EXCEL POINT OF PURCHASE DISPLAY (AD-XLPOP)

The Excel POP Display helps the customer visualize what a chimney system would look like in their home. It displays the most commonly used parts in any system, including chimney lengths, a ceiling support, a flashing, tee, radiation shield, wall and roof supports and rain caps.

The display includes all of the chimney components required. It has a small footprint and can be easily moved around the showroom. It is indispensable in demonstrating EXCEL chimney to a customer.

EXCEL CHIMNEY POINT OF PURCHASE - POSTER (AD-XLPOP-2)

The EXCEL Chimney POP fits onto a 6" diameter length of EXCEL. It is designed to demonstrate the advantages of EXCEL over other brands of chimney. The installation examples along the edge are meant as a guide to help determine which components are required for specific installations.

ULTRABLACK POINT OF PURCHASE - POSTER (AD-UBPOP)

The Ultra Black POP display is a must-have for any showroom with woodstoves on display. It is designed to fit directly onto a one-foot length of Ultra Black which can be inserted into the flue of a display model.

GENERAL INFORMATION

Industrial Chimney Company was established in 1991 by a small group of partners with over 75 years combined experience in the chimney industry. Our experience convinced us that the needs of our ultimate customers (the people who live in a house with one of our chimneys) are served best when our products are sold by retailers who specialize in chimney and fireplaces. Specialty dealers understand the unique nature of our industry and are qualified to provide both technical support and installation. One of the cornerstones of our business is the conviction that hearth dealers are our essential partners in delivering the highest quality, safest chimney systems available.

From the beginning our objective has been to engineer products which enable better, faster installations while using fewer parts, thereby improving installation efficiency. This is the best way we know of to ensure that consumers benefit from safer installations and competitive pricing. Our goal is to do everything possible to help our business partners do the best installation possible for the homeowner.

We believe that our long-term accomplishments are tied to our commitment to people, both inside and outside of our company. While we are continuously investing in our plant and processes, the most gratifying returns come from the investments in people. Our greatest sense of accomplishment comes from when we see an employee or customer achieve their personal or business goals. That is why we continue to make major promotion and funding commitments to hearth industry education.

We focus our efforts in four areas. We manufacture residential venting, specifically insulated chimneys, single & double walled stove pipe and chimney liner for wood burning applications as well as venting products for pellet and gas appliances. We also manufacture two brands of wood burning fireplace with all customers needs in mind. The RSF brand is designed for heat and efficiency, while the Renaissance Fireplaces brand is designed for ambiance. In addition we manufacture commercial and industrial venting - everything from chimney liners to 48" diameter pressure stacks, which we sell through specialty reps in that market. From the beginning, our residential, commercial, and industrial venting products have enabled us to secure leadership roles in each segment of the industry.

Thanks to the strong support we have received from our distributors and dealers, our strategy is working. We have grown dramatically over recent years. Our 120,000 sq. ft. factory runs 24/7 all year round. It is located on more than 20 acres of prime industrial property and is filled with state-of-the-art machinery. We currently employ over 200 people.

This catalog contains information on our residential venting products and we have done our best to ensure it is complete and up-to-date. If you have any questions or concerns regarding any of our products please feel free to contact us directly. We will be pleased to assist you.

The ICC team

THE KEY TO OUR SUCCESS IS OUR PEOPLE

Making great, innovative products requires great, innovative minds. It is easy to look at a competing product and reproduce it; however, everything we do at ICC is the result of time, testing and engineering. We will make 50 different versions of one part, to make sure it satisfies the customer purchasing it and the dealer installing it.

We occasionally glance at our competitors' catalogs, only to find our components in their product lines. That's fine, because while they're following our lead, we're pushing forward with ideas and designs they haven't even dreamed of.

ICC's laboratory is DAP certified by UL, permitting us to test our new ideas without having to book independent lab time. This gives us freedom to be more creative and revolutionary.

LIMITED LIFETIME WARRANTY FOR ICC VENTING PRODUCTS

Industrial Chimney Company (ICC) warrants all its venting products to be free from functional failure due to defects in material or workmanship for as long as the original consumer owns the chimney system (limited to 5 years for EXCELPrime). This warranty provides replacement of any components which fail as a result of normal use and includes replacement of any components damaged as a result of a chimney fire. (Note: Chimney fires are dangerous and preventable. We strongly encourage you to have your chimney cleaned regularly.) ICC warrants all stainless steel chimney components against perforation as a result of corrosion. This warranty does not cover damage caused to the building by chimney fires or misuse of the product.

No claims under this warranty will be honored unless ICC is notified of the potential claim and is given the opportunity to have one of its agents examine the chimney prior to replacement.

ICC will only be responsible for repair or replacement of any components found to be defective under this warranty. In no event shall ICC be responsible for any incidental or consequential damage caused by defects.

During the first ten years of the warranty (five years for EXCELPellet & EXCELDirect), ICC will provide replacement components except rain caps at no charge. During the balance of the warranty, ICC will provide replacement chimney components at 50% of the current retail price at the time of the warranty claim. This applies to all ICC venting products except for ULTRABlack Double Wall Stove Pipe and EXCEL Deluxe Rain Caps (EDRC), both of which are covered 100% for life.

ICC will not be responsible for labor of any kind required in the removal or replacement of any system replaced under this warranty.

Each venting product is designed to vent specific fuels only. This warranty is void if the venting is used in an application for which it is not designed.

EXCEL, EXCELiner, EXCELPrime, RIS and ULTRABlack:

Continuous 650°C (1200°F) temperature

Fuel: Wood, oil, coal, gas, charcoal

EXCELPellet:

Continuous 300°C (570°F)

Fuel: Wood pellet and agricultural products, natural gas, propane and liquid fuel

EXCELDirect®:

Gas-Fired Direct Vent appliances certified with EXCELDirect®

Fuel: Natural or LP gas

Model RIS:

Continuous 540°C (1000°F) temperature

Fuel: wood, oil, coal, gas, charcoal

All ICC systems must be installed according to the Installation Instructions which are included with every system at the time of purchase. If you do not have a set of installation instructions, they are available free upon request or online at:

<https://icc-rsf.com/chimney/residential/excel>

This warranty is void if the chimney is not installed according to the installation instructions.

This warranty may not be extended or modified by our agents or representatives.

This warranty is in lieu of all other express warranties or guarantees, of any kind.

EXCEL

ALL FUEL, INSULATED CHIMNEY SYSTEM 5" – 8"

EXCEL Technical Information

Certification

EXCEL is tested and listed by Intertek Testing Services to two safety standards:

UL 103HT - The standard for solid and liquid fuel chimneys installed in the USA. Along with many other tests the UL 103HT Standard requires the chimney to withstand three 10 minute chimney fires at 2100°F (1150°C).

ULC S-629 - The standard for solid and liquid fuel chimneys installed in Canada. Along with many other tests the ULC S-629 Standard requires the chimney to withstand three 30 minute chimney fires at 2100°F (1150°C).

Applications

EXCEL chimney is suitable for use on appliances that burn:

- Wood
- Oil
- Coal
- Gas
- Charcoal

It is specifically engineered for wood burning stoves, fireplaces and residential furnaces.

Allowable Flue Gas Temperatures

	ULCS629 (Canadian)	UL103HT (USA)
Max Continuous	650°C (1200°F)	538°C (1000°F)
Brief Forced Firing	925°C (1700°F)	760°C (1400°F)
Tested To	1150°C (2100°F)	1150°C (2100°F)

Clearance to Combustible Materials

2" clearance except in areas protected by factory-built supports certified for reduced clearance. EXCEL round and square supports permit the chimney to be installed with approximately 1 inch of clearance - in the area shielded by the support.

Construction

Flue: .016" 304 or FW2 stainless steel

Casing: .016" 430 stainless steel

Seam: Interior and exterior seams are continuous seam welded

Insulation: Thermoplus continuous blanket

Wall thickness: 1"

Paint: All black EXCEL components are painted with Forrest "Stove Bright" flat black paint

EXCEL Dimensions and Support Capacities

Chimney size	5"	6"	7"	8"
Rough opening required	(INCHES)			
Round support (ERDS)	10 x 10	10 x 10	11 x 11	12 x 12
Square support (ESS)	N/A	10 x 10	11 x 11	12 x 12
Roof support (ESR)	11 x 11	12 x 12	13 x 13	14 x 14
Offset support (EOS)	11 x 11	12 x 12	13 x 13	14 x 14
Radiation shield (ERS, ERSA & ERSC)	11 x 11	12 x 12	13 x 13	14 x 14
Wall radiation shield (EWRS)	10 x 10	10 x 10	11 x 11	12 x 12
Maximum height per support	(FEET)			
Round support (ERDS)	65	55	50	45
Square support (ESS)	N/A	55	50	45
Roof support (ESR)	65	55	50	45
Wall support (EWS)	50	44	37	35
Offset support (EOS)	35	30	27	25

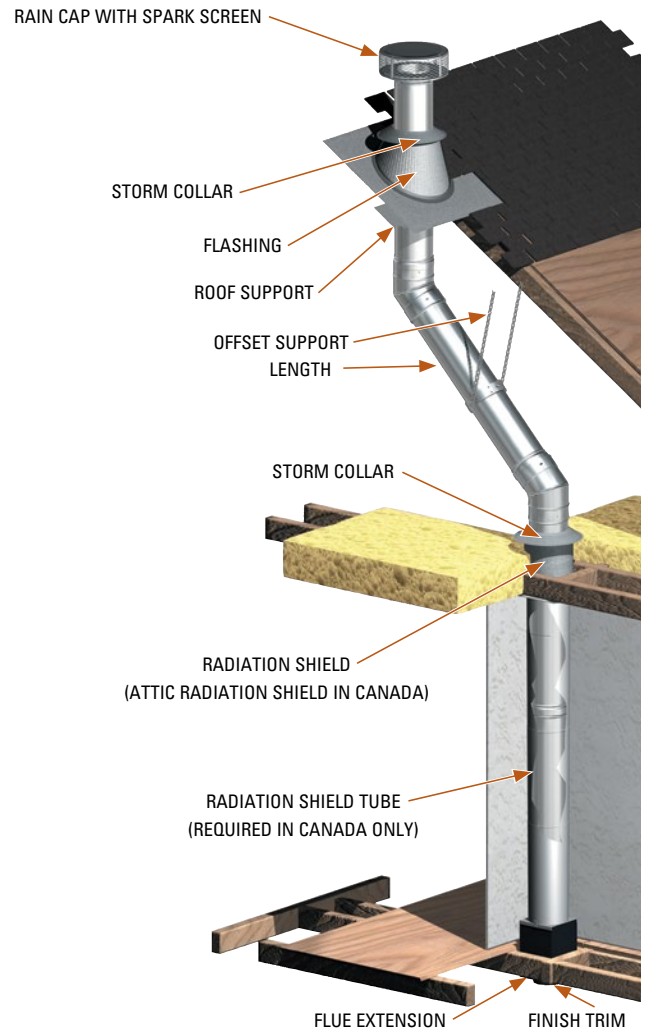

Radiation shields must be used at all floor joist and ceiling areas

EXCEL has been tested and listed to the UL 103HT and ULC S-629 chimney standards by INTERTEK.

EXCEL Typical Installations

NOTE: The following information is provided to assist you in selecting the chimney components required for your installation. It is intended to be a guideline only. These are not the installation instructions.

EXCEL Product Descriptions

Insulated Lengths

(EL48, EL36, EL24, EL18, EL12, EL6)

EXCEL chimney lengths are available in 48", 36", 24", 18", 12" & 6" lengths. To determine the installed length deduct 1 1/2" from the overall length.

INCHES

Insulated Lengths						
Inside diameter			5	6	7	8
Outside diameter	Nominal		7	8	9	10
	Outside of Bead		7 1/4	8 1/4	9 1/4	10 1/4
Weight - lbs/foot			3.6	4.2	4.9	5.3
Nominal length	48	36	24	18	12	6
Installed length	46 1/4	34 1/4	22 1/4	16 1/4	10 1/4	4 1/4

Insulated Adjustable Lengths

(ELA18)

The most common applications for the adjustable length are:

- Between elbows so that any required centre-to-centre offset can be achieved.
- When it is necessary to balance the chimney height so that the caps line up for functional or aesthetic reasons.
- When a specific horizontal offset is required.

The adjustable length must be installed above a straight chimney length. It will not adjust into an elbow or tee. To determine the installed length deduct 1 1/2" from the overall length. To adjust the length, remove the screws, slide the sections of the outer casing together to the desired length and cut away the excess insulation. Do not cut the inner flue, it will slide inside the next chimney length.

