

STAINLESS STEEL BARRIER MESH

Rodents are blocked from entering voids around your structure with GONZO® Rodent Pro® Barrier Mesh.

This product acts as a barrier to mice, rats, bats and other small rodents. Search for voids and gaps in your foundation, around windows or doors. Cut mesh to estimated size to fill openings. Stuff mesh into cracks, weep holes and any other openings. Do not leave gaps in the mesh as pests may find their way through unprotected openings. Use a screwdriver or stick to force mesh deep into voids.

No-rust solution to keep rodents from entering your home, barn or shed.

Block foundation gaps, weep holes, and other small passageways to keep rodents out!

PRECAUTIONS: Keep Out of Reach of Children May contain sharp edges. **Keep away from electricity.**
