## ECO-FLO POWDER & LIQUID SYSTEM TREATMENT

A highly concentrated blend of multiple bacterial spores, designed to biologically digest and deodorize organic wastes in all drain lines, food handling and municipal facilities, animal waste pits, lagoons and storage tanks, septic and holding tanks, leach beds, grease traps and fat separators, aquaculture confinements, portable and pit toilets, boats and RV's, ornamental ponds and fountains.

### ADVANTAGES

Thrift Marketing's scientifically researched formula digests organic wastes naturally and effectively. Unique bacterial cultures are selected for optimum enzyme production, assuring efficient breakdown of proteins, carbohydrates, oils, grease, fats and other common organic matter.

A proprietary micronutrient carrier provides accelerated germination and growth, reduces odor, **\*Biochemical Oxygen Demand**, Chemical Oxygen Demand, suspended solids, turbidity, and ammonia concentrations.

Thrift Marketing's unique, non-engineered cultures rapidly digest odor causing organic wastes. Odors are not just covered up; they are eliminated at the source!

Bacteria are stabilized and shipped in spore form, ensuring long-term stability and extended shelf life. Regular use will keep your system(s) functioning properly for longer periods of time.