INCHES

Insulated Adjustable Lengths	
Nominal length	18" adjustable
Installed length	9 1/2 - 16 1/4

Insulated Tees

(ETI)

The insulated tee can be used on the interior or exterior of a building. The tee is designed to be used in combination with a wall support assembly. The EXCEL tee cap has a handle on the bottom to simplify removal for cleaning. An ETC Tee Cap is included.

INCHES

Dimensions			
Code	A	B	C
5ETI	11 1/4	6 3/4	6 1/4
6ETI	12 1/4	7 1/4	6 3/4
7ETI	13 1/4	7 3/4	7 1/4
8ETI	14 1/4	8 1/4	7 3/4

Tee Cap

(ETC, EITC)

ETC

An ETC Tee Cap is included with the EXCEL Insulated Tee and an EITC Insulated Tee Cap is optional. If a replacement tee cap is required, either version tee cap can be ordered. The EITC Insulated Tee Cap has an insulated plug that reduces heat loss from the bottom of the chimney system. The Insulated Tee Cap does not reduce clearance to combustibles, but will help maintain higher flue temperatures.

Chimney Top Damper

(ETD)

Adding this "Top Damper" to a system seals it right at the top of the chimney. The "Chimney Top Damper" is placed directly below the cap and is designed to prevent any cold air infiltration into the house through the chimney. It functions on a chain that hangs down to the firebox and comes with 30' of wire.

INCHES

Dimensions				
Code	A	B	C	D
7ETD	7	9	12	10 1/4
8ETD	8	10	12	10 1/4

Elbows

(EE15, EE30 & EE45)

EXCEL 15° and 30° elbows are tested and listed to UL 103HT and ULC S629 Standards. EXCEL 45° elbows are certified to ULC S629 only.

Dimensions

7EE45	3 1/4	4 1/4
8EE45	3 1/2	4 1/2

Wall supports - Wall Bands (EWS) Extended Wall Supports (EWSE)

Old Style Wall support (EWS-R)

Extended Wall support (EWSE)

The wall support (EWS) is used to support a vertical chimney on a through-the-wall installation. The EXCEL Wall Support installs on the first length of chimney above the tee, (not below the tee, thus making it easier to fasten the support to framing, instead of into concrete). The Wall Support utilizes the universal band to fit 6, 7, & 8 inch chimneys. It is designed to slide in and out to fit a variety of wall profiles. The Wall Support is also used as a lateral support every 8 feet in height. The Extended Wall Support (EWSE) will allow the chimney to pass by a 12" overhang. It often eliminates the need to either offset a chimney around the overhang or cut and finish the soffit and fascia. One support is required every 8', minimum of two per system. The Old Style Wall Support (EWS-R) is generally more complicated to install than the EWS. However it simplifies installations on irregular surfaces like vinyl siding.

EWS Dimensions (Fits 6", 7" & 8" chimney)				
Code	A	B	C	D
EWS	7, 8, 9 or 10	5	3 1/2	6
EWS-R	8, 9 or 10	5	3 1/2	16
EWSE Dimensions (Fits 6", 7" & 8" chimney)				
Code	A	B	C	D
EWSE	8, 9 or 10	12 1/4	6 1/2	13

Roof Support

(ESR)

The roof support is primarily used when it is difficult to use a round or square support in a cathedral ceiling. It can also be used above an offset, or to provide additional support when the chimney height exceeds the capacity of the primary support. The roof support utilizes a universal band, so that the same support fits 6, 7, & 8 inch chimneys. It is made with adjustable brackets, which allows it to adjust easily to any roof pitch.

Dimensions (Fits 5", 6", 7" & 8" chimney)			
Code	A	B	C
ESR	7, 8, 9 or 10	6	Fits flat - 24 / 12

Offset Support

(EOS)

The offset support is primarily used to re-support the chimney above an offset. However, it can also be used to provide additional support when the chimney height exceeds the capacity of the primary support. The offset support straps are 24 inches long.

Round Support

(ERDS)

EXCEL's ceiling supports are suitable for use on flat or sloping ceilings. They must project into the room a minimum of 3 inches on a flat ceiling. For sloping ceilings, see the EXCEL installation manual.

These supports are designed to act as a combination of support and attic radiation shield. To use a support as an attic radiation shield, simply close the open area at the top of the support (in the attic) with a storm collar. Clearance to the exterior of EXCEL chimney is reduced to 1" while inside the support or support extension.

Dimensions				
Code	A	B	C	D
5ERDS	5	10	24	14 1/4
6ERDS	6	10	24	14 1/4
7ERDS	7	11	24	15 3/4
8ERDS	8	12	24	17

INCHES

Storm collar (ESC) ordered separately.

Insulated Round Support

(ERDSI)

The Insulated round support includes an insulation wrap for the chimney length inside the support and an insulated firestop to be sealed to the vapor barrier.

Dimensions				
Code	A	B	C	D
6ERDSI	6	10	24	14 1/4
7ERDSI	7	11	24	15 3/4
8ERDSI	8	12	24	17

INCHES

Storm collar (ESC) ordered separately.

Square Support

(ESS)

Square Supports are ideal for installation in sloped ceilings but can be installed in flat ceilings as well.

Like Round Supports, Square Supports act as a combination of support and attic radiation shield. To use a Square Support as an attic radiation shield, the top of the support (in the attic) must be covered with an **ESQSC (Square Support Storm Collar)** because a standard storm collar is not wide enough to fully cover the opening. Clearance to the exterior of EXCEL chimney is reduced to 1" while inside the support or support extension.

Dimensions					
Code	A	B	C	D	E
6ESS	6	10	24	14	12
7ESS	7	11	24	15	12
8ESS	8	12	24	16	12

INCHES

Storm collar (ESQSC) ordered separately.

MINIMUM SUPPORT PROJECTION - BELOW THE CEILING

PITCHED TRIM RING (ROUND SUPPORT) OR FINISH TRIM (SQUARE SUPPORT)

Slope	X
0/12	3
2/12	5 1/2
7/12	6 3/4
12/12	7 1/2
24/12	12 1/2

Support Extensions

(ERDSE & ESSE)

Support extensions are available to facilitate installations on very steep pitched ceilings, or where the chimney must project unusually far into the room. Both the round and square support extensions are 24" long. Clearance to the exterior of EXCEL chimney is reduced to 1" while inside the support or support extension. Thus, there is zero clearance to the exterior of the support or support extensions.

Pitched Trim Rings

(ERTA, B, C & ECTA, B, C)

Use ERTA, B, C for pitched trim on Round Support.

Use ECTA, B, C for pitched trim on EXCEL lengths.

If you are installing a round support on a sloping ceiling, or passing EXCEL through a pitched ceiling without a support, you will require a pitched trim ring. Use the following table to determine the correct trim ring for your installation. Pitched trim rings are not available in 5" Ø. The finish trim which comes with the square support, is adjustable for any ceiling pitch from flat to 24/12. Not available in 5" Ø.

INCHES

EXCEL	8ECTC	10 1/16	14 1/4	22 1/4	8/12 - 12/12

Wall Radiation Shields

(EWRS & EWRSI)

The wall radiation shield is used when the chimney passes horizontally through a combustible wall. The EWRS telescopes to adjust for wall thickness from 6" – 12", so no painting is required. The inside finish trim is removable from the EWRS, allowing for easy installation before or after the wall finish is applied. The Insulated Wall Radiation Shield (EWRSI) is designed for installations in energy efficient houses which have tightly sealed vapour barriers.

Insulated Wall Radiation Shield (EWRSI)

The EWRSI is fully insulated and has a flange to permit an airtight seal to the vapour barrier. It can be installed into an existing home but since it must be installed under the drywall it is most often used for new construction. Flue extension and trim ring included.

INCHES

Dimensions					
Code	A	B	C	D	E
5EWRS/EWRSI	5	10	14 1/4	16 X 16	6-12
6EWRS/EWRSI	6	10	14 1/4	16 X 16	6-12

8EWRS/EWRSI	8	12	17	16 X 16	6-12

Stainless Trim for EWRS (EST)

A decorative trim cover for the exterior wall plate of the Wall Radiation Shield that prevents water infiltration while providing adequate heat ventilation. It is constructed from two separated pieces and can be added at any point.

INCHES

Dimensions		
ø	A	B
6"	16 1/4	8"
7"	16 1/4	9"
8"	16 1/4	10"

Insulated Angled Wall Radiation Shields (EWRSI30 & EWRSI45)

The insulated angled wall radiation shield is used when the chimney goes through a combustible exterior wall, with a 30 or 45 degree angle. A radiation shield is installed on the exterior side of the wall to complete the installation. This part is used for fireplace installations only. *Note: 45° are approved for use in Canada only.*

INCHES

Required Opening Dimensions				
Angle θ	30°		45°	
	A	B	A	B
6"	11 3/4	38	11 3/4	27 7/16
7"	12 3/4	40	12 3/4	28 7/8
8"	13 3/4	42	13 3/4	30 1/4

Anchor Plate (EAP)

It is used to connect EXCEL Chimney to an appliance, masonry fireplace or heater.

Anchor Plate Dampers (EAPD, EAPD2)

Combines the anchor plate with a heavy gauge stainless steel damper to simplify masonry fireplace construction, reduces installation cost and provides a superior seal.

INCHES

Dimensions		
Code	Diameter	A
EAP	5	12" X 12
EAP - EAPD - EAPD2	6	12" X 12
EAP - EAPD - EAPD2	7	13" X 13
EAP - EAPD - EAPD2	8	14" X 14

Hardware Kit (HK)

Includes over 50 pieces of exclusive hardware for EXCEL installations - carriage bolts, thumbscrews, wingnuts and washers.

Flue Extension (EX)

The flue extension fastens to the bottom of the first chimney length with three screws. It makes it possible to connect a stove pipe, or other type of connector, to the chimney. It is sometimes used to connect an EXCEL chimney directly to an appliance. The flue extension is designed to fit a variety of stove pipes. However, due to variations from one manufacturer to another, some modifications may be required in the field.

Locking Band (ELB)

EXCEL insulated components are designed to be fastened together with the stainless steel screws provided with each part. In some cases, it may be desirable to install a locking band for aesthetic purposes. The locking band is designed to overlap the two beads immediately above and below the chimney joint. Fastens with a 1/4" bolt. All three screws are required even when the ELB is installed.

Gable End Guide (EGEG)

The purpose of the Gable End Guide is to assist in the stabilization of chimney as it passes the gable end of a home. The EGEG has adjustable arms to fit up to a 12/12 pitch. It is important to note the EGEG is a guide and it does NOT replace a support. Utilizes universal band to fit 6, 7 and 8" Chimneys.

INCHES

Dimensions						
Code	A min	B min	C min	A max	B max	C max
XM-EGEG	2 3/4	1 1/2	3	6 3/4	4 3/4	9 1/2

Roof Brace
(ERB, ESRB)

Stainless steel roof brace poles (ESRB) are now available; the roof brace is used to provide lateral support for a chimney which extends more than 5 feet above a roof. The roof brace utilizes a universal band to fit 6, 7 and 8 inch chimneys. The arms on the roof brace telescope from 5 ft. to 9 ft. long.

Roof Brace Stiffener
(ERBS)

Prevents roof brace poles bending under the weight of snow. Recommended for metal roofs.

Adjustable Stud Support
(EAS)

Allows you to install a round or square support (ERDS, ES & ESS) without using wood framing. The maximum support capacity is 30 feet of chimney. The maximum joist spacing is 24" center to center.

Snow-Wedge
(ESW)

For roof pitches of 4/12 to 12/12.

Wall Channel
(EWC)

The wall channel enables a wall support or wall band to be fastened solidly to the framing when the framing centers do not line up with the chimney opening. The wall channel is 24" long.

Universal Vinyl Siding Trim
(EVT)

This piece comes as two sections of galvanized metal. There are tabs cut into the strips that allow for easy bending at key points. Assembling these brackets will create a vinyl siding trim for any size of wall thimble in the wood, pellet or gas venting products.

Rain Caps

(ERC, EDRC, ERCS, ERCW, ERCB, ERRC)

Regular Rain Cap (ERC)

Rain Cap Deluxe (EDRC)

Spark Screen (ERCS)

Rain/Wind Shield (ERCW)

Rain Cap Base (ERCB)

Revolving Rain Cap (ERRC)

All EXCEL chimneys must be installed with an EXCEL rain cap (any model) to prevent water from entering the chimney.

