caustic solutions.							
SECTION 8: EXPOSURE		ROLS / PERSON	NAL PROTEC	CTION				
EXPOSURE GUIDELINES: Note: Processing of sorptive clays is not covered by the OSHA Silica Standard (29CFR1910.105 the OSHA PEL associated with that standard.

ENGINEERING CONTROLS	Use general or local exhaust ventilation to control dust within recommended exposure limits. Refer to ACGIH publication "Industrial Ventilation" or similar publications for design of ventilation systems.							
PERSONAL PROTECTIVE EQUIPMENT:								
EYE / FACE PROTECTION	Goggles to protect from dust							
SKIN PROTECTION	No special equipment is needed.							
RESPIRATORY PROTECTION	Respirators fitted with filters certified to standard 42CFR84 under series N95 should be worn when dust is present. If the dust concentration is less than ten (10) times the Permissible Exposure Limit (PEL) use a quarter or half-mask respirator with a N95 dust filter or a single use dust mask rated N95. If dust concentration is greater than ten (10) times and less than fifty (50) times the PEL, a full-face piece respirator fitted with replaceable N95 filters is recommended. If dust concentration is greater than fifty (50) and less than two hundred (200) times the PEL use a power air-purifying (positive pressure) respirator with a replaceable N95 filter. If dust concentration is greater than two hundred (200) times the PEL use a type C, supplied air respirator (continuous flow, positive pressure), with full face piece, hood or helmet.							
GENERAL HYGIENE	Avoid bre	athing dust. Avoid contac	t with eyes. Wash	hands after handling and before eat	ing or drinking.

HAZARDOUS DECOMPOSITION Not applicable PRODUCTS SECTION 11: TOXICOLOGICAL INFORMATION POTENTIAL HEALTH EFFECTS Likely Routes of Exposure See below EYE May cause irritation (tear formation and redness) if dust gets in eyes. SKIN Not absorbed by the skin, but may cause dryness if prolonged exposure. Ingestion of small quantities is not considered harmful, but may cause irritation of the mouth, throat and INGESTION stomach. Acute inhalation can cause dryness of the nasal passage and lung congestion, coughing and general throat INHALATION irritation. Acute inhalation of high concentrations of respirable crystalline silica may cause acute silicosis. This product contains naturally occurring crystalline silica. Respirable crystalline silica may cause lung cancer and lung disease (silicosis) if inhaled for prolonged periods. Symptoms of silicosis include wheezing, cough and CHRONIC EFFECTS shortness of breath. This natural product is composed predominantly of clay, but contains some crystalline silica. Respirable crystalline silica (quartz) is classified by IARC and NTP as a known human carcinogen. Crystalline silica is only CARCINOGENICITY known to cause cancer when inhaled in a respirable form. It is not known to cause cancer by any other route of exposure. NTP Respirable crystalline silica (quartz) is classified as a known human carcinogen. Respirable crystalline silica (quartz) is classified as a known human carcinogen. IARC No data available NUMERICAL MEASURES OF TOXICITY
