SOIL ACIDIFIER

DELIVERS FAST RESULTS

DECREASES SOIL pH
FOR PLANTS
THAT PREFER ACID SOIL

ALL NATURAL INGREDIENTS
**FOR HYDRANGEAS
AND BLUEBERRIES**

NET WT. 6.0 POUNDS (2.72 KG.)

Jobe's is proud to introduce you to Jobe's Organics Soil Acidifier, an all-natural mineral formula that provides plants with sulfur, a nutrient that can be used to correct alkaline soils.

This garden formula can also be used to:

- Turn hydrangeas from pink to blue
- Lower soil pH
- Promote dark green growth

Use Jobe's Organics. Your plants will love you for it!

KEEP OUT OF THE REACH OF CHILDREN AND PETS.

Use protective clothing, gloves and glasses to avoid irritation that may be caused by product dust. Wash hands thoroughly with soap and water after handling and before eating or smoking. Keep bag tightly closed, away from moisture and light.

DIRECTIONS - Always water well after application.

NOTE: Before application, the soil pH should be tested either with a home test kit or through a local extension office.

LOWERING pH	AMOUNT OF FERTILIZER	1 lb = Approximately 2 cups
For Blueberries and Hydrangeas	Apply in the spring. For new plants use 1 ¼ cups. For established plants use 2 ½ cups. Spread evenly around plant extending to the drip line and water well. Repeat in 2 months until desired pH and color is achieved.	
Container Applications	Add 1 tbsp. for each 4" of pot diameter.	
Broadcast Rates	Apply 6 lbs. per 50 sq. ft. for each one point reduction in soil pH desired. For heavy clay soils increase rate to 7.5 pounds. To reduce plant stress gradual reduction in soil pH is preferred.	
Garden Applications	Apply ½ cup per 100 sq. ft.	

Jobe's Organics offers a complete line of products with JOBE'S BIOZOME to organically feed the whole garden, including:

- Jobe's Organics Fast Start