- ERC:** The regular rain cap is made from .016" thick type 304 stainless steel and carries a one year warranty.
- EDRC:** The deluxe cap is made from .025" thick type 304 stainless steel and carries a **lifetime 100% full replacement warranty.**
- ERCS:** An optional stainless steel spark screen is available for installations where sparks can pose a safety problem.
- ERCW:** The optional wind and rain shield improves draft by up to 40% in windy conditions and is very effective at preventing wind driven rain from entering the chimney. It bolts to the existing holes in either the regular or deluxe cap.
- ERCB:** The rain cap base is designed to cover the end of the chimney in applications where a rain cap is not practical but it does not keep rain from entering the chimney.
- ERRC:** The revolving rain cap helps to prevent the entry of wind driven rain and helps to prevent wind induced downdrafts.

Flashings

(EF, ESF)

Flat Flashing (EF)

Adjustable Flashing (EFA, EFB, EFC)

Stainless Steel Flashing (ESF)

These flashings are made from either galvalume steel, which is considerably more corrosion resistant than galvanized, or from stainless steel for applications where maximum corrosion resistance is desired. They are made to cover the entire range of roof pitches.

Metal Roof Flashings

(EMF)

"US Patent 7114301, Can Patent 2460044"

These flashings are specifically designed for metal roofs and greatly simplify metal roof installations. They are made from galvalume steel only. Due to the raised lip at the bottom edge of the Metal Roof Flashing, it cannot be installed on a roof pitch less than 3/12.

INCHES

Flexible Base Flashings

(ELFA, ELFB, ELFC)

All Flashings include a Storm Collar

Flashing	Storm Collar included	Material
ELFA	ESSC	Stainless
ELFB	ESSC	Stainless
ELFC	ESSC	Stainless

The flexible base flashing combines a stainless steel cone with a flexible lead base which can be easily formed on site to match virtually any roof profile. It was designed for masonry tile roofs but can be used wherever a flexible base is required except for metal roofs.

Ventilated Chase Cone

(EVCC)

EVCC Ventilated Chase Cone

Designed to be mounted to custom chase top covers where the chimney is enclosed in a chase and the appliance requires a vented flashing. This vented cone provides the ventilation required without the cumbersome flashing base. This makes it easy to meet the vented flashing requirements, even with a custom chase top cover. Extra wide storm collar included.

INCHES

EVCC Dimensions						
Code	Flue I.D.	A	B	C	D	E
EVCC	6"	10 1/2"	7 7/8"	14 1/4"	15 1/4"	7"
	7"	11 1/2"	7 7/8"	15 1/4"	16 1/4"	7"
	8"	12 1/2"	7 7/8"	16 1/4"	17 1/4"	7"

Adjustable Peak Flashing

(EFP)

The adjustable peak flashing is designed to be used when the chimney passes through the peak of the home. It will fit any peak between 2/12 and 12/12.

INCHES

Flashing Dimensions					
Pitch	Flue I.D.	Code	A	B	C
2/12 - 12/12 Peak	6"	6EFP	12	12 3/16	8 3/8
	7"	7EFP	13	13 3/16	9 3/8
	8"	8EFP	14	14 3/16	10 3/8

All Flashings include a Storm Collar

Flashing	Storm Collar included	Material
EFP	ESC	Galvalume

Storm Collar (ESC, ESQSC, EVSC)

These storm collars fit 6, 7 and 8 inch EXCEL chimneys. To form an attic insulation shield assembly in an insulated space, use a storm collar in combination with a support box or radiation shield. The ESQSC is required to form an attic insulation shield on a Square Support (ESS), all other supports and radiation shields can use either collar. If installing 5" EXCEL, use the storm collar for EXCELDirect (TM-SC). Use the EVSC Storm Collar for vented flashing.

Roof Radiation Shield (ERRS)

The roof radiation shield is required with some roof support and outside chase installations. Position of the mounting brackets is adjustable for roof pitch. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

INCHES

Roof Radiation Shield Dimensions	
Code	Diameter
6ERRS	10"
7ERRS	11"
8ERRS	12"

Radiation Shield (ERS)

The radiation shield protects combustible framing in the floor or ceiling adjacent to the chimney and also acts as a firestop spacer. When the chimney passes through the radiation shield into an insulated space a universal storm collar must also be installed to prevent the entry of insulation. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

INCHES

Dimensions				
Code	A	B	C	Framing
5ERS	10 1/2	16 X 16	15 3/4 - 28	12 x 12
6ERS	10 1/2	16 X 16	15 3/4 - 28	12 x 12
7ERS	11 1/2	16 X 16	15 3/4 - 28	13 x 13
8ERS	12 1/2	16 X 16	15 3/4 - 28	14 x 14

Storm collar (ESC) ordered separately.

Radiation Shield for Cathedral Ceiling (ERSC)

For installations where EXCEL chimney extends through a pitched ceiling. The firestop trim is adjustable to accommodate any pitch and has spacers to ensure that proper clearances are met.

In Canada, this part can be used in combination with factory built fireplaces only. For woodstove installations in Canada, the Attic Radiation Shield for Cathedral Ceilings (ERSCA) is required in combination with a Radiation Shield Tube.

Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

INCHES

Dimensions				
Code	A	B	C	Framing
6ERSC	8 1/4	10 1/4	24-38	12 x 12
7ERSC	9 1/4	11 1/4	24-38	13 x 13
8ERSC	10 1/4	12 1/4	24-38	14 x 14

Canadian Components:

The following components are for Canadian installations only and are not available in the USA.

Attic Radiation Shields

(ERSA)

The radiation shield protects combustible framing in the floor or ceiling adjacent to the chimney and also acts as a firestop spacer. When the chimney passes through the radiation shield into an insulated space a universal storm collar must be installed on top of the ERSA to prevent the entry of insulation. The ERSA has a flange on the bottom to fasten the radiation shield tube. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

INCHES

Dimensions			
Code	A	B	C
5ERSA	Ø 10 1/2	16 X 16	13 3/4 - 26
6ERSA	Ø 10 1/2	16 X 16	13 3/4 - 26
7ERSA	Ø 11 1/2	16 X 16	13 3/4 - 26
8ERSA	Ø 12 1/2	16 X 16	13 3/4 - 26

Canada Only, not available in USA

Attic Radiation Shield for Cathedral Ceiling

(ERSCA)

Similar to the Attic Radiation Shield (ERSA), only this component is designed for freestanding woodstove installations where insulated chimney passes through a cathedral ceiling. The ERSCA has a flange at its base to connect a Radiation Shield Tube. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

INCHES

Dimensions		
Code	A	B
6ERSCA	10 5/8	24 – 38
7ERSCA	11 5/8	24 – 38
8ERSCA	12 5/8	24 – 38

Canada Only, not available in USA

Radiation Shield Tubes

(ERST, ERSF & ERSF10)

The radiation shield tube is only used where the chimney is enclosed in the interior of the building (e.g. between the basement ceiling and the attic). It is not required in the attic or on exterior chase installations. It is not required when EXCEL is installed on a fireplace, gas or oil appliance. The ERST or ERSF10 are for straight installations, the ERSF is used when an offset is required in the chimney. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

***ERSF10 does not include a Square Support Adapter (ESQSA); please order one separately for square support installations.**

ULTRABlack

DOUBLE WALL STOVE PIPE

ULTRABlack Technical Information

Certification

ULTRABlack has been tested and listed by Intertek Testing Services to ULC S641 standards.

Applications

ULTRABlack is designed to be used as a connector between a freestanding oil, wood or coal burning stove and a masonry or metal chimney. There are four primary advantages to ULTRABlack over single wall connector pipes:

- It offers reduced clearance to combustible materials.
- It is designed to last the lifetime of the stove and/or chimney system.
- It offers reduced creosote formation.
- It is certified for use with mobile home stoves.

Allowable Flue Gas Temperatures

Max Continuous	650°C (1200°F)
Brief Forced Firing	925°C (1700°F)
Tested To	1150°C (2100°F)

Clearance to Combustible Materials

ULTRABlack is certified for 6" clearance with the following exception. When ULTRABlack is used as the connector on a mobile home certified stove the clearance is determined by the installation instructions for the specific stove model being installed.

Construction

Flue: .016" stainless steel.

Casing: .019" satin coat steel. Satin coat is specifically designed to be painted.

Seam: Interior and exterior seams are seam welded.

Wall thickness: Approximately 3/8"

Paint: Forrest "Stove Bright" flat black

ULTRABlack Engineering and Design Considerations

Maximum allowable overall height:

There is no maximum requirement however, as a general guideline we recommend that the length of ULTRABlack not exceed 20 feet.

ULTRABlack assembles like a regular single wall stove pipe - no complicated, unsightly twist lock connectors or spot welds. There is no cutting required and all the screw holes are predrilled. Just put one piece on top of the other and screw together using the black oxide screws provided. Easily fits most stoves, including cast iron stoves and stoves with oval collars. ULTRABlack is approved for mobile home installation on most major stove brands, when installed with EXCEL insulated chimney. For mobile home installations follow the stove manufacturer's installation instructions.

EXCEL ULTRABlack

Fully Shielded Stove pipe with smooth, clean lines.

- Requires just 6" clearance to combustibles in all diameters - even when installed in a corner, or parallel with a ceiling*.
- Has a smooth, clean appearance to compliment any stove installation.
- Maximizes flue gas temperature, ensuring good draft.
- Minimizes creosote buildup.

* Some stoves may require greater clearances.

ULTRABlack Product Descriptions

Lengths (UB5F, UB1F, UB18F, UB2F & UB3F)

Lengths are available in 5", 12", 18", 24" and 36".

Adjustable Lengths (UBAF)

Adjustable Lengths combine a 36" length and a 36" slip length in one box. The UBAF fits all brands of insulated chimney and most brands of wood burning stoves without a stove or chimney adapter. A UBTC trim collar is included with the UBAF.

Slip Lengths (UB6SF, UB1SF & UB18SF)

Slip Lengths slide over a regular straight length allowing you to adjust the overall length of a straight run without cutting. The minimum adjustment can be reached only if the length used below the slip length is long enough to accept it.

Reducers

(UBR)

Large end crimped/male end

Designed to reduce the diameter of a system to accommodate a range of flue sizes, appliances and installations. *Note: Decreasing chimney diameter even 1" can have a serious negative impact of chimney performance. Be careful to use these components only when appropriate.*

INCHES

Dimensions			
Code	A	B	C
UBR76	7	6	7
UBR86	8	6	7
UBR87	8	7	7

Increasesers

(UBI)

Small end male

Designed to increase the diameter of a system to accommodate a range of flue sizes, appliances and installations. *Note: Increasing chimney diameter can reduce draft and increase creosote formation. Be careful to use these components only when appropriate.*

INCHES

Dimensions			
Code	A	B	C
UBI56	5	6	7
UBI67	6	7	7
UBI68	6	8	7
UBI78	7	8	7

Oval to Round Adapter

(UBORF)

Adapters are designed to connect ULTRABlack to stoves with oval flue collars - such as a Vermont Castings Defiant Encore. Available in 8" oval to 8" round only.

INCHES

Dimensions (8" only)					
Code	A	B	C	D	E
8UBORF	18	17	8	5 3/4	10 3/4

8" - 6" Oval to Round Adapter

(86UBORF)

Connects to Vermont Castings Defiant 8" oval flue collar and reduces to 6" ULTRABlack.

INCHES

Dimensions				
Code	A	B	C	D
86UBORF	10 3/8	6	14 3/8	13 3/8

Stove Adapters

(UBSE)

Primarily used with cast iron flue collars. Connect ULTRABlack to stoves with flue collars that do not project above the top of the stove. It can also be used to connect to stoves with irregular shaped or sized flue collars.

INCHES

Dimensions		
Code	A	B
6UBSE	2 1/2	1 1/2
7UBSE	2 1/2	1 1/2
8UBSE	2 1/2	1 1/2

Barometric Damper Adapter

(SWBA)

This adapter simplifies the connection between a barometric damper and an EXCELPrime or ULTRABlack tee.

Dimensions			INCHES
Code	A	B	
6SWBA	6 1/16	2 3/8	
7SWBA	7 1/16	2 3/8	
8SWBA	8 1/16	2 3/8	

Masonry Adapter

(UBM)

This part acts as a thimble sleeve to secure ULTRABlack or Prime to a masonry chimney that does not have a thimble or has an oversize one. *Note: ULTRABlack is not certified to pass through a combustible wall. An EXCELiner Insulated Thimble (ITH) must be used where there is a combustible wall between the stove and the masonry chimney. Flat trim collar included.*

Dimensions					INCHES
Code	A	B	C	D	
6UBM	11 7/8	10 7/8	12	6 1/8	
7UBM	11 7/8	10 7/8	13	7 1/8	
8UBM	11 7/8	10 7/8	14	8 1/8	

Masonry Thimble Adapter

(UBMA)

Connect ULTRABlack to a masonry chimney with an existing 8" thimble. *Note: ULTRABlack is not certified to pass through a combustible wall. An EXCELiner Insulated Thimble (ITH) must be used where there is a combustible wall between the stove and the masonry chimney.*

Dimensions					INCHES
Code	A	B	C	D	
6UBMA	6 7/8	11 1/8	7 1/2	4 3/4	

Damper Section

(UBD)

Butterfly type in line damper. They are recommended by some stove manufacturers to help control draft.

