

SAVE TIME AND MONEY

EZ Street saves time and money because work crews don't have to return to replace a temporary patch.

Compare EZ Street Asphalt versus traditional Cold Mix & Hot Asphalt.

EZ Street Asphalt is Guaranteed Permanent!

SHOWING POTHOLE'S WHO'S BOSS

APPLICATIONS

Potholes

Utility Cuts, Overlays & Edge Repairs

Manholes, Water Valves & Drains

INSTALLATION GUIDE

EZ Street asphalt will perform best and achieve maximum longevity if the following installation procedures are followed.

Sweep

Sweep out area to be patched. Make sure to remove all loose debris, broken pieces of pavement, and dust.

Fill

Fill pothole with EZ Street asphalt. For holes deeper than 4", compact material in 2" layers. Apply directly into water filled potholes. EZ Street asphalt will displace the water.

Compact

Compact the EZ Street asphalt with a shovel, tamper or vehicle tire to just over the level of the existing pavement.

GENERAL INFORMATION

EZ Street is a ready to use, high performance, polymer-modified, asphalt capable of providing a cost effective, simple and permanent solution to a variety of applications. EZ Street asphalt has an extended stockpile life while retaining excellent workability. EZ Street asphalt requires no tack coat, can be used to patch both asphalt and concrete surfaces, and can even be applied in water! EZ Street asphalt can be opened immediately to traffic making it perfect for those inevitable "throw and go" situations. If proper installation techniques are utilized, EZ Street applications should have an equivalent or extended life expectancy in comparison to hot mix asphalt. Proper installation is the key to the longevity of any EZ Street application and helps to ensure the maximum performance for your EZ Street material.

**Works in Water
& All Weather**

FAQs

How long does EZ Street asphalt stay workable in a stockpile?

EZ Street asphalt is guaranteed to stay workable in a stockpile for at least 6 months in a 50-ton pile stacked 6' high. But we've had smaller stockpiles last over a year outside. If you leave the stockpile undisturbed for a long period of time, a protective crust may form over the pile. This is a built-in mechanism to prevent premature hardening of your stockpile. If this happens, simply have your loader "fluff up" the material prior to loading the truck. This will rejuvenate the EZ Street asphalt.

What's so special about the EZ Street bag?

The EZ Street bag is made of durable poly-vinyl that helps prevent breakage a first in the industry. EZ Street asphalt lasts for at least a year in the bag.

Does EZ Street get harder to work with as the temperature gets colder?

All EZ Street mixes are custom designed for a region's climatic conditions. If your area is experiencing normal winter temperatures, then EZ Street asphalt will work in that environment. As temperatures drop the EZ Street asphalt stiffens but it does not affect performance.

**Available in Bulk, 50 lb
Bags & Bulk Sacks!**
