On the job with HYDE®

A contractor speaks from experience

“... the HYDE® Rapid Valve Transfer® system has completely changed the way that we spray. It saves us time. It saves us an unbelievable amount of money. And it's a whole lot safer. The job we're on today — it would usually take us about four days to do this one side of the building. There'd be staging on this deck, and a staging tower at the bottom, and planks ... it would take at least two days to set up. With the Rapid Valve Transfer® system, we're able to paint this whole upper section in an hour and a half. So it's pretty easy to do the math. An hour and a half vs. two to three days with two to three guys. So we're making all kinds of money with this system ...”

SURFACE PRO

Pressure Washer Accessories

Adding a Pivot Nozzle Wand to your pressure washer allows you to step back, stay dry and reach into every nook and cranny without pain and strain. With a twist of the handle the patented nozzle pivots up to 90° as you work, so you can reach in, over, under or around obstacles and still keep a 90° angle to the surface for maximum power. With the Pivot Nozzle Wand, the tool does all the work, making pressure washing more productive and much less tiring. Models are available for use with all major brands of gas and electric pressure washers. U.S. Patent #6979644. Other U.S. and International Patents Pending.

28420 18" Pivot Nozzle Wand for Electric Pressure Washers

Rated for use with electric pressure washers up to 2000 PSI. Perfect for cleaning decks, house siding, cars, ATVs and many other areas around the house or worksite. Patented slide handle pivots the nozzle as you work. Includes 4 adapters for use with all major brands of electric pressure washers.

**Clam pack, 5.9lb, 4pk*

28430 28" Chrome-Plated Wand for Gas Pressure Washers (M22-style)

Gas Pivot Nozzle Wand (also called pressure washer lance) is rated for up to 3200 PSI and designed specifically for M22-style gun fittings. Soft-touch, rubberized grip provides non-slip control. Heavy-duty lightweight housing has a chrome-plated steel shaft, providing durability and corrosion resistance.

**Clam pack, 2.9lb, 1pk*

28440 40" Chrome-Plated Wand for Gas Pressure Washers (1/4"-style)

Rated for up to 4000 PSI and designed specifically for 1/4" "female" gun fittings. Soft-touch, rubberized grip provides non-slip control. Heavy-duty lightweight housing with durable chrome-plated shaft.

**Clam pack, 3.3lb, 1pk*

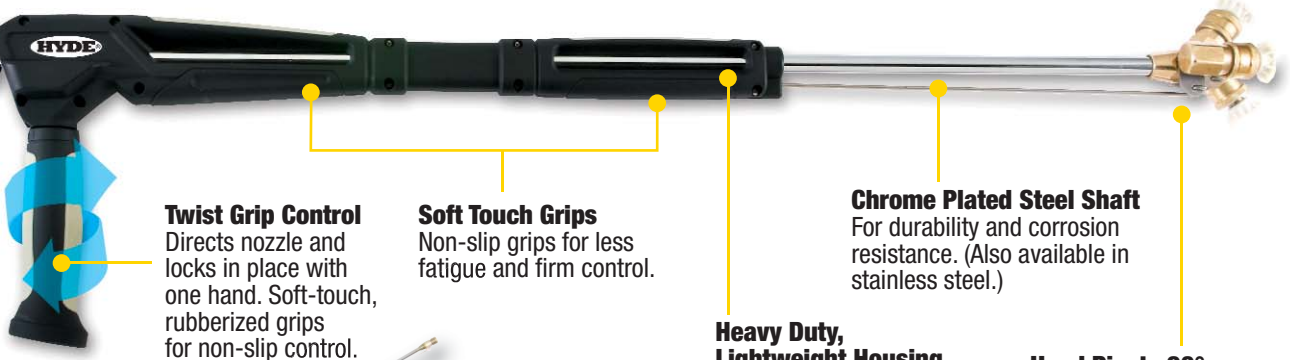

28450 40" Stainless Steel Wand for Gas Pressure Washers (1/4"-style)

Identical to the 28440 but with a stainless steel shaft, providing durability and superior corrosion resistance.

**Clam pack, 3.3lb, 1pk*

PAINTING

This valve is going to change the way you spray. The Rapid Valve Transfer® System

Finally, an airless spray system that lets you spray nonstop, switching easily from gun to pole *as you paint*. Unlike most poles, the RVT® telescopes ... extending your reach up to 12 feet. No ladders or scaffolding. No powering down or depressurizing. Just faster jobs with less fatigue and easy cleanup.

The brain of the RVT® system is the unique spray valve. It holds the pressure, allowing the valve itself to be transferred "live" from gun to pole and back again. The RVT® Valve eliminates the need for a heavy gun at the top of a pole. Insert the valve into the lightweight head and you're ready to spray. And since no paint runs through the pole, cleanup is easy.

The HYDE® RVT® system is a better way to spray.

Airless Spray System with RVT® Technology

28700 HYDE® Airless Spray System with RVT® Technology

Full kit includes an airless spray gun with an RVT® valve, tip, tip guard and inline filter, and a 5-1/2' to 8-1/2' spray pole. Gun is fully assembled and ready to spray. U.S. Patents #6378922, #5485960 and patents pending.

WALL REPAIR

Wet & Set® Wall and Ceiling Repair

There simply is no faster, more professional way to repair a hole or crack in drywall, plaster, stucco or even wood than with this fabric patch that hardens into a permanent patch within minutes. Cut it to size with scissors. Then, just dip it in water and

spread it over the damaged area. Stains, holes, cracks and crumbling damage disappear within seconds, replaced by a hard, permanent patch that's ready for a finish coat within 20-30 minutes. Perfect for flat, curved or uneven surfaces.

WET & SET® forms a strong polymer adhesion that won't peel or delaminate like some patching materials do. In most cases, one coat of patching compound is all it takes — no two-day wait to finish up the job.

Available in single flat sheets or economical 3-yard contractor rolls.

DRYWALL SANDING

Suck up drywall dust with your wet/dry vac, not your lungs, with a HYDE® Dust-free Vacuum Sander Kit.

Do it the hard way, or the HYDE® way.

Dust-Free Vacuum Sanders

No more dust! These handy drywall sanders attach to any wet/dry vacuum for sanding without creating dust throughout your worksite. Protects furniture, floors, electronics — and your lungs — from invasive drywall dust. EasyClamp system allows sanding screen replacement quickly and easily. Both hand and pole-style sanding kits come with a 6' hose, coupling adapters and one sheet of reversible sanding screen.

09165 Dust-Free Vacuum Hand Sander Kit

Attachment for hand sanding

*Boxed, 1.9lb, 1pk

09170 Dust-Free Vacuum Pole Sander Kit (without pole)