Dimensions			INCHES
Code	A	B	
UBD	5	4	

Trim Collars

(UBTC)

Covers the crimped (top) end of ULTRABlack where it connects to the insulated chimney. A UBTC is included with every UBAF so they rarely need to be purchased separately.

Dimensions		INCHES
Code		
6UBTC	22 x 2	
7UBTC	25 3/8 x 2	
8UBTC	28 1/2 x 2	

Conical Trim Ring

(UBTR)

6UBTR

8UBTR

Adjustable to fit the exterior of regular ULTRABlack lengths and slip lengths. There are also slots to fit EXCELPrime single wall pipe. Available in 6" or 8".

REVOLUTIONARY NEW STOVE PIPE

THE ONLY STOVE PIPE LISTED FOR **4" CLEARANCE** WITH SHIELDING

EXCELPrime

SINGLE WALL STOVE PIPE

EXCELPrime Technical Information

Certification

EXCELPrime has been tested and listed by Intertek Testing Services

Applications

EXCELPrime is designed to be used as a connector between a freestanding oil, wood or coal burning stove and a masonry or metal chimney.

Allowable Flue Gas Temperatures

Max Continuous	650°C (1200°F)
Brief Forced Firing	925°C (1700°F)
Tested To	1150°C (2100°F)

Clearance to Combustible Materials

EXCELPrime is certified for 18" clearance to combustible materials or otherwise specified by appliance manufacturer instructions.

With the addition of a listed EXCELPrime Heat Shield, the clearance can be reduced to:

6" dia.	- 4" clearance from the shield
7" & 8" dia.	- 6" clearance from the shield

Construction

Single Wall: 24ga steel

Seam: Laser seam welded

Paint: Forrest "Stove Bright" flat black

EXCELPrime Engineering and Design Considerations

Maximum allowable overall height:

EXCELPrime must not exceed 10 feet in length and a maximum of two 90-degree elbows are permitted.

To assemble EXCELPrime, ensure that the shrunken end is facing down. Place one length on top of another and screw them together using the screws provided. There is no cutting required and all the screw holes are predrilled. EXCELPrime easily fits most stoves including cast iron stoves and stoves with oval collars.

EXCELPrime

Single wall stove pipe with smooth, clean lines.

- Heavy wall, 24ga steel.
- Laser welded to be perfectly round and does not require assembly like snap lock pipes.
- Has a 5 year, no questions asked replacement warranty.
- Without shielding, EXCELPrime requires 18" clearance to combustibles in all diameters.
- With an EXCELPrime UL Listed Heat Shield, clearance to combustibles can be reduced to 4" from the exterior of the shield for 6" EXCELPrime or 6" clearance for 7 & 8" EXCELPrime.

Length (SW1, SW18, SW2, SW3, SW4)

Slip Length (SW1S)

Adjustable Length (SWA)

Lengths are available in 12", 18", 24", 36" and 48" lengths; 6", 7" and 8" diameter.

Slip Length will slide into a regular straight length allowing you to adjust the overall length of a straight run without cutting. The minimum adjustment can be reached only if the length used below the slip length is long enough to accept it.

Adjustable Lengths combine a 36" length and a 36" slip length in one box. The SWA provides enough range that it is often the only component required for vertical installations.

Length Dimensions		
Code	A	B
SW1	12	10 5/8
SW18	18	16 5/8
SW2	24	22 5/8
SW3	36	34 5/8
SW4	48	46 5/8

Slip Length Dimensions		
Code	Min. Installed Length	Max. Installed Length
SW1S	1 3/8	10 5/8
SW6S	1 3/8	4 5/8

Adjustable Length Dimensions				
Code	A MIN.	A MAX.	B MIN.	B MAX.
SWA	40	68	38 5/8	66 5/8

Damper Section (SWD)

Acts as a 5" length and has a butterfly type incorporated damper. In the closed position, the damper is still 20% open so as not to completely block the chimney.

Dimensions		
Code	A	B
SWD	6	4 5/8

Tee (SWT)

Combines a 90° transition with a clean out. Tee Cap (SWTP) **not included**.

Dimensions			
Code	A	B	C
6SWT	10 5/8	4 1/4	4 3/4
7SWT	10 5/8	4 3/4	4 3/4
8SWT	10 5/8	5 1/4	4 3/4

Tee Cap (SWTP)

Caps off the open portion of a Tee.

Dimensions		
Code	A	B
6SWTP	6	1
7SWTP	7	1
8SWTP	8	1

Elbow (SW45, SW90)

Are available in 45° and 90°

INCHES

Dimensions		
Code	A	B
6SW45	2 5/8	2 1/4
7SW45	2 7/8	2 1/4
8SW45	3 1/8	2 1/2
6SW90	4 3/4	5 3/8
7SW90	5 1/4	5 7/8
8SW90	5 3/4	6 3/8

Slip Elbow 90° (SW90S)

Combines a 90° elbow and a slip length in one piece.

INCHES

Dimensions			
Code	A max.	A min.	B
6SW90S	19 3/4	4	5 5/8
7SW90S	19 3/8	4 1/2	6 1/8
8SW90S	19 1/8	5	6 5/8

Clean Out Elbow 90° (SW90C)

Incorporates an easily removable inspection port that is large enough for a chimney brush.

INCHES

Dimensions		
Code	A	B
6SW90C	4 5/8	6
7SW90C	5 1/8	6 1/2
8SW90C	5 5/8	7

Adjustable Elbow 90° (SWA90)

The angle of this elbow is variable between 90° and straight. Patent Pending.

INCHES

Dimensions		
Code	A	B
6SWA90	5 3/8	6 3/8
7SWA90	5 7/8	6 7/8
8SWA90	6 3/8	7 3/8

Increaser (SWSI)

Designed to increase the diameter of a system to accommodate a range of flue sizes, appliances and installations. *Note: Increasing chimney diameter can reduce draft and increase creosote formation. Be careful to use these components only when appropriate.*

INCHES

Dimensions			
Code	A	B	C
SWSI67	6	7 1/8	2 5/8
SWSI68	6	8 1/8	2 5/8
SWSI46	3 7/8	6 1/8	2 1/4

Reducer (SWSR)

Designed to reduce the diameter of a system to accommodate a range of flue sizes, appliances and installations. *Note: Decreasing chimney diameter even 1" can have a serious negative impact on chimney performance. Be careful to use these components only when appropriate.*

INCHES

Dimensions			
Code	A	B	C
SWSR76	7	6 1/8	2 1/2
SWSR87	8	7 1/8	2 1/2
SWSR86	8	6 1/8	2 1/2

Oval to Round Adapter (8SWOR)

Connects EXCELPrime to stoves with oval flue collars. Available in 8" only.

INCHES

Dimensions					
Code	A	B	C	D	E
8SWOR	9	7 7/8	8	5 3/4	10 3/8

12" Slip Flue Extension (6SWEX)

Can be used to replace the EXCEL Flue Extension (EX) in EXCELPrime installations. This 12" long version will slip into a standard length, eliminating the need for a slip length.

INCHES

Dimensions				
Code	A	B	C MIN.	C MAX.
6SWEX	5 7/8	8	1/2	10 - 3/4

Barometric Damper Adapter (SWBA)

This adapter simplifies the connection between a barometric damper and an EXCELPrime or ULTRABlack tee.

INCHES

Dimensions		
Code	A	B
6SWBA	6 1/16	2 3/8
7SWBA	7 1/16	2 3/8
8SWBA	8 1/16	2 3/8

Masonry Adapter

(SWM)

Connects 6" EXCELPrime to a 7" or 8" masonry chimney thimble. *Note: EXCELPrime is not certified to pass through a combustible wall. An EXCELiner Insulated Thimble (ITH, page 41) must be used where there is a combustible wall between the stove and the masonry chimney.*

Dimensions				
Code	A	B	C	D
6SWM	6 1/4	10 1/2	6 5/8	4 3/4

See 6UBM for use with 6" Masonry Chimney Thimbles

Masonry Plug

(SWMP)

Plugs the opening into an existing masonry chimney that had been previously used to vent another appliance. The Masonry Plug is capable of plugging a round opening up to 8" diameter and is lined with insulation to prevent cold drafts.

Dimensions			
Code	A	B	C
SWMP	10 1/2	5 7/8	4 3/4

Heat Shield

(SW1HS, SW2HS, SW3HS, SW45HS, SW90HS)

Reduces clearance required from combustible walls and ceilings. EXCELPrime heat shields are UL listed in combination with EXCELPrime only and will not reduce the clearance of other brands of stove pipe (each heatshield includes installed heatshield spacers). For other brands of single wall stove pipe, clearances will be reduced to those of an unlisted heat shield installation. Available in 12", 24", 36", 45° and 90° designs.

Clearance	
Diameter	Clearance to Combustibles from Shielding
6"	4"
7"	6"
8"	6"

Heat Shield Spacer

(SWHSS)

Used to maintain 7/8" spacing where shields do not overlap.

Dimensions	
Code	A
SWHSS	7/8

EXCELPrime Offset Tables

Use this table if you are not installing an adjustable length between the elbows.

EASY TO INSTALL

EASY TO MAINTAIN

SUPERIOR QUALITY PRODUCT

Manufactured using Type 304 stainless steel, EXCELiner is listed to UL and ULC standards by Intertek Testing Services to be used as a liner in a new chimney or to reline an existing chimney. Designed to withstand chimney fires without damage and to facilitate installation, its perfectly round, smooth shape allows lengths to fit together effortlessly. Simply line up the pre-punched holes, fasten with the stainless steel rivets provided and you're done!

EXCELiner offers versatility and a cost-effective solution, with a large range of lengths, connections and diameters, making it an excellent option when used:

- to replace clay tile liners or to reline clay tile liners which have become cracked, misused, or had chimney fires;
- to improve the safety, performance and efficiency of wood or gas-burning stoves and fireplace inserts by reducing the chimney to the correct size for the appliance;
- to improve draft, reduce fuel consumption, and help to ensure consistent appliance operation;
- as the flue in a new masonry chimney or in an unlined chimney.

EXCELiner can be used in combination with EXCELFlex liner to install in difficult to maneuver places.

EXCELiner

RIGID LINER FOR MASONRY CHIMNEYS

EXCELiner Technical Information

Certification

EXCELiner is tested and listed by Intertek Testing Services to the following standards:

ULC S-635 - Standard for relining existing masonry chimneys in Canada.

ULC S-640 - Standard for liners for new masonry chimneys in Canada.

UL 1777 - Standard for liners in new and existing masonry chimneys in the USA.

The installation requirements vary depending on which standard your installation must meet, particularly with respect to the requirements for insulation and clearance from the liner. You must ensure that your EXCELiner is installed in accordance with your local building codes.

EXCELiner is available in 5", 5.5", 6", 7" and 8" diameters.

EXCELiner is certified for installation in combination with all certified brands of flexible chimney liner.

Applications

EXCELiner is certified as a chimney liner for use on appliances that burn:

- Wood
- Oil
- Natural or LP Gas

Allowable Flue Gas Temperatures

Max Continuous	650°C (1200°F)
Brief Forced Firing	925°C (1700°F)
Tested To	1150°C (2100°F)

Clearance to Combustible Materials

The clearance between EXCELiner and surrounding combustible and non-combustible materials varies with the type of installation. Please refer to the installation instructions for specific details for your application.

Construction

Single wall: .016" or .025" stainless steel (all tees are heavy gauge .025").

Seam: Continuous seam welded.

Insulation: Optional (required for some applications) Foil backed ceramic liner.

EXCELiner Engineering and Design Considerations

EXCELiner is a fast, cost effective solution to the following chimney situations:

To repair cracked or damaged clay tile liners. EXCELiner is designed and approved to replace clay tile liners which have become cracked from age, misuse, or chimney fires. EXCELiner can be used to reline structurally sound masonry chimneys where the liners have deteriorated due to chimney fires, spalled tiles, moisture damage or eroded mortar joints.

