Fertilizer Spikes

Easy Gardener® Jobe's® Fertilizer Spikes

Organic pre-measured spikes that make for a fast, easy and mess-free fertilizing experience. Specially formulated to help build a nourishing environment that promotes beneficial microbial action where plants need it most. Unlike surface fertilizers that can wash away with rain or watering, Jobe's works underground at the plant's roots, providing heightened growing power and healthy blooms. Spikes come in a waterproof, resealable pouch. Feeds for eight weeks

Fertilizer Spikes

Easy Gardener® Jobe's® Fertilizer Spikes

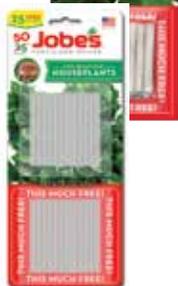

Spikes provide a continuous supply of important nutrients right at the roots, where plants need it most. The premeasured, specially formulated spikes are simply inserted into the soil around your plant. Unlike liquids or granular, Jobe's Plant Spikes eliminate mess, hazards and smells – and can't wash through when you water. Feeds for two months.

Root Feeder

Easy Gardener® Ross® Root Feeder

A deep feeding system that is specially designed to water and fertilize below the soil's surface, where most of the active tree roots grow. Simply connect a garden hose to the Root Feeder and insert the feed tube into the soil around the drip line of a tree. Water flows through a chamber filled with fertilizer, through a feed tube right to the tree's roots. Perfect for drought weather, there is no runoff and wasted water, just healthy, beautiful trees all season.

Fungicides

FoxFarm® Bush Doctor® Force Of Nature™ Fungicide

Force of Nature™ Fungicide controls Powdery Mildew on many types of crops such as melons, squash, tomatoes, tree crops, grapes, cucumbers and all sorts of flowers. Force of Nature™ Fungicide has shown the ability in replicated field and greenhouse trials to control Powdery Mildew for 7-10 days with a 1% spray solution. Force of Nature™ Fungicide is applied as a foliar spray and would be a great addition to a well-managed disease program. Force of Nature™ Fungicide is non-toxic to humans and animals. Refer to label for caution statement and complete instructions. Use caution when applying to roses and peppers.

Fertilizer - Soil Care

**Jonathan Green® MAG-I-CAL®
Soil Food for Lawns in Acidic Soils**

MAG-I-CAL® for Acidic Soil is a highly soluble form of calcium that helps to rapidly raise your soil's pH, improving the health of your lawn by releasing trapped nutrients in the soil that feed the grass plants. Low soil pH causes weeds, moss, and bare spots to grow, while soil pH ranging between 6.0 – 6.8 will re-energize your lawn, increasing microbial activity, boosting your lawn's color, reducing stress, improving soil texture and aiding in water uptake. Using MAG-I-CAL® will also significantly improve your fertilizer's effectiveness for a thicker, greener lawn with improved weed control. MAG-I-CAL® comes in an easy to spread pellet form, can be applied anytime during the growing season, and is safe throughout the yard. MAG-I-CAL® is also concentrated, meaning one bag of MAG-I-CAL® equals up to ten bags of limestone, saving your time, money, and your back!

Fertilizer - Soil Care

**Jonathan Green® MAG-I-CAL®
Soil Food for Lawns in Alkaline Soils**

MAG-I-CAL Soil Food for Alkaline Soils lowers soil pH. MAG-I-CAL's fine particles break-down quickly in the soil and is formulated for superior performance to help improve fertilizer efficiency. Your soil is considered alkaline if it reads between 7 – 14 on the pH scale. Standard fertilizer programs are not enough to get a beautiful lawn. They don't address the long-term health of the soil, particularly soil pH. Plants growing with improper soil pH levels will not thrive because certain nutrients become "tied-up" in the soil and are unavailable to the plants. Lowering soil pH may take a number of applications to reach desirable levels. A gradual reduction in soil pH is preferred because a dramatic reduction can result in plant stress. Applying MAG-I-CAL helps balance the soil pH and, at the same time, helps the lawn to grow greener and healthier.

**Jonathan Green® Love Your Soil®
Organic Soil Food**

All natural and organic, stimulates soil microbes and creates a biologically healthy soil. This soil food helps to loosen heavy, hard packed soils, and releases trapped nutrients. You can grow better turf by creating better soil! Use on existing lawns, when seeding to enhance grass root mass development, and on cool and warm season grasses. Your lawn soil will become more alive and porous allowing water, air and grass roots to enter the soil more easily. Love Your Soil also increases the grasses' resistance to drought and heat stress, and helps to kick-start your lawn in the spring. Environmentally friendly and safe to use around people and pets. It is a homogeneous formula that applies easily with any spreader. Contains humic and fulvic acids, calcium, sulfur, iron and molasses.

Insect & Disease Control

Organicide® 3-in-1 Garden Spray

ORGANOCIDE® 3-in-1 is an OMRI Listed Insecticide, Fungicide & Miticide. It kills the eggs, larvae, nymphs and adults, of over 25 small soft bodied insects & mites and certain fungal diseases such as powdery mildew. The dense oils suffocate insects by contact, so insects can't develop a resistance. Leaves a micro-film on the plant which repels egg-laying females. Will not harm beneficial insects such as bees, lady bugs or butterflies. Can be sprayed at harvest time. Use in organic gardening on vegetables, fruits, nuts, vine crops, herbs, ornamentals, greenhouse crops, turfgrass, landscape plants, bulbs, flowers and field crops. People, planet and pet friendly!

Fungicides

Plant Doctor® Systemic Fungicide

Natural

An earth-friendly broad spectrum disease control and preventative for use on turf, fruit trees, vegetables, ornamentals and flowers. Controls and prevents a myriad of plant diseases including those that cause root rot, leaf and stem blights, leaf spots and more as listed! A systemic product, it has a foliar or root application that will work its way throughout the entire plant to prevent disease and attack existing disease above and below ground. Once inside the plant, Plant Doctor® increases plant metabolism so plants grow faster, bloom more and have an increased yield while providing a nutritional boost of potassium and phosphorus, essential nutrients for plant growth.

Weed Control

Pulverize® Weed & Plant Killers

Natural

PULVERIZE weed and plant killers have been specially formulated to perform with little to no impact to people, pets, wildlife and the environment. Using effective, natural and safe ingredients to perform as well as or better than chemical alternatives, PULVERIZE products quickly kill plants down to the roots in hours, while providing long lasting solutions for the most common weed and unwanted plant issues.
