Wrap Up 365 Days of Peace of Mind

Monitor your fence remotely with the Gallagher's i Series Fence Energizer System

i Series Fence Energizers carry a powerful shock, but they also monitor your fence performance, informing you of any voltage drops or issues so immediate action can be taken. An i Series Energizer and Controller when coupled with add-on products like the i Series Fence Monitor and Fence Remote offer unmatched performance, productivity and peace of mind.

System pricing varies based on Energizer & accessory selection.

Call 800-531-5908 for details or to find your local Gallagher Dealer, visit us at www.GallagherUSA.com.

*A watchful eye on all corners
of your fence!*

01 i Series Energizers

i Series Fence Energizers monitor your fence performance, informing you of any voltage drops or issues so immediate action can be taken. Three models available. The 1800i (G304504), the 2800i (G306504) the 5800i (G308514) and the world's largest Energizer - the 10000i (G379514) Energizer work with all accessories show on this page.

All i Series Energizers are packaged with a controller.

01 i Series Controller

Energizer Controller allows fence information to be seen in a convenient location up to 160' away from the Energizer. Waterproof for outdoor placement.

02 i Series Remote G50700

The Remote pinpoints the fault within the monitored zone and enables you to turn off the Energizer during repair and on again once complete.

- Shows fence voltages and current
- Shows Alarm status for the Energizer and the Fence Monitors
- One Remote can be used on up to 9 Energizers or use multiple Remotes on one (or more) Energizers.

The 10000i is the world's largest, most powerful Energizer in the world, with 100 stored joules and powering up to 1,000 miles!

03 i Series Fence Monitor G51000

Add up to six monitors to your fence system to turn it into a fully monitored set up that keeps the Energizer Controller constantly up to date with fence performance.

Additional Accessories:
Monitor a section of fence and drive external strobe lights, sirens or alarm panels if the circuit is broken e.g.: gate opened or a wire cut.

Siren G56902

'Tis the Season

Gallagher i Series Fence Energizers Systems Offer Security & Peace of Mind

"With the Gallagher i Series, I can focus on caring for my animals and my business and not worry about the safekeeping of my property and valuable assets – it's already taken care of."

Like any new landowner, Karlin Ekberg noted the repairs needed to be made on her recently-purchased property located in Washington's beautiful Kittitas Valley. As owner of a small equine breeding operation, custom rehabilitation and retirement care center, first on the to-do list was tending to the property fence before moving her animals to their new home.

After evaluating her maintenance needs, Ekberg selected the Gallagher i Series Fence Energizer Systems as the best fit for her operation.

"I learned my lesson the hard way on my previous property when a deer dragged the electric fence and left a gap about 100 feet open," Ekberg says. "Thankfully my horses are well trained on electric fence and stayed in, but it would have been good to know exactly when and where it went down. I was sold on the features of the i Series right away."

The Gallagher i Series Fence Energizer Systems allow you to quickly and easily monitor your fence performance, informing you of any problems immediately so you can take action quickly to ensure your livestock are kept safe, says Liam Shaw, Gallagher representative.

"The controller can be placed up to 160 feet away from the chargers and will provide fence information, such as voltage and current readings, all at-a-glance," Shaw says. "Fence monitors recognize any significant drop in fence zone or fence charger performance and raise alarms to the property owner so they know exactly when there was a problem and where."

In less than three months from installation, Ekberg can already testify to the immediacy of the i Series Systems. "Like most young animals, my filly likes to test boundaries and tried to sneak under the fence," she says. "As designed, my controller alerted me right away and told me exactly which zone had a higher reading. Luckily I was home at the time and could take care of the problem."

Shaw explains the Gallagher i Series Fence Systems feature cutting-edge technology at the forefront of the industry today. "But probably more important, these electric fence systems offer security and peace of mind unlike any other products on the market."

"Some people spend a large part of their day walking their property checking and mending electric fence," Ekberg says. "With the Gallagher i Series, I can focus on caring for my animals and my business and not worry about the safekeeping of my property and valuable assets – it's already taken care of."

"...these electric fence systems offer security and peace of mind unlike any other products on the market."

FREE i Series Fence Monitor Offer with the purchase of select items

It's easy. From November - December, purchase either an M1800i (G304504) i Series Energizer/Controller, a M2800i (G306504) Energizer/Controller, a M5800i (G308514) Energizer/Controller or a M10000i (G379514) Energizer/Controller **AND** an i Series Remote (G50700) and receive an i Series Fence Monitor (G51000) FREE after mail in rebate. Turning a Passion into a Successful Family Business

Like many school-aged girls, Jane Atkinson's daughter, Robin, wanted a horse. Unfortunately, due to allergies and other concerns, Atkinson said no. And like many children that age, Robin was also very persistent. So Atkinson suggested an animal better suited to their Arctic climate of Fairbanks, Alaska – a reindeer.