To improve the safety, performance and efficiency of wood or gas burning stoves and fireplace inserts. By reducing the chimney to the correct size for the appliance EXCELiner improves draft, reduces fuel consumption, and helps ensure consistent operation. There is less creosote formation in a properly sized flue which decreases the probability of a chimney fire.

EXCELiner is listed to UL and ULC standards by Intertek Testing Services to be used as stainless steel liner in a new chimney, instead of a clay tile liner. Unlike clay tile liners, EXCELiner can withstand chimney fires without damage and comes with a lifetime warranty.

EXCELiner is easier to clean

EXCELiner's smooth surface accumulates less creosote than a flexible liner and is much easier to clean.

EXCELiner has been tested and listed to the ULC S-635 ULC S-640 and UL 1777 chimney liner standards by INTERTEK.

EXCELiner Product Descriptions

Lengths

(LL4, LL3, LL2 & LL1)

EXCELiner is available in 4', 3', 2' and 1' lengths. EXCELiner components fasten together with 100% stainless steel pop rivets which are supplied with the liner. The holes and slots for the rivets are factory pre-punched so no drilling is required. The male and female ends are hemmed to make the liner more rigid and reduce the likelihood of cutting yourself during installation.

EXCELiner is available in 5", 5.5", 6", 7" and 8" diameter.

Length Dimensions		
	A	B
LL1	11 5/8	10 1/4
LL2	23 5/8	21 1/4
LL3	35 1/2	33 1/8
LL4	47 1/2	45 1/8

Slip Lengths

(LLA3 & LLA1)

Slip lengths are available in 3' and 1' lengths. Slip lengths are used to adjust the length of the system without cutting. *Note: Slip lengths must be installed above a fixed length or they will not adjust. They should not be installed immediately above a tee or elbow.*

Dimensions		
Code	A MIN.	A MAX.
LLA1	1 3/8	11 5/8
LLA3	1 3/8	35 1/2

Split Base Tees

(LT)

EXCELiner tees are made from .025" thick stainless steel. The removable snout is fastened to the body of the tee with heavy duty stainless steel screws. **All 5 1/2", and 6" tees have a 6" diameter snout so that they can connect to 6" smoke pipe without a reducer.** Tee Cap (LTC) not included.

Dimensions					
Code	A	B	C	D	E
5LT	9 3/8	8	4 5/8	3 1/8	4 7/8
55LT	9 7/8	8 3/8	4 7/8	3 3/8	5 7/8
6LT	10 3/8	9	5 1/8	3 5/8	5 7/8

8LT	12 3/8	11	6 1/8	4 5/8	7 7/8

Adjustable Snout Tees

(LTA)

EXCELiner tees are made from .025" thick stainless steel. The LTA eliminates the difficult job of cutting and fastening a short horizontal length of liner in the breeching. **All 5 1/2", and 6" tees have a 6" diameter snout so that they can connect to 6" smoke pipe without a reducer.** Tee Cap (LTC) not included.

Dimensions						
Code	A	B	C	D MIN.	D MAX.	E

Twist Lock Tee

(LTL)

The Twist Lock Tee is ideal for tight installations. The telescopic snout connects to the body of the tee with a twist action and locks into place with fold over tabs.

INCHES

8LAF90	10 1/4	6

Flex Liner Adapters

(LAF)

Note: The male end of EXCELiner will fit into most brands of stainless flex (except for some models of flex which are intentionally made undersize) so no adapter is generally required when the flex is installed below the rigid.

Can be used either as an appliance adapter for stainless flex or to connect rigid EXCELiner to flex. The 6LAF5 and 6LAF55 will connect an appliance with a 6" flue outlet to 5" or 5 1/2" flex liner respectively.

INCHES

Rain Caps

(LCR, LCD)

EXCELiner rain caps are made entirely of type 304 stainless steel. The top is held in place with four wing nuts on the regular (LCR) and deluxe (LCD) rain caps for easy removal and cleaning without the need to remove the rain cap itself. The deluxe cap has a stainless steel band.

Dimensions

Model RIS

ALL FUEL, INSULATED CHIMNEY SYSTEM 10" - 24"

Model RIS Technical Information

Certification

Model RIS is tested and listed by Intertek Testing Services to the following standard:

UL 103HT – The standard for chimneys on gas, liquid and solid fuel-fired appliances in the USA.

CAN/ULC-S604 – The standard for chimneys on gas and liquid fuel-fired appliances in Canada.

CAN/ULC-S610 – The standard for solid fuel Factory-Built Fireplaces in Canada.

Applications

RIS chimney is suitable for use on appliances that burn:

- Wood
- Oil
- Coal
- Natural or LP Gas
- Charcoal

Model RIS is certified to vent wood burning stoves, fireplaces and residential furnaces. In addition, there are a number of RIS components specifically designed and certified to vent large open masonry fireplaces burning wood and/or gas. There are also specific components designed to extend masonry chimneys and repair earthquake damaged masonry chimneys.

Note for customers in Canada: RIS chimney is not certified to the CAN/ULC-S629 standard but is certified to CAN/ULC-S610 in combination with some solid fuel appliances (e.g. Renaissance Fireplaces). Only install RIS on wood fireplaces certified to CAN/ULC-S610 in combination with RIS or contact the appropriate authorities for approval, beforehand. ICC can provide complete engineering services (sizing, material selection, installation recommendations, drawings etc.) to assist you in obtaining approval. However, we can not guarantee that it will be accepted in all cases. If you have a large fireplace project you would like to quote on please be sure to contact us in advance so we can work with your local engineer, architect and building authority.

Allowable Flue Gas Temperatures

Max Continuous	540°C (1000°F)
Brief Forced Firing	760°C (1400°F)
Tested To	1150°C (2100°F)

Clearance to Combustible Materials

Model RIS is certified for 2" clearance to combustible materials.

Construction

Flue: .018" - .025", stainless steel.

Casing*: .018" - .025", stainless steel or .018" - .025" galvalume steel.

Seam: Interior and exterior seams are continuous seam welded.

Insulation: Thermoplus continuous blanket.

Wall thickness: 1"

See page 81 of this catalog for recommended chimney sizing for masonry fireplaces.

Note: There are some components of RIS chimney that are available in 10" and 12" diameter only. Some of these parts are designed for specific fireplaces which are not described in the catalog.

* See Lengths (RIL), for types of stainless steel by diameter.

Model RIS has been tested and listed to the UL 103HT chimney standards by INTERTEK.

Model RIS Product Descriptions

Lengths (RIL)

RIS is available in 12", 18", 24" and 48" lengths. Deduct 1 1/2" from overall length to determine the actual installed dimension.

Diameters 10" – 14" have a 430 stainless steel exterior like EXCEL.

Diameters 16" – 24" have either a galvalume or 304 stainless steel exterior.

Adjustable Lengths (RILA)

12" and 24" adjustable lengths are available. The 12" can be adjusted from 7 1/2 to 10". The 24" can be adjusted from 13 1/2 to 22". Deduct 1 1/2" from overall length to determine the actual installed length. *Note: Adjustable lengths must be installed above a fixed length or they will not work. They should not be installed immediately above a round or square support, tee or elbow.*

Insulated Tees (RIT)

Designed to connect horizontal and vertical lengths of the chimney. Does not include a tee cap (RITC).

Chimney Top Damper

(RCTD)

Currently available in 10" to 16" diameter only. Adding this "Top Damper" to a system seals it right at the top of the chimney. The "Chimney Top Damper" is placed directly below the cap and is designed to prevent any cold air infiltration into the house through the chimney. It functions on a chain that hangs down to the firebox and comes with 30 feet of cable.

INCHES

12RCTD	12	14	12	10 1/4

Radiation Shield

(RRS)

Used when the chimney passes through a combustible floor or ceiling. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

Anchor Plate

(RAP)

Is used to connect an appliance (such as a masonry fireplace or heater) to an RIS chimney.

Anchor Plate Damper

(RAPD, RAPD2)

Combines the anchor plate with a heavy gauge stainless steel damper. The RAPD simplifies masonry fireplace construction, reduces installation cost and provides a superior seal. The RAPD comes with 6' stainless steel cable.

Rain Caps

(RRC, RDRC)

The RIS rain cap is constructed entirely of stainless steel. It is designed to provide good protection from wind and rain while being a small size and a low profile. The Deluxe Rain Cap is available in 10" and 12" diameters. An optional wind/rain shield is available in 10" - 24" diameter. An optional spark screen is available for installations where sparks can pose a safety problem.

Note: We do not recommend the use of untested, unlisted rain caps or shrouds. In some cases it is possible to create an unsafe installation simply by using an aftermarket shroud. If you choose to do so you must terminate the chimney with an ICC Rain Cap Base (RRCB). The RRCB closes off the top of the chimney to prevent moisture from entering the insulation.

Rain Cap Base

(RRCB)

Roof Flashings

RF

RFA, RFB

(RF, RFA & RFB) Used to provide weather protection where the chimney penetrates the roof. Three models are available to accommodate various roof pitches. The storm collar (RSC) is included.

(RMFA, RMFB, RMFC) These flashings are specifically designed for metal roofs and greatly simplify metal roof installations. They are made from galvalume steel only.

(RSF, RSFA, RSFB) Stainless steel flashings are available in 10" and 12" diameters. Dimensions are the same as standard flashings.

Vented flashings are required in certain applications where additional airflow is required.

Wall Support

(RWS, RWSG)

Designed to support a vertical chimney on a wall. There are two styles of wall support, one for 10" & 12" diameter RIS and one for all other diameters.

RWS for 10" & 12" diameters

RWS & RWSG for all other diameters

Wall Band

(RWB)

Used on vertical or horizontal runs of chimney to stabilize the chimney. The maximum distance between wall bands is 8'.

Offset Support

(ROS)

The offset support is primarily used to re-support the chimney above an offset. However it may also be used to provide additional support when the chimney height exceeds the capacity of the primary support.

Roof Support

(RSR)

The roof support easily adjusts to any roof pitch. It can be used above an offset or to provide additional support and stability at the roof level.

Roof Brace

(RRB)

Designed to provide a lateral support for the chimney above a roof. The roof brace must be fastened solidly into a structural member.

Locking Band (RSLB & RGLB)

All RIS insulated components are designed to be fastened together with the stainless steel screws provided with each part. In some cases, it may be desirable to install a locking band for aesthetic purposes. The locking band is designed to overlap the two beads immediately above and below the chimney joint and fastens with a 1/4" bolt. All screws are required even when the locking band is installed. Available in stainless steel and galvalume.

Components for Renaissance Fireplaces

Roof Top Shield (RTS)

The Roof Top Shield is required for Renaissance Fireplace installations. Designed to protect combustible roofs where the chimney passes through, it has adjustable mounting brackets that raise or lower the shield depending on the roof pitch. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

Dimensions		INCHES
ø	A	
10"	13 7/8"	
12"	16 1/2"	

Insulated Angled Wall Radiation Shields (RWRSI30 & RWRSI45)

The insulated angled wall radiation shield is used when the chimney goes through a combustible exterior wall, with a 30° or 45° angle. A radiation shield is installed on the exterior side of the wall to complete the installation. This part is used for fireplace installations only. *Note: 45° are approved for use in Canada only.*

Rumford 1500 12" Radiation Shield (12RRS2)

This radiation shield is required for installations of the Renaissance Rumford 1500B fireplace. No other radiation shield is certified with the Rumford 1500B. A radiation shield MUST be installed for each floor the chimney passes through. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

Components for Renaissance Fireplaces

Flexible Radiation Shield Tube

(12RRSF)

For Canada only. A flexible radiation shield tube (RM-12RRSF) must be installed around the chimney when it is enclosed in Rumford 1500 installations. This includes an outside chase. In the fireplace enclosure the flexible radiation shield tube is not required. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

Dimensions			INCHES
Chimney	Inside diameter	Max. Length

Attic Cathedral Ceiling Radiation Shield

(RM-12RRSCA)

For Canada only - specific to the Rumford 1500. Similar to the Attic Radiation Shield for Cathedral Ceiling (ERSCA). Only, this component is designed for Renaissance Rumford 1500 installations where insulated chimney passes through a cathedral ceiling. The RRSCA has a flange at its base to connect a Radiation Shield Tube. Radiation Shields do NOT reduce chimney clearance. Always maintain 2" clearance to chimney through radiation shields.

SETTING THE STANDARD FOR THE PELLETT CHIMNEY INDUSTRY

EXCELPellet has revolutionized the pellet chimney industry. It was the first pellet vent to include a silicone gasket seal on every part. It's not surprising EXCELPellet has spawned a league of impersonators. Today, nearly all pellet chimneys use a silicone gasket seal, but none have the innovative components or quality fit and finish of the original, EXCELPellet.

