### The Never-Miss® Finishing System New

Never-Miss® Colour Gel and Final Coat Finishing System is a patented, breakthrough formula designed to enable the drywall professional to consistently achieve a high quality finish with less time, effort and cost.

**The Colouring Gel** dries highly visible; when the surface is sanded, the colour dissipates preventing over sanding. When added to joint compound:

- Provides extreme visibility
- Track job progress
- Self Priming
- Eliminates paint flashing

**Never Miss Final Coat Ultra White Gel** gives a level 5 finish for both smooth and textured surfaces when added to joint compound. Apply by either spraying or roll skimming. As Final Coat dries and cures, it becomes scratch and nick resistant. No priming required.

**Professional Drywall Lifter**

**ST0760 – Drywall Panel Lifter Ea.**

- 110 lb. Load Limit.

Professional drywall lifter is designed to lift drywall panels up to 12' long. An 11' lifting height allows for panel placement on most ceilings and walls. Compact and easy to maneuver.

Extendable arms adjust quickly and easily, held in place by screw tabs to accommodate large sheets of drywall.

The safety support pin locks the adjusting arm in place. The radius arc allows user to adjust to any angle for specific projects.

The wench design uses a ratchet drive for easy up and down adjustments. Durable steel cable combined with sprocket gear and locking clasp hold lift in place.

Three leg design allows the lift to be positioned very close to the walls. Legs are locked in place by two steel strut rods.

Rods are repositioned for easy transporting. Easy to assemble.
