Batteries designed to perform

Exide makes high-performance motorcycle batteries, designed for those who demand the best from their bike. We use the most advanced components and materials, and our products are renowned for their reliability and long lifespan. We make batteries for motorcycles, scooters, jet skis and a wide range of other vehicles. Customers use our products to get to work, explore the world, and race on land and sea. We are an original equipment manufacturer, and have the most forward-looking technology in the industry. Take to the road with confidence, knowing you are powered by Exide.

GEL

Exide GEL is the ultimate choice for any premium motorcycle, scooter and powersport vehicle. It is designed to bring you maximum comfort on the road, easily handling power hungry equipment like audio, GPS, additional lights and heating systems. It is completely spill-proof, leak-proof and highly vibration resistant, making it also ideal for off-road uses. Its deep discharge protection and very low self-discharge make it perfect for long storage periods and seasonal use. Gel technology was originally invented by Exide, and is now the gold standard in motorcycle batteries.

Benefits

- > Ideal for premium vehicles with power hungry electrical equipment
- > Very low self-discharge - perfect for seasonal use
- > Deep-discharge protection - store for up to 24 months without loss in cycle life
- > Brilliant performance even when partially discharged, prolonging cycle life
- > Maximum safety and highly vibration resistant - easily handles rough road conditions
- > Ready to use, no initial acid filling
- > Maintenance free - no water refilling
- > Latest original equipment technology
- > Made in Europe

High performance components and materials

Superior valves, cell sealing and ultra pure battery materials for low self-discharge and extra security

The original Gel technology invented by Exide. The acid is fixed in a gel form with higher electrolyte reserve. Thus the battery is more heat tolerant, less prone to irreversible sulphation and has a longer cycle life

Did you know?

As the original inventor of Gel technology back in 1958, Exide supplies **original equipment Gel batteries for BMW motorcycles**. Exide GEL is the perfect upgrade choice for vehicles with demanding electrical equipment such as audio, GPS, heating systems and additional lights.

AGM Ready

AGM Ready provides maximum power and is entirely “install and forget”, just like you always wanted. No initial acid filling or water topping required! The battery is leak-proof, spill-proof and highly vibration-resistant, ideal for powersport, all-terrain and extreme uses. Exide AGM Ready offers incredible performance and exceptional starting power in all weather conditions, making it also ideal for jet-skis.

Benefits

- > Maximum power
- > Extended cycle life
- > Ideal for cold weather
- > Low self-discharge - suitable for seasonal use
- > Ultra safe and highly vibration resistant - ideal for rough road conditions
- > Ready to use, no initial acid filling
- > Maintenance free – no water refilling
- > Original equipment experience inside
- > Largest range in the market - covering 80% of the parc

AGM

Exide AGM offers impressive reliability and lifespan, easily withstanding cold winters and other harsh conditions. The battery is completely maintenance free, only requiring initial acid filling to get you started. It features AGM technology, and is ideal for the majority of applications, including high-end scooters.

Benefits

- > Extended cycle life
- > Ideal for seasonal use and cold weather
- > Great safety features and vibration resistant
- > Maintenance free – no water refilling
- > 6-bottle acid pack included for initial filling
- > Easy stock handling – no recharge required before acid filling
- > Wide range covering 90% of the parc

Conventional

Exide Conventional batteries are designed for entry-level and older vehicles with basic power needs. They are also ideal for small lawn movers and garden machines.

Benefits

- > Acid pack included for initial filling
- > Easy stocking and handling
 - no recharge required before initial acid filling
- > A great variety of battery types, including 6V

Acid filling instructions

1 Prepare

AGM

Remove the red protective seal from the battery. Remove the lid from the acid pack, keeping the lid and not piercing or peeling the seal.

Conventional

Remove the plugs from the battery cell openings on the top and set aside. Remove the red exhaust cap on the side and discard. Do not pierce or peel the seal on the acid pack.*

2 Align

Align the acid pack with the battery cell openings.

3 Fill

Press the acid pack gently downward until the seal is self-punctured. The acid will flow into the battery cells. Wait until the acid is fully filled and let the battery rest for at least 30 minutes.

4 Dispose

Gently rock the acid pack to make sure all acid is dispensed. Carefully remove the acid pack and dispose of safely. Wipe off any spilled acid from the battery.