EXCELPellet

PELLET AND BIOFUEL VENTING SYSTEM

EXCELPellet Technical Information

Certification

EXCELPellet has been tested and listed to UL 641 and ULC S609 by Intertek Testing Services.

Applications

EXCELPellet is certified as a chimney liner for use on appliances that burn:

- Wood
- Agricultural products
- Natural or LP Gas

Allowable Flue Gas Temperatures

Max Continuous	300°C (572°F)
Tested To	927°C (1700 °F)

Clearance to Combustible Materials

EXCELPellet is certified for 1" clearance to combustible materials.

Construction

Flue: .016" laser welded stainless steel.

Casing: .019" laser welded Galvalume steel or .019" laser welded satin coat steel (painted)

Paint: Forrest "Stove Bright" *flat black*.

Insulation: 3/8" Air Space

Gasket: Silicone Rubber

EXCELPellet Engineering and Design Considerations

We suggest that your pellet system be designed with a vertical rise. This is not a requirement but will help the stove to vent combustion products in the case of a power failure.

Keeping the horizontal run and number of elbows to a minimum will reduce the cost of your installation and improve performance.

Although not required we recommend that terminations be installed 12" away from the wall to reduce the potential for smoke stain on outside walls. Refer to your stove manual for exact dimensions.

Do not install a vent smaller in diameter than the flue outlet on the stove.

EXCELPellet must be installed according to the installation instructions (available from your dealer upon purchase of support or on our web site).

EXCELPellet is manufactured using specialized machinery which makes it possible to maintain strict tolerances between components. This precision permits the use of a factory installed silicone gasket and eliminates the need for field application of silicone.

This unique factory installed silicone rubber gasket solves two major pellet venting problems:

- The gasket seals perfectly so there is no need for sealant application in the field. This speeds up installation, simplifies clean up, facilitates painting and eliminates callbacks.
- Not only do all parts assemble easily, they can be disassembled and reassembled just as easily making routine maintenance much easier.

EXCELPellet has a smooth attractive Black painted or Galvalume steel exterior. Galvalume is corrosion resistant and requires very little preparation for painting.

EXCELPellet Typical Installations

NOTE: The following information is provided to assist you in selecting the chimney components required for your installation. It is intended to be a guideline only. These are not the installation instructions.

All measurements are in inches

Inside Diameter	3 Inch	4 Inch
Outside Diameter	3 3/4"	4 3/4"
Weight/Foot (lb/ft.)	1.3	1.6
Rough Opening Required:		
Supports (PSA, PSF)	5 3/4" x 5 3/4"	6 3/4" x 6 3/4"
Supports (PSS)	6 3/4" x 6 3/4"	6 3/4" x 6 3/4"
Wall Thimble (PWT)	6 1/2" x 6 1/2" or 6 1/2" round	7 1/2" x 7 1/2" or 7 1/2" round
Masonry Chimney Adapter (PAM)	6" to 8" dia.	6" to 8" dia.
Maximum Support capacity		
Ceiling Supports (PSA, PSF)	30 feet	25 feet
Ceiling Support (PSS)	37 feet	30 feet
Wall Support (PSW)	21 feet	17 feet

EXCELPellet Product Descriptions

Lengths

(PL5, PL5B, PLA6, PLA6B, PL16, PL16B, PLA16, PLA16B, PL1, PL1B, PL2, PL2B, PL3, PL3B, PL4, PL4B)

48", 36", 24", 16", 12", 5" & 6", 16" slip lengths, all lengths are available in Galvalume or Black exterior. Slip sections slide over standard length pellet vent.

INCHES

Length Dimensions

Clean-Out Length

(PCOL)

The removable casing allows access to the inside of the flue for easy cleaning. The Clean-Out length can be in any location as a substitute for a standard length.

INCHES

Clean-Out Length Dimensions		
	3"	4"
A	3 1/16	4 1/16
B	3 5/8	4 5/8
C	11 7/8	11 7/8
D	10 1/8	10 1/8
E	4 3/16	4 1/8
F	3 3/16	2 1/2

Tees

(PT, PTB, 3PT4, 3PT4B)

The tee cap incorporates a silicone gasket making it easy to remove for cleaning. All tees are available in Galvalume or Black exterior. Short snout places vent closer to stove. Tee cap included.

INCHES

Tee Dimensions			
	3"	4"	3" to 4"
A	3	4	3
B	3 3/4	4 3/4	4 3/4
C	8 3/4	9 3/4	8 3/4
D	4 1/8	4 5/8	4 5/8

Stove Adapter Tee

(3PAT3, 3PAT3B, 3PAT4, 3PAT4B)

Stove Adapter Tees can be installed directly to the stove without the need for a stove adapter. Tee cap included.

INCHES

Stove Adapter Tee Dimensions		
	3"	3" to 4"
A	3	3
B	3 3/4	4 3/4
C	8 3/4	8 3/4
D	3 7/8	4 3/8
E	5/8	5/8

Clean-Out Tee (PCOT)

Allows easy access to the horizontal run of a system for cleaning. Tee cap included.

INCHES

Clean Out Tee Dimensions		
	3"	4"
A	3	4
B	3 3/4	4 3/4
C	8 3/4	9 3/4
D	4 1/8	4 5/8

Tee Cap (PTC1)

PTC1

The PTC1 is a replacement tee cap held with a bolt at the bottom of the cap.

Elbows (PE45, PE45B, PE90, PE90B)

Small radius elbows make installations in tight spaces easier. 45° and 90° available, all elbows are available in Galvalume or Black exterior.

INCHES

Dimensions		
	A	B
3PE45	2 7/8	2 7/8
4PE45	3	3
3PE90	4 11/16	4 11/16
4PE90	5 1/4	5 1/4

Slip Elbow (PE90S, PE90SB)

The vertical portion of the slip elbow slides over a standard pellet length just like a slip section. This eliminates the need for a separate slip piece.

INCHES

Dimensions			
Code	A max.	A min.	B
3PE90S	10 3/4	2 7/8	3
4PE90S	11 1/4	3 3/8	3 1/2

Clean-Out Elbow (PCOE)

The removable casing allows access to the inside of the flue for easy cleaning. Typically used for "up and out" installations.

INCHES

Dimensions		
	3"	4"

3" - 4" Tapered Increaser (3PIT4, 3PIT4B)

Used for increasing the diameter from 3" to 4" at any point in the system.

Dimensions		INCHES
A	4	
B	4 3/4	
C	3	
D	3 5/8	
E	6	

Insulated Wall Thimble (PWT)

(PWT)

Telescopes to accommodate wall thicknesses from 5" to 10". It is fully insulated to maintain insulation integrity and fits tightly to prevent heat loss. The 3" requires a 6 1/2" X 6 1/2" framed opening; the 4" requires a 7 1/2" X 7 1/2" framed opening. A template for EXCELPellet wall thimbles can be purchased to simplify installation (PTMP).

Dimensions			INCHES

D	min. 5 - max. 10		
E	1 1/2	1 1/2	

Wall Thimble with Integrated Outside Air (PWTOI)

(PWTOI)

Insulated

Simplifies a fresh air connection by integrating it into the same conduit as the wall thimble. This component is fully insulated through the wall and on the inside wall to prevent cold air or condensation in the home. Includes 10' of aluminum flex and 3' flex insulation.

Dimensions			INCHES
	3"	4"	
A	3 7/8	4 7/8	
B	2 7/8	2 7/8	
C	15	16

F	6 5/8	7 5/8	
G	1 1/2	1 1/2	

Wall Thimble with Outside Air Channel (PWTOC)

(PWTOC)

Insulated

Functions similarly to the PWTOI, but designed for "up and out" installations (e.g. basement). The outside air channel is adjustable for height and can be painted any color to match the décor. Includes 10' of aluminum flex and 3' flex insulation.

Dimensions			INCHES

F	6 5/8	7 5/8	
G	1 1/2	1 1/2	

Wall Thimble Extension (PWTE)

(PWTE)

UL Listed Wall Thimble insulated extensions. They install easily and will allow wall thimbles to fit walls up to 20 3/4" thick.

Dimensions			INCHES
	3"	4"	
A	4 1/8	5 1/4	
B	6 1/4	7 1/4	
C	5 3/4 to 15		

Ceiling Support/Radiation Shield (PSA)

Rated to support up to 30' (3") or 25' (4") of venting where it passes through a floor or ceiling. It telescopes from 12" to 23" to keep insulation and debris away from the vent.

Dimensions		INCHES
	3"	4"
A	3 7/8	4 7/8
B	9 1/4	9 1/4
C	5 3/4	6 3/4
D	min. 12 - max. 23	

Square Support/Radiation Shield (PSS)

Rated to support up to 37' (3") or 30' (4") of venting where it passes through an insulated or un-insulated ceiling. It is particularly suitable for cathedral and drop ceilings.

Dimensions		INCHES
	3"	4"
A	3 7/8	4 7/8
B	10 3/4	10 3/4
C	6 5/8	6 5/8
D	16	16

Adjustable Wall Support (PSW)

Rated to support up to 21' (3") or 17' (4") of venting. Fits 3" and 4" diameters. It adjusts easily to provide from 1" to 5" of clearance to the wall.

Dimensions		INCHES
	3"	4"
A	3 3/4	4 3/4
B	7 1/2	7 1/2
C	4 1/4	4 1/4
D	2 3/4	2 3/4

Masonry Adapter (PAM)

Provides a tight, positive transition to a masonry chimney. Fits existing masonry thimbles up to 8" in diameter.

Dimensions		INCHES
	3"	4"
A	3 15/16	4 15/16
B	9 1/2	9 1/2
C	5 7/8	5 7/8
D	3 3/4	3 3/4

Type A Chimney Adapter (PAA5, PAA6, PAA7, PAA8)

Provides a positive seal connection between EXCELPellet and class A chimneys. Connects 3" or 4" pellet vent to class A.

Dimensions		INCHES
	3"	4"
A	3 3/4	4 3/4
B	5, 6, 7 or 8	6, 7 or 8
C	2	2
D	2 1/4	2 1/4

Type A Chimney Reline Adapter

(PAX6, PAX7, PAX8)

Permits re-lining of an existing pre-fab chimney with EXCELPellet or an approved flexible liner. Available to fit 6", 7" or 8" chimneys with 3" or 4" venting. Use the universal Chimney Adapter Cap (PCA) at the top.

		Dimensions	
		3"	4"
A		3 7/8	4 7/8
B		6, 7 or 8

INCHES

Flex Adapter Tee

(3PATF4, 4PATF4)

For pellet stove installations that are vented into a masonry chimney. The snout accepts EXCELPellet and connects EXCELPellet to a 4" flexible liner. The Flex Adapter tee has a removable twist mouth that is available in 3" or 4". Use in combination with the Masonry Adapter (PAM). Tee cap included.

		Dimensions	
		3"	4"

Tapered Stove Adapter (3PI4, 3PI4B)

Universal Stove adapter that increases diameter from 3" to 4".

Dimensions		INCHES
A	4	
B	4 3/4	
C	3	
D	3 5/8	
E	6	

Quick Disconnect Stove Adapter (PAQ)

Makes cleaning and servicing pellet stoves dramatically easier. This stove adapter comes apart at the center by undoing two thumb screws. With the PAQ installed, there is no need to take lengths apart for cleaning.

Dimensions			INCHES
	3"	4"	
A	3	4	
B	5 3/8	5 3/8	
C	3 5/8	3 5/8	
D	4 3/4	5 3/4	

Harman Stove Adapter

(PASH, PASH6)

Bolts directly to Harman stoves and does not require silicone. Available in two lengths to accommodate stoves with extended hoppers. Includes a Harman Style Gasket (HG).

Dimensions			INCHES
	PASH	PASH6	
A	3	3	
B	2 7/8	6 3/8	
C	1 1/8	4 5/8	

Harman Style Gaskets (HG)

(HG)

Replacement gaskets for the Harman Stove Adapter, comes in packs of 5.

Adjustable Jet Cap

(PCJ)

Can be rotated to direct hot flue gasses away from bushes or other things in proximity to the exhaust. Includes a spark screen.

Dimensions		
	3"	4"
A	9 3/8	9 3/4
B	5 1/2	5 7/8
C	3 3/4	4 3/4

Horizontal Cap

(PCH)

Directs and accelerates flue gasses away from the house reducing the possibility of "moustache effect" from smoke accumulation. Includes a spark screen.

Dimensions		
	3"	4"
A	5	6
B	6 1/4	8
C	3	4

Spark Screen

(PCS)

A stainless steel spark screen that fits any standard length or elbow to be used as a termination. Also fits Economy Cap (PCE).

