

TC-G® and TC-120® HIDDEN FASTENING SYSTEMS FOR GROOVED DECKING

FEATURES

- Ultimate corrosion resistance. ACQ Approved
- Strong connection between decking and joists
- Requires no special tools
- TC-G fits most 5/4" grooved decking
- TC-120 fits 3/4" hardwood decking with no predrilling
- Made in USA

PACKAGING QUANTITIES

TC-G, 50 sq ft bag with hand driven screws,
500 sq ft bucket for use with pneumatic gun
TC-120, 50 sq ft bag with hand driven screws

DESCRIPTION

Tiger Claw TC-G and TC-120 clips are the easiest way to install grooved decking. Use the Tiger Claw Pneumatic Installation Gun for the fastest possible installation.

Create grooves in non-grooved boards with the TC-G or TC-120 slot cutter.

COMPLETE HIDDEN FASTENING

Combine the speed and ease of the Tiger Claw TC-G for the field of the deck with the versatility of Cortex for first board, last board, perimeter boards and stairs to get a beautiful fastener-free surface.

TC-G

TC-120

INSTALLATION PROCEDURE

Fully insert TC-G or TC-120 clip into grooved edge of deck board. Screw hole should line up with the center of support joist. While standing on deck board, install provided screw at 45° angle through clip and into joist. Install one fastener and screw at each support joist.

For more detailed information, please refer to our TC-G/TC-120 installation instructions included in all packaging as well as Ask the FastenMaster Installation Video for Complete Hidden Deck Fastening with TC-G and Cortex is available on our website.

INSTALLATION TOOLS/ACCESSORIES

Pneumatic Installation Gun

The Tiger Claw Installation Gun is a semi-automatic installation tool that greatly increases the installation speed of TC-G clips.

This tool can also be used with TimberTech® CONCEALoc™, KleerKlips™, Clubhouse™ Connect Clips and Trex HideAway™ fasteners.

Collated Pneumatic Screws

For use with the pneumatic installation gun. Available in coated and stainless steel.

Butt Seam Clip

Stainless steel clip used in conjunction with TC-G.

Slot Cutters

For non-grooved boards, use the TC-G or TC-120 slot cutter to create the correct groove for each clip.