5 Cover

AGM

Cover the battery cell openings carefully and firmly with the lid you removed from the acid bottle pack.

Conventional

Put the plugs back on the battery cell carefully and firmly.

Batteries should be handled properly. Please always refer to the instruction booklet packed with each battery.

* Some Conventional batteries come with a single-bottle acid pack.

Did you know?

Exide has the most comprehensive fitment list on the market. The list is constantly updated to include the latest motorcycle and scooter models, so you will always find the right battery for your needs. Contact your local sales representative to request a paper copy or visit www.exide.com to view our online catalogue. You can also download the FREE Exide Battery Finder app to access fitment information on the go.

Exide Battery Finder app

Accessories

Motorcycles and powersport vehicles often go extended periods without being used, but this does not have to be a problem. Follow the tips below and your engine will start just fine, even after a long winter stored away. Exide also has a range of chargers and testers, designed for the home or workshop. With the right maintenance, your battery will last even longer.

Testing

EBT Bike

The Exide EBT Bike tester is specially designed for motorcycles, scooters and powersport batteries. It is an essential tool for bikers and professionals alike.

Charging

Charger 12/7

The Exide 12/7 Charger is ideal for most motorcycle and powersport batteries. It even includes a convenient state-of-charge adviser, which can be left on the battery permanently. The charger can also be used on cars and boats!

Charging Tips

- Batteries should be charged off-vehicle if the voltage drops below 12.45 volts (or 6.2 volts for 6V batteries)
- Use the specially-developed Exide motorcycle charger for best results
- Avoid fire or flare and ensure good ventilation during and after charging
- Allow the battery to rest for at least 12 hours after charging

Battery Tips

<h4>Shelf Storage</h4> <ul style="list-style-type: none"> Store in a cool (0-25°C), dry and well-ventilated environment free from sparks and frost For GEL and AGM Ready, manage stock rotation and check voltage regularly Use the specially-developed Exide EBT Bike tester for the most accurate results 	<h4>Regular maintenance during use</h4> <ul style="list-style-type: none"> Check the voltage regularly Check cables, clamps and the rest of the battery for obvious signs of damage or loose connections Clean terminals and connectors and apply pole grease as necessary For Conventional, check the electrolyte level and refill water when necessary. And make sure the exhaust outlet is free of kinks and clogs 	<h4>Long resting period between uses</h4> <ul style="list-style-type: none"> Disconnect electrical equipment and fully charge the battery Check the voltage every month for Conventional and every 3 months for AGM, AGM Ready and GEL batteries

Fitment Remarks

- (1) Bolt/nut/terminal may slightly differ from replaced battery
- (2) Keep old leads with the new battery
- (3) Degassing position may differ from replaced battery
- (4) Length may slightly exceed from replaced battery
- (5) Width may slightly exceed from replaced battery
- (6) Height may slightly exceed from replaced battery
- (7) But without sensor

Fitment Remarks

- (1) Bolt/nut/terminal may slightly differ from replaced battery
- (2) Keep old leads with the new battery
- (3) Degassing position may differ from replaced battery
- (4) Length may slightly exceed from replaced battery
- (5) Width may slightly exceed from replaced battery
- (6) Height may slightly exceed from replaced battery
- (7) But without sensor

Fitment recommendations contained in this catalogue are provided as a guide only. Whilst Exide Technologies takes every care in compiling accurate information, we do it in partnership with third party data providers and therefore cannot be held responsible for any inaccurate recommendations. ALWAYS, check the specifications of the original battery.

Battery Upgrade Suggestions

If the original or previously equipped battery do not provide the expected performance levels, such as service duration, reliability or safety. Suggesting a superior battery with advanced technologies, which is designed to perform under the most demanding conditions, is recommended.

Fitment Remarks

- (1) Bolt/nut/terminal may slightly differ from replaced battery
- (2) Keep old leads with the new battery
- (3) Degassing position may differ from replaced battery
- (4) Length may slightly exceed from replaced battery
- (5) Width may slightly exceed from replaced battery
- (6) Height may slightly exceed from replaced battery
- (7) But without sensor

In some cases, the proposed battery for upgrading could differ slightly in physical dimensions or other detail. This will be highlighted in the “fitment remarks” column and must be verified before installation.

Range Updates 2016