Dimensions		
	3"	4"
A	3 3/4	4 3/4
B	1 7/8	1 7/8

Vertical Rain Cap (PCR)

Rain/Wind Shield (PRCW)

Constructed entirely of stainless steel and designed to provide good protection from wind and rain. An optional Wind/Rain Shield (PRCW) is available for added protection in harsh weather.

Dimensions		
	3"	4"
A	3	4
B	8	9
C	3 7/8	3 7/8
D	11	11
E	3 7/8	3 7/8

Vertical Cap Spark Screen

(PRCS)

An optional stainless steel spark screen is available for installations where sparks can pose a safety problem

Traditional Masonry Adapter Cap (PCT)

Certified for pellet appliances in a masonry chimney. Requires a flashing (CTF, or CTFC). The optional Wind / Rain Shield (CTS) can improve performance in extreme wind conditions. Cap can be reduced to 3 1/2" high to fit under slate or stone topped chimneys.

Dimensions		INCHES
A	6 1/2	
B	2 3/4	
C	3 3/4	
D	16 1/2	
E	12	

Universal Flashing for Traditional Cap (CTF)

Made of galvalume, this flat flashing base is easy to cut, bend, or simply silicone to the top of a masonry chimney.

Dimensions		INCHES
A	11 3/4	
B	7 1/4	
C	20	

Clay Tile Flashing for Traditional Cap (CTFC)

Made of galvalume and designed to fit onto a clay tile flue. Optional Hose Clamp Bracket (HC) can be used or it can be secured in the method of your choice.

Dimensions		INCHES
A	11 3/4	
B	7 1/4	
C	13 3/4	
D	1 1/2	

Hose Clamp Bracket (HC)

Heavy duty hose clamp and two mounting brackets for the Clay Tile Flashings (MFC and CTFC).

Flashings (PF, PFA, PFB)

EXCELDirect

DIRECT VENT FOR GAS & PROPANE APPLIANCES

EXCELDirect® Technical Information

Certification

EXCELDirect® is certified by INTERTEK and UL.

Applications*

EXCELDirect® is a certified venting system designed to be used only with certified direct vent gas fired appliances.

Clearance to Combustible Materials

As determined by the gas appliance specifications in its instruction manual.

Construction

Flue: .016" Stainless Steel

Casing: .019" Galvalume Steel or .022" Satin Coated (painted black)

Paint: Forrest "Stove Bright" flat black.

Seam: Interior and exterior seams are laser welded.

Sizes

4" interior X 6 5/8" exterior

5" interior X 8" exterior

* charts refer to inner diameter.

EXCELDirect® Design Considerations

Prior to starting your installation, we suggest you take the following into consideration:

- There are two possible ways to connect a direct vent venting system to a gas appliance:
 - The horizontal installation (through the wall);
 - The vertical installation (through the roof). Check the appliance manufacturer's installation instructions to see all possible vent configurations.
- Review all your options for the appliance location and also venting configuration. Try to minimize the alteration and reframing of structural components of the building (wall studs, water pipes, electrical wiring, ceiling joists, roof rafters, etc.). It may be easier to change the location of your appliance than to modify the building structure.
- Carefully read the appliance and the venting system instruction manuals. Good planning will save you time, work and money.
- Use only authorized EXCELDirect® listed components unless compatibility with another brand is specified in the appliance manufacturer's instructions. Do not use damaged parts.
- For a horizontal installation, you will have to take into consideration the distance between the gas appliance adapter to the wall, as well as the wall thickness and a vertical rise (if applicable). The horizontal vent termination on the exterior must be located in accordance with the Installation Codes and Regulations.
- For a vertical installation, you must consider the distance between the gas appliance outlet and the ceiling, the ceiling thickness, the height of the attic or second floor and allow sufficient vent height above roof line.
- For two-story applications, firestops are required at each floor. If an offset is needed in the attic, additional lengths and elbows will be required.
- Contact your local building authority and/or fire officials for permits, restrictions and installation inspections. You may also wish to contact your house insurance representative.

* For a list of manufacturer-specific appliance adapters, reference page 80.

EXCELDirect® Typical Installations

NOTE: The following information is provided to assist you in selecting the chimney components required for your installation. It is intended to be a guideline only. These are not the installation instructions.

EXCELDirect® Product Descriptions

Horizontal Termination Kit

(4HTK)

This classic up and out kit includes a Horizontal Termination (HT), Insulated Wall Thimble (WT), Trim Plate (TP), Black 90° Elbow (DE90B), Black 9" Length (DL9B) and Black 2' Length (DL2B).

Lengths

(DL6, DL6B, DL9, DL9B, DL1, DL1B, DL2, DL2B, DL3, DL3B, DL4, DL4B)

EXCELDirect® lengths are available in 48", 36", 24", 12", 9" & 6". All lengths have a stainless steel interior and either a Galvalume or "Stove Bright" flat black exterior. **All EXCELDirect® lengths fit directly onto DuraVent® flue collars without the need for an adapter.**

Slip Lengths

(DLS1, DLS1B, DLS2, DLS2B)

Slip lengths enable an installer to adjust the system to the exact overall length required for any installation. Slip lengths must be installed above a straight length that is not adjustable and will not adjust into an elbow.

Dimensions		
Code	A	B
DL6	5 5/8	4 1/4
DL9	8 5/8	7 1/4
DL1	11 5/8	10 1/4
DL2	23 5/8	22 1/4
DL3	35 5/8	34 1/4
DL4	47 5/8	46 1/4

Slip Lengths	
DLS1	Adds 1 7/8" - 9"
DLS2	Adds 1 7/8" - 21"

INCHES

Telescopic Length

(DLA30, DLA30B)

The Telescopic Length includes two pipe sections that must be used together. The joint between the pipe sections is cleaner looking than using a slip length. Telescoping from 16 1/2" to 29" in length makes it ideal for up and out installations.

Telescopic Length	
DLA30	Adjustable from 16 1/2" to 29"

INCHES

Elbows 30°, 45° & 90°

(DE30, DE30B, DE45, DE45B, DE90, DE90B)

EXCELDirect® elbows are available in 45° and 90° and also in Black or Galvalume. The stainless steel inner casings are seam welded to ensure there is no leakage.

INCHES

Dimensions		
Code	A	B
4DE90	6 3/4	7
4DE45	3 5/8	4 3/8
4DE30	3 1/4	3 15/16
5DE90	7 5/8	7 7/8
5DE45	4	4 5/8
5DE30	3 1/4	3 15/16

Slip Elbow

(DE90S, DE90SB)

The vertical section of the slip elbow slides over a standard length just like a slip section of pipe. This eliminates the need for a separate slip piece. The installation can be completed faster and with fewer joints.

INCHES

Dimensions			
	A max.	A min.	B
4DE90S	11 1/2	4 3/4	6 7/8
5DE90S	11 1/2	5	7 3/4

Ceiling Support / Firestop

(CS)

The Ceiling Support/Firestop is the most common support. It can be used on any floor level. It is the perfect choice when a structure hides the venting system. Simply screw the support to the framed joist with four #8 x 1 1/2" wood screws or use four spiral nails, 2" long. The Ceiling Support/Firestop acts as a firestop and a support when installed from below. It can also be installed above the joists; however an additional firestop is required from below in this case.

INCHES

Dimensions		
	4CS	5CS
A	6 3/4	8 1/8
B	8 3/4	10
C	10 3/4	12

Round and Square Support / Radiation Shield (RDS, SS)

EXCELDirect® supports are suitable for use on flat or sloping ceilings. The amount they project into the room is determined only by the desired visual effect, but must be more than 1/4 inch. These supports are designed to act as a combination of support and attic radiation shield. To use either support as an attic radiation shield, simply close the open area at the top of the support (in the attic) with a storm collar. The Round & Square Supports can hold up to 50' of 4"x 6 5/8" venting or 40' of 5"x 8".

INCHES

Square Support Dimensions		
	4SS	5SS
A	6 3/4	8 1/8
B	9 3/4	10 3/4
C	24	24

B	9 3/4	10 3/4
C	15 3/4	15 3/4

Storm collar (ESC) ordered separately.

Insulated Wall Thimble (WT)

(WT)

Telescopes to accommodate wall thickness from 4" to 10 1/2". It is fully insulated and fits tightly to prevent heat loss. The 4" X 6 5/8" venting requires an 8 3/4" x 8 3/4" framed opening; the 5" X 8" venting requires a 10" x 10" framed opening.

INCHES

Dimensions		
	4WT	5WT
A	7	8 3/8
B	8 5/8	9 7/8
C	12	13
D	4 to 10 1/2	4 to 10 1/2

Trim Ring, Trim Plate (TR, TP)

(TR, TP)

These are typically used as decorative covers when installing a wall thimble in a gas stove application. On vertical installations they can serve as firestops when installed from below. They can also serve as a firestop on horizontal installations that don't require a wall thimble (i.e. a fully non-combustible wall). The Trim Ring (TR) is larger and round and the Trim Plate (TP) is smaller and square. Available in black only.

All EXCELDirect trims include a rubberized O-ring to seal the gap between the trim and vent.

INCHES

Dimensions				
	4TP	4TR	5TP	5TR

B	12 1/4	19	13	20

Wall Thimble Extension (WTE)

(WTE)

UL listed Wall Thimble insulated extensions. They install easily and will allow our standard wall thimble (WT) to fit walls up to 20 3/4" thick.

INCHES

Dimensions		
	4WTE	5WTE
A	6 7/8	8 1/4
B	8 1/2	9 3/4
C	5 3/4 to 15	

Attic Radiation Shield / Firestop

(AS)

The Attic Radiation Shield / Firestop protects combustible framing in the floor or ceiling adjacent to the chimney, and also acts as a firestop spacer. When EXCELDirect® passes through the Attic Radiation Shield into an insulated space, a storm collar (SC) must also be installed to prevent the entry of insulation. This option CANNOT be used as a support and is typically used when the venting system will be enclosed.

INCHES

Dimensions		
	4AS	5AS
A	6 7/8	8 1/4

Reducer 5" – 4"

(R54)

Only certain appliances are approved to use a reducer. Check the appliance manual. This component permits the transition from 5" x 8" to 4" x 6 5/8".

INCHES

Dimensions				
Code	A	B	C	D
R54	8"	6 5/8"	5 1/2"	4"

Reducer 8" – 5"

(R85)

Only certain appliances are approved to use a reducer. Check the appliance manual. This component is for large direct vent gas fireplaces. It permits the transition from 8"x11" venting to 5"x 8" EXCELDirect.

INCHES

Dimensions				
Code	A	B	C	D
R54	11.162"	7.859"	10.973"	9.478"

Adjustable Wall Support

(WS)

Rated to support up to 13' (4" x 6 5/8") or 10' (5" x 8") of venting. The universal support collar is adjustable for either the 6 5/8" or 8" outside vent casing. It adjusts easily to provide from 1" to 5" of clearance to the wall.

INCHES

Dimensions	
WS (universal)	
A	6 1/2 or 7 7/8
B	7 1/2
C	2
D	4 1/4

Offset Support

(OS)

The offset support is primarily used to re-support the chimney above an offset. However it can also be used to provide additional support when the chimney height exceeds the capacity of the primary support, or to support horizontal runs. The offset support straps are 24 inches long and the collar is adjustable to fit the 6 5/8" or 8" outside vent casing.

INCHES

Dimensions	
OS (universal)

C	2	6 7/16	

Restrictor Disk

(4RD)

Used only in accordance with specific manufacturer's installation instructions to reduce the flow of combustion air.

EXCELDirect Parts for Masonry Installations

Aluminum Flex Kits

(ALK, ALT)

EXCELDirect® Aluminum Flex Kits combine certified, high performance caps with quality, UL/ULC listed two ply aluminum flex. Certified with the most popular brands of direct vent stoves and fireplaces, our Galvalume flashing is durable, easy to bend, cut and secure with silicone. Kits include a cap with co-linear connectors, a flashing, hose clamps, and two 35' coils of aluminum flex.

ALK Aluminum Flex Kit						
CODE	EXHAUST	AIR INTAKE	Insert Vertical Terminal (IVT)	Universal Flashing (MFR)	Aluminum Flex Roll (AL)	Hose Clamp
ALK33	3"	3"			 2 x 35'	 x4
ALK43	4"	3"				
ALT Aluminum Flex Kit						
CODE	EXHAUST	AIR INTAKE	Traditional Co-linear (CT3 or CT4)	Universal Flashing (CTF)	Aluminum Flex Roll (AL)	Hose Clamp
ALT33	3"	3"			 2 x 35'	 x4
ALT43	4"	3"				

Horizontal Co-Linear Flex Kit

(ALH)

Designed for installations that penetrate the exterior wall of a masonry chimney and terminate horizontally. Certified with certain appliances only. Check the appliance manual.

