

STRUCTURAL SCREWS

WE BUILD AMERICA®

The newest fastener launch from the brand you know and trust, Grip-Rite Structural Screws offer versatility, speed and longevity in load-bearing exterior wood construction projects. Available in both traditional flat head and hex head styles, the hex head features Grip-Rite's exclusive Dual Drive Power, which brings flexibility to the jobsite with a unique combined Hex Washer/Star Drive recess head, offering the user a choice of using the included hex driver or a star drive bit to fasten the screw. Both styles include an ID code stamped right into the head for easy spec reference and a load value chart conveniently located on every package. As a replacement for lag screws, Grip-Rite Structural Screws feature a type 17 point that translates to both efficiency and time savings by eliminating the need to pre-drill pilot holes. Our premium PrimeGuard Plus coating assures Grip-Rite Structural Screws will last throughout a project's lifetime. Easily identifiable, cobalt blue packaging features easy to read iconography, lateral load value references and a scannable QR code that links directly to the ICC report for technical specifications.

Applications

Decking, Gazebos, Playground structures, Pergolas and Trusses

Features and Benefits

Dual Drive Hex Head

Flat Washer Head

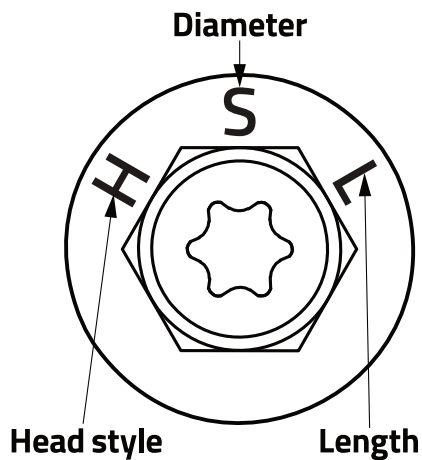

LAG SCREW REPLACEMENT GUIDE

- 1/4" Hex Head replaces 1/4" Lag Screws
- 5/16" Hex Head replaces 1/4", 5/16", 3/8", 7/16" Lag Screws
- 3/8" Hex Head replaces 1/4", 5/16", 3/8", 7/16", 1/2", 5/8" Lag Screws

Easily identifiable, cobalt blue packaging features easy to read iconography, lateral load value references and a scannable QR code that links directly to the ICC report (ESR-3933) for technical specifications.
