KONG®

OPTIMIZED DESIGN

Every material has unique characteristics that are considered when we design our glove fit. We choose the best materials for the task at hand, then design the fit specs around the materials to ensure comfort and durability.

ENGINEERED FIT

Different situations have different fit requirements. We design our gloves with our industry leading flawless fit system that defines up to 16 application driven measurements to provide best in class fit.

TIGHT TOLERANCES

Our factories are held to the highest standards of quality control to ensure that every glove meets our superior level of quality. This guarantees that the first glove off the line fits exactly the same as the last one.

INFUSED TOUCHSCREEN DOESN'T WEAR OUT

As the leader in performance work glove technology, Ironclad engineers and manufactures its gloves with cutting-edge materials. The Command Series™ Touchscreen gloves are the latest Ironclad innovation. Incorporating nanoparticle technology, our Command Series™ gloves are infused with highly conductive carbon ions. The result is a fabric composite with an electrical conductivity even greater than your own finger.

What are nanoparticles, carbon ions, and why do they make the new Command Series™ touchscreen gloves the best in class? Unlike a conductive palm coating, which conducts poorly and can easily wear off, we have developed a specialized ion-infused microfiber matrix which will last the lifetime of the glove.

The modern workplace is a changing landscape with the influx of tablets, data entry terminals and smartphones; the Command Series™ glove line meets these challenges, and then exceeds them with the Ironclad stamp of quality, durability and flawless fit.

HIGH PERFORMANCE TASK SPECIFIC

Ironclad was founded on a construction site in 1998 by Ed Jaeger. Ed noticed that while every specialist utilized dedicated, task-specific tools, no one had addressed the special connection between tool and worker. With an extensive background in motorsports, Ed came from a world where glove performance, fit and comfort were vital. It was at that moment that Ed saw his mission; to create gloves that were both protective and driven by performance, without sacrificing either. Thus was born a new glove technology that incorporated military-grade fabrics with an unrivaled fit and comfort that would raise the industry to new standards.

With 27 patents worldwide and more pending, Ironclad Performance Wear continues to grow and innovate; bringing new technologies to the everyday heroes, the unheralded men and women whom we depend on every single day. It's a brand we are proud of, and it's a brand that gets the job done.

KONG[®]

KING OF OIL & GAS[®]

In 2008 the Oil & Gas Safety Committee, represented by ExxonMobil, ConocoPhillips, Halliburton and other industry leaders, put out a call to action to the industrial safety market asking them to solve their industry's biggest problem: hand safety. Eye, head, and foot safety had been addressed, but hand injuries still represented more than 70% of all jobsite injuries. These injuries not only caused serious harm to their employees, but they also cost significant amounts of money and lost productivity. Ironclad Performance Wear and the Oil & Gas Safety Committee joined forces to solve this problem. The KONG[®] glove line is the result of that collaboration. At Ironclad we are constantly stationed on oil platforms, getting feedback from front line workers, to make sure that we solve real world problems. We began with the KONG[®] Original, and now have a complete line of over twenty patented glove models, each engineered to address the needs of oilfield workers worldwide. Today, more than 3 million hands have been protected with KONG[®] gloves.

"In 2010 Ironclad sponsored an impact study with University of Wisconsin to develop a reliable, repeatable glove impact test and a rating system"

ironclad
TACTICAL

TAC OPS HUNT EDC

Be it a weekend warrior or combat deployment, Ironclad's Tactical Series gloves are designed and built for the harshest terrains on the planet. Made from innovative materials that wick sweat and maintain ultimate grip and dexterity where you need it, Ironclad's Tactical series brings durability to an unforgiving landscape. With features like ballistic stretch nylon, silicone grip palm-patterns, flexible TPR impact protection, and permanent touchscreen fabric throughout our Command Series™ glove line, Ironclad Tactical gloves are the apex predator in any jungle. Ironclad focuses on maximum performance, comfort and durability.

Our Command Series™ Tactical gloves are TAA Compliant, which certifies that these products are manufactured to meet multiple U.S. Government and military requirements. So whether it's law enforcement, military or civilian challenges, Ironclad's Tactical Series is ready to serve.

TAA compliance certifies that a product has been manufactured either in the United States of America or in one of the countries specified in the Trade Agreement Act (TAA) and is a requirement for government and military procurement. By buying TAA compliant product, you are helping foster fair international trade practices and are purchasing goods with the same standard that is used by government procurement specialists.

COMMON GLOVE RATINGS

QUICK REFERENCE GUIDE

ABRASION RESISTANCE:
“The ability to withstand rubbing abuse from rough surfaces” Generally the best indicator of how long a glove lasts, durability. Protection against rebar, concrete block, rough surfaces, etc.

CUT RESISTANCE:
“The ability to protect the wearer from being cut by sharp objects” Protection against metal shards, knives, razor blades, etc.

TEAR RESISTANCE:
“The ability to stay intact once a puncture has occurred” protection against snags.

PUNCTURE RESISTANCE:
“The ability to resist penetration of pointy objects” Protection against nails, thorns, splinters, etc.

RATINGS

LARGER NUMBER = MORE RESISTANCE