ALH Aluminum Flex Kit (ALH)						
CODE	EXHAUST	AIR INTAKE	Co-linear Horizontal Termination	Aluminum Flex Roll (AL)	Hose Clamp	
ALH	3"	3"	 	 2 x 5'	 x4	

Masonry Chimney Conversion Kit

(ALC4)

Uses the masonry chimney to provide fresh air to a short length (5') of flex connected to the appliance and exhausts flue gases with a 35' coil of UL/ULC listed two ply aluminum flex. Kit includes a Traditional Masonry Adapter Cap (4PCT) with a 4" connector, a flashing, hose clamps, one 4" diameter coil of aluminum flex (35'), and one short length 3" diameter flex (5').

*Not certified for use in Canada.

Masonry Chimney Conversion Kit (ALC4)						
CODE	EXHAUST	AIR INTAKE	Traditional Masonry Adapter Cap (4PCT)	Universal Flashing (CTF)	Aluminum Flex Roll (AL)	Hose Clamp
ALC4	4"	3"			 3" x 5' + 4" x 35'	 x3

Prefab Chimney Co-linear Flex Kit

(ALP33)

Designed for relining prefab chimneys with co-linear aluminum flex. Fits prefab chimneys up to 11 1/2" OD.

Prefab Chimney Co-linear Flex Kit (ALP33)						
CODE	EXHAUST	AIR INTAKE	Insert Vertical Termination (IVT)	Prefab Chimney Top Adapter (IVTP)	Aluminum Flex Roll (AL)	Hose Clamp
ALP33	3"	3"			 2 x 35'	 x4

Aluminum Flex Roll

(AL)

Our UL/ULC certified flex has gone through rigorous puncture and torsion testing to ensure continuous quality of every length. Rolls are available in 3" or 4" diameters.

- ØAL35: 35' roll
- ØAL50: 50' roll

Insert Vertical Termination

(IVT)

Used when installing a direct vent system in a masonry chimney using two aluminum flex liners. The IVT has a 3" air inlet and a 4" exhaust. An adapter for 3" exhaust is included. Requires a flashing (MF, MFR, MFC or IVTP). Certified for high wind. The optional Wind / Rain Shield (SVTS) can improve performance in extreme wind conditions. Stainless steel construction.

Dimensions		INCHES
A	8 1/8	
B	10 1/2	
C	12 1/4	

Universal Flashing for IVT

(MFR)

Made of galvalume, this flashing can be cut, bent, or secured with silicone to the top of a masonry chimney.

Clay Tile Flashing for IVT

(MFC)

Made of galvalume and designed to fit onto a clay tile flue. Optional Hose Clamp Bracket (HC) can be used or it can be secured in the method of your choice.

Masonry Flashing for IVT

(MF)

Made of stainless steel for added rigidity and corrosion resistance.

Prefab Chimney Top Adapter

(IVTP)

For co-linear direct vent installations in a prefab chimney. Will fit any round prefab chimney up to 11 1/2" OD. Use with the IVT termination only.

Traditional Co-Linear Chimney Cap

(CT3, CT4)

This stainless steel cap is designed for a direct vent insert installation in a masonry chimney that uses two flex liners. Requires a flashing (CTF, or CTFC). Certified for high wind. The optional Wind / Rain Shield (CTS) can improve performance in extreme wind conditions.

INCHES		
Dimensions		
	CT3	CT4
A	6 1/2	6 1/2
B	2	2
C	2 7/8	2 7/8
D	2 7/8	3 3/4
E	16 1/2	16 1/2
F	12	12

Universal Flashing for Traditional Cap

(CTF)

Made of galvalume, this flat flashing base is easy to cut, bend, or simply silicone to the top of a masonry chimney.

INCHES		
Dimensions		
A	11 3/4	
B	7 1/4	
C	20	

Clay Tile Flashing for Traditional Cap

(CTFC)

Made of galvalume and designed to fit onto a clay tile flue. Optional Hose Clamp Bracket (HC) can be used or it can be secured in the method of your choice.

INCHES		
Dimensions		
A	11 3/4	
B	7 1/4	
C	13 3/4	
D	1 1/2	

Hose Clamp Bracket

(HC)

Heavy duty hose clamp and two mounting brackets for Clay Tile Flashings (MFC and CTFC).

Flex Liner Connector

(CFAA3, CFAA4)

Used to connect two pieces of flex together securely and without tearing. Available for 3" or 4" flex.

NEW**Coaxial Flex Adapter**

(4CFA, 5CFA)

Permits approved appliances to use coaxial aluminum flex rather than rigid EXCELDirect. The ØCFA includes an appliance adapter, a termination adapter, and clamps. Coaxial flex is not included.

Co-Axial to Co-Linear Appliance Adapter

(CAA)

Use with direct vent gas appliances that require 4" x 6 5/8" venting. This part adapts a co-axial flue outlet to a flexible co-linear system to be used in an existing masonry chimney. **Flexible liners are ordered separately.**

INCHES

Dimensions	
Ø	4"
A	6 5/8
B	10 1/2
C	7 1/2
D	2
E	2 7/8

Co-Linear Termination Adapter

(CTA and CTA4)

The Co-Linear Termination Adapter is for direct vent systems that are installed in existing masonry chimneys and use two co-linear liners. It is made out of stainless steel and is available with either 3" or 4" exhaust.

INCHES

Dimensions		
	CTA	CTA4
A	10 3/8	10 3/8
B	18	18
C	2 7/8	2 7/8
D	2 7/8	3 3/4
E	6 1/2	7 1/2

Co-Linear Masonry Adapter

(TM-4MAC33)

The Co-linear Masonry Adapter is designed for freestanding gas stove installations that will use a masonry chimney. Designed to fit 4x7 EXCELDirect, the built-in trim of the MAC is painted with Stove Bright Flat Black paint. Depending on the size of the existing thimble, some small masonry removal may be required, but the MAC has been built to the absolute minimum dimensions possible.

INCHES

Dimensions	
A	6 5/8
B	9 5/8
C	5 7/8
D	12 7/8
E	9 3/4
F	3

Type A Chimney Adapter

(CA6, CA7, CA8)

Provides a positive sealed connection between EXCELDirect® and class A chimneys. The Chimney Adapter includes a universal connector to tie into the existing chimney and an adapter to connect to an EXCELDirect® Vertical Cap (SVT). **4" flex and SVT termination sold separately.**

INCHES

Dimensions			
	4CA6	4CA7	4CA8
Ø	4"	4"	4"
A	6	7	8
B	4	4	4
C	8 1/8	9 1/8	10 1/8

USA only, not available in Canada

Masonry Adapter

(MA)

Easily connect a masonry chimney of any size to a freestanding gas stove with the Masonry Adapter. It is to be installed in combination with the MTA (Masonry Termination Adapter). **4" flex and SVT termination are sold separately.**

INCHES

Dimensions	
Ø	4"
A	6 5/8
B	9 1/2
C	5 7/8
D	3 3/4

USA only, not available in Canada

Masonry Termination Adapter

(MTA)

Adapts a 4" flexible liner to a direct vent system, typically used with the MA (Masonry Adapter). **4" flex and SVT termination sold separately.**

INCHES

Dimensions	
	MTA
A	6 5/8
B	18
C	4

USA only, not available in Canada

Traditional Masonry Adapter Cap

(PCT)

This stainless steel cap is designed for direct vent installations in a masonry chimney that uses a single 4" aluminum flex liner for exhaust and the masonry chimney for fresh air. Requires a flashing (CTF, or CTFC). Certified for high wind. The optional Wind / Rain Shield (CTS) can improve performance in extreme wind conditions.

Open Fireplace Chimney Design Considerations

Chimney Sizing and Flue Height

The following information is provided to assist you in determining the correct chimney size and overall height required to provide trouble free operation. It is intended as a guideline only. There are many other factors, which determine the effective draft of a specific installation.

Sizing Fireplace Chimneys

The chimney-sizing chart on this page determines the correct chimney size for an open fireplace. For factory-built fireplaces and woodburning stoves, use the size specified by the appliance manufacturer. In most cases, this is the diameter of the flue collar.

If you need help with a more complicated shape such as a multisided fireplace or an open fire pit please feel free to contact us by phone, fax or e-mail. Our engineering department will be pleased to assist you with sizing, material specifications, and any other technical information you require.

Example: A fireplace with a 24 inch wide by 18 inch high opening requires a 8 inch diameter chimney for 15' of chimney height.

Chimney Height Design Considerations

Recommended Flue Height

Once the correct chimney size has been determined, there are two factors which can be compensated for when calculating the optimum height of the system-elevation and chimney layout. The higher the elevation, the greater the chimney height required to provide the same draft as an installation at sea level. The more complex the chimney layout is (the more tees, elbows, etc. in the system), the greater the chimney height required to provide the same draft as a straight up system.

The minimum overall height of any chimney system is 12 feet for a vertical chimney with no offsets at sea level.

You must increase the vertical height of the system to compensate for horizontal runs, tees, and elbows. To compensate for:

- One Tee** Add 3 feet. to the minimum height.
- One 45° Elbow** Add 1 feet. to the minimum height.
- One 90° Elbow** Add 2 feet. to the minimum height.
- Each foot of horizontal run** Add 2 feet. to the minimum height.
- Each 1000 feet. above sea level** Add 4% to the minimum height.

Example 1: House Built at Sea Level

A wood burning stove is installed on the main floor of a single story house at sea level. The chimney is installed with a 90° elbow through the wall into a tee, then straight up through the roof. To determine the minimum overall height add:

The minimum overall height =	12 feet
1 1/2 feet of horizontal run =	3 feet
One "Tee" =	3 feet
One 90° Elbow =	<u>2 feet</u>
Additional Height =	8 feet

The minimum overall chimney height required is 12 ft. + 8 ft. = 20 ft.

Example 2: Identical House Built at 8,000 feet

To determine the minimum overall height, add 32% (4% per 1000 feet) to the height calculated in the above example:

$$20 \text{ feet} + 32\% = 26.4 \text{ feet}$$

If the house were built at an altitude of 5000 feet, the overall height would be:

$$20 \text{ feet} + 20\% (4\% \text{ per } 1000 \text{ feet.}) = 24 \text{ feet}$$

Minimum Recommended Flue Height from the flue connection on the appliance (feet)										
Elevation Above Sea Level (feet)	Number of elbows								1	2
	0	2 X 15°	2 X 30°	2 X 45°	4 X 15°	4 X 30°	4 X 45°			
0-1000	12	13	15	16	14	18	20	18	20	
1000-2000	12 1/2	13 1/2	15 1/2	16 1/2	14 1/2	19	20 1/2	19	21	
2000-3000	13	14	16	17	15	19 1/2	21 1/2	19 1/2	21 1/2	
3000-4000	13 1/2	14 1/2	17	18	15 1/2	20	22 1/2	20	22 1/2	
4000-5000	14	15	17 1/2	18 1/2	16	21	23	21	23	
5000-6000	14 1/2	15 1/2	18	19	17	21 1/2	24	21 1/2	24	
6000-7000	15	16	18 1/2	20	17 1/2	22 1/2	25	22 1/2	25	
7000-8000	15 1/2	16 1/2	19	20 1/2	18	23	25 1/2	23	25 1/2	
8000-9000	16	17	20	21	18 1/2	24	26 1/2	24	26 1/2	
9000-10000	16 1/2	17 1/2	20 1/2	22	19	24 1/2	27	24 1/2	27	

No more than two offsets (four elbows) allowed

1. This column shows the height required for a rear vented stove run 18" horizontally into a tee
2. This column shows the height required for a top vented stove with a 90° degree elbow and an 18" horizontal run into a tee

The table above can be used to determine the minimum height required for many common installations

RSF Woodburning Fireplaces, a division of ICC, is one of North America's largest manufacturers of clean burning, high efficiency fireplaces. RSF has been designing leading edge woodburning products for over twenty years and manufactures the broadest range of environmentally friendly fireplaces on the market today.

CLEAN DOESN'T MEAN COMPROMISE

Renaissance Fireplaces is a line of high end award winning fireplaces which offer an unmatched view of the fire and very low emissions.

VIP | VIC | IS

ICC Chimney engineers a wide range of commercial/industrial chimney systems. We make insulated pressure stacks for applications ranging from forced draft boilers and industrial ovens to diesel engine exhaust systems. ICC can provide complete engineering and design services from preliminary chimney sizing and material specifications to detailed 3D AutoCAD assembly drawings.
