HOW TO FIND YOUR SIZE

Usually one hand will be slightly larger than the other, typically the strong hand (e.g. the right if you are right handed). Using a tape measure, wrap the tape around the hand at the widest part as shown and make a loose fist. Round the measurement to the nearest half inch.

MEASUREMENT	YOUTH	LADIES	MENS
4 1/2-5	2-X SMALL		
5-5 1/2	3-SMALL		
5 1/2-6	4-MEDIUM		
6-6 1/2	5-LARGE		
6 1/2-7		6-SMALL	
7-7 1/2		7-MEDIUM	
7 1/2-8 1/2		8-LARGE	
8 1/2-9 1/2			9-MEDIUM
9 1/2-10 1/2			10-LARGE
10 1/2-11 1/2			11-X LARGE
11 1/2-12 1/2			12-XX LARGE
12 1/2-13 1/2			13-XXX LARGE

USA SIZING vs. EURO SIZING

As Heritage is a USA glove manufacturer, we base our sizing on the USA Sporting Industry standard method of measuring gloves. Please note that other European glove companies base their measuring of gloves in a completely different way and this method is also based on the EU metric system, not USA inches.

For your convenience we have provided a glove measuring conversion chart between USA sizing and EU (European) sizing.

USA	EURO
US 2	EU 4.5
US 3	EU 5
US 4	EU 5.5
US 5	EU 6
US 6	EU 6.5
US 7	EU 7
US 8	EU 7.5
US 9	EU 8
US 10	EU 8.5
US 11	EU 9
US 12	EU 9.5
US 13	EU 10

HERITAGE GLOVES WARRANTY

All Heritage gloves are warranted against defects in material or workmanship for 90 days from date of purchase. Valid only with original receipt of purchase. Normal wear and tear, damage due to misuse, alteration to the product or negligence is not covered under Heritage Gloves' warranty. Please make sure that the gloves returned for warranty are washed. Please contact our customer service department at 805-552-1900 for return authorization and instructions.

TOUCHSCREEN FRIENDLY
MANY HERITAGE GLOVES ARE DESIGNED TO BE TOUCHSCREEN FRIENDLY

TOUCHSCREEN FRIENDLY for use with smart phones. Non-abrasive metallic micro fibers conduct your finger tips' electrical charge and work as your bare finger on your smart phones touch screen. No need to remove your Heritage glove to take the call.

CATALOG DESIGN RANDY COMMANS PHOTOGRAPHY SCOTT HIRKO/HIRKO PHOTOGRAPHY

REIN CUT Patented "Rein Cut" design between the ring and pinky fingers. This unique design removes the bulky seam and materials between your fingers to allow you to flex your fingers unrestricted and comfortably while maintaining sensitivity and control of your reins. US PATENT NUMBER 7,281,275

DELTA GRIP

DELTA GRIP Delta Grip synthetic suede leather increases your sensitivity control and grip of the reins. This material was specially developed to be three times more durable and abrasion resistant than other brands of gloves, which increases the wear-life of the glove. Delta Grip is machine washable.

SUPER GRIP Super Grip is a high quality synthetic grain leather that is designed to help increase your sensitivity control and grip of the reins. The material is breathable and permeates the perspiration from your skin out at the same time it is maintaining a perfect grip. Super Grip is machine washable.

MICRO-TEC Micro-Tec is a specially developed synthetic leather. This material was designed to blend a very soft and lightweight fit with the technology of micro-porous holes for breathability and comfort. Letting perspiration out while preventing moisture and wind from entering the glove surface. Micro-Tec is machine washable.

HERITAGE KEVLAR Heritage Kevlar® is stronger than steel, yet it was especially created for our Air-Flow Roping glove to feel as soft as cotton. Unlike traditional forms of Kevlar® material, Heritage Kevlar® is comfortable, contours to your hand, and feels like cotton. (US Patent pending) Like traditional Kevlar® materials, it has five times the strength of a steel wire of the same diameter, excellent resistance to abrasion, fire, water, and biological growth.

SPECTRUM SUEDE Designed to be breathable and permeate perspiration from your skin out, while maintaining a perfect grip.

CABRETTA LEATHER Cabretta leather is the highest quality of leather available. This drum-dyed sheepskin leather is extremely soft and durable.

GOATSKIN LEATHER Goatskin leather is one of the most durable, yet remains soft and flexible. Laboratory tests show that goatskin is three times stronger than cowhide.

3M THINSULATE™ The warmest thin glove insulation available, even in damp conditions. It provides 1 1/2 times the warmth of down, and twice the warmth of other high loft insulation materials.

SPANDURA A blend of Nylon and Lycra, omni-directional stretch fabric that forms to the hand well and offers exceptional ventilation.

COOLMAX® Coolmax® fabrics are designed to move moisture away from the body and enhance fabric drying rate thus, keeping you feeling cool and dry.

LYCRA® Soft form fitting omni-directional stretch Nylon used for its ventilation and comfort characteristics.

NEOPRENE An extremely versatile synthetic rubber which is soft, flexible and stretchable. Neoprene displays outstanding physical toughness and retains body heat.

KEVTEC® Aromatic polyamide fibers, consisting of synthetic polyamides, commonly woven into fabrics for cut, abrasion and heat resistance.

HERITAGE POLO PRO GLOVES

Through innovation and high performance materials Heritage Gloves has created the newest design polo specific glove in the sport. The Polo Pro glove is anatomically cut to fit your hands properly while holding your mallet and reins. The left hand glove is designed with special reinforcement for the reins and the right hand glove is reinforced for the mallet to increase your grip and durability. Our unique Tackified digital goatskin leather gives you that secure grip and sensitivity for controlling your mallet.

- A QUALITY ROPING GLOVE AT AN ECONOMICAL VALUE.

HERITAGE AIR-FLOW ROPING GLOVES

The Heritage Air-Flow Roping glove's innovative design offers the only roping glove available made with an open weave stretch mesh top that allows air-flow inside the glove to keep your hands comfortable and dry. We have also totally redesigned the palm with dual layer Kevlar in the high friction areas to provide greater durability. Anatomically pre-curved construction prevents bunching in the palm and fingers. This glove is also designed to keep any seam from getting between your grip and the critical feel of the rope enhancing balance and control.

(right hand only)
