Weed-Out Plus Lawn Fertilizer

READ THE ENTIRE LABEL FIRST OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY

long-sleeved shirt, long pants, shoes plus socks and chemical-resistant gloves (made of any waterproof material). User should wash hands thoroughly with soap and water before eating, drinking, chewing gum, using tobacco, or using the toilet.

FIRST AID				
If In Eyes:	Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.			
If On Skin Or Clothing:	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. Call a poison control center or doctor for treatment advice.			
If Swallowed:	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. 			
Have the product container or label with you when you calling a poison control center or doctor or going for treatment.				

You may also call toll-free, 1-877-800-5556 for emergency medical treatment information.

In the event of a medical or chemical emergency contact ChemTel North America 1-800- 255-3924

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems. This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. **General Precautions and Restrictions:**

• Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. • Do not allow people or pets to enter the treated area until dusts have settled.

USE PRECAUTIONS

Do not exceed specified dosages for any area. Do not apply to newly seeded lawns. During application, close spreader openings when turning.

• Do not use this product on or near desirable plants, and avoid spreading granules onto exposed root systems or adventitious shoots (rhizomes) within the drip line of desirable trees and shrubs, since injury may result.

• Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street back onto the treated area. To prevent product run off, do not over water the treated area(s) to the point of run off or apply when raining or when rain is expected that day.

INSTRUCTIONS

ferti•lome® WEED-OUT® PLUS LAWN FERTILIZER controls a wide range of lawn weeds, including Dandelion, Chickweed, Knotweed, Plantain, Henbit, Spurge and many others commonly found in home lawns. In addition, a 25-0-4 fertilizer provides a supply of plant food. Possible retreatment may be necessary if (a) lawn is heavily overrun by weeds or (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. A second application may be made in approximately 30 days. Do not use on Dichondra. Do not over apply. Under conditions of adequate moisture, high temperatures and high humidity, over-application may cause minor transitory discoloration on St. Augustinegrass. Do not use this product on "Floratam" St. Augustinegrass

- 1. Mow lawn to normal height 1 to 2 days before application.
- 2. Water lawn thoroughly at least 1 day before application to sustain moisture until the next watering (see step 4). 3. Apply when weeds are young and actively growing, preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to hold the material and prevent dust drift onto nontarget areas.
- 4. Do not wash from weed leaves for 1 to 2 days after application. At this time, a thorough watering should be made.

HOW MUCH TO APPLY For Kentucky Bluegrass, Fescues, Perennial Ryegrass, Bermudagrass, Zoysiagrass, St. Augustinegrass, Bahiagrass and Centipedegrass: Apply 4.0 pounds of product per 1,000 square feet of turfgrass. A second or follow-up application may be required for dense infestations of weeds or for adverse seasonal conditions. The second application of 4.0 pounds of product per 1,000 square feet should be used 30 days after the first application.

The maximum broadcast application rate is 4.0 pounds of product per 1,000 sq. ft. per application. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 8.0 pounds of product per 1,000 sq. ft. A uniform distribution of product on the treated area is essential. Choose a calm day to ensure uniform coverage. Do not exceed the application rate for

SPREADER GUIDE - ONE BAG WILL COVER UP TO 10,000 SQUARE FEET

These settings can be used only as a guide, they are not absolute. The speed at which the applicator walks, spreader condition and the texture of the turf will alter the rate of application. If product remains in spreader after application to recommended square foot coverage, spread remainder over same

Spreader	Spreader Settings Lbs. of product per 1,000 sq. ft.		
-	4 lbs.		
Scotts®/Republic Accugreen (Drop)	4 1/4		
Scotts®/Republic Speedy Green (Broadcast)	3 3/4		
ferti•lome®/Earthway Ev-N-Spred (Broadcast)	14		

The above spreader settings are approximate. Calibrate your spreader on 250 square feet and adjust to apply at the rate of 1 pound of product

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal

PESTICIDE STORAGE: Store in original container and keep any bags containing unused product in a locked storage area inaccessible to children and domestic animals. PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
