

GreenGuard® RainDrop® 3D Building Wrap

FOR USE AS AN AIR BARRIER, WATER-RESISTIVE BARRIER AND DRAINAGE MEDIUM IN CONSTRUCTION ENVIRONMENTS WHERE OPTIMUM BARRIER PERFORMANCE PLUS DRAINAGE BEHIND WALL CLADDING IS REQUIRED

- Provides advanced moisture management
- Drains water that gets through exterior cladding
- Built-in drainage channels will not crush or crimp
- Qualified air barrier
- Water-resistive barrier
- High resistance to tearing
- Residential and commercial applications
- Use for siding, stone, stucco
- Breathes to allow moisture vapor to escape
- Translucent for easy installation

GreenGuard® RainDrop® 3D Building Wrap

Description

Kingspan GreenGuard® RainDrop® 3D Building Wrap is a cross-woven polyolefin building wrap designed with an enhanced contour to facilitate the drainage of water that penetrates the exterior cladding, which is the primary weather barrier of a wall system.

The contour won't crimp, collapse, or flatten, ensuring water will drain no matter how tightly cladding is nailed to the wall. It is a recognized air barrier material listed with www.airbarrier.org, and it has demonstrated water holdout capabilities in industry recognized water resistance tests. This non-perforated wrap also breathes to allow moisture vapor to escape. Stays UV-stable up to 6 months.

It is an excellent secondary weather barrier that helps deflect water and wind-driven rain, yet is designed to breathe to assist trapped moisture vapor to escape, helping walls dry faster.

It meets the International Building and Residential Code requirements for air barrier materials, water-resistive barriers, and for drainage efficiency.

Compliance

Intertek CCRR-1018 for IBC, IECC and IRC Compliance;
DrJ Engineering TER No. 1407-05 (NFPA 285);
ASTM D 226, Type I (Specification for Building/Roofing Paper);
ASTM E 1677, Type II (Specification for Air Infiltration Barriers);
ASTM E 2178 – Air Permeance (Air Barrier Materials);
ASTM E2357 – Air Barrier Assembly (go to www.airbarrier.org);
ASTM E 2556, Type II (Specification for Water-Resistive Barriers);
HUD/FHA UU-B-790a – Equivalent to Grade D/Type 15 Building Paper.

Handling & Storage

When stored outdoors, all product should be protected from exposure to direct sunlight using the original packaging or an opaque, light-colored tarp. Material that has been unwrapped should be covered or rewrapped.

WARNING: This product is combustible. A protective barrier or thermal barrier is required as specified in the appropriate building code. Protect it from exposure to open flame or other ignition sources during shipping, storage and installation.

Health & Safety

Kingspan GreenGuard® RainDrop® 3D Building Wrap is made of synthetic materials that are generally recognized as not providing a food source for insects, fungus, mold, or mildew. It should always be properly installed and stored.