"When Robin sets her mind on a goal, she does everything to achieve it," says Atkinson. "For two years, her whole focus was reindeer research – all of her science fair projects, she joined 4-H and she interviewed people."

Robin's dedication to learning about reindeer also became a family affair. Atkinson says she became the instructor for their 4-H club, Arctic Herder.

"4-H was a great venue for Robin to share the information she was learning about reindeer," explains Atkinson. "She also gained confidence and experience in public speaking."

Fueled by her passion to own a pet reindeer, and relying on her honed-in public speaking skills, Robin set out to raise the \$2,000 necessary to purchase the animal.

"Robin and her sister started Murphy Dough Cookie Co., and began making and selling cookie dough to members of the community," says Atkinson. "In fact, we still use her recipe today."

Two years later Robin had raised the money.

"The original investment was \$2,000, but reindeer are herd animals, so you have to get two," Atkinson says. "Thankfully, Robin's Dad agreed to fund the second."

In October 2007, Ruby and Moon joined the family.

Since then, the herd has grown to eight. Atkinson says reindeer are gentle by nature and are fun, curious animals. She also adds that each one has a very distinct personality.

"Olive was initially very shy," says Atkinson. "She quickly overcame her shyness with grace and a new boldness."

"You could tell there was something different about Rufus from the moment he was born," she says. "Rufus turned out to be our kissing reindeer!" Atkinson's passion, love and care for the reindeer presented a unique Agritourism opportunity.

"I love walking with the reindeer every day and enjoying what they discover out in the forest and their interactions with each other," Atkinson explains. "Friends would ask to join us on our daily walks, and we realized we had a great educational and business opportunity at hand."

"There's a lot of mystical hype about reindeer for sure," says Atkinson. "People are fascinated and delighted to be around these animals."

It sure appears so. According to the website TripAdvisor, Running Reindeer Ranch is listed as number two on the "Things to do in Fairbanks" list. The tour also holds a five star rating from over 450 reviewers. In fact, for the past five years, Running Reindeer Ranch has received the coveted Certificate of Excellence award from TripAdvisor for constantly earning great reviews from visitors.

"A lot of our guests tell us they are just amazed at the experience," says Atkinson. "Some folks thought the tour would be more like a petting zoo, and it is so much more. People are enraptured by the animals."

Atkinson says visitors should expect a very educational experience during their 2.5 hour tour. She says she covers the full natural history of reindeer and explains how they adapted to living in the Arctic.

Visitors spend an hour and a half out in the forest walking a loop with the reindeer and then return to her home for garden-fresh vegetables served with homemade ranch dressing or cookies and cocoa – season depending. The cookies, Atkinson notes, are made using the same recipe Robin and her sister used when she raised money for her first reindeer.

"Our most popular cookie, 'The Works,' combines oatmeal, chocolate chip and coconut," says Atkinson. "It's been a family favorite for years and our guests also agree."

Opening her home and operating Running Reindeer Ranch has allowed Atkinson the opportunity to share her passion and educate others about these fascinating animals. It also provides a way for Atkinson and her family to meet people from all over the world, while remaining in her native state.

"I live in an incredible birch forest," Atkinson says. "Having the reindeer has completely made a new appreciation for living in Alaska."

For more information about Running Reindeer Ranch, or to schedule a tour, please visit their website at www.runningreindeer.com, or e-mail: info@runningreindeer.com, or call 907-455-4998.

Introducing the W110 Entry Level Weigh System

Easy to use. Easy to haul.

New

PORTABLE, ALL WEATHER

With a 0-3,300 lb weighing capacity these galvanized steel chassis loadbars fit most platform sizes and come precalibrated to the indicator.

EASY SET-UP

All in one, plug and play system enables easy portability and set-up. Operates on 4 "AA" batteries.

LARGE SCREEN

Easy to use modern design with large intuitive touch buttons. Three modes for weighing both static weights and livestock.

There are few things you can count on when raising or showing livestock, but you can count on Gallagher's easy W110 Livestock Weighing System. This easy to use portable entry level system comes with a weigh scale indicator, mount bracket, loadbars and connection cables. **Visit your local Gallagher Dealer to learn more.**

Something for Every Operation

Whether you are upgrading your current management system or using the technology for the first time, investing in a Gallagher Weighing & EID system makes working livestock easier, safer and less stressful for both the you and the animal.

System pricing varies. Call 800-531-5908 for details or to find your local Gallagher dealer, visit www.GallagherUSA.com.

A winter scene with a horse and a snow-covered tree under a golden sky. The background is a vast, golden-yellow sky with soft, wispy clouds. In the foreground, a horse's rear and tail are visible on the right side, standing in a snowy field. To the left, a large, snow-laden evergreen tree stands prominently. The overall color palette is warm and monochromatic, dominated by shades of gold and orange.
